FOREWORD

This document is a description of the ADHS/DBHS quality management system as it applies to class members in the Arnold v. Sarn case. It demonstrates the ways in which ADHS/DBHS acts to ensure high quality care for class members while complying with the requirements of the *Exit Stipulation* for the case.

The document begins with a brief introduction and background of the case and describes the relationship of Principles and Performance Outcomes, enunciated by ADHS/DBHS, to the *Exit Stipulation*. There are descriptions of the quality management system of ADHS/DBHS and of COMCARE, first globally, then relative to continuous quality improvement efforts, and ultimately specific to the class members and the quality management endeavors engaged in on their behalf. The document describes how, through the activities of the quality management system, ADHS/DBHS is able to monitor and measure their compliance with Appendix C of the *Exit Stipulation* and the enunciated Performance Outcomes and then act on the output of the monitoring and measuring to improve the system for the benefit of the class members and others.

In the context of the quality management system as it applies to the class members, the document denotes which data are used in determining compliance with the *Exit Stipulation* and the process for organizing the data to ensure meaningful interpretation. Furthermore, there are descriptions of where responsibility for managing, monitoring, and overseeing the system lies and how the overall process flows.

An in-depth look at the components and processes of the quality management system is provided in the following sections and attachments which comprise this document.

1. Relevance to Class Members (Sections I, II, V, VIII, IX, X, and Attachment H)
2. Description of Quality Management Systems (Sections III, IV, and Attachments A, B, and C)
3. Tools/Processes and Associated Data Management Activities (Sections VI, VII, VIII, and Attachments D, E, and F)
4. Prospective Examples of Four Categories of Data Reports (Attachments G and I)
 - Related to Data Collection Tools
 - Related to Performance Outcomes
 - Related to Appendix C Criteria
 - Related to Grievances and Appeals

Through the quality management system, ADHS/DBHS demonstrates its commitment to providing to the citizens of Arizona the best behavioral healthcare achievable.

SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

I. INTRODUCTION

The Arizona Department of Health Services, Division of Behavioral Health Services (ADHS/DBHS), serves as the single state authority to coordinate, plan, administer, regulate, and monitor all facets of the state behavioral health system. ADHS/DBHS continually refines its quality management system to ensure these activities empower people and help them lead meaningful, productive, and responsible lives, improving their overall quality of life, and reducing the costs to society of behavioral health problems.

This document describes the quality management system, as it applies to class members, which accomplishes these ends through the means elaborated on in the following pages.

THIS DOCUMENT AND ITS CONTENTS APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

II. HISTORICAL BACKDROP

As an outcome of the Arnold v. Sarn case, a stipulation was entered into on May 6, 1991 adopting an Implementation Plan for the development of a comprehensive community mental health system in Maricopa County to prevent unnecessary and inappropriate hospitalization. The Arizona Department of Health Services, Arizona State Hospital, and Maricopa County Board of Supervisors were the defendants in this case.

On February 12, 1996, a Stipulation on Exit Criteria and Disengagement was adopted with the approval of the Court. This *Exit Stipulation* is the exclusive method for assessing the defendants' performance, for defining the defendants' obligations, and for determining satisfaction of all remaining obligations relative to class members. For this case, a class member is defined as a person who is a resident of Maricopa County, indigent, and seriously mentally ill and who would reasonably benefit from appropriate behavioral health treatment due to his or her mental illness.

Section VIII of the *Exit Stipulation* requires that documents describing the quality management system for class members are to be submitted by ADHS/DBHS to the Court Monitor for review and approval. Section VIII also describes components of an appropriate quality management system.

To ensure compliance with the terms of the *Exit Stipulation* and also organize the requirements contained in the *Stipulation, Appendix C* of the *Stipulation*, and the Rules for persons with serious mental illness, ADHS/DBHS articulated six guiding principles with associated performance outcomes. ADHS/DBHS has initiated refinements to the existing quality management system in accordance with the letter and the spirit of the six principles and 40 associated performance outcomes. These principles and performance outcomes are listed in Section V of this document.

III. PURPOSE OF THE QUALITY MANAGEMENT SYSTEMS

Note: This document is intended to illustrate the application of portions of the ADHS/DBHS quality management system to Arnold v. Sarn class members. To this end, the following pages will describe the ways in which quality of services to class members will be measured, monitored, and continuously improved by ADHS/DBHS, consistent with ADHS/DBHS commitments. The document is not intended to describe the entire ADHS/DBHS quality management system nor how it applies to non-class members.

A. ADHS/DBHS

ADHS/DBHS uses the term "quality management" to consolidate a range of activities from Quality Assurance and Performance Improvement to Utilization Review and Risk Management. This integrated approach ensures high quality of care in the context of managed care concepts, diverse funding sources, and myriad complex forces which influence behavioral health care in Arizona. Inherent in the ADHS/DBHS approach to quality management is a firm commitment to the principles of continuous quality improvement as exemplified by mandatory compliance with minimal standards, positive feedback loops, ongoing monitoring and correction, and constant striving for performance which exceeds expectations in delivering high quality services to consumers.

ADHS/DBHS continually improves the quality management system in order to accomplish the mission, goals, and objectives of the division. ADHS/DBHS has designed the system to measure the efficiency and effectiveness of the delivery of care and to provide continuous feedback to stakeholders and internal decision makers. The performance measures incorporated in the quality management system are outcome based and are selected for their usefulness in responding to customers' changing needs and improving service delivery performance. The overall goal of the quality management system is to enhance the quality of ADHS/DBHS administered behavioral health services and increase the accessibility and adequacy of those services.

To accomplish this goal, ADHS/DBHS has adopted the following objectives:

- To assess the extent to which current services meet the needs of consumers and implement changes as needed as a result of this assessment
- To direct all quality assurance efforts toward continuous quality improvement
- To integrate quality management activities at all administrative and service levels
- To ensure clinical, program, and fiscal management are carried out in accordance with established guidelines, regulations, procedures, and standards and to provide for the protection, safety, and rights of consumers

B. COMCARE

The Quality Management/Utilization Management (QM/UM) Plan of COMCARE is designed to develop and conduct an effective and systematic quality assessment and improvement process throughout the COMCARE network of services. The Plan provides the framework for monitoring and evaluating the outcomes and processes of important aspects of service delivery both at the regional authority and provider level. COMCARE designs, implements, evaluates, improves, and reports monitoring and evaluation activities through the processes outlined in the QM/UM Plan. Results of the quality assessment and improvement processes are utilized to formulate action plans to improve care and service and to resolve identified problems. The effectiveness of such actions is periodically evaluated to assure that improvement is sustained over time.

In concurrence with COMCARE's mission, administrative and clinical staff promote quality of care, of service, and of service delivery to members. The QM/UM Plan is designed and implemented to assist in achieving the COMCARE mission and to achieve the following objectives (as well as others):

1. Develop and conduct a cost-effective and time-efficient improvement process in which all levels of the COMCARE service delivery system participate in monitoring the quality of member care, clinical services, and management systems through the use of performance indicators and outcome measures based on data-driven analysis of business and clinical practices.
2. Organize and operationalize comprehensive and coordinated company-wide quality management activities.
3. Assess the extent to which current COMCARE services, designated for monitoring and evaluation in FY 96/97, are designed to meet the needs of the member population they are to serve as well as the community at large; identify and implement changes needed as a result of this assessment.
4. Determine adequacy/relevance of current internal procedures and/or standards; identify and implement changes as needed.
5. Detect events and circumstances with unnecessary exposure to risk or harm or liability and decide whether response to these events and circumstances is timely and appropriate.
6. Reveal trends in quality improvement over time and assure maintenance of quality improvement; utilize trends to establish priorities for future monitoring and evaluation activities, inclusive of performance indicators and outcome measures.
7. Assure that resources are used most effectively for the most members.
8. Provide services that are clinically sound, timely, and well documented.
9. Systematically evaluate the effectiveness of the QM/UM Plan to implement operational linkages with Quality Management, Risk Management, Budget and

QUALITY MANAGEMENT SYSTEMS / AN OVERVIEW
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

Finance (claims), Provider Relations, Adult Services, and Child and Adolescent Services.

The overall organization of the quality management systems of both ADHS/DBHS and COMCARE are described in Attachment A. The integration of quality management into each of the organizations is reflected in their organizational charts which are included in Attachment B (ADHS/DBHS) and Attachment C (COMCARE).

Note: Only the aspects of the ADHS/DBHS and COMCARE quality management systems which are relevant to class members, as described in the Exit Stipulation, are addressed in this document. Thus, portions of the attached data collection instruments are not relevant and will not be discussed in this document.

IV. CONTINUOUS QUALITY IMPROVEMENT

A. Overall Approach to Quality Improvement

Both the ADHS/DBHS and COMCARE quality management systems rest on the foundation of general quality management processes: identifying relevant indicators, establishing thresholds, determining an appropriate sample, collecting data, aggregating data, analyzing data, comparing to thresholds, reporting results, effecting corrective actions (as needed), and following up to ensure proposed actions have been implemented and are successful in achieving correction. (These processes, as they apply to class members, are described more fully in Attachment A.) In order to maximize the impact of efforts expended in carrying out these processes, the systems also ensure there is continual tracking and trending of the output in order to identify opportunities to make systemic changes. The approach is illustrated graphically in the figure below:

FIGURE 1

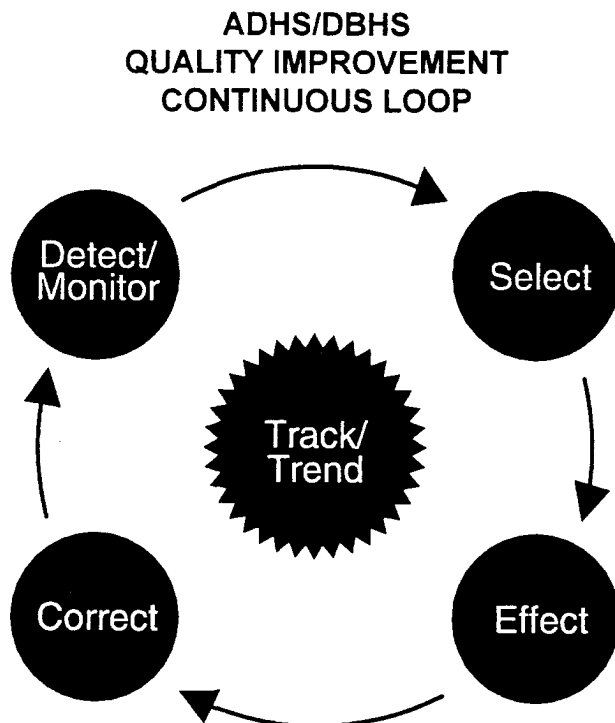

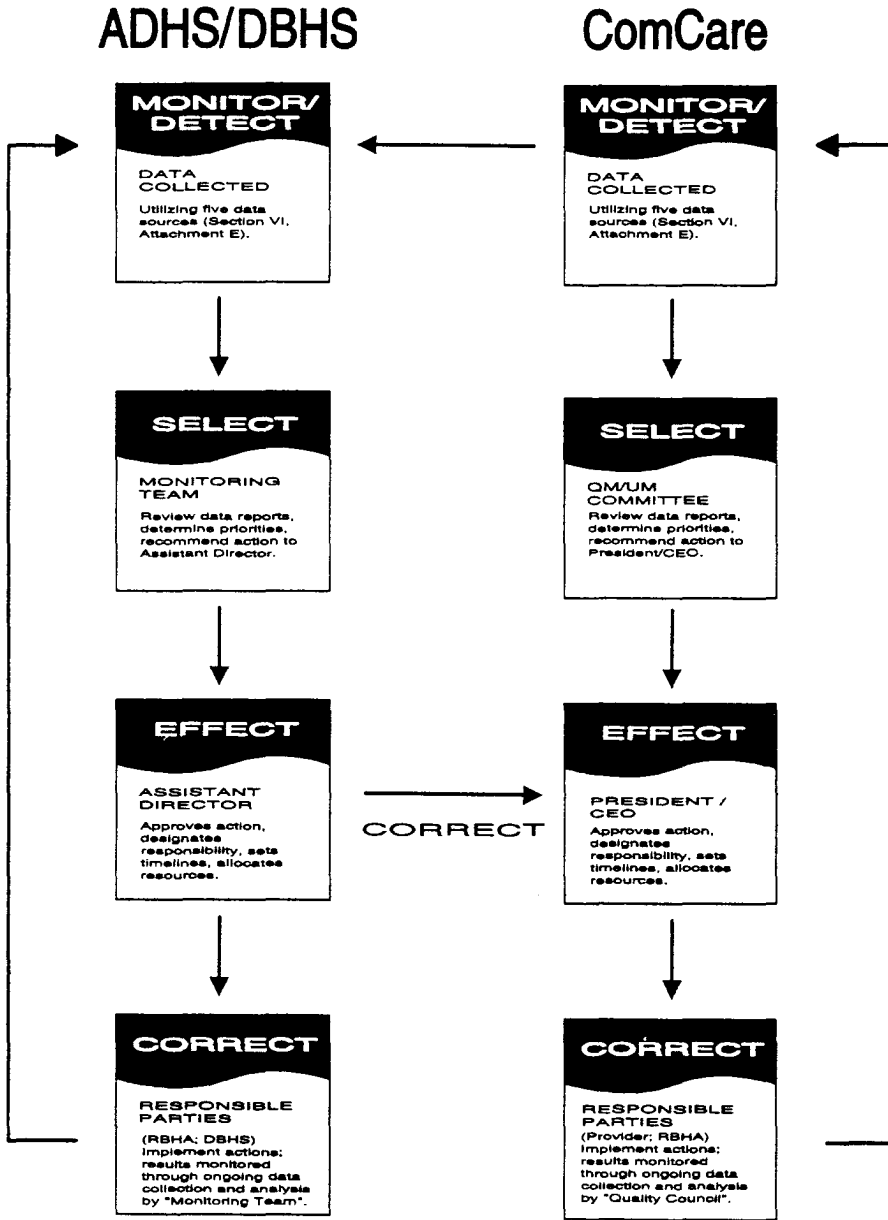

FIGURE 2

QUALITY IMPROVEMENT PROCESS

Responsibility for promoting and overseeing systemic quality improvement resides with both ADHS/DBHS and COMCARE. Using the model outlined in Figure 1 above, Figure 2 to the left indicates more specifically how the process flows, both within and between the two organizations.

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

B. Key Points of Responsibility

At each level of the systems (ADHS/DBHS and COMCARE), there are important points of accountability which hold the key to successful accomplishments in the quality improvement effort.

1. ADHS/DBHS

Office of Managed Care/Quality Assurance (OMC/QA)

This Office has the primary responsibility for all aspects of the quality management system. Working in conjunction with other program areas, OMC/QA is responsible for developing a plan that includes: the scope and timetable for monitoring activities; coordinating monitoring functions with other State agencies, such as Licensure; conducting internal coordination meetings for exchanges of information; overseeing the actual monitoring activities, including checking deliverables; and establishing a process for technical assistance and training.

Monitoring Team

The Monitoring Team is the focal point at the state department level for quality management and quality improvement. It is overseen by the Office of Managed Care/Quality Assurance. The team unifies all the state level functions in an integrated monitoring/quality improvement program. Team composition includes representation from: the Office of Administrative Support; the Office of Information Technology Services; the Offices for Persons with the Serious Mental Illness, Children's Services, Substance Abuse/General Mental Health, and Prevention, as well as Planning and Quality Management. In addition, the Office of Grievance and Appeals and the Office of the Medical Director are resources to the team.

Each RBHA has an ADHS/DBHS team designated to monitor the RBHA's quality management functions, processes, and outputs. The monitoring team meets monthly to review data reports which describe RBHA performance on quality indicators; these reports are updated monthly and trended year-to-year. The team is also responsible for regular on-site monitoring of the RBHA, focusing on issues which arise through the data review process. Recommendations for actions are made via a quarterly report to the Assistant Director. Urgent issues are brought to the attention of the Assistant Director immediately. Action recommendations are made on the basis of team review of data from reports and on-site visits. The team is responsible for identifying highest priority problems

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

and/or opportunities for quality improvement and formulating cogent recommendations to the Assistant Director and ADHS/DBHS management team as to actions, timelines, responsible parties, and potential resource commitments. Criteria utilized in prioritizing include: 1. comparison to identified thresholds (e.g., percent commitments in Appendix C of the *Stipulation*), 2. comparison to baseline data in year-to-year trending, and 3. face validation of information indicating possible danger to the health and safety of clients. A complete description of the Monitoring Plan is in Attachment D.

Assistant Director

The Assistant Director is where the buck stops. It is the responsibility of the Assistant Director, in consultation with the ADHS/DBHS management team, to approve or defer quality improvement actions/initiatives recommended by the monitoring team. The decisions of the Assistant Director and the management team are based on the merits of team recommendations in the context of other current initiatives and resources available. Approved actions/initiatives are communicated to the responsible party(s) by the Assistant Director and referred back to the monitoring team for ongoing follow-up. Actions/initiatives may include, but are not limited to:

- **System redesign** at the state level (e.g., the current redesign of the management information system to support reliable reporting of financial and quality information),
- **Technical Assistance** to the RBHA from internal state or external sources (e.g., consultation on effective design and implementation of crisis services from outside expert),
- **Training** for RBHA staff from state, RBHA, or external sources (e.g., training of case managers in ISP process),
- **Corrective Action Plan** required of RBHA and monitored by team,
- **Financial Sanctions** for failure to meet prescribed standards, and
- **Involvement in Change Process** at state, RBHA, and provider levels (e.g., annual Independent Quality Evaluation).

Structure

ADHS/DBHS has an organizational structure aimed at the functional integration of quality management into all activities of the Division. This structure fosters increased communication across all units within ADHS/DBHS and incorporates quality improvement functions into all areas. This structure illustrates and ensures that the work of all units is directly related to the quality of service delivery to all consumers and, ultimately, to their clinical outcomes. As noted

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

previously, Attachment B provides an organizational chart for ADHS/DBHS which displays this integration.

2. COMCARE

The COMCARE Board of Directors and President/CEO delegate the authority and responsibility for conducting QM/UM activities to the COMCARE Director of Quality Management who is responsible for reporting QM trends and patterns.

Leadership

The management of COMCARE is organized into three groups including the Executive Council, the Management Leadership Team (MLT), and the Extended Management Leadership Team (MLT plus Section Managers). Each of these groups has varying responsibility for reviewing and discussing plans, performance indicators, service delivery, and management data indicating trends and issues. The groups also have responsibility for sharing information with each other about issues arising in each of their individual areas of responsibility which may have an impact on other areas of responsibility.

Quality Council

The governing body and leadership of COMCARE remain accountable for all QM functions even when various and certain functions are delegated to subcontractors. A Quality Council consisting of Board members and community representatives meets quarterly to review key trends and performance measures. The Quality Council ensures that COMCARE receives additional input from external parties related to the performance of the agency.

QM/UM Committee

The QM/UM Committee is organized and structured to provide meaningful information to the decision/policy makers of COMCARE. The QM/UM Committee membership links upward and downward within the organization so that information is both coming from and going to: (1) the standing Management Teams for issues relevant to their part of the organization and (2) the ad hoc cross-functional teams assigned to specific improvement efforts.

