RE: YH23-0021 AHCCCS System Integrator RFQ

Dear Ms. Linville,

In order to continue with the evaluation of your proposal for the procurement listed above, AHCCCS requires clarification and confirmation of the following:

HealthTech Pricing Assumption #5

- In all our engagements within the SI domain, we have found that engagement of the SI vendor within the procurement lifecycle of the modules is important so that all modules are properly aligned to established integration and technical processes and vetted from a technical standpoint. The proposed key resources have expertise in providing this type of consulting and project support. Pricing is not included for this support within the DDI but can be provided.

Please clarify which (if any) modules HealthTech solutions will provide procurement lifecycle engagement and support during the contract period (DDI through Year 4 M&O).

HealthTech Pricing Assumption #6

- Documentation of current business processes will be critical to the ongoing success of the modularity engagements. While some enterprise documentation development is included in scope, additional requirements, and expectations of the total scope of enterprise system documentation, etc. to be developed can be discussed. There are a few different methodologies that we have utilized with other clients to meet this need and would like the opportunity to discuss this with AHCCCS.

Please clarify in detail what enterprise documentation development is included in scope of your proposal in addition to what is not included and along with the expectation around AHCCCS internal resources to carry out this work.

HealthTech Pricing Assumption #9

- Pricing for the logic app configuration for the EDMS was calculated by reviewing the volumetric data and assuming an average of three (3) pages for file. If this is not a correct assumption, adjustments may be required to the final pricing for the EDMS. HealthTech also assumed that the current volume data as provided by AHCCCS was intended to be used for base pricing for DDI and ongoing operations of the EDMS and migrated data during DDI.

Please clarify how the three page per file average was calculated and how this may affect pricing should this assumption be inaccurate. Include details if there is a price per page or some other sort of expected pricing change so that AHCCCS can accurately determine the value of if this assumption turns out to be incorrect.

HealthTech Optional Pricing Component D– Electronic Data Interchange (EDI) Platform

Please clarify if proposed pricing is limited to the DDI only or if it includes Maintenance, Operations or any other costs.

AHCCCS requests your response to be submitted electronically to me no later than **Thursday, April 13, 2023** at Procurement@azahcccs.gov with a copy to Meggan.LaPorte@azahcccs.gov. Please feel free to contact me directly with any questions. Thank you.

Sincerely,

M. LaPorte

Meggan LaPorte, AHCCCS Chief Procurement Officer