In order to implement quality efforts across organizational boundaries, the QM/UM Committee membership includes the following members: the Deputy Medical Director, the CEO/President, the Senior Vice President, Vice President

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

of Member Services, Vice President of Support Services, the Medical Director, General Counsel, Director of Quality Management, Director of Capacity Management, the Manager of Utilization Review, the Manager of Resource Management, and the Manager of Quality Improvement. The Deputy Medical Director, or designee, serves as the Chairperson of the Committee.

The functions of the QM/UM Committee include:

1. Monitoring and evaluating services utilized in COMCARE's system of care;
2. Reviewing, approving, and tracking performance indicators and outcome measures, aggregated data, trends, patterns, and improvement actions and their effectiveness;
3. Setting policy for operations based on data-driven and informed analysis of business and clinical practices;
4. Making, approving, or reviewing recommendations for corrective actions necessary to improve service delivery on the individual, program, and system levels;
5. Assigning to Management Teams specific projects around which to direct CQI efforts;
6. Notifying providers and supervisory and management personnel of exemplary and deficient practices;
7. Evaluating the effectiveness of the COMCARE quality management system and recommending quality management plan activities and focus areas for the future;
8. Reviewing and analyzing ADHS/DBHS Quarterly Quality Management Reports;
9. Using feedback loops to improve the quality of care/service and internal processes through analysis of, and corrective actions or improvements related to, patterns/trends emerging from the review of incident/accident reports, restraint and seclusion reports, grievance and appeals reports, results of member satisfaction surveys, and reports of rights violations.

Provider Relations/Monitoring

The Provider Relations Department consists of several Program Administrators one of which is assigned to each provider in COMCARE's provider network. These individuals, in conjunction with Quality Improvement Specialists, work with subcontracted providers to assure they have the correct licenses, quality management plans, and grievance/appeals processes to address continuing quality of care issues. Concerns about quality of care which are raised through processes other than member complaints are addressed by the Program Administrators who have responsibility for knowing the programs they work with at each provider agency assigned to them.

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

QM information is used in re-credentialing, re-contracting, and annual performance appraisals of behavioral health professionals as specified in COMCARE policy and procedure and the Provider Quality Review Protocol. COMCARE QM/UM activities are coordinated with other performance monitoring activities, including Risk Management and resolution/monitoring of complaints and grievances. Additionally, QM/UM functions are linked to other management functions of COMCARE including: network changes, best practice feedback to providers, member education, member services, financial, and business systems.

Management Teams

The extended operational structure of the UM/QM Committee includes Management Teams within each Department/Division and office of COMCARE. Each of the COMCARE Management Teams has standing members as well as the capacity to draft members for time limited projects from disciplines and areas across the organization. The standing Management Teams and ad hoc cross-functional teams meet as necessary. The work of the teams is accomplished through the projects and improvement efforts each undertakes. The standing Management Teams and the ad hoc cross functional teams serve as vehicles for communication of project and improvement effort accomplishments to the QM/UM Committee. QM/UM staff are available to provide resources needed to support and guide the teams' accomplishments.

Structure

As noted previously, Attachment C provides organizational charts for COMCARE which display the integration of quality management and quality improvement efforts throughout the organization.

SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

V. QUALITY MANAGEMENT PRINCIPLES AND ASSOCIATED PERFORMANCE OUTCOMES

The focus of the ADHS/DBHS quality management system, as it applies to class members, is on the following six principles and 40 associated performance outcomes which were articulated to capture the essence of the ADHS/DBHS commitment to the individuals they serve.

PRINCIPLE # 1

People are treated with dignity and respect, and it is acknowledged that each person has rights and individual strengths which are molded by differences in culture, values, perspectives and goals.

PERFORMANCE OUTCOMES:

1. Individuals are treated with dignity and respect.
2. Individuals are made aware of their rights.
3. All service providers protect the rights of individuals.
4. Treatment staff identify and incorporate the individual's strengths, perspectives, and goals in the planning and delivery of services.
5. Service providers report all allegations of abuse and take reasonable steps to prevent abuse through staff training and procedures for staff recruitment, hiring, and supervision.
6. Restraint and seclusion are used only when an individual presents a threat of serious harm to self or others and when all other less restrictive interventions have been ineffective and only with appropriate clinical authorization and monitoring.
7. Individuals are provided sufficient information on their assessments and service plans so they are able to provide informed consent to treatment.
8. Information regarding an individual's treatment is released with the appropriate consent.
9. Individuals have access to their clinical record.

PRINCIPLE # 2

Consumers, family members, and treatment staff are valued, responsible partners in the delivery of services.

PERFORMANCE OUTCOMES:

QUALITY STANDARD #2100011 APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

1. Treatment staff ensure that individuals and/or their guardians coming for services are encouraged and assisted in participating in all decision-making related to their treatment assessments, treatment planning, and other treatment services including their medication regimen.
2. Treatment staff respect the individual's/guardian's rights to make decisions and offer explicit opportunities to choose among, and participate, in alternative treatment options and to receive, review, and approve or reject treatment services or plans which are proposed, prescribed, and/or developed with them.
3. When inpatient treatment is necessary, outpatient and inpatient treatment staff work together with the individual and/or guardian, family members, or designated representative in developing the ITDP which has been agreed to by the individual, guardian, case manager, and the treatment team.
4. ADHS and all service providers promote the optimal competence of their staff by providing appropriate orientation and inservice training programs.
5. ADHS and all service providers promote the empowerment of consumers through the provision of information and assistance for their understanding of their mental health issues and treatment services.

PRINCIPLE #3

People are able to achieve the highest level of self sufficiency possible, with assistance in the development and maintenance of a healthy life style.

PERFORMANCE OUTCOMES:

1. Individuals participate in the development, implementation, monitoring, and revision of their treatment plans.
2. The assessment process provides sufficient information for the treatment staff to develop an appropriate treatment plan with the individual and/or other responsible parties.
3. Individuals choose personal goals with respect to community living arrangements, educational/vocational, and social/recreational activities unless they are unwilling or unable.
4. Treatment planning is provided in a timely manner and meets the individual's needs as identified through the assessment and the individual's expressed preferences.
5. Services and supports are provided in accordance with needs documented in the treatment planning process.
6. Treatment plans are periodically reviewed and revised in order to respond adequately to the abilities and changing needs of the individual.
7. Treatment staff promote healthy lifestyles for individuals through education regarding management of their illness and chemical use, abuse/dependence.

PRINCIPLE #4

Services are accessible, timely, and in the least restrictive setting necessary to meet the clinical needs of the individual.

PERFORMANCE OUTCOMES:

1. Individuals receive timely, adequate, and comprehensive assessments, and services are initiated within appropriate time frames.
2. Individuals are offered services which are geographically, physically, and culturally accessible.
3. A full continuum of services is available in order that treatment may be provided in the least-restrictive and clinically-appropriate setting.
4. Individuals receive services and supports from a comprehensive network of service providers.

PRINCIPLE #5

People are encouraged and supported to challenge the system to continually improve its services.

PERFORMANCE OUTCOMES:

1. Human rights advocates are available to help consumers in asserting and protecting their rights.
2. Treatment staff proactively identify individuals who may need the assistance of human rights advocates or another designated representative in asserting and protecting their rights.
3. The Office of Oversight and Protection for the Seriously Mentally Ill and the Human Rights Committees will oversee the protection of the rights of persons with mental illness, including but not limited to, their rights to protection from abuse.
4. Consumers who have the capacity to make decisions about daily living, money management, and medical and mental health treatment are not restricted in their ability to make these decisions.
5. Consumers who lack the capacity or who need assistance in making personal decisions related to daily living, money management, and/or medical or mental health treatment are provided appropriate assistance through the appointment of a guardian, conservator, representative payee, and/or any other advocate or other representative.
6. Assigned guardians and conservators assist individuals in personal decision-making in a manner which represents the individual's expressed wishes and best interest.

7. Service providers acting as representative payees will assist individuals in personal decision-making in a manner which represents the individual's expressed wishes and best interest and in accordance with legal mandates established in federal and state law, regulation, and administrative rule.
8. Individuals are informed of their rights to challenge the service system, including any decisions or determinations affecting their eligibility, assessments, treatment plans and services, and required fee payments.
9. When individuals challenge the service system or any decision or determination affecting their treatment, the service system responds in a timely and appropriate manner in addressing and resolving the grievance and/or appeal.
10. Reports of abuse or any other allegations of dangerous or inhumane conditions are addressed, investigated and resolved in a timely manner.
11. Consumers and/or guardians who are dissatisfied with the appeal/grievance decision from an agency director may appeal to ADHS and then subsequently to a judicial review.

PRINCIPLE #6

Identification and resolution of problems and concerns in the service delivery system, as well as other proactive efforts toward improving consumer care and services, are important priorities of ADHS and all service providers.

PERFORMANCE OUTCOMES:

1. ADHS will establish and maintain a quality management system which provides objective assessment of the performance of the service delivery system in accordance with the mission of the agency and the laws, regulations, and administrative rules under which it operates.
2. ADHS will ensure that the quality management system involves an array of quality improvement activities and assessments, whereby consumers, family members and/or other representatives, treatment staff, and agency and ADHS administrators all participate and contribute valued perspectives on needed improvements and new priorities for the service delivery system.
3. The quality management system will strive to promote continued improvement of service delivery to individuals and measure and seek to achieve substantial compliance of all service providers with Title 9, Chapter 21, Mental Health Services for Persons with a Serious Mental Illness.
4. Periodically, but at least annually, ADHS, DBHS, and the Regional Behavioral Health Authorities will assess the effectiveness of their quality management systems in promoting positive change in the quality of service delivery to individuals. As warranted, based on these assessments, ADHS, DBHS, and the Regional Behavioral Health Authority will make needed revisions in their quality management systems.

QUALITY MANAGEMENT SYSTEMS
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

In the next section, the specific sources of information which will be used to demonstrate adherence to these performance outcomes (and, by extension, the requirements of the *Exit Stipulation*) are described.

VI. DATA SOURCES FOR INDICATORS APPLICABLE TO CLASS MEMBERS

Five primary data sources or processes contain all necessary information for measuring and ensuring compliance with the relevant requirements of the *Exit Stipulation*, including *Appendix C*. The Case Review Instrument is the primary responsibility of COMCARE with ADHS/DBHS assuming responsibility for validating a sample of Case Review Instrument-generated results. The Provider Quality Review is the sole responsibility of COMCARE, and two of the data sources/processes are the exclusive province of ADHS/DBHS (Client Satisfaction Survey and RBHA Evaluation). The last data source relates to the responsibilities of the Office of Oversight and Protection for the Seriously Mentally Ill.

Copies of each of the tools are included in Attachment E. Descriptions of the data management activities for the tools or processes are contained in Attachment F, and prospective examples of data reports, based on the output of the majority of these tools, are shown in Attachments G and I. Attachment H demonstrates the relationship of data elements from these tools to the Six Principles and Performance Outcomes. The five data sources/processes are as follows:

1. DATA SOURCE

Case Review Instrument

DESCRIPTION

A tool of 191 data elements probing the status of an individual class member which is administered by qualified behavioral health staff

Data are generated via a treatment record review; interviews with clients, family members/surrogates, case managers, and providers; and via personal observations. The Case Review Instrument concludes with a summation applying the professional judgment of the reviewer to present a coherent picture of the status of the individual class member.

PRIMARY PURPOSE - COMCARE

To comprehensively examine, with a client-centered focus, most elements of services authorized for, and utilized by, individual class members

To determine whether each individual is receiving treatment and support appropriate to his/her needs, multiple components of service delivery (structure, process, and outcome) are assessed from several perspectives to promote accurate identification of opportunities to ensure protection of clients' rights, enhance their quality of life, and improve delivery of treatment services to clients. Because it is prohibitive to assess each client individually, a representative

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

sample will be drawn from the population of all clients according to the methodology described in Section VIII.

PRIMARY PURPOSE - ADHS/DBHS

To ascertain the reliability of the responses recorded in the COMCARE process of administering the tool and recommend necessary corrections, ADHS/DBHS reaudits 10% of the cases completed by COMCARE (using the original data sources), comparing results of the reaudits to the original audit responses, and immediately addressing issues of significant concern. ADHS/DBHS trends the results of these reaudits and then works with COMCARE to modify the tool and/or instructions and/or conduct additional training as needed in order to continually improve the reliability of the instrument.

For more information on the data management process, please refer to the description located under the Case Review Instrument tab in Attachment F.

2. DATA SOURCE

Provider Quality Review¹

DESCRIPTION

An instrument of approximately 180 data elements administered by qualified behavioral health and financial staff in order to assess provider performance in the provision of services to persons with serious mental illness

PRIMARY PURPOSE

To assess and monitor the delivery of services by the provider network through a review encompassing quality of care/service, member satisfaction, client rights, provider quality management program, utilization of funding, staff training, and compliance with all subcontract provisions and other requirements. The goals of administering the Provider Quality Review are twofold:

- A. to assess the extent to which clients receive services of optimal quality and appropriateness, and
- B. to identify barriers to achieving this objective and initiate actions to remove those barriers.

More detail on this tool can be found under the Provider Quality Review tab in Attachment F.

¹ Given the status of the Arizona State Hospital as a provider, ADHS/DBHS will review the Arizona State Hospital using the relevant components of the Provider Quality Review.

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

3. DATA SOURCE

Client Satisfaction Survey

DESCRIPTION

A questionnaire comprised of 12 items (4 demographic and 8 opinion) asking for the client's perceptions regarding services received and providing an opportunity for the client to offer additional comments about the program

PRIMARY PURPOSE

To ascertain the level of satisfaction with services provided in order to identify needed modifications to improve service delivery

Please refer to tab Client Satisfaction Survey in Attachment F for more information on this data source.

4. EVALUATION PROCESSES

RBHA Evaluation Reports

- Quarterly quality management and financial reports
- Problem resolution tracking system reports
- Grievance, appeal, and investigation reports
- Mortality reports
- Seclusion and/or restraint reports
- Annual operational/financial review
- Annual provider network status report with quarterly updates
- Case file review (see Data Source #1 above)
- Client satisfaction survey (see Data Source #3 above)

DESCRIPTION

Each of these nine discrete data collection/information management components are described separately in Attachment E under the tab for RBHA Evaluation.

PRIMARY PURPOSE

RBHAs are evaluated on an ongoing basis through numerous ADHS/DBHS monitoring channels. Evaluation data are utilized to determine whether RBHA staff fulfill their contractual obligations and deliver services in a manner consistent with ADHS/DBHS principles. These evaluation tools are a continual source of information for identifying opportunities to improve service delivery. The specific purpose for each of the nine sources of information is described under the RBHA Evaluation tab in Attachment F.

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

5. DATA SOURCE/PROCESS

Independent Evaluation of the Duties and Activities of the Office of Oversight and Protection for the Seriously Mentally Ill (OOPSMI)

DESCRIPTION

A full description of the scope, methods, activities, analysis, and evaluation for this process is contained in Attachment E under the tab for OOPSMI.

PRIMARY PURPOSE

On both a regional and state-wide level, to provide independent identification of systemic issues and potential solutions related to rights violations and the use of seclusion and restraint. In addition, the processes will provide information on the effectiveness of the grievance and appeal systems and the effectiveness of OOPSMI services.

ADDITIONAL ACTIVITIES

ADHS/DBHS engages in numerous other quality management data collection, review, monitoring, and follow up activities which are beyond the scope of the requirements of the *Exit Stipulation*. Although this document is focused exclusively on *Exit Stipulation* requirements, it is important to note that such other endeavors are undertaken on a regular basis, such as the annual Quality Evaluation projects. These activities result in systemic improvements to care delivery; and, therefore, they are relevant to class members who will be positively impacted by such systemic improvements.

ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

**VII. SPECIFICATIONS FOR DEVELOPMENT OF QUALITY MANAGEMENT
DATA ANALYSIS AND FEEDBACK SYSTEM**

General Scope of Work

ADHS/DBHS, working in conjunction with a Contractor, will develop and implement a system for analyzing, interpreting, and using data findings from the ADHS/DBHS quality management system to improve services and service delivery for individuals with serious mental illness in Maricopa County (Arizona). This system will apply to data generated from both the DBHS-controlled central functions and the ADHS/DBHS quality management system.

The quality management activities and reviews include:

- Client Case Reviews
- Provider Quality Reviews
- Client Satisfaction Surveys
- ADHS/DBHS annual comprehensive reviews of COMCARE's financial and programmatic operations
- Periodic service and financial reports regarding service delivery (units of services, individuals served, costs, etc.) by COMCARE and its subcontracted service provider agencies
- Procedures for handling client grievances and treatment appeals
- Investigations of allegations of abuse and/or rights violations of individuals with serious mental illness
- Reviews/investigations of deaths of individuals with serious mental illness
- Review of the use of restraints and seclusion

Specific Capabilities of the System

The system to be developed will be capable of identifying and disseminating significant data findings as they pertain to individuals served by COMCARE and/or its subcontracted provider agencies. These data findings will emanate from the quality management activities contained in this document describing the ADHS/DBHS quality management system as it applies to Arnold v. Sarn class members. It is anticipated that the data findings will most often be generated from the Client Case Reviews as well as the activities of both ADHS/DBHS and COMCARE pertaining to grievances, treatment appeals, restraint and seclusion use, and allegations of client abuse.

Additionally, the developed system will be capable of trending data findings generated through the quality management activities outlined in both the text and the RBHA Evaluation sections of this document (see Attachments E and F) which are relevant to:

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

- Subcontracted provider agencies and, as applicable, to the provider agency's specific program sites/types;
- COMCARE executive management, case management sites, and clinical teams; and
- ADHS/DBHS management, operations, and quality management staff members.

The system will also elaborate on the nature and format of the trending reports to be prepared and the frequency with which specific reports will be generated.

The system will reflect a comprehensive understanding of ADHS/DBHS's Quality Management Plan, the types of data findings which may be generated from each of the Division's various quality assurance activities, and the relevance of specific data findings to the Division's articulated listing of service system performance principles and associated 40 performance outcomes. The proposed system will delineate the following:

1. Specific methods, procedures, and safeguards to ensure that quality assurance findings of significant client treatment and care issues are promptly identified, disseminated to the appropriate party, and addressed with timely corrective action by clinical teams, subcontracted providers, or other parties, as applicable. The system will also ensure a reasonable "tracking mechanism" whereby COMCARE monitors the timely response to such specific quality assurance findings.
2. Specific methods, procedures, and safeguards to ensure that quality assurance findings of significant treatment and care issues relevant to specific subcontractors are identified, communicated to DBHS, COMCARE, and the provider agency and addressed with timely corrective action by the provider agency. The system must also ensure a reasonable "tracking mechanism" whereby COMCARE monitors the subcontracted provider's response to identified problems and needed corrective action.
3. Specific methods, procedures, and safeguards to ensure that quality assurance findings of significant treatment and care issues relevant to the service delivery and/or the oversight/quality management role of COMCARE, its various offices/sites, or clinical team operational practices are identified, communicated to DBHS and COMCARE, and addressed with timely corrective action. The system must also ensure a reasonable "tracking mechanism" whereby DBHS and COMCARE monitor COMCARE's response to identified problems and needed corrective action.
4. Specific methods, procedures, and safeguards to ensure that quality assurance findings of significant treatment and care issues relevant to ADHS/DBHS operations or centralized quality assurance activities or reports are identified and addressed

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

with timely corrective action. The system will also ensure a reasonable "tracking mechanism" whereby DBHS and other interested parties have information available to determine DBHS's response to identified problems and needed corrective action.

5. Specific methods and procedures for DBHS, utilizing the data, findings, and analysis of the QM system, to provide for at least an annual comprehensive review of the overall effectiveness of the ADHS/DBHS quality management plan, which includes clearly stated findings related to its effectiveness to measure the service system's performance vis a vis ADHS/DBHS's six performance principles and 40 associated performance outcomes and its effectiveness in ensuring a timely and accountable self-correcting process for addressing identified problems. This review will be inclusive of the effectiveness of the centralized quality assurance functions of ADHS/DBHS: grievances, treatment appeals, restraint and seclusion, abuse reporting and investigations, and death investigations.

VIII. SAMPLING

Appendix C of the *Exit Stipulation* set forth thresholds for many of the indicators which are applicable to class members, and ADHS/DBHS has agreed to conduct annual monitoring of these items to compare the results to the established thresholds for each year. Compliance with some of the criteria in *Appendix C* can be determined through straight mathematical calculations, e.g., criterion 1 requires counting the number of priority clients who have case managers and dividing that number by the total number of priority clients to determine the percent of priority clients who have case managers. This percent is then compared to the established threshold for that year in order to ascertain compliance. ADHS/DBHS will determine by this calculation whether, in the first year, a minimum of 85% of priority clients have case managers.

Other measures do not lend themselves to such straightforward calculation from routinely maintained administrative records. Some of the indicators can be assessed only by direct interviews with class members (criteria 2 through 12), others require audits of service programs and program staff (criteria 14 and 15) and still others deal with ADHS/DBHS monitoring systems (criteria 16 and 17). Criterion 13 involves class members in jail psychiatric units and is not applicable to ADHS/DBHS.

Sampling becomes an issue when the relevant experiences of a set of class members cannot be assessed from computerized administrative records. In these instances, it will be necessary to draw samples of the appropriate population and then gather the necessary information through interviews or audits of existing records.

ADHS/DBHS and COMCARE have developed two instruments for gathering such information--the Case Review Instrument, which is used to gather information on individual class members served by COMCARE or its providers, and the Provider Quality Review instrument which is used to gather information on providers and programs run by providers. One portion of completing a Provider Quality Review assessment of a program is to complete a Case Review Instrument for two class members who have been served by the program.

We will determine the extent of compliance with criteria 2 through 12 using a carefully drawn random sample of class members. (The procedures for drawing the sample are described below). We will complete Provider Quality Reviews for all:

- twenty-four hour staffed residential treatment programs
- inpatient settings
- day/vocational programs
- supported housing

QUALITY MANAGEMENT SYSTEMS WHICH APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

The Case Review Instruments needed for completing the Provider Quality Reviews will be drawn from the random sample of class members as much as possible. However, additional Case Review Instruments will be completed as needed in order to have at least two Case Review Instruments from class members being served by each of the programs being assessed. These additional Case Review Instruments will tend to come from the high priority class members since these are the people who are most likely to receive the services provided by the programs being assessed.

In addition to providing the information required to assess the extent to which the exit criteria are being met, the same information can be used to examine subgroups of class members, as defined in the *Exit Stipulation*, who are of special concern. These subgroups are class members who have been in, or presently are in, the Arizona State Hospital; who have been in, or presently are in, Supervisory Care Homes; who have used 24 hour residential care; who have been in jail and have a major biological mental illness; and who are frequent users of inpatient hospital or crisis services. To evaluate the services provided to these special subgroups of class members, we will combine the Case Review Instruments collected for the random sample of class members and those collected for the program assessments. An additional subgroup of interest is those class members who receive services only from COMCARE. The proportion of COMCARE only clients in the priority sample will be the same proportion as in the total population. This group may be analyzed separately once the sample has been drawn.

Dates in the following definitions differ from the dates found in the *Exit Stipulation* in order to ensure that adequate data are available to identify class members in the various subgroups. Therefore, for clients in Supervisory Care Homes, Jail, 24 Hour Residential, and Hospitalized as Inpatients Twice or More in One Year, we have selected the earliest dates for which valid data are available to define these individuals. This date is a year later for 24 Hour Residential and Twice Hospitalized and two years later for Supervisory Care Homes and Jail than the dates cited in the *Exit Stipulation*. This approach will ensure that individuals are appropriately included in the subgroups of interest.

Specific definitions for each subgroup are as follows:

Arizona State Hospital

Any COMCARE non-forensic/SMI class member, enrolled as of 2/12/96 or after, who, as of 7/1/93, is or has been a resident of the Arizona State Hospital. Original list of class members in the ASH category was verified by comparing COMCARE list to ASH list, unduplicating, and correcting the data until a final and accurate list was determined.

The list includes a subset of 118 non-forensic/SMI class members who were residing at ASH for greater than one year as of 1/1/95. These class members are tracked separately for purposes of exit criteria compliance specific to this population. The class

QUALITY MANAGEMENT SYSTEMS NOT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

members in this dataset are determined by their admission date occurring at least 365 days prior to 1/1/95.

The data are a daily ASH fax transmittal notifying COMCARE of class member admissions and discharges (planned).

This is the highest ranking priority population category to which all other categories default when pulling the population data.

A non-forensic/SMI class member cannot leave this category except by expiring, moving out of the County, or being discharged from the COMCARE system of care pursuant to ADHS/DBHS policy and procedure.

Supervisory Care Home

Any COMCARE class member, enrolled as of 2/12/96 or after, who, as of 7/1/95, is or has been, to the knowledge of COMCARE, a resident of a licensed supervisory care home facility appearing on the document entitled, Supervisory Care/Boarding Home List with Case Manager Name, dated February 29, 1996 through March 25, 1996 received by COMCARE in September 1996, and/or including any newly licensed supervisory care homes.

The data source is case manager report. COMCARE will make every effort in not placing class members in supervisory care homes without the approval of the Adult Services Clinical Director.

This is the second highest ranking priority population category to which all other categories except ASH default when pulling the population data.

A class member cannot leave this category except by expiring, moving out of the County, being discharged from the COMCARE system of care, or entering a higher ranked priority category pursuant to ADHS/DBHS policy and procedure.

Jail

Any COMCARE class member, enrolled as of 2/12/96 or after, who, as of 7/1/95, is or has been to the knowledge of COMCARE, an inmate in the Maricopa County Jail, is identified to the COMCARE Forensic Team and who has an Axis I major biological disorder.

QUALITY MANAGEMENT SYSTEM
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

The following diagnoses are used to define Axis I major biological disorder:

Schizophrenia:	295.30, .10, .20, .90, .60
Schizoaffective Disorder:	295.70
Major Depressive Disorder Recurrent:	296.24, .32, .33, .34, .35, .36
Bipolar Disorder:	296.40 through 296.89
Delusional Disorder:	297.1

The data source is the COMCARE Forensic Team report to Adult Services Administration.

This is the third highest ranking priority population category to which all other categories default, except ASH and Supervisory Care Home, when pulling the population data.

A class member cannot leave this category except by expiring, moving out of the County, being discharged from the COMCARE system of care, entering a higher ranked priority category, or no longer having an Axis I major biological disorder as defined above.

24 Hour Residential

Any COMCARE class member, enrolled as of 2/12/96 or after, who, as of 7/1/94, is or has been, to the knowledge of COMCARE, a resident of a COMCARE contracted licensed Level II twenty-four hour residential provider facility.

The data source is encounter data up until 8/15/96. After 8/15/96 the data source is clinical team report and encounter data.

This is the fourth highest ranking priority population category to which all other categories default, except ASH, Supervisory Care Home, and Jail, when pulling the population data.

A class member cannot leave this category except by expiring, moving out of the County, being discharged from the COMCARE system of care, by entering a higher ranking category, or by failing to reside in a contracted licensed Level II twenty-four hour residential provider facility for a period of 24 months following the class member's most recent move-out date related to twenty-four hour residential.

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

Inpatient x2/year or Frequent User of Crisis Services

Inpatient x2/year

Any COMCARE class member, enrolled as of 2/12/96 or after, who, as of 7/1/94, is or has been, admitted to a COMCARE contracted inpatient acute provider facility at least two times within a one year period.

Encounter data are used to determine the population for this category. A rolling 12 month calculation is used to determine if the class member is part of this priority category.

This is the fifth highest ranking priority population category to which all other categories default, except ASH, Supervisory Care Home, Jail, and 24 Hour Residential, when pulling the population data.

A class member cannot leave this category except by expiring, moving out of the County, being discharged from the COMCARE system of care, entering a higher ranking category, or by failing to have at least 2 inpatient acute admissions to a COMCARE contracted provider facility in a subsequent rolling 12 month period following the original date at which the class member entered the category. Due to encounter data lag time, sixty (60) days are subtracted from the date the class member entered the category to establish a start date for encounter data review. However, the review ending date will be twelve (12) months from the date the class member entered the category.

Frequent User of Crisis Services

Any COMCARE class member, enrolled as of 2/12/96, who, as of 7/1/93, is or has been a frequent user of crisis services as defined by:

Three (3) episodes of crisis service usage in a rolling 90 day period

One Episode = 2 crisis services in a rolling 14 day period

Crisis Services = as determined by the contracted crisis and related services by provider, excluding crisis phone services.

Encounter data are used to determine the population for this category.

A class member cannot leave this category except by expiring, moving out of the County, being discharged from the COMCARE system of care, entering a higher ranking category, or by failing to have a frequent use of crisis services (as defined by the definition parameters above) within a six month period subsequent to the date the class member was determined to meet the frequent-crisis-user criteria. Due to encounter data lag time, sixty (60) days are subtracted from the date the class member entered the category to establish a start date for encounter data review. However, the review

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

ending date will be six (6) months from the date the class member entered the category.

Discussion of these definitions took place at the Triennial meeting on March 7, 1997.

Although the definitions are described as a hierarchical set of categories, class members who qualify to be counted in more than one category at a time will be included in all categories for which they qualify. Thus, hierarchical organization is not a part of the sampling and data analysis methodologies.

Any individuals identified as *non-priority* clients who are determined to be priority clients will be moved to the priority category, using the original definition of dates in the Exit Criteria.

ASSESSMENT OF INDIVIDUAL CLASS MEMBERS - Case Review Instrument

Sampling Objectives

The objective will be to ensure a sample of Maricopa County class members (both priority and nonpriority) which has a 95% level of statistical significance and a +/- 10% confidence level. Using an example of a priority population numbering approximately 2300 and a non-priority population numbering approximately 9200, and estimating conservatively, this statistical significance would yield samples sizes of 86 priority class members and 88 non-priority class members.

Sampling Methodology

The process used to select the random sample will involve the following steps:

- Identify the number in the population, both priority and non-priority
- Using EpilInfo (a public health statistical software package), determine the number of priority and non-priority class members at the 95% level of statistical significance and a +/- 10% confidence interval

Sample sizes based on conservative estimates

An estimate of 50% is the most conservative--i.e., estimating that 50% of cases will meet a given criterion requires the largest sample to achieve any given level of confidence that the data are accurate. Estimating that 85% or 15% of cases will meet the criterion--any proportion more or less than 50%--requires a smaller sample. Since the quality management system for class members entails measurement of many variables, which are likely to have many different proportions of cases meeting criteria, **a conservative 50% estimate has been used. This means that the confidence**

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

intervals for any obtained estimates of proportions closer to 0% or to 100% will be smaller (more accurate) than the +/- 10%.

Considerations of drawing quarterly samples

The sample sizes will be for numbers of class members who will be examined each year to assess the success with which these clients are being served. However, the interviewing and auditing will be an ongoing process throughout the year and the population changes constantly as members enter and leave the system. Each quarter ADHS/DBHS will draw a sample for one quarter of the target annual sample. In this way, ADHS/DBHS can assure that members who enter the system during the course of the year have a chance of being included, and ADHS/DBHS can ensure that members who leave the system are excluded from the sample after they have left.

Sampling Procedure

For each quarter, ADHS/DBHS will use the following procedure. ADHS/DBHS will select a random sample of non-priority members and replace any members in the sample who have been previously sampled during the year. For the priority sample, ADHS/DBHS will draw a stratified random sample by the five categories of priority class members as defined in Section II, #8 of the *Exit Stipulation*:

1. a resident of the Arizona State Hospital
2. a resident of a supervisory care home
3. a resident of a twenty-four hour residential program
4. an inmate in a jail who has a major biological mental illness; or
5. individuals hospitalized for mental illness twice or more in a year or a frequent recipient of crisis services.

ADHS/DBHS can aggregate data from two of these categories to assess class members perceived to be "very high risk", i.e., class members in the categories for frequent hospitalization/crisis and jail. *Stratification* of the sample is done proportionally and does not corrupt the randomness of the sampling methodology.

Because members can receive multiple types of services, an appreciable number appear in more than one category. As an example, if the priority population numbered approximately 2300 and the non-priority population numbered approximately 9200, the following number of priority clients could be found distributed in the groups as follows:

Arizona State Hospital	845
Supervisory Care	585
24 Hour Residential	347
Jail and major biological mental illness	550
Frequent Hospitalization/Crisis	712

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

To draw a sample, the priority clients would be classified according to whether they were Arizona State Hospital, Supervisory Care or Other, and combinations of these 3 categories. Thus, 42% of the clients would be the group of Jail/24 Hour/Crisis/Frequent Hospitalization but not in Arizona State Hospital or Supervisory Care; 11% would be both Arizona State Hospital and Jail/24 Hour/Crisis/Frequent Hospitalization. A stratified sample could be drawn which would maintain the proportional representation of each of these groupings. Thus, there would be the same 42% Jail/24 Hour/Crisis/Frequent Hospitalization clients in the sample as there are in the population, and the same 11% Arizona State Hospital and Jail/24 Hour/Crisis/Frequent Hospitalization in the sample as in the population.

ASSESSMENT OF PROGRAMS - Provider Quality Review

Sampling Considerations

A Provider Quality Review will be completed for all twenty-four hour staffed residential treatment programs, all inpatient programs, all day/vocational programs, and all supported housing programs providing services to class members. The Case Review Instruments completed as a part of the Provider Quality Review will be drawn from the Case Review Instruments collected from the random samples of class members as much as possible. The commonly used programs may well have Case Review Instruments for more than two class members. However, whenever needed new Case Review Instruments will be completed to provide a minimum of two for each of the relevant programs. When there are more class members than needed who have been served by a program, the class members for whom Case Review Instruments are to be completed will be selected randomly. Subsequent to the first year of administering the Provider Quality Review, a smaller number of providers will be reviewed by exempting from review in the second year providers who met ADHS/DBHS standards in the first year. These providers would be reviewed only every other year or so as long as they continue to meet standards.

The following table shows the numbers of programs of the four types noted above:

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
 ARNOLD V. SARN CLASS MEMBERS
 Arizona Department of Health Services
 Division of Behavioral Health Services

Type of Program	Number of Programs	Number of Class Members in Population
Twenty-four Hour Staffed Residential Treatment	37	947
Inpatient	4	163
Day/Vocational	8	440
Supported Housing Programs	NA*	NA*

* It was not possible to identify the class members in Supported Housing Programs using the dataset provided by COMCARE in December, 1996. This information will be provided prior to selecting the actual sample for the first quarter reviews.

PRELIMINARY SAMPLE

The exact numbers of class members in the random samples of non-priority and priority class members will be fixed at 88 and 86 respectively. The number of additional class members for whom Case Review Instruments will be conducted is difficult to predict because of the randomization in the sampling. A test of the sampling procedures based on the population as of November, 1996 was run, and the obtained sample was:

Random Sample of Non-Priority Class Members	88
Random Sample of Priority Class Members	86
Additional Class Members from Program Sample*	31
Total	205

* It was not possible to identify the class members in Supported Housing Programs using the dataset provided by COMCARE in December, 1996. This information will be provided prior to selecting the actual sample for the first quarter reviews, and, therefore, the number of additional class members selected may increase if class members in supported housing programs have not been represented in other categories.

These 205 class members were distributed among the categories as follows (one person may be in more than one category):

<u>Group</u>	<u>Number</u>
Arizona State Hospital	48
Supervisory Care Home	27
24 Hour Residential	32
Jail and major biological mental illness	20
Frequent Hospitalization/Crisis	21

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

At present, we cannot determine which class members in the Arizona State Hospital category were still hospitalized and which had been discharged. This determination will be made when the actual sample is drawn. We do estimate that approximately 100 class members are presently hospitalized in the Arizona State Hospital; this is about 12% of the total number of class members who are designated as being formerly or presently hospitalized in the Arizona State Hospital. Therefore, we estimate approximately 6 of the 48 class members selected for the Arizona State Hospital category are still hospitalized in the Arizona State Hospital. Nonetheless, as requested by the plaintiffs, we will ensure that one half (or a minimum of ten) of the individuals selected for the subgroup of *Arizona State Hospital* clients will still be hospitalized in ASH and one half will have been discharged from ASH. Meeting this request may increase the sample size slightly.

The test sample provided the following numbers of class members in the different types of programs:

- Twenty-four Hour Staffed Residential Treatment Programs 70
- Inpatient Programs 10
- Day/Vocational Programs 27
- Supported Housing NA*

* It was not possible to identify the class members in Supported Housing Programs using the dataset provided by COMCARE in December, 1996. This information will be provided prior to selecting the actual sample for the first quarter reviews.

When the new samples are drawn for the actual assessment, we expect the distributions of class members in the different categories and in the different programs to vary slightly from these numbers. This is because the population being sampled will have changed and because the randomization procedures will select a different set of individuals who may or may not have received exactly the same array of services as the individuals in the preliminary sample.

ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

IX. RELATIONSHIP OF DATA TO EXIT STIPULATION

ADHS/DBHS distilled the requirements of the *Exit Stipulation* in the context of the ADHS/DBHS culture, mission, and philosophy and created the previously described Six Principles and Associated Performance Outcomes. In concert with enunciating the Principles, ADHS/DBHS modified or created the data collection instruments discussed in Section VI to ensure capture of all requisite information to measure compliance.

As a result of this process, ADHS/DBHS was able to map direct relationships between specific data elements collected in the previously described data sources/processes and the requirements of the *Exit Stipulation* as represented by the Principles and Performance Outcomes. This mapping was done in November, 1996 and, therefore, it references data elements from the instruments in place at that time, i.e., Version 11.00 of the Case Review Instrument and the October, 1996 version of the Provider Quality Review.

Attachment H displays the relationships between the data elements from those instruments and the performance outcomes. When the quality management system is approved and fully implemented, the data elements used will be taken from the most recent versions of the instruments, i.e., Version 15.00 of the Case Review Instrument and the April, 1997 version of the Provider Quality Review.

As noted previously in Section VI, prospective examples of data reports are shown in Attachment G. The prospective data report example for the Appendix C criteria of the *Exit Stipulation* used the data elements from the most recent versions of the two tools (Case Review Instrument and Provider Quality Review). (See Attachment G3 and G3a). All other data reports in Attachment G were developed in November, 1996 and, therefore, reference the prior versions of these two tools.

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

X. CONCLUSION

This description of the ADHS/DBHS quality management system, as it applies to the Arnold v. Sarn class members, illustrates how ADHS/DBHS will be fulfilling the requirements of the *Exit Stipulation*, relative to the quality management system.

Once this description of the quality management system has been approved by the Court Monitor, ADHS/DBHS will implement, with the assistance of their consultant, all aspects of the described quality management system which are not currently in place. The implementation phase will include, but not be limited to, the following activities:

- Refinement of selection of data elements for the purposes of achieving the intent of the six principles and 40 performance outcomes and ensuring compliance with the Appendix C Criteria of the *Exit Stipulation* and meeting, or exceeding, the specified thresholds each year
- Creation or refinement of report formats and a reporting system to ensure collection of the most relevant information and dissemination to the appropriate individuals or entities in a timely manner
- Development of a tracking system to ensure ongoing monitoring of identified problem areas, follow up on the implementation of corrective actions and their efficacy, and maintenance of monitoring activities to ensure a system of ongoing self correction.
- Deployment of reasonable and sufficient resources to ensure continuous quality improvement through the activities described for the quality management system

Through all of these and related efforts, ADHS/DBHS enables clients to achieve their highest possible level of self-sufficiency while ensuring the availability and accessibility of the full range of services most appropriate to the clinical needs of each person.

ORGANIZATION OF THE QUALITY MANAGEMENT SYSTEMS

A. ADHS/DBHS

ADHS/DBHS contracts with organizations, known as Regional Behavioral Health Authorities (RBHAs) to administer behavioral health services in the State. These RBHAs, which are private, non-profit organizations, function in a fashion similar to a health maintenance organization (HMO). COMCARE is one of five RBHAs in Arizona, and it is responsible for behavioral health services provided in Maricopa County.

The ADHS/DBHS Quality Management System functions at a statewide level. Statewide quality management activities include participation by ADHS/DBHS senior management, clinical, statistical, and program staff, and corresponding COMCARE and provider representatives.

Because ADHS/DBHS is committed to system improvement as well as regulation, the quality management system develops structures and processes that support the continuous quality improvement approach. This approach demands system self-evaluation and self-correction and includes monitoring, evaluation of findings, feedback concerning findings, and corrective actions to improve or change systems, processes, and structures. This process is designed to improve the quality of services and care and increase class member satisfaction.

The Assistant Director of ADHS/DBHS delegates responsibility to coordinate the Quality Management program to the Office of Managed Care and Quality Assurance (OMC/QA)

The ADHS/DBHS Medical Director and the Manager of the OMC/QA, or designee, are responsible for overall review of statewide quality management policies including service monitoring/improvement, provider networks, and utilization management. The Medical Director and the Managers of the OMC/QA and the Office for Persons with Serious Mental Illness work in close association to implement the quality management program.

ADHS/DBHS reviews COMCARE Quality Management Reports. At the conclusion of its review, ADHS/DBHS may accept the report with no further action required, offer written observations or additional findings, call for improvement/corrective actions, or impose sanctions. The ADHS/DBHS Assistant Director determines the appropriate actions. The decisions and directions from the Assistant Director are provided to the ADHS/DBHS Monitoring Team for COMCARE for review and follow up as determined by the management team.

Feedback loops and continuous quality improvement are assured through centralized reporting of all data output to the ADHS/DBHS Monitoring Team for

ORGANIZATION OF THE QUALITY MANAGEMENT SYSTEMS

COMCARE. Team composition includes representatives from several ADHS/DBHS offices. Additional information on the Monitoring Teams is included in Attachment D.

B. COMCARE

COMCARE's leadership demonstrates commitment to Quality Management by allocation of resources (personnel, time, information systems) and promotion of TQM principles (self-assessment, open communication, and appropriate inclusion of all levels of the organization in decision making processes). The 1996/97 QM/UM Plan sets forth the integration of the QM/UM Council and program structure. Input from the various stakeholders will be considered in order to further enhance the structure and activities of the COMCARE QM/UM Program. Because the QM/UM structure is changing substantially, the changes will be implemented over the course of the next year.

COMCARE has a Quality Management system of coordinated monitoring and evaluation activities aimed at assessing and improving the quality of care, services, and systems both within COMCARE and at the provider (subcontractor) level. Each department at COMCARE and each subcontracted provider within the COMCARE system of care is responsible for improving the quality of care and services within its domain.

The Quality Management Department endeavors to work closely with each COMCARE clinical and non-clinical department to assess the quality of clinical, non-clinical, and administrative services rendered to members, providers, and internal COMCARE department staff. The Provider Relations Department endeavors to work closely with the provider network to assess the quality of clinical, non-clinical, and administrative services rendered to members as well as internal and external customers to the provider.

Data are collected and organized. All information collected by reviewers/data collectors is confidential and is compiled and reported in aggregate form without individual identifying information. Peer Review data collection (which by nature of the process identifies the individual practitioner) is confidential, privileged information available only to, and utilized by, supervisory and management staff to assist in supervision, evaluation, credentialing, and/or decisions to retain employees or contractors.

Thresholds for evaluation are chosen for each monitoring and evaluation activity. Desired levels of performance are stipulated. Actual levels of performance are compared to the threshold and desired level of performance. Performance below the threshold requires further investigation and/or intensive monitoring and an action plan for improvement.

ORGANIZATION OF THE QUALITY MANAGEMENT SYSTEMS

A narrative analysis of the monitoring and evaluation findings and results is composed. Findings are discussed by the department/service/area personnel whose process or outcome has been the focus of the monitoring activity. Discussion of results, conclusions, and an action plan for improvement are recommended by the pertinent area staff. Aggregated summary data (along with monitoring and evaluation conclusions, evaluations, and action plans) is reported monthly to the QM/UM Council inclusive of Executive Council members, via written reports, for review, approval, and further recommended actions and improvements. Actions may be directed to a particular program, the entire staff of a section, or an individual practitioner. Action plans define the action, responsible party, timeline for action, feedback on steps taken, and when re-evaluation will occur.

Evaluation of the effectiveness of action plans and improvements is contained in the Quarterly QM/UM Reports and contributes to the QM/UM Plan Annual Appraisal. The Annual Appraisal addresses all studies and includes a summary of findings, trends, results, recommendations, and opportunities to improve care and services which were identified and implemented; revision in policies and procedures, resource allocations, and staffing patterns; staff training and education conducted; and recommendations for revisions to the next year's QM/UM Plan to facilitate increased effectiveness and quality of care and service throughout the COMCARE direct services and provider (subcontractor) service system.

Each Management Team selects performance measures in an effort to improve a function or process located within its domain. Management Teams may recommend, design, implement, analyze, and evaluate performance measures relevant to their scope. Each Management Team and its associated Project Team has standing members as well as the authority to draft members for time limited projects from disciplines and areas across the organization.

Data are collected according to specified frequency, then organized and analyzed. Specific subject information obtained through the data collection process is provided to involved areas/parties to effect individual corrective action as necessary. Measures and desired levels of performance are specified as required. Performance is measured by assessing actual levels of performance against the desired level of performance. Suboptimal performance is addressed through improvement/corrective actions. Aggregate information is compiled and reported to ADHS/DBHS. Reports of findings may include, but are not limited to:

- Total number of subjects that have been screened;
- Total number of subjects with variations from criteria;
- Comparison or trending of results relative to previous samples or to a predetermined benchmark or desired/required level of performance.

ORGANIZATION OF THE QUALITY MANAGEMENT SYSTEMS

As part of the evolving QM plan for 1996/97, COMCARE will participate in the outcome measures developed collaboratively with ADHS. In addition, COMCARE will establish additional outcome measures in order to further enhance continuous quality improvement efforts.

Regarding the SMI population, COMCARE plans to implement a pilot project, followed by full implementation, measuring the following on a regular and systematic basis: quality of life, symptoms, health status, substance use/abuse, and satisfaction. All phases of case management will be represented. Measures will be secured directly from members and, in some instances, from providers of care. Instruments which are valid, reliable, affordable, and brief are preferred. Instruments which have been translated into Spanish will be used, when appropriate. If Spanish translations are not available, COMCARE will endeavor to formulate a Spanish translation in conjunction with the author(s) of the instrument(s). The pilot project commenced in November, 1996 with full implementation scheduled to begin March, 1997.

In conjunction with the Adult Services departments, outcomes data will be examined with particular emphasis on high quality of care/outcomes. Interviews will be conducted in order to determine practices likely responsible for these outcomes. Training will be conducted with remaining areas in order to improve quality of care/outcomes. Follow-up measures will be secured.

Baseline data will be secured in order to identify the correlates associated with "high risk" members among the SMI population. Upon identification of correlates, efforts will be made to predict "high risk" members at time of intake.

COMCARE plans to integrate satisfaction surveys into the measurement of several additional areas of functioning. Satisfaction with services will become a standard component of regular and systematic assessment of outcomes among the SMI population. In addition to satisfaction, measurement will include quality of life, symptoms, health status, and substance use/abuse.

It is planned to also secure information regarding various phases of case management as well as satisfaction among priority members and non-priority members. General areas of satisfaction with services will be assessed as will satisfaction from the initial contact to the first appointment.

Because satisfaction with services will be integrated into the measurement of outcomes, it is planned to secure information on either a quarterly basis or continuous basis. Satisfaction with both case management and provider services will be evaluated.

An improvement action plan may be recommended or required by the Quality Team, and follow up on both the efficacy of the actions taken and any

ORGANIZATION OF THE QUALITY MANAGEMENT SYSTEMS

subsequent recommendations for modifications will be ongoing as part of the continuous quality management process.

ADHS/DBHS MONITORING TEAM PLAN

MONITORING TEAM PLAN

Purpose

The purpose of this monitoring plan is to establish a mechanism for ADHS/DBHS to evaluate the RBHA system. By reviewing the operational and financial performance and the quality of care provided by the RBHAs, the Division of Behavioral Health Services will be able to ascertain:

1. how successfully the RBHAs meet the obligations of their contracts with ADHS/DBHS, including the requirements of the Rules for persons with serious mental illness;
2. whether the RBHAs are fulfilling the requirements for the delivery of Title XIX services;
3. what the strengths and weaknesses of each RBHA are, and to identify best practices that may be replicated throughout the system; and,
4. what the needs are of each RBHA for technical assistance and corrective action.

Scope of Monitoring Activities

There are three areas of focus in monitoring that enable the reviewer to assess performance. These areas are:

1. Structure - what is the organizational structure of the business? What are the major reporting relationships.
2. Process - how does the business function? Does it have policies and procedures? Are they followed? Is there a formal internal communication process?
3. Outcome - is the business meeting its goals? Are services being utilized appropriately?

These areas are all examined through a variety of monitoring activities conducted throughout the year.

Organizational Structure of the Monitoring Function

The responsibility for the coordination of the monitoring function resides in the Office of Managed Care/Quality Assurance. This Office, in conjunction with other program areas, is responsible for developing the monitoring plan that includes: the scope and timetable for monitoring activities; coordinating the work of the monitoring teams; coordinating monitoring functions with other State agencies, such as Licensure; conducting internal coordination meetings for exchanges of information; overseeing the actual monitoring activities, including checking deliverables; and establishing a process for technical assistance and

MONITORING TEAM PLAN

training. Written feedback on monitoring activities is provided to the Associate Director on a regular basis.

Team Model

There are three monitoring teams, and each team is responsible for two geographic service areas. Team composition includes representation from the Office of Administrative Support, the Office of Information Technology Services, the Offices of the Seriously Mentally Ill, Children's Services, Substance Abuse/General Mental Health, and Prevention, as well as Planning and Quality Management. In addition, the Office of Grievances and Appeals and the Office of the Medical Director are resources to the team. One person on each team is designated as the team leader, and each team leader has a designated back-up.

The team leaders' duties are:

- ⇒ oversight of administrative and clerical tasks;
- ⇒ facilitation of team meetings; and
- ⇒ ensuring that monitoring activities are planned and implemented and that corrective action is taken.

The person designated as back-up to the team leader is responsible for assisting the team leader in preparing for the annual Operational and Financial Review of the RBHA as well as team meetings, including facilitating monitoring activities in the absence of the team leader and designing and planning the direction of monitoring activities.

Team members are responsible for becoming knowledgeable about the RBHA by: reviewing data reports received/generated on a routine basis; researching information and assuring reasonableness and consistency in information available on the RBHA; participating in on-site reviews; writing review reports; and assisting in the provision of technical assistance. In addition, team members are responsible for bringing information from their respective offices to share with the team, and bringing on-going information from the team back to the manager and staff in the office. Team members are also expected to notify the team leaders when special issues arise at the RBHAs.

Monitoring Activities

The monitoring of RBHA performance occurs through on-site review activities and internal assessment of data received at ADHS/DBHS on a routine basis from a variety of sources.

Internal Monitoring Activities Conducted at ADHS/DBHS

MONITORING TEAM PLAN

Data review occurs on a routine basis. There are approximately 100 deliverables mandated by the ADHS/DBHS contract with each RBHA. Deliverables are reviewed to assure that timely, consistent, and reasonable information is available for the RBHA and to ensure continued financial viability, service delivery, and compliance with reporting requirements. Through the reviews, ADHS/DBHS is also able to trend information (intakes/discharges) and identify problem areas which may need to be addressed. Another source of data is the Independent Quality Evaluation which is performed annually. This evaluation consists of a chart review of a large sample of clinical records, and it has a different focus each year. The results of the annual quality evaluations are shared with the monitoring teams, and areas for improvement are addressed through a variety of monitoring activities.

An all-team meeting is held monthly and is facilitated by team leaders on a rotational basis. Minutes are taken by the designated team member. Copies of minutes are given to the team leader for distribution to the team and to the Associate Director.

The current status of the RBHA is assessed through a review of monthly data sets that describe specified financial and quality indicators. Any issues identified in the data reviews are processed at these meetings. In addition, team members provide updates on the status of the various functions that are monitored during the Operational and Financial Review; e.g. accessibility, status of the provider network, quality management, etc. A quarterly report summarizing the findings of these reviews is prepared for the Assistant Director. When the review is completed and all revisions incorporated, the report is forwarded to the appropriate RBHA Director.

In addition to utilizing the mechanism of communication of the quarterly reports, a decision can be made to immediately bring an issue to the attention of the Assistant Director for resolution (e.g., an issue requiring a policy decision). Certain issues can also be resolved through the Monitoring Team (e.g., missing information in a report).

Monthly meetings of team leaders and team leader back-ups are also conducted. They are facilitated by staff from the Office of Managed Care/Quality Assurance. The purpose of these meetings is to assure consistency in the monitoring processes and to coordinate information exchange among the Monitoring Teams. Updates are also provided on any issues or policy decisions. The Office of Managed Care/Quality Assurance staff may write a report on behalf of the team leaders/liaisons for the Assistant Director identifying any systems issues, statewide problems, best practices, etc. which may require action, clarification, or dissemination of additional information.

MONITORING TEAM PLAN

Routine meetings with RBHA "special interest groups" also provide an avenue for collection of monitoring information. There are already regular meetings with RBHA Directors, QA Coordinators, RBHA Medical Directors, MIS and Finance staff, Grievance and Appeal Managers, and an ADHS/DBHS/RBHA "Work Group." Additional groups that might be brought together are SMI Coordinators, Grievance Coordinators, Children's Services Coordinators, etc. The value of such meetings, which might occur on a quarterly basis, would be to provide an opportunity for the exchange of information on what's happening in that particular program area as well as promote early problem resolution. Minutes from these meetings are shared with appropriate Monitoring Team members.

On-site Monitoring Activities

The **Annual Operational and Financial Review** is a comprehensive monitoring activity conducted by ADHS/DBHS. This review is conducted for all RBHAs in a concentrated period of time, i.e., two consecutive months, usually September and October. During this review, all members of the team spend 2-3 days at a RBHA reviewing documents, meeting with staff members, and observing the operation of the RBHA. An exit report is given, and a final report written and delivered to all appropriate parties by the end of the calendar year. From this review, strengths and areas for improvement of the RBHA are identified and plans for technical assistance or need for corrective action are identified.

An additional pre-scheduled RBHA visit occurs annually in March or April. The purpose of this visit is to assess progress toward accomplishment of corrective action and provide technical assistance. The composition of the team may vary depending on need. **All** visits are coordinated with the team leader.

Ad-hoc site visits occur as needed. These may be in response to special issues that arise in: programs, quality assurance activities, problem resolutions, and/or individual training needs, etc. Although the team composition may vary, depending on the issue, **all** visits are coordinated with the team leader.

Team Training

Training needs of the teams are addressed by the Office of Managed Care/Quality Assurance and the team leaders. Resources for training activities are both internal and external. Training topics range from broad overview presentations on such issues as managed care, capitation, and case management to more specific items, such as, interpretation of data received at ADHS/DBHS and explanation of financial ratios. Training occurs on an ad hoc basis.

REVIEWER'S GUIDE

for

Case Review

The guide for reviewers is provided as general information about the review process. It should be read by reviewers prior to training and may be used for reference during the review. The guide is to be used in conjunction with training, supervision, debriefings, and final team analysis. This protocol should not be used by untrained persons. The guide for reviewers is a necessary tool but is not a substitute for professional skills, proper training or supervision of reviewers.

General Procedure

Each RBHA will complete the Quality of Care Review on a defined member sample. The review will be performed by qualified professionals in the field of behavioral health who are experienced in evaluating or providing services to persons who have behavioral health problems and/or substance abuse. Reviewers will use data collection protocols designed specifically for the purpose of the review. ADHS/BHS professional staff will repeat the review on a portion of the RBHA completed sample.

For each member in the sample the reviewer will conduct a record review that focuses on the documentation in the past year. In Maricopa County the reviewer will also conduct an interview with people with serious mental illness, case manager/provider, and, as applicable, provider staff, family member/guardian/designated representative or others within the RBHA service delivery system.

In each section the reviewer will respond to a series of questions. The relationship between the service system and the individual's circumstances is the focus of the overall review.

Reviewers are selected because of their ability to render professional opinions with regard to the quality and adequacy of services provided. The reviewer is responsible for gathering enough information to render an opinion which is based on competent, relevant information. The reviewer will make judgments as a professional qualified to participate and render opinions in the clinical process. If there is reason to doubt, the reviewer should take measures to authenticate the evidence or to report possible limitations of the evidence. The reviewer may ask for assistance or professional input from their immediate/direct supervisor when unable to give a definitive response.

Due Professional Care

Due professional care is to be used in conducting the review. This standard places upon an reviewer the responsibility for employing high professional standards in performing the review.

This standard does not imply unlimited responsibility for discovery and disclosure of any irregularities in treatment, nor does it imply infallibility on the part of either the reviewer or review organization. This standard does require professional performance of a quality appropriate to the complexity and importance of the task. Due professional care imposes on the reviewer the requirement to be alert to situations or actions that could be indicative of abuse, neglect, insensitive care, unnecessary restriction, or ineffective or harmful treatment.

Exercising due professional care means using good judgment in applying review procedures. The quality of review work is related to: procedures properly applied by competent persons; findings and conclusions based on objective use of relevant facts; and of the judgment exercised by those participating in the review.

Definitions

The review process uses a variety of terms that require definition for reviewers. These terms are identified and defined below in working terms for use in this protocol.

Adult Phase 1 Case Management (for ComCare):

Individuals assigned to this level of case management are most often Members who have a major biological illness and significant functional impairment, who lack any community/Provider/social supports and who are generally unable or unwilling to avail themselves of traditional outpatient services.

Adult Phase 2 Case Management (for ComCare):

Individuals assigned to this level are most often Members who have a moderate level of functional impairment in conjunction with their mental illness and will require assistance, support and ongoing monitoring to maximize the member's benefit from services.

Adult Phase 3 Case Management (for ComCare):

Individuals assigned to this level of case management are often Members who have minimal functional impairment as a result of their mental illness and are generally able and willing to initiate contact and avail themselves of out-patient services and have demonstrated an ability to recognize and manage psychiatric symptoms and therefore have a very low need for inpatient or crisis services.

Case Coordination (for those Non-Maricopa County RBHAs):

Individuals assigned to this level of case management are often Members who have minimal functional impairment as a result of their mental illness and are generally able and willing to initiate contact and avail themselves of out-patient services and have demonstrated an ability to recognize and manage psychiatric symptoms and therefore have a very low need for inpatient or crisis services.

Conservator:

Means a person who is appointed by a court to manage the finances and property of a protected person. As such, a conservator is legally empowered to act on behalf of the protected person to sell the property of the protected person, to purchase goods and services and pay the debts for the protected person using the protected person's income and assets. A conservator is required to exercise his/her best judgment to act in the best interests of the protected person. Proof of the conservator relationship is established by "letters of conservatorship" issued by the court. The precise duties and responsibilities of a conservator are set forth in the Arizona Revised Statutes at A.R.S. § 14-5417 *et seq.*

EISP (Extended Individual Service Plan):

A version of the ISP especially designed for individuals who, because of their Serious Mental Illness or long-term institutional care, have severe functional deficits in several life domains. The EISP, in addition to meeting the definition of the ISP, specifically requires the development of a Long Term View and a comprehensive Functional Assessment.

Functional Assessment:(SMI only) (Referred to as F.A.)

A functional assessment describes the supports needed to achieve the long-term-view in relation to environmental demands. There may be one functional assessment or a series of functional assessments in different areas that are summarized by the treatment team.

General Mental Health:

A category of eligibility of behavioral health service for those individuals who have behavioral health issues which meet the criteria for a DSM IV diagnosis, but whose diagnosis and functional impairment do not meet the SMI criteria.

Guardian:

Means a person who, in general, has the authority to exercise the same powers, rights, and duties over an incapacitated person as a parent has respecting an unemancipated minor. In general, it is the guardian's responsibility to make provision for the care, comfort and maintenance of the incapacitated person. A guardian is responsible to secure appropriate treatment for the incapacitated person and, in general, can consent to treatment. The guardian can establish the abode of the ward and is obligated to find the most appropriate least restrictive setting consistent with the needs and abilities of the ward and public safety. In addition, a Title 36 guardian is required to consult with mental health professionals and to seek appropriate alternatives to hospitalization with a preference for alternative placements at home or with family. The precise duties and responsibilities of a Title 14 guardian are set forth in the Arizona Revised Statutes at A.R.S. § 14-5312 *et seq.* The additional duties of a Title 36 guardian are set forth at A.R.S. § 36-547.04

Housing:

Long-term, permanent residence.

Individual Service Plan:

A document that is used for individualized treatment and rehabilitation including the person's goals and services to attain the LTV/identified goals.

Informed Consent:

Consent or agreement to treatment based on the person having knowledge of the purpose, benefits, expected outcomes, potential side effects and alternative(s) to the treatment.

Inpatient Treatment Discharge Plan (ITDP):

A document that is used as the basis for individual treatment during hospitalization to facilitate the person's discharge from the hospital.

Interim Service Plan:

A plan which must be developed within 14 days of intake and which guides service provision until an Individual Service Plan/Treatment Plan is completed. The Interim Service Plan typically provides for immediate needs of the person, which may include short term crisis stabilization, access to health services, respite and support services, housing or health needs. It also identifies behavioral health services which must begin immediately, which may include case management and medication monitoring.

ISP (Individual Service Plan):

A detailed outline of the supports and services needed and wanted by the member. The ISP is based on assessments and where possible attends to the choices and preferences of the member. The ISP contains mutually developed goals and objectives and is the document by which services are monitored for quality and quantity. The ISP also defines responsibility for action and time lines.

Long-term View (LTV):

A planning statement developed by the individual with support and assistance from his/her clinical team which identifies what the person will be doing for living, work or education, and leisure pursuits which the next one to three years. This statement provides the service providers with a common vision as to the direction of the individual would like his or her life to take.

Major Biological Illness:

Schizophrenia, Schizoaffective Disorder, Bipolar Disorder, or Major Depression with psychotic features.

Priority Members:
All SMI individuals who do not meet the criteria for a Priority Member (as defined below).

Payee:
Means a person appointed by a public agency to accept and manage public benefits for persons who are unable or unwilling to handling those funds appropriately. The procedures for appointment of a payee are unique to each payor agency. In essence, the payee is the "conservator" with respect to the benefit payment only.

Person Who Needs Special Assistance:
A person who has been deemed by a qualified clinician, case manager, clinical team or regional authority to need special assistance in participating in the ISP or ITDP process, which may include, but is not limited to: a client who requires 24 hour supervision; a client who is, in fact, incapable of making or communicating needs but is without a court-appointed fiduciary; or a client with physical disabilities or language difficulties impacting the client's ability to make or communicate decisions or to prepare or participate in meetings; or otherwise determined to need special assistance to effectively participate in the grievance process.

Priority Members:
A SMI individual, currently in the system, who meets one of the following:
- is inpatient at Arizona State Hospital (ASH),
- is a resident of a Supervisory Care Home,
- is a resident of a 24 hour Residential Program,
- is an inmate in jail who has a major biological illness,
- has been hospitalized for mental illness twice or more in a year or frequent recipient of crisis services.
(For Maricopa County, Priority Individuals include persons currently in the system and those since July 1, 1993 that were members of the above listed groups.)

Progress:
Includes positive changes, trends, and relevant events reflected in data. Narrative summaries should address the data and trends in a level of detail adequate to make periodic, reasonable decisions about the status and appropriateness of the individual's program.

Public Fiduciary:
Means the Office of the Public Fiduciary as created by each county board of supervisors. The Public Fiduciary may be appointed by the court to act as the conservator and/or guardian for persons when there is no other person willing or able to act as the conservator and/or guardian. The precise duties and responsibilities of the Public Fiduciary are set forth in the Arizona Revised Statutes at A.R.S. § 14-5601 *et seq.*

Retired:
The person is 62 years or older and chooses to retire or is financially independent without public funds.

Seriously Mentally Ill:
A category of eligibility for behavioral health services for those adult individuals who meet the criteria for a specific DSM IV diagnoses and whose emotional or behavioral functioning is so impaired as to interfere with their capacity to remain in the community without supportive treatment. The mental impairment is severe and persistent and may result in a limitation of their functional capacities for primary activities of daily living, interpersonal relationships, homemaking, self-care, employment or recreation.

Substance Abuse:

A category of eligibility for behavioral health services for those individuals who have drug or alcohol use which meets the criteria for a DSM IV diagnosis.

Rules of Thumb

Presented below are general rules to follow in conducting case file activities. Some rules apply to special situations that are possible but unlikely to occur. Other rules apply to the mechanics of the review itself.

1. Any instance of abuse or neglect is to be reported immediately to the appropriate supervisory and public authorities.
2. Any situation observed that poses an immediate threat to the health or safety of a person is to be reported immediately. If possible, ensure that actions necessary to secure the safety of the person have been taken.
3. Any discrepancies found across records, observations, and/or interviews should be documented by noting clearly the sources and information that appears discrepant.
4. All records and case specific information are confidential.
5. Denial of access to pertinent records or activities is to be reported immediately to the RBHA Administration and ADHS/BHS.
6. In Maricopa County, all available records should be reviewed prior to the beginning of the interviews.

7. Key for questions:

Shaded = SMI Only
Bold = Exit Criteria
Unshaded = All populations (GMH, S/A, C/A, and SMI)
Double Boxes = DDD/ALTCS Children and Adolescents only

II. Intake

Review Guide

In the event Intake or assessment information is absent from the available record; rate item NO and explain.

1. This question applies only to cases in which the intake occurred after 4/1/94. The question seeks to verify appropriate timelines are followed. To assess timeliness, calculate using calendar days. When multiple intakes are present the reviewer will utilize information from the most recent intake only. If unable to determine, rate item NO.
Referral Date: The date a request for behavioral health services is made by a prospective client, parent/guardian of a prospective client, or custodial agency. A referral may be made in writing, by telephone, or through face-to-face contact.
Intake Date: The date a face-to-face meeting occurs between a prospective client and a behavioral health person for the purpose of determining financial, clinical, programmatic eligibility for behavioral health services and to identify the individual needs and priority for services.
2. A. Note whether the referral source (self, family, agency, etc.) was notified by the RBHA of referral received -- any documentation in record would be adequate, N/A if intake prior to 4/1/94.
B. Note if the referral source is notified of appointment within 72 hours of referral for evaluation, N/A if intake prior to 4/1/94.
3. A&B. Review the record for evidence on the service/treatment plan and revisions; intake documents, or other sources for information informing the person of the right to file a treatment appeal or grievance (SMI only). Evidence would include the person's/guardian's signature on the documents explaining the rights or documentation that these same rights were explained to the person/guardian and justification for no signature present.
- 3.B Applies only to adults with Serious Mental Illness.
4. Review the record for evidence that the person/legal guardian has provided written consent for treatment.
5. The reviewer will identify if documentation is present identifying history of previous treatment and treatment effectiveness information was elicited from the person/family/guardian/significant other.
 - A. Any documentation in record would be adequate.
 - B. N/A if no history of previous treatment.
6. The assessment should be performed or reviewed by a mental health professional per AAC R9-20-306. If you cannot determine the qualifications from the record, mark NO and explain in the comments section. N/A if intake prior to 4/1/94 only.

<p>1. Is the <i>intake</i> assessment timely (within 24 hrs emergency; 7 days routine)?</p> <p>A. Date of referral _____</p> <p>B. Date of Intake _____</p>	<p>YES NO N/A</p>	
<p>2. Is there evidence of response back to referral source?</p> <p>A. Referral source _____</p> <p>B. Is there notice to the referral source within 72 hrs of referral?</p>	<p>YES NO N/A</p> <p>YES NO N/A</p>	
<p>C. For ALTCs/DDD children and adolescents, was the response to DDD within 72 hrs of Intake?</p>	<p>YES NO¹ N/A</p>	
<p>3. Is there documentation indicating that the person was notified of his/her rights:</p>		
<p>A. to appeal eligibility and treatment decisions? (Appendix C.6.)</p>	<p>YES NO</p>	
<p>B. to file a grievance?</p>	<p>YES NO</p>	
<p>4. Is there evidence that the person/guardian has given written consent to receive treatment?</p>	<p>YES NO</p>	
<p>5. Was input from the person/family/guardian/ significant other included in the assessment regarding:</p>	<p>YES NO</p>	
<p>A. The history of previous treatment?</p> <p>B. The success of previous treatment?</p>	<p>YES NO N/A</p> <p>YES NO N/A</p>	
<p>6. Was the intake assessment performed by (or reviewed by) qualified staff?</p>	<p>YES NO N/A</p>	
<p>A. Level of qualification _____</p>		

7. List all assessments utilized in the review and the dates for each. N/A if prior to 4/1/94.
8. After reading the intake evaluation/assessment reports, the reviewer shall determine if the reports address the need for: N/A if intake prior to 4/1/94
8. A. **Provisional services:** A description of any services (including a plan for needed emergency services) that will be provided while assessments are completed and the individual service planning process has begun, and plans for the referral of the person to provisional services or the continuation of provisional services already provided.
- YES = evaluation or assessment report does address whether or not the person needs provisional services.
NO = the assessment report does not address the need for provisional services (+NO = not addressed, not needed)
N/A = the person has been in the RBHA for greater than 12 months.
8. B. **Further evaluations or assessments:** An identification of further evaluations which the treatment staff/clinical team deem necessary to determine the services appropriate to the person's needs. (Diagnostic laboratory, psychological testing, EKG etc.)
- YES = the evaluation or assessment report does address whether or not the person needs additional evaluations.
NO = the assessment report does not address the need for additional evaluations (+NO = not addressed, not needed)
N/A = intake prior to 4/1/94
8. C. **Follow-up Efforts to Secure, Needed Information:**
Identification of actions taken by the clinical team/treatment staff to acquire unavailable information. (i.e. diagnostic testing or laboratory, psychological testing, EKG etc.) N/A if no additional information needed. N/A if intake prior to 4/1/94
9. Based on information contained in the clinical record, the reviewer will assess whether the assignment to programmatic services (SML, GMH, SA, Child/Adolescent Intensive Case Management or Child/Adolescent Case Coordination), based on age, diagnosis, functional abilities, as well as other pertinent clinical issues

II. Intake

COMMENTS

<p>7. Does the intake assessment, comprehensive assessment, or psychiatric evaluation information include:</p>		<p>List all assessments utilized and the date for each:</p>
<p>A. Reason for request and/or referral for services?</p>	<p>YES NO N/A</p>	
<p>B. Past psychiatric history, including hospitalizations?</p>	<p>YES NO N/A</p>	
<p>C. Medical history?</p>	<p>YES NO N/A</p>	
<p>D. Substance use history?</p>	<p>YES NO N/A</p>	
<p>E. Family history, including history of behavioral health disorders?</p>	<p>YES NO N/A</p>	
<p>8. Do evaluations or assessment reports address: (see prompts)</p>		
<p>A. Required provisional or emergency services 1. If yes, were the required provisional or emergency services provided?</p>	<p>YES NO N/A YES YES NO</p>	<p>* Comments required if No.</p>
<p>B. Further evaluation or assessments required</p>	<p>YES NO N/A</p>	<p>* Comments required if YES</p>
<p>C. Follow up efforts to secure needed information</p>	<p>YES NO N/A</p>	
<p>9. Is the person appropriately assigned to programmatic services? (SMT, GMH, SA, Child/Adolescent Intensive Case Management or Child/Adolescent Case Coordination)</p>	<p>YES NO</p>	

Review Guide

Use the initial and any/all update assessments for these question.

10. The reviewer will review assessment reports, including psychiatric, psychosocial and comprehensive assessments and determine if the assessment info includes a psychiatric diagnosis, and if:
 - A. The diagnoses have been established/reviewed within the past 12 months;
 - B. A DSM IV Diagnostic Code and/or written diagnosis is present on Axes 1, 2 and 3; a description of the Psychosocial and Environmental Problems is present on Axis 4; and a number representing the functional assessment is present on Axis 5.
- 11.A. Comprehensive assessment: (N/A if intake occurred within 30 days for all 7A-7C) If a comprehensive assessment evaluation has not been completed, indicate "No" for item 7.A. and N/A for 7.B. and 7.C. 1 - 11.
- 11.B. The assessment must include a face-to-face interview.
- 11.C. The reviewer should not complete each of these ratings until the record review and all interviews are completed. The determination of adequacy must include a consideration of the accuracy of information in each component of the assessment. For each component of the comprehensive assessment, indicate whether the component was present and addressed adequately. If in the reviewers clinical judgment the component is present but inadequate, an explanation is required. The determination of adequacy is based on whether the following aspects were included for each component:
 - 11.C.1. **MENTAL HEALTH STATUS:** Cognitive functioning, including attention, memory, information processing and problem solving; affect, mood, attitudes, self-image, emotional stability, and mood; behavioral symptoms and history; history of and diagnosed mental illness; documentation of the need for medication.
 - 11.C.2. **LEGAL STATUS and/or APPARENT CAPACITY:** The existence of a guardianship or conservatorship for the person and the scope and authority of the guardian or conservator; whether the person appears capable of making informed decisions with regard to medical care or other treatment, financial matters, or confidential information; able to effectively participate in the service planning process; able to exercise other rights and privileges; whether the person needs a guardianship, conservatorship, representative payee, or other protective services or, in the alternative, whether the person is no longer in need of such protective services; whether the person needs or would benefit from special assistance, counsel or advice in making treatment decisions or in enforcing the person's rights; the existence of any type of court-ordered treatment.
 - 11.C.3. **PERSON'S SOCIAL SETTING:** The person's current living situation, neighborhood, community, family, and key support persons (friends).
 - 11.C.4. **PHYSICAL HEALTH STATUS:** The person's health, including a summary of physical examination and other evaluations completed in past year. The documentation should include the person's medical condition, including any chronic medical condition which requires regular monitoring or intervention.
 - 11.C.5. **LEVEL OF DAILY LIVING SKILLS:** The person's level of daily living skills includes (adults): personal care and grooming, nutrition and food preparation, and domestic skills: health maintenance, hazard recognition and avoidance; ability to follow a prescribed treatment program, including medication; time and money management; the utilization of community resources; communication, functional reading; the use of a telephone; ability to independently request assistance; and self-preservation.
- 11.C.6. **CRIMINAL JUSTICE HISTORY:** Any history or current status of arrests, probation or incarceration including the dates and conclusion of any criminal justice involvement.

III. Assessment

COMMENTS

<p>10. Does the assessment information include a psychiatric diagnosis?</p> <p style="margin-left: 20px;">A. Is it current? (Within the last 12 months)</p> <p style="margin-left: 20px;">B. Is it complete? (All 5 axis)</p>	<p>YES NO</p> <p>YES NO</p> <p>YES NO</p>	
<p>11. Is there a comprehensive assessment for evaluation?</p> <p style="margin-left: 20px;">A. Date _____</p> <p style="margin-left: 20px;">B. Was a face-to-face interview conducted during the assessment/evaluation process?</p> <p style="margin-left: 20px;">C. Does it include the following components? (See prompts)</p>	<p>YES NO N/A</p> <p>YES NO N/A</p>	<p>* Explain a response of NO for 11.</p>
<p>1. Mental health status</p>	<p>Present, Adequate ①</p> <p>Present, Not Adequate ②</p> <p>Not Present ③</p> <p>N/A ④</p>	<p>Explanation required if inadequate</p>
<p>2. Legal status and/or apparent capacity to make informed decisions/need for guardian/conservator.</p>	<p>①</p> <p>②</p> <p>③</p> <p>④</p>	<p>Explanation required if inadequate</p>
<p>3. Person's social setting</p>	<p>①</p> <p>②</p> <p>③</p> <p>④</p>	<p>Explanation required if inadequate</p>
<p>4. Physical health status</p>	<p>①</p> <p>②</p> <p>③</p> <p>④</p>	<p>Explanation required if inadequate</p>

<p>6. Criminal justice history</p>	<p>①</p> <p>②</p> <p>③</p> <p>④</p>	<p>Explanation required if inadequate</p>

11. C.7. EMPLOYMENT: The person's vocational and employment skills and preferences, including any vocational history, a summary of an evaluation of work skills, and the person's preferences and interests in employment.

11. C.8. EDUCATION: The person's education and training, including a history or evaluation of the person's education background, current education plan or Individual Education Plan (IEP), if any.

11. C.9. Language abilities: The person's language abilities including an identification of the person's ability to read, hear, understand, and speak English or in the person's preferred language.

11. C.10. Resources: The person's resources including the identification of public and private resources paid to or for the person or to which the person may be entitled under any local, state or federal law or regulations including: (a) income maintenance programs such as SSI, SSDI, Worker's Compensation, Unemployment Compensation, Veteran's Administration, Food Stamps, and/or General Assistance; (b) if resources are available and subject to the control of a representative payee; the name of the payee and the specific agency or office with responsibility for the representative payee; (c) benefits or income from any trust, including the court, if any, with responsibility for overseeing the operation of the trust, the name of the trustee, and terms of the trust; (d) health care benefits; (e) housing assistance, including eligibility for public housing, rental assistance, and subsidized housing; (f) education/vocational services; and (g) social services, including those under Title XIX and those administered by private, local, and state social service agencies.

11. C.11. Substance use history: Current status and/or any history of substance use including specific substances used and any treatment history.

12. (Applies only to adults with Serious Mental Illness) Evidence that an assessment for Special Assistance has occurred may be located in the Individual Service Plan, staffing notes, psychiatric evaluations, comprehensive assessment, psychosocial reports and/or progress notes. The documentation may include a specific statement about the need for 'special assistance' or may include specific documentation referencing the person's inability to participate in the ISP or grievance processes due to physical or cognitive deficits, or language difficulties that interfere with the person's ability to communicate effectively. Regarding the ISP process, the person may be identified as being unable to communicate choices, desires, preferences or understand service options; regarding the grievance and appeal process, the person may be identified as unable to communicate objection, refusal, disagreement or allegations of abuse or rights violations or cannot understand options proposed to resolve grievance/appeal issues. There may also be the existence of The Office Of Oversight - Protection for Seriously Mentally Ill " Special Assistance Form".

YES = there is evidence that the team has assessed whether or not the person needs special assistance.

NO = there is no evidence that the team has assessed whether or not the person needs special assistance.

12.A. The reviewer will determine whether the person received special assistance, either through ADHS or the RBHA. Evidence of this may be documented in the progress notes, ISP or staffing notes.

The reviewer will also determine whether the person was offered, but refused to accept, special assistance through ADHS or the RBHA. Evidence of this may be documented in the progress notes, ISP or staffing notes.

YES = The person received Special Assistance

YES = Special Assistance was offered and refused by the person

NO = Special Assistance was not offered to the person

12.B. After reviewing the clinical record and conducting all interviews, the reviewer will determine, utilizing their best clinical judgment, whether the person is in need of special assistance. The reviewers determination is independent of whether the team has assessed or determined the need for special assistance.

III. Assessment

COMMENTS

	Present, Adequate	Present, Not Adequate	Not Present	N/A	
7. Employment	①	②	③	④	Explanation required if inadequate
8. Education	①	②	③	④	Explanation required if inadequate
9. Language abilities/Interpreter services/need for sign language or literary assistance	①	②	③	④	Explanation required if inadequate
10. Resources/Entitlements	①	②	③	④	Explanation required if inadequate
11. Substance use history	①	②	③	④	Explanation required if inadequate
12. Did the clinical/treatment team assess whether the person needed special assistance in the ISP and grievance processes?			YES	NO	
A. If special assistance was needed, was it provided by ADHS or the RBHA? (Appendix C.10)			YES	NO	
B. Regardless of the team assessment/decision, is there evidence that the individual requires special assistance?			YES*	NO	* specify reason

IV. Service Planning/Treatment Planning

13. Identify whether the presence of a service/treatment plan is evident by circling yes, no, or N/A. Not applicable response is only acceptable if the person's intake and eligibility was determined less than 30 days prior to case file review.

13.B. **INDIVIDUAL SERVICE PLAN (ISP) FORMAT INSTRUCTIONS AND INFORMATION;**
The development of an individual plan for services is a requirement of applicable regulatory agencies in Arizona. These agencies include AHCCCS, ADHS/BHS and ADHS/Office of Behavioral Health Licensure (OBHL).

The Department has determined that, as with case management services, the individual service plan shall be developed in accordance with each person's level of need. People with significant need for support will continue to receive Individual Service Plans, following the process outlined in A.A.C. R9-21-301 through 315. All other consumers of mental health services may have a service plan that meet all AHCCCS and OBHL requirements. The reviewer will check the format of the plan in the clinical record, then indicate whether that plan is present and adequate, present or not adequate. If the person is required to have a specific format, but it is not present, the reviewer will mark Not present in the applicable section. N/A = the specified format is not applicable to the person.

SMI ONLY:

A. An ISP (EISP for Maricopa County) is required for the following priority groups:

- Inpatient at ASH
 - Persons who live in Supervisory Care Homes.
 - Persons in 24 hr. Residential program.
 - Persons who are in Jail who have a major biological mental illness (as defined on page ____).
 - Any person who requests an ISP.
(In Maricopa County Only) Persons who have been hospitalized for mental illness twice or more in a year or a frequent recipient of crisis services.
- B. The components for service plan (sometimes call a "condensed" ISP) include: - a Comprehensive Assessment
Goals, Objectives and Methodologies

14. If the individual has been determined to be a Priority Class member, and there has not been a specific determination that the individual does not require an Extended Individual Service Plan, the treatment plan should contain a functional assessment and a long-term view. N/A if a specific determination has been found or the individual is not a priority class member.

15. This standard applies to ONLY interim service/treatment plans completed on 10/1/93 and after per AHCCCS requirements. Refer to date in 1.B. N/A if in service prior to 10/1/93.

16. An answer of N/A means the person is not SMI. N/A also if in service prior to 10/1/93.

17. The individual service plan per R9-21 must be prepared or revised at least every six months. The service plan for children in RTC updated/revised every 30 days; plans for persons in acute care treatment updated/revised every seven days; and outpatient plans updated every 90 days (per R9-20)

IV. Service Planning/Treatment Planning

COMMENTS

	YES	NO	N/A		
13. A. Does the person have a service/treatment plan? Date: _____					
13. B. The format of the plan is: <i>(check one)</i>					
An ISP (has a long term view and functional assessment (EISP for ComCare))	①	②	③	④	
An ISP (NO long term view and functional assessment)	①	②	③	④	
A Treatment Plan	①	②	③	④	
Other specify _____	①	②	③	④	
14. Priority clients whose clinical needs require EISP's, have an EISP with a functional assessment and long-term view. (Appendix C.3.)	YES	NO	N/A		
15. Was an interim service/treatment plan completed within 14 days of intake?	YES	NO	N/A		
16. Was the individual service plan completed within 90 days of intake? (Appendix C.3.)	YES	NO	N/A		
17. Was the plan reviewed within the last six months? (Appendix C.4.)	YES	NO	N/A		

19. For persons with Serious Mental Illness, except in the unusual circumstance where the person is properly assigned to the Phase 3 Case Management/Case Coordination Model, priority clients have clinical teams which include the person, guardian, nurse, physician, case manager, and vocational specialist. For other populations participation in planning should be based on the individual's needs; if participation is not required or needed, mark the item N/A. N/A if plan is interim and team has not met. The reviewer will determine whether the required members of the clinical team actively participated in the service/treatment planning. A signature on the plan in and of itself, may not be sufficient to reflect active participation. Active participation may be indicated by the presence of clear professional input/recommendation in the comprehensive and functional assessment and the goals/objectives/methods, as well as documentation that the specific clinical team members attended the ISP meeting and assisted in establishing goals and making service recommendations; documentation in the team discussion or in progress notes.
- 19.F. An answer of N/A means that the person is already employed and does not need the support or services offered by Vocational Rehabilitation to maintain that employment; the person has goals related to employment, but the person and the team has assessed that Vocational Rehabilitation is not needed in order for the person to successfully achieve the goal of employment; or employment is not an issue because the person has identified that they do not want or need to be employed.
- 19.H. If in the reviewer's opinion the participation of a provider has an impact on planning and there is no evidence of their participation, the reviewer will answer "NO"
- 19.I. **Other:** If in the reviewer's opinion the participation of a person (i.e. representative payee, family member etc.), has an impact on planning and there is no evidence of their participation; the reviewer will circle "No" and write in the space the relationship to the person. For each person designated, the evidence that the person is a active participant could include; signature on the plan, documentation in team discussion, or progress notes, correspondence with person or other team members.
20. This is a summary question. In order to answer YES, items A through F in #19 must be answered YES, with the exception that F may be NA if employment is not an issue. In addition to items A through F, the clinical team should include other pertinent individuals such as current providers of service, family members actively involved in treatment planning and others as needed on an individual basis. If the person is properly assigned to a case coordination model, N/A may be used. The auditor should not rate this item until the record review and all interviews are completed. This is a summary question based on a review of the record and all interviews.
- 21.A&B. **After reviewing the person's recent assessment (i.e. comprehensive assessment, a psychiatric evaluation) and the service/treatment plan, determine whether the person's plan is consistent with the findings in the assessments or the subsequent diagnosis.**
- 21.C. Identify whether the person's plan reflects the providers (i.e. case managers, residential treatment staff, crisis providers etc.) involved and participating in the care of the individual. N/A if no service providers.

IV. Service Planning/Treatment Planning

COMMENTS

18. For ALTCs/DDD children and adolescents, was the DD case manager notified 72 hours prior to ISP staffing.	YES NO N/A	
19. Is there evidence of active participation in service/treatment planning by the following:	YES NO N/A	
A. the Person (Appendix C.9.)	YES NO N/A	* Explain a NO or N/A response FYI: Positive no = person's guardian there, person refused to participate.
B. Guardian	YES NO N/A	* Explain a NO or N/A response
C. the Psychiatrist	YES NO N/A	* Explain a NO or N/A response
D. the Nurse	YES NO N/A	* Explain a NO or N/A response
E. the RBHA case manager/therapist (circle one)	YES NO N/A	* Explain a NO or N/A response
F. the Vocational Specialist	YES NO N/A	* Explain a NO or N/A response
G. Case managers from other agencies (AOC, DES, DDD, Court, other)	YES NO N/A	* Explain any response
H. Providers	YES NO N/A	* Explain any response
I. Others as needed (i.e. family members, designate representatives)	YES NO N/A	* Explain any response
20. Unless properly assigned to case coordination, the priority client has an appropriate clinical team as indicated in 19A-19F? (Appendix C.2)	YES NO N/A	* Explain any response, Note 19 F exception.
21. Does the plan reflect:		
A. the assessments	YES NO N/A	
B. the diagnosis	YES NO N/A	N/A only if prior to 30 day timeline
C. all service providers who will share in the responsibility of providing services to the individual.	YES NO N/A	

22. A. **(SMI ONLY)**A long-term view (LTV) is a statement that is used for planning and which minimally includes where and with whom the person will live, learn/work, and socialize in the next 1-3 years. Circle the appropriate answer. The reviewer must keep in mind that the long-term view is a statement developed by the person. It is possible that a person may refuse to address all or part of the long-term view components. It is incumbent upon the clinical team to record this refusal. If the person refuses to state a vision for his/her future in any or all of the required components, the clinical team should document this refusal as part of the long-term view. Therefore, a documented statement that the person refused to provide a long-term view for where he/she wants to be living, learning, working and/or socializing, is considered a statement about each area. This is also true for "unrealistic" or "pessimistic" long-term view statements. The clinical team should make effort to assist the person in developing a realistic and optimistic long-term view, but may not be immediately successful and can only record what the person has said. In each of these instances, the reviewer will look for the plan to address what the clinical team will do to assist the person with developing an adequate long-term view. When the service/treatment plan does not require a long-term view, the treatment team is still required to elicit from the person and document the person's preference in the living, learning/working, leisure domains.
22. B. **(SMI ONLY)** Evidence that the preferences/goals were established by the person may be the person's signature, the long term view preferences are hand written by the person, the use of "I" statements, or the team documents the person's "wishes", "desires", etc.
22. C. **(SMI ONLY)** The reviewer will look for documentation which reflects the clinical team's consistent efforts in working with the person so that the person is able/willing to establish personal goals.
23. (Only applies to adults with Serious Mental Illness) may be titled "Functional Assessment". The skills and supports described should be specific to achieving the personal goals or long-term view in relation to environmental demands. Answer N/A if no long term view. Indicate whether the description of skills and supports was present and adequate. If in the reviewer's clinical judgment the description is present but inadequate an explanation is required.
24. **(For SMI)** Individualized goals/objectives can be determined by the existence of a relationship of the written goals to the person's preferences or LTV. **(For non-SMI)** Individualized goals are outcome-stated and related to assessment information.
25. Goals that reflect information or recommendations available from professional evaluations/assessment is evidence of professional input. Documentation by the clinical/treatment team that describes goals for improvement of behavioral health or adaptive functioning supporting the personal preferences/long-term view are also indicators of professional input into goal formulation.
26. Based on information collected from assessments, documentation, and interviews (if applicable) goals that are reasonable and/or achievable can be determined by the presence of:
- measurable outcome statements
 - reflective of the person's preferences or needs
 - based on available functional assessments
 - takes into account the person's resources (both psychological and material)
27. Methodologies may include services by providers, generic services, actions by people other than the person including family members, paid RBHA staff, and friends. The methods/steps described should lead the person toward achievement of the goal/objective. If in the reviewer's clinical judgment the description of methodologies are present but inadequate an explanation is required.
28. Review the person's goals on the service/treatment plan and the progress and staffing notes; then make a determination if there is documentation reflecting the progress, or lack of progress, on the goals. Answer N/A if no goals.

IV. Service Planning/Treatment Planning

COMMENTS

<p>22.A. Is there documentation of the person's long term view, preferences, or personal goals with respect to:</p>						
1. Community living arrangements	YES NO N/A					
2. Educational/vocational activities	YES NO N/A					
3. Social/recreational activities	YES NO N/A					
22.B. Were these preferences/goals established by the person or with assistance, if necessary?	YES NO N/A					
22.C. Is there evidence that the person was encouraged and supported to establish personal goals if unable and/or unwilling to participate in treatment planning process?	YES NO N/A	N/A if yes to B.				
23. Is there a description of the skills and supports needed for the person to establish or achieve his/her long term view or personal goals?	<table border="1"> <tr> <td>Present, Adequate ①</td> <td>Present, Not Adequate ②</td> <td>Not Present ③</td> <td>N/A ④</td> </tr> </table>	Present, Adequate ①	Present, Not Adequate ②	Not Present ③	N/A ④	Explain if present, not adequate ②
Present, Adequate ①	Present, Not Adequate ②	Not Present ③	N/A ④			
24. Are there individualized service/treatment goals or objectives?	YES NO N/A	* Explain NO or N/A				
25. Is there evidence of professional input in the development and formulation of these services/treatment goals?	YES NO N/A	* Explain NO or N/A				
26. Are the goals reasonable and/or achievable?	YES NO N/A	* Explain NO or N/A				
27. Are there specific steps/methods documented that describe how the goal will be achieved?	<table border="1"> <tr> <td>Present, Adequate ①</td> <td>Present, Not Adequate ②</td> <td>Not Present ③</td> <td>N/A ④</td> </tr> </table>	Present, Adequate ①	Present, Not Adequate ②	Not Present ③	N/A ④	Explain if present, not adequate ②
Present, Adequate ①	Present, Not Adequate ②	Not Present ③	N/A ④			
28. Do progress notes or any other documents reflect progress, or lack of progress, toward goals described in the plan?	YES NO N/A	N/A if No Goals.				

29. Based on information in the progress notes and other documentation in the record, the reviewer will assess whether there is evidence to support that the service/treatment plan was revised based on the individual's progress/lack of/ or emerging needs. If evidence leads the reviewer to the conclusion that the plan is revised according to agency policy and not as a result of individual progress, then "No" is the appropriate response.
30. The auditor should not rate this item until the record review and all interviews are completed. The reviewer will determine if, within the past year, there was a substantial reduction, modification of residential setting or day/vocational program modification or termination of services. For this purpose, a substantial reduction or termination is defined as any change in service provision which causes a significant change in the person's daily routine and activities, and/or the level/type of supervision and support provided.
- 30.A. The reviewer will assess whether the service plan was modified with the person's/guardian consent. This would be reflected by a person's/guardian's signature on the treatment plan/ISP/EISP and/or the clinical team meeting/staffing notes. The reviewer will assess whether the service plan modification was done in accordance with AAC Ch.21 R9-21-314. N/A if No to 30.
- 30.B. The reviewer will assess whether the changes were clinically indicated or appropriate. N/A if No to 30.

IV. Service Planning/Treatment Planning

COMMENTS

29. Is the service/treatment plan revised as necessary based on progress, lack of progress and/or significant behavioral health needs?	YES NO N/A	N/A if No to 30.
30. During the past year, was there a substantial reduction of services, a substantial modification of a residential setting or day/vocational program, or a termination of services?	YES NO	
A. If yes, was the person's ISP modified with their consent or consistent with the ISP rules (Appendix C.5)?	YES NO N/A	
B. If yes, were the changes clinically indicated/appropriate?	YES NO N/A	

V. Service Delivery and Progress

31. N/A if the person reviewed has been enrolled in continuous services past year.
32. (Skip this question if in Maricopa County) Is there evidence that the RBHA/service provider is providing the services as described in the service plan? If unable to determine rate item NO.
33. (SMI Only) Review the provider plan and compare it to the ISP in order to make this determination. List the name of each provider
YES = The provider plan is consistent with the ISP
NO = The provider plan is not consistent with the ISP, or the reviewer is not able to determine whether it is consistent with the ISP
N/A = There is no provider of service in addition to the RBHA
34. (Skip this question if in Maricopa County) Examples of basic needs include adequate food, safe housing, satisfactory cooling/heating, free from obvious danger, and that existing physical health care needs are being addressed. The auditor should not rate this item until the record review and all interviews are completed.
35. (Skip this question if in Maricopa County) The auditor should not rate this item until the record review and all interviews are completed. The reviewer will make a determination if the person's behavioral health treatment needs, including substance abuse needs, are satisfactorily addressed.
36. After reviewing the person's record including assessments, treatment/service plans, progress notes and medication logs, the reviewer will make a determination of whether the person is prescribed behavioral health medications. The medications may be prescribed through the RBHA, a RBHA contracted provider or a private/non-RBHA provider of service.
37. A. Review the information from the record including the physician/nurse practitioner/nurse/physician's assistant progress notes, evaluations or assessments to ascertain whether the behavioral health medication benefits and risks were explained to the person/guardian.
B. A qualified staff is the psychiatrist, nurse practitioner, registered nurse, physician's assistant.
38. Evidence that the person/guardian provided either verbal or written consent to take psychotropic medication can be located in the physician/nurse practitioner progress notes, consent forms, or team meeting notes. An answer of YES indicates that the person/guardian gave informed consent indicated by the person having the cognitive capacity at the time of the consent to make the decision. An answer of NO indicates that the person/guardian either did not provide verbal or written consent, or that despite having documentation of verbal or written consent, the person did not have the cognitive capacity to make the decision. An answer of NO would also be given if the person/guardian provided verbal or written consent for some, but not all, medications. N/A would mean the person is not taking psychotropic medications.
39. N/A if no ECT or surgically related procedures to address mental health conditions were initiated as part of the person's treatment.

V. Service Delivery and Progress

COMMENTS

31. Is service delivery timely (first service or first case management contact within 30 days of intake)?	YES NO N/A										
32. Are on-going services delivered per service/treatment plan? (Skip if Maricopa County)	YES NO N/A										
33. Is the provider plan consistent with the ISPT? Specify name of provider: Provider #1: _____ Provider #2: _____ Provider #3: _____	<table border="0"> <tr> <td>YES</td> <td>NO</td> <td>N/A</td> </tr> <tr> <td>YES</td> <td>NO</td> <td>N/A</td> </tr> <tr> <td>YES</td> <td>NO</td> <td>N/A</td> </tr> </table>	YES	NO	N/A	YES	NO	N/A	YES	NO	N/A	
YES	NO	N/A									
YES	NO	N/A									
YES	NO	N/A									
34. Are the person's basic needs addressed? (Skip if Maricopa County)	YES NO	* Explain what action taken or referrals made									
35. Are all the behavioral health treatment needs adequately addressed? (Skip if Maricopa County) If no, please list unmet needs:	YES NO										
36. Is the person currently prescribed behavioral health medications?	YES NO	* If NO go to question # 39 (FYI No is positive)									
37 A. Is there documentation that the person received an explanation of the benefits and risks of the medication?	YES NO N/A										
37 B. Is there evidence that the explanation was provided by qualified staff?	YES NO N/A										
38. Is there evidence that the person/guardian provided verbal or written consent to take the psychiatric medication? Appendix C.11.	YES NO N/A										
39. Is there documentation of adequate informed consent to ECT or surgically related procedures to address mental health conditions? Appendix C.11.	YES NO N/A										

40. Indicators for the need for medications should be documented in the Physician/Nurse Practitioner/Physicians Assistant/ Psychiatrist progress notes, evaluations, or assessments.

41. After reviewing the record, the reviewer should note any instances of the person experiencing allergic symptoms or severe side effects to medication and make a determination if follow up and/or treatment was provided by the clinical team.

42. Through review of the person's record, including progress notes, assessments and medication logs, the reviewer will look for evidence that the behavioral health medications have been reviewed by a Nurse Practitioner, Physician, Physicians Assistant or Psychiatrist at least quarterly.

43. "Antipsychotic medications are utilized to treat nearly all forms of psychosis, including schizophrenia, Schizoaffective disorders, affective disorders with psychosis, and psychosis associated with organic mental disorders."

The medications include those that have long-term, potentially irreversible movement disorder:

Generic Name	Brand Name	Generic Name	Brand Name	Generic Name	Brand Name
Amoxapine	Asendin	Haloperidol	Haldol	Perphenazine	Trilafon
Chlorpromazine	Thorazine	Loxapine	Loxitane	Risperidone	Risperdal
Clozapine	Clozaril	Mesoridazine	Sereniti	Trifluoperazine	Stelazine
Fluphenazine	Prolixin	Molindone	Moban	Thiothixene	Navane
Olanzapine	Zyprexa	Perphen - Amitrip	Triavil	Thioridazine	Mellaril

Through review of the person's record, including psychiatric or nursing assessments, progress notes and/or any form designed to document movement disorder assessment or testing, the reviewer will determine if testing assessment is completed and the frequency of the assessment by circling the appropriate box. The reviewer will indicate the evidence found to determine their answer by circling/writing in the appropriate response.

44. Consider information obtained from, progress notes, assessments, treatment notes, service/treatment planning determine if the person does not take the medication as prescribed. N/A would be applicable if the person is not on any medications.

45. Review the staffing notes, progress notes, physician and nursing notes, and other information in the medical record to ascertain if there is a documented plan directed at taking medications as prescribed. Either A, B or C are required in order to answer YES.

46. Review service/treatment plan to ascertain the frequency of clinic appointments for the person. After reviewing progress and staffing notes the reviewer will make a determination if follow-up/outreach actions were completed for any missed appointments.

V. Service Delivery and Progress

COMMENTS

40. Is the need for psychotropic medications clearly indicated?	YES NO N/A	* Explain a NO response
41. If there are adverse reactions to medications, (including allergies/side effects) is there documentation of follow-up and remedy?	YES NO N/A	
42. Are medications reviewed by a Nurse Practitioner, Physician, Physician's Assistant, or Psychiatrist at least quarterly?	YES NO N/A	
43. For individuals taking Antipsychotic medication, is testing/assessment for movement disorders documented?	YES NO N/A	* If YES, explain
A. If yes, circle frequency:	Yearly	* If YES, explain
B. Evidenced by (circle)	AIMS Assessment	* If YES, explain
C. For DDD/ALTCs children and adolescents, who are taking Antipsychotic medication, is AIMS testing documented at least two times yearly?	YES NO N/A	
44. Is there documentation that the person does not take the medicine as prescribed?	YES NO N/A	* If YES, explain
45. If <u>yes</u> , is there documentation any of the following steps have been taken:	YES NO N/A	
A. assist the person to take the medication as prescribed	YES NO N/A	
B. change to a medication or dosage more acceptable to the person		
C. change to a treatment plan more acceptable to the person		
46. Is follow-up or outreach documented following missed medication or treatment appointments?	YES NO N/A	

VI. COORDINATION OF CARE WITH PCP/OTHER AGENCIES/FAMILY

47. Evidence that treatment has been coordinated would include correspondence to a PCP/medical physician or other agency describing treatment and/or services being provided; information received from a PCP/medical physician or other agency that is reflected in treatment or services provided; or documentation such as progress notes or signatures on plans that the PCP or other state agency participated in a staffing or ISP meeting. N/A is applicable if there is no primary care/medical physician or other agency involved and if intake was prior to 4/1/94.

Communication with the PCP could be documented in the form of written correspondence or physician, nurse or case manager progress notes.

For TXIX persons, a consent to contact the PCP is NOT REQUIRED. For NON-TXIX persons, a consent to contact the medical provider IS REQUIRED.

48. & 49 Evidence of family/guardian involvement would include signatures on plans, names listed as attending staffing or ISP meetings, and/or progress notes that reflect conversations or other input from family members or guardians.

VI. COORDINATION OF CARE WITH PCP/OTHER AGENCIES/FAMILY

COMMENTS

47. A. Is there evidence that behavioral health care has been coordinated with: the primary care physician:					
1. at initiation	YES	NO	N/A		
2. periodically during on-going treatment (write in an estimate of how often i.e. monthly, quarterly, yearly, one time only, sporadically)	YES	NO	N/A		
3. regarding sentinel events (hospitalization, change in class of medication)	YES	NO	N/A		
B. Other agency (previous or current service agencies CPS/AAPS, Medicare funded services, etc.)	YES	NO	N/A		
Specify					
1. periodically during on-going treatment (write in an estimate of how often i.e. monthly, quarterly, yearly, one-time only, sporadically)	YES	NO	N/A		
2. regarding sentinel event (hospitalization, change in class of medication)	YES	NO	N/A		
48. Is there evidence that the guardian is informed regarding behavioral health treatment?	YES	NO	N/A		
49. As appropriate and with consent from the person, is there evidence that the family or the guardian is involved and informed regarding behavioral health treatment?	YES	NO	N/A		

VII. Inpatient Care and Coordination of Care

50. Complete this section only if the person had an admission within the past 12 months to an inpatient hospital, RTC for person under 21, JCAHO level I, or PHF. If the person has had multiple hospitalizations use information from the most recent admission only. If the person has not been in an inpatient setting within the last 12 months, skip the remainder of this section.
- 51.A The reviewer will determine whether the clinical record contains documentation describing the inpatient treatment and discharge plan (ITDP). Evidence of the plan may be found on a document entitled Inpatient Treatment and Discharge Plan, or documentation of the plan for inpatient services and services to be provided at discharge may be found on a staffing note or progress notes. Documentation describing the ITDP should be found for any inpatient psychiatric admission, regardless of whether the RBHA is funding the admission.
- 51.B The reviewer will determine whether the ITDP reflects the individual's preferences and strengths based on the plan's contents.
52. The reviewer will determine through a review of progress notes, clinical team meeting/staffing notes and treatment plan/ISP/EISP/ITDP whether an ITDP was developed by the tenth day of an inpatient stay.
53. After reviewing the plans developed by the community clinical team and the inpatient treatment team, the reviewer will ascertain if the inpatient plan is consistent and/or reflective of the goals identified by the person in the community plan. An answer of N/A would mean that there is not an existing service or treatment plan.
54. Evidence of participation would include signatures on plans, names listed as attending staffings or ISP meetings, and/or progress notes reflecting conversations or other input.
55. Through review of the clinical record, including the progress notes, staffing notes and treatment plan, the reviewer will determine if a discharge staffing was held for any acute hospital stay over 72 hours. (Child/Adolescent ALTCS or DDD only)
56. Notice may be in the form of mailed or faxed correspondence or documentation of phone notice. This item is N/A if no other agency case managers assigned. (Child/Adolescent ALTCS or DDD only)

VII. Inpatient Care and Coordination of Care

COMMENTS

50.	Has the person had an inpatient admission within the last 12 months? (If NO skip the remainder of this section)	YES	NO	
51. A.	Is there a written document describing the inpatient treatment and discharge plan?	YES	NO	N/A
51. B.	Does it reflect the individual's preferences and strengths	YES	NO	
52.	Was an inpatient treatment and discharge plan developed by the tenth day of the inpatient stay? (NA in inpatient/stays of seven days or less) Appendix C.12.	YES	NO	N/A
53.	Is the inpatient treatment and discharge plan consistent with the community service or treatment plan? Appendix C.12.	YES	NO	N/A
54.	Did the following individuals participate in the development of the inpatient treatment and discharge plan?			
	A. The person	YES	NO	N/A
	B. Guardian, family member, or designated representative, if applicable	YES	NO	N/A
	C. Case manager or outpatient team/staff member	YES	NO	N/A
	D. Other (specify)	YES	NO	N/A
	E. Other state agency case manager	YES	NO	N/A
55.	Is the discharge staffing held for any acute hospital stay over 72 hours? (Child/Adolescent ALTCS or DD only)	YES	NO	N/A
56.	Is the case manager notified prior to hospital staffing (Child/Adolescent ALTCS or DD only)	YES	NO	N/A

57. (SMI only) N/A if inpatient stay less than 7 days or less.
59. In reviewing the inpatient or RTC discharge planning documentation, the reviewer will determine if services were planned for the person prior to being discharged from the inpatient or RTC setting. This item is N/A if the person was not hospitalized or in a RTC during past year.
60. In reviewing the inpatient or RTC discharge planning documentation as well as post discharge documentation (progress notes, treatment plan/SP/EISP, clinical team meeting/staffing notes) the reviewer will determine if services were initiated/continued after the person was discharged from the hospital or RTC.
61. The reviewer will determine if the case manager had met with the person within 7 days of the person's discharge.
62. The reviewer will determine whether a person was readmitted to an inpatient facility within 30 days of a previous inpatient discharge.

VII. Inpatient Care and Coordination of Care

COMMENTS

	YES	NO	N/A	
57. Is there evidence the clinical team received a copy of TIDP?				
58. Is there evidence that the case manager or a member of the clinical team met with the person while in the hospital?	YES	NO	N/A	
59. Is there a specific plan to initiate or continue outpatient services prior to discharge from hospital or RTC?	YES	NO	N/A	
60. Is there evidence that outpatient services were initiated/continued after discharge from hospital or RTC?	YES	NO	N/A	
61. Is there evidence that the case manager met with the individual within 7 days of discharge? (SMI only)	YES	NO	N/A	
62. Is there evidence person was readmitted to an inpatient facility within 30 days of discharge?	YES	NO	N/A	

Interviews

(SMI, MARICOPA COUNTY ONLY)

REVIEWER NOTE: If interviews are not scheduled for this case, skip to Summary Questions.

The purpose of the interview is to gain insight into the perspective, knowledge, opinions, preferences, and circumstances of the person interviewed. The interview may present the reviewer with the opportunity to observe first hand someone's communication skills, appearance, manner and working style. The questions presented in interview protocols are intended to elicit certain information. Each reviewer is expected to phrase or rephrase the question(s) as necessary to promote communication, addressing the intent of the questions. The reviewer has the discretion to omit questions that apply to specific service settings or ask additional questions as needed. If issues are identified that require further clarification or input the reviewer may request or conduct additional interviews as needed within the RBHA service delivery system.

Even if asked directly, do not tell the person interviewed that anything is or is not "all right," "okay with me," "does or does not "comply" with any regulation, law or requirement, or any other indication of approval or disapproval. Even if asked directly, do not provide technical assistance or "recommendations" to resolve or improve issues.

1. Did you participate in the development of the ISP?	
2. How often does the clinical team meet to discuss the needs and progress of the individual?	

XI. Provider Interview

155. Do you/your agency have a separate treatment plan for this person?	YES NO N/A
156. Is your plan consistent with the ISP? Explain:	YES NO N/A
156.A. Are there any current immediate medical issues that relate to the person's ability to function? Explain:	YES NO N/A
156.B. If yes, are they being addressed? Explain:	
157. In your opinion, are this person's day activities appropriate with respect to the person's needs and capabilities?	YES NO
158. In your opinion, is this person's current living situation appropriate?	YES NO
159. Does this person have a positive ongoing relationship with another person?	YES NO
160. Do you hear in a timely manner about emergency service contacts, hospitalizations or significant non-involvement with services/tx?	YES NO N/A
161. Do you feel that you are adequately trained to meet the person's needs/provide requested services?	YES NO
162. Additional information/questions.	

XII. Family Member/Guardian/Designated Representative Interview

Name of person interviewed:

Relationship to class member:

COMMENTS

163.	Tell me about the person		
164.	Does the team include you in treatment decisions? Appendix C.2	YES NO N/A	
165.	Does the team consider your opinion regarding the effectiveness of current or previous treatment?	YES NO N/A	
166.	Overall, does the person appear to have benefited from the services provided?	YES NO N/A	
167.	(For Title 36 guardians only) Did you receive a copy of the service plan?	YES NO N/A	

XII. Family Member/Guardian/Designated Representative Interview

COMMENTS

	(For Title 36 guardians only) Do you have access to the person's clinical record?	YES	NO	Explain a NO response.
168.				
169.	Additional information/questions.			

Summary Questions for Case File Review Tool

The reviewer should base his/her evaluation on the information previously reviewed and should not identify new or conflicting issues to what has been determined prior to completing this section. The reviewer's opinion and conclusions in the summary section must be derived from information contained in (1) the client and/or provider record including: progress notes; provider reports/documentation; assessments; service/treatment plans; and other documents and (2) information obtained during interviews.

The following areas are not inclusive but should be considered when completing the summary questions. Summary questions should only be completed by the reviewer after all components of the case review process have been completed, including the case manager/provider record review, interviews with the member, case manager/provider and family member/guardian/designated representative when appropriate and a home visit with the member.

XIII. Process Summary

170. The reviewer should consider the following to determine whether the case manager/case coordinator knew the person:
- Participation in assessments and service treatment planning (including provisional/emergency/interim/ISP/EISP)
 - Identification of strengths, preferences and needs
 - Components of the comprehensive assessment including identification of additional/further assessments or evaluations needed
 - Knowledge of progress/lack of progress or emerging needs
 - Revisions or modifications of the service/treatment plan based on the above
 - Coordination and communication with involved people/agencies

171. & 172. The reviewer will determine after the clinical record review and interviews whether the person received sufficient information regarding their assessments and service plans which would allow them to give informed consent to treatment. Sufficient information may be defined as the person having knowledge of their identified areas of need, diagnosis(es), recommendations of the clinical team, a description of available services, a description of recommended services, length of service recommended and/or expected outcomes.

173. After review of information contained in the clinical record and conducting all interviews, the reviewer shall determine whether the person has received a comprehensive assessment that provides enough information for the clinical/provider treatment team to develop a treatment/service plan.

YES = all behavioral health issues and needs identified through the clinical review and interview process were identified, adequately assessed and documented.

NO = all behavioral health issues and needs were not identified or adequately assessed and documented.

N/A = the person has been in services less than 30 days.

XIII. Process Summary

Based on all information obtained and utilized professional judgment; in the reviewer's opinion:

170. Does the case manager/case coordinator know the person? Explain:	YES	NO
171. Was the individual/guardian provided with sufficient information on the assessment so they are able to give informed consent to treatment?	YES	NO
172. Was the individual/guardian provided with sufficient information on the service plan so that they are able to give informed consent to treatment.	YES	NO
173. Is the assessment information available and sufficient for the clinical team/provider treatment staff to formulate a service/treatment plan?	YES* NO* N/A*	* explain all responses

174. Consider the following to determine whether there is adequate communication among involved parties:
- Input from person/family/guardian/significant others included in the assessment and service/treatment planning process
 - Plan reflects service providers
 - Service/treatment plan modified with the person's consent
 - Person received an explanation of risks and benefits of medication
 - Case manager informed of crisis services
 - Revisions and modifications of plan is based on progress and/or emerging needs
 - Provider plan is consistent with ISP/EISP
 - Follow up and outreach
 - Communication with PCP and other involved agencies
175. The reviewer will determine through interviews and through documentation in progress notes, ISP/treatment plans, assessment information and other clinical record documentation whether the person meaningfully participated in the planning or development of their ISP/treatment plan.
176. A. Consider the following to determine whether services provided are timely:
- Time frames of intake, assessments, service/treatment plans (provisional/emergency/interim, ISP/EISP) and service delivery/completed
 - Services consistent with the service/treatment plan
 - Medication risks and benefits explained
 - Follow up/remedies initiated for adverse reactions and movement disorder assessment, if required
 - Outreach and follow up when appointments missed
 - Initiation/continued services following discharge from inpatient or residential services
- B. Consider the following to determine whether services are germane to the need:
- Assessments and evaluations including history of previous treatment
 - Input from person/family/guardian in assessment and service/treatment planning process
 - Use of provisional, emergency, interim and service/treatment plans
 - Plan reflects assessment, diagnosis and personal preferences
 - Steps/methods documented on how goals will be achieved
 - Revision of service/treatment plan as necessary based on progress or emerging needs
- C. Consider amount of supervision needed, input from person/family/guardian, privacy, individualized setting, safety issues, person's ability to make personal choices and decisions when determining whether services are provided in the least restrictive setting.
177. The reviewer will determine whether the case manager, clinical team or service delivery system responded in a timely manner to changes in treatment needs and/or life circumstances. Changes in treatment needs may include the person consistently missing appointments, multiple crisis episodes, admission/discharge from inpatient or residential services, etc. Life circumstance may include changes in financial situations, residence, employment, marriage/divorce, birth of a child, etc.
178. The reviewer will determine after the clinical record review and interviews whether the RBHA and provider staff are adequately trained to meet the person's needs. This determination may be based on the staff's self-report, knowledge of the person's behavioral health diagnosis(es) and needs, the staff's assessment and service planning skills, knowledge of available resources/services and ability to implement and monitor requested services.
179. The reviewer will determine through the clinical record review and interviews whether a class member in need of Special Assistance was offered or provided reasonable assistance by ADHS or the RBHA. An answer of N/A means the individual was not in need of Special Assistance.

XIII. Process Summary

174. Was there documentation of adequate communication among involved parties?	YES	NO
175. Did the class member meaningfully participate in the planning and development of their ISP (if one exists), or their treatment plan (if no ISP is available)?	YES	NO
176. During the time period examined, the services provided are: A. timely B. germane to the need C. provided in the least restrictive manner possible Explain:	YES YES YES	NO NO NO
177. Does the case manager, clinical team and/or service system respond to changes in the person's treatment needs and/or life circumstances in a timely manner?	YES	NO
178. Are RBHA and provider staff adequately trained to meet the person's needs?	YES	NO
179. Were class members in need of Special Assistance offered or provided reasonable assistance by ADHS or the RBHA in the ISP and grievance processes.	YES	NO N/A

XIV. Outcome Summary

180. Consider the following to determine whether the person is treated with dignity and respect:
- Indication that the person is treated as a unique and valued individual
 - Individual's rights are honored and protected
 - Provision of special assistance when applicable
 - Participation in the planning process
 - Person's input, preferences, choices and personal goals are included in the planning
 - Changes in the person's circumstances are responded to by the clinical team
 - Cultural diversities are recognized and respected by the clinical team
181. The reviewer should consider the following to determine whether the person/guardian is aware of their right to file a grievance or treatment appeal:
- Documentation or evidence of notification of rights
 - Assessment and/or provision of special assistance
 - Changes or modification of service/treatment plan
 - Reduction or termination of services
182. Consider the following to determine whether the individual's rights have been honored and observed:
- The level of person's involvement in decision-making
 - Person's choices are honored whenever possible
 - Person is informed of their right to file a grievance or appeal
 - Person's freedom from discrimination
 - Person engages in religious practice, communicates and associates with others as they choose
 - Person's level of involvement in generic/community based activities

XIV. Outcome Summary

180. The person is treated with dignity and respect by the following:			
A. RBHA staff	YES	NO	N/A
B. Provider staff	YES	NO	N/A
C. Other (specify) _____	YES	NO	N/A
D. Overall, is the person treated with dignity and respect? Explain:	YES	NO	NO
181. The person/guardian are aware of their rights to file a grievance or treatment appeal? Explain:			
	YES	NO	NO
182. The individual's rights are honored and observed?			
	YES	NO	NO

183. The reviewer may utilize information obtained through the clinical record review and interviews in completing this section. If no change has occurred during the past year, the reviewer should select the N/A response.

XIV. Outcome Summary

183. Have there been any of the following outcomes while in service the past year:					Explain
A.	Injury/accident requiring medical attention	YES	NO	N/A	
B.	Physical or sexual abuse	YES	NO	N/A	
C.	Hospitalized for medical condition	YES	NO	N/A	
D.	Homelessness	YES	NO	N/A	
E.	Victim of crime, i.e. assault, theft, etc.	YES	NO	N/A	
F.	Mortality	YES	NO	N/A	
G.	Involvement in the criminal justice system (including incarceration)	YES	NO	N/A	
H.	Lost eligibility for financial entitlements	YES	NO	N/A	
I.	Psychiatric symptom reduction	YES	NO	N/A	
J.	Maintained compliance with prescribed behavioral health medications?	YES	NO	N/A	
K.	Maintained compliance with other behavioral health services?	YES	NO	N/A	
L.	Employed for part or all of year?	YES	NO	N/A	
M.	Attended school, training or participated in volunteer activities?	YES	NO	N/A	
N.	Improved relationships with peers, family, friends, neighbors, etc.?	YES	NO	N/A	
O.	Improved personal appearance/hygiene?	YES	NO	N/A	
P.	Participated in community events/activities?	YES	NO	N/A	
Q.	Better off financially?	YES	NO	N/A	
R.	Economic Self-sufficiency?	YES	NO	N/A	
S.	Other/specify (i.e. used illegal drugs, frequent abuse of ETCH, become unemployed)	YES	NO	N/A	

184. A. Consider the following to determine whether services are effective:
- History of past treatment
 - Benefits of current and previous services
 - Consistent with needs and capabilities
 - Participation in services and need for follow up or outreach
 - Progress notes
184. B. Consider amount of supervision needed, input from person/family/guardian, privacy, individualized setting, safety issues, person's ability to make personal choices and decisions when determining whether services are provided to maximize the person's independence/community integration.
185. Evidence in record regarding adequacy of food, clothing and shelter should be considered to determine if the person's basic needs have been met.
- Input from person, family and guardian
 - Assist in obtaining and coordination regarding medical treatment for major medical conditions
186. A. Is there evidence that the living situation is sufficient to address the person's behavioral health needs such as the type and amount of support needed. This could be helping with medications, assisting/arranging transportation to appointments, encouraging the person, etc.
186. B. Is there evidence that the day/work situation is sufficient to address the person's behavioral health needs such as opportunities for personal growth, financial self sufficiency, development of new skills and enhancement of self esteem.
186. C. Is there evidence that the social/leisure situation is sufficient to address the person's behavioral health needs such as providing activities that are enjoyable, developing/maintaining personal relationships, involvement in community activities, etc.

XIV. Outcome Summary

<p>184. During the time period examined, the services provided:</p> <p>A. were effective</p> <p>B. maximized individual's independence/community integration</p> <p>Explain:</p>	YES	NO	
<p>185. The person's basic needs are reasonably met?</p>	YES	NO	* Explain any answer
<p>186. The person's behavioral health needs are addressed in the following domains:</p>			
A. living situation. Explain:	YES	NO	N/A
B. day/work situation. Explain:	YES	NO	N/A
C. social/leisure situation. Explain:	YES	NO	N/A

187. The reviewer should consider information obtained through the clinical record review and interviews conducted to determine whether the person has a case manager.

188. The reviewer should consider the following to determine whether the person received the case management services (which includes all members of the clinical case management team i.e. psychiatric and nursing services, etc.).
- Components of the comprehensive assessment including identification of additional/further assessments or evaluations needed
 - Determination of need for special assistance
 - Provisional/emergency services provided
 - Service/treatment plan including goals/preferences of the individual and needed skills/supports
 - Revisions or modification of the service/treatment based on progress/lack of progress and/or emerging needs
 - Service delivery consistent with service/tx plan
 - Follow up and outreach following missed appointments
 - Coordination and communication with involved people/agencies
 - Advocacy
 - Assigned to appropriate programmatic service
 - Basic and Behavioral Health needs adequately addressed

189. The auditor should not rate this item until the record review and all interviews are completed. The reviewer, through interviews and a review of the person's record, including review of the assessment reports, progress notes, treatment plan/SP/ISP reviews, will assess if the person appears to made progress as a result of the services provided. The reviewer would determine this by assessing issues such as progress toward achievement of personal goals, decrease in need for crisis intervention and services, reduction of psychiatric symptoms.

190. Consider the following to determine whether all the behavioral health needs met are consistent with the person's ISP:

- All supports and services identified as needed (through Comprehensive and Functional Assessment, Long Term View and the goals and objectives established by the clinical team) to address the member's behavioral health needs, will be provided.

191. Consider the following to determine whether class members needs are substantially met with the person's ISP:

- Supports and services identified as needed (through Comprehensive and Functional Assessment, Long Term View and the goals and objectives established by the clinical team) to address the member's behavioral health needs will be provided to the extent that the member is supported in working toward achievement of their goals in the least restrictive environment.
- If the ISP is not sufficient to meet the person's needs considered whether the services provided support the person in working toward achievement of his/her goals in the least restrictive environment.

XIV. Outcome Summary

187. Does the person have a case manager?	YES	NO
188. Does the person receive the case management services they need?	YES	NO
189. The person has made progress as a result of the services provided? Explain:	YES	NO
190. For priority clients, are all the behavioral health needs met, consistent with their ISP or treatment plan? Appendix C.7. [SKIP IF NOT A PRIORITY CLIENT] Explain:	YES	NO
191. For class members, their behavioral health needs are substantially met consistent with their ISP or treatment plan? Appendix C.8. [SKIP IF PERSON IS A PRIORITY CLIENT] Explain:	YES	NO

XV. Recommendations and Comments

Directions for Recommendations and Comments

The reviewer will document issues/comments and recommendations related to client specific issues or broader system issues that were identified through the course of the case file review. If the person had not previously been identified as a priority classmember, but through the course of the case file review is determined to meet the criteria for a priority classmember this should be listed in the Issues/Comments Section below. Upon the reviewer's completion, this section of the tool will be provided to the RBHA clinical or administrative staff designated to coordinate or provide follow-up to the issues presented. Once the recommendations and issues have been addressed, the QM coordinator is to receive a response back, including actions recommended/taken and time frames for completion.

CLIENT EVALUATION OF SERVICES

Please help the Arizona Department of Health Services/Behavioral Health Services to evaluate the services you have received from your provider. We are interested in your honest opinion and all responses are confidential. Thank you!

Please circle the number of the response which best describes how you feel:

1. When you first came to the program, how long was it until you began receiving services?

1	2	3	4	5
Immediately	1-7 days	1-2 weeks	2 weeks to 1 month	Over 1 month

2. I am satisfied that my Individual Service Plan is being followed.

1	2	3	4	5
Always	Usually	Sometimes	Seldom	Never

3. I am treated with dignity/respect by staff.

1	2	3	4	5
Always	Usually	Sometimes	Seldom	Never

4. Staff advise me of my rights as a consumer and I can express complaints without fear of retaliation.

1	2	3	4	5
Always	Usually	Sometimes	Seldom	Never

5. The clinic/office is conveniently located.

1	2	3	4	5
Yes, very	Yes, fairly	Somewhat	No, not very	No, not at all

6. The clinic/office offers convenient appointment times.

1	2	3	4	5
Yes, very	Yes, fairly	Somewhat	No, not very	No, not at all

7. Overall, I am satisfied that the services I have received have helped me to deal better with my problems.

1	2	3	4	5
Yes, very	Yes, fairly	Somewhat	No, not very	No, not at all

8. I would recommend this program to a friend/relative.

1	2	3	4	5
Yes, definitely	Yes, probably	Not sure	No, probably not	No, definitely not

Demographics — (This portion of the survey is completely optional. The data obtained from this section is used to determine whether or not the program treats members of certain categories differently.)

Age of client

1	2	3
Under 18	18 — 65	Over 65

Gender of client

1	2
Male	Female

Ethnicity of client

1	2	3	4	5	6
Caucasian	Hispanic	Black	Native American	Asian	Other

AHCCS status of client

1	2	3
Enrolled	Not enrolled	Not sure

Do you have any other comments or suggestions about the program?

PROVIDER PROFILE

COMCARE PROVIDER QUALITY REVIEW PROTOCOL

INTRODUCTION

The COMCARE Provider Quality Review Protocol describes the components of and methodology for the provider review process as well as how the information collected will be used to profile providers, determine contracting and re-contracting, and improve the quality of care/services in the provider network.

The Director of the Provider Relations Department is responsible for the oversight of the Provider Quality Review Protocol and process. The process includes assessment of provider performance in the following areas:

1. Fiscal and Service Audit
2. Contract Provision Compliance Audit
3. Quality Management Program Audit
 - Quality Management Review
 - Case Review
 - Service Program Review - SMI Providers
 - Training Review
 - Member and Family Member Satisfaction

The Provider Quality Review Protocol includes, but is not limited to, elements required by AHCCCS, ADHS/BHS, the BHS Exit Criteria QM Plan, the SMI Rules or R9-21, and the COMCARE Subcontract.

GOALS

The goals of the Provider Quality Review process include:

- To determine that the provider has an efficient system by which funds are utilized accurately and effectively to deliver services to COMCARE members through the contracted provider network.
- To determine that the provider complies with the COMCARE Subcontract provisions.
- To determine that the provider has an effective Quality Management Program inclusive of required policies, procedures, and practices.
- To determine that the provider medical records meet minimum standards for documentation, that required clinical and administrative processes are performed, and that service/care rendered is effective, satisfactory and leading to desired measurable outcomes.
- To determine that residential and non-residential provider programs for adults with Serious Mental Illness meet minimum standards in the areas of human rights, member rights, individual service planning, as well as grievance and appeals.
- To assess the level of provider compliance with training requirements and the level of staff competency acquired.
- To assess the level of member satisfaction with provider network services and programs.
- To improve the quality of care/service through: analysis of data collected and displayed via provider profiling; reallocation of resources; program development and implementation responsive to identified needs; and continued follow up to assess effectiveness of corrective actions warranted as necessary and resulting from the review process.

COMCARE uses a team approach to conduct the Provider Quality Review. Team membership includes representatives from operational areas within COMCARE including the: Quality Improvement Section; Fiscal Provider Audit Section; and Program Administrators from the Provider Relations Department. Team membership may include a physician or psychologist as deemed necessary by COMCARE.

The Provider Quality Review Process begins with an **Administrative Review** which is conducted by the COMCARE Review Team prior to visiting the provider agency's location. The provider agency visit is known as the **On-Site Review**. Each discipline conducts their own Administrative Review prior to the agency visit. Prior to the ON-Site Review the Team convenes to discuss and problem solve any last minute issues.

This document will detail the content of the **Administrative Review** and the **On-Site Review** for each of the areas listed above.

Each provider is reviewed annually according to an established schedule. An Exit Interview is conducted at the conclusion of the **On-Site Review** wherein the Team members disclose findings from the Administrative and On-Site Reviews and formulate preliminary recommendations. Within two weeks of the Exit Interview each discipline of the Review Team will draft their respective reports. The Program Administrator merges these reports into the Comprehensive Provider Quality Review Report, a written report of findings, recommendations, and/or request for corrective action. The report is to be submitted to the provider within 30 days of the date of the **On-Site Review**. The Director of Provider Relations signs off on all reports sent to subcontracted providers.

1. FISCAL AND SERVICE AUDIT

- **GOAL:** To determine that the provider has an efficient system by which funds are utilized accurately and effectively to deliver services to COMCARE members through the contracted provider network.

Data Collection Instrument: The printed document resulting from the EDS paid claims sample becomes the Claims Review Worksheet for the Provider Fiscal Auditor with the addition of three columns to contain the auditors notes related to supporting service documentation, authorization documentation, and comments related to a specific claim under scrutiny. ***See Attachment A for a sample of the Claims Review Worksheet.***

A. The **Administrative Review** includes the following processes conducted by the Fiscal Provider Auditor assigned to the provider agency scheduled for review:

- 1) Review the provider contract to identify the Fee Schedule and document the total contract maximum; the fund type maximum; the covered services/rates; and identify/document any special provisions.
- 2) Review the provider's financial statements; rate worksheet; allocation; and information contained in the Provider Relations' file.
- 3) Review all external audit reports for findings and responses.
- 4) Determine if claims submitted and paid through EDS agree to the Fee Schedule in the provider subcontract.

- 5) Prepare a statistical sample for review using attribute sampling of the EDS paid claims with the population being all paid claims to the provider during the period covered by the test date range.
 - 6) Determine the tolerable deviation rate.
 - 7) Determine expected population deviation rate by estimating how often a provider's internal control procedure was not performed when it was prescribed.
 - 8) Determine acceptable risk of over reliance/confidence level.
 - 9) Run report listing the sample of paid claims for the provider with a test period of one retrospective fiscal year. Include any high dollar or unusual claims selected for review in addition to the sample selected for review with the reason for the selection documented.
 - 10) Determine deviation and deficiencies through inspection of the paid claim to see if there are differences noted between the service rate paid and the service rate authorized in the provider contract.
 - 11) Notify the provider's and COMCARE's management of scheduled **On-Site Review** dates.
- B.** The **On-Site Review** is then performed by the Team. During the **On-Site Review**, the following processes are conducted by the assigned Fiscal Provider Auditor:
- 1) Ensure that all payments made to the provider are supported by proof of service and that service approvals are made by an authorized person who is different than the person initiating request for payment.
 - 2) Determine if claims submitted and paid through EDS are for authorized services provided to the member.
 - 3) Determine if claims paid to the provider agree with the source documents for the services provided to the member.
 - 4) Determine deviation and deficiencies through inspection of the source document to determine adequacy of service documentation and authenticity of claim.
- C.** The Fiscal Provider Auditor verifies the deficiencies with the provider. If the deficiencies found during the review are in excess of the tolerable deviation rate, or there appear(s) to be reason(s) to doubt the integrity of the provider process, additional test work may be performed in order to evaluate the effects of the lack of provider control.

If additional test work is indicated, the Manager of Fiscal Provider Audit will notify COMCARE management and the provider management of any change in the audit scope. The following will occur for those providers identified with significant discrepancies:

- COMCARE will only recoup moneys based upon the specific errors identified during the initial audit of those providers found to have significant discrepancies.
- The provider will be required to respond to COMCARE with an appropriate corrective action plan.

- A follow-up audit will be performed after approximately six months following the implementation of the corrective action plan. The test will be based on activity of that six month period.
- If the follow up audit reveals continued significant discrepancies, COMCARE will extrapolate the potential misstatement based upon the sample from the tested six month period.

Requests to the provider to repay dollar amounts of misstatement for the population of claims paid to the provider or to repay the difference on a specific claim is a COMCARE management decision.

Reporting and Feedback Loops:

- D. The Fiscal Provider Auditor prepares a written report of the:
- 1) Review of the provider's internal control procedures including reports, findings, and responses noted during the Administrative Review and related to the provider's compliance with:
 - a). the OMB Circular A-133 requirements for a single audit (findings, corrective actions documented, corrective actions verifiable);
 - b). external audits (findings, corrective actions documented, corrective actions verifiable); and,
 - c). internal reviews (findings, corrective actions documented, corrective actions verifiable).
 - 2) Deficiencies noted for each claim in the sample. Differences noted in rates and other dollar amounts discovered during the review of a particular claim must be reported according to the Single Audit.
- E. During the Provider Quality Review Exit Interview, the Fiscal Auditors verbally provide an overview of their Administrative and On-Site Review findings and suggests some initial recommendations. A detailed report of findings, specific recommendations and requested corrective actions, if applicable, will be submitted to the provider in the form of a Comprehensive Provider Quality Review Report within 30 days of the Exit Interview. A copy of all correspondence relative to the audit process will be maintained in the provider's file by the Program Administrator.

Providers will have 14 working days to respond with their plan of correction. The plan of correction will be reviewed by the Fiscal Auditors and staffed with the Director of Finance as necessary. A letter acknowledging receipt and acceptance of the plan of correction will be returned to the agency. The letter will also specify a tentative date and time for a follow up visit specifically to review the agency's effectiveness in implementing the plan of correction.

- F. The Manager of Fiscal Audits reports the findings of regularly scheduled and follow-up audits to the Provider Quality Review Committee. The Committee meets two times a month. This group consists of management representation from Provider Relations, Capacity Management, Fiscal, Adult Services, C/A Services, Quality Management, Quality Improvement, Office of Legal Counsel, Office of the Medical Director, and the V. P. of Member Services.

The group hears high level summaries of audit findings and makes recommendations as needed. These recommendations will be included in the final Comprehensive Provider Quality Review Report. In the event of more critical issues, the V. P. of Member Services

takes the issues to COMCARE's Executive Council for an administrative ruling and/or policy decision.

2. CONTRACT PROVISION COMPLIANCE AUDIT

- **GOAL:** To determine that the provider complies with the COMCARE Subcontract provisions.

Data Collection Instrument: *The Provider Quality Review Site Visit Checklist - Basic Contract Requirements* tool is used to collect information associated with the measures contained in this section. **See Attachment A for a sample of this tool.**

A. The **Administrative Review** portion includes a desk review of the provider file at COMCARE by the assigned Fiscal Program Auditor for the following:

- 1) Licensing - the provider holds a current OBHL License according to the ADHS Matrix of licensed providers.
- 2) Licensing - if provider serves adults with Serious Mental Illness, the provider must hold a "restrictive behavior management" level one license in order to seclude or restrain members (R9-21-203).
- 3) Amendments and Notices (per contract) - the provider notifies the COMCARE Director of Provider Relations in writing and 60 days in advance regarding changes in ownership or facility licensure.

B. The **On-Site Review** is then conducted by the Team. The Fiscal Program Auditor reviews provider personnel records, medical records, and administrative records.

- 4) Provider complies with Title VII of the Civil Rights Act of 1964, as amended as evidenced by personnel records.
- 5) Provider complies with the Age Discrimination Act in Employment Act of 1975 as evidenced by personnel records.
- 6) Provider complies the Federal Executive Order 11246.
- 7) Provider complies with State Executive Order #75-5.
- 8) Provider complies with ARS § 41-1461 et. seq.
- 9) Provider complies with Title VI of Civil Rights Act of 1964.
- 10) Provider complies with Section 504 Rehabilitation Act of 1973.
- 11) Provider complies with the Federal Fair Housing Act.
- 12) Provider complies with the Americans with Disabilities Act of 1990 as evidenced by provider programs that have a self-evaluative component for ADA standards; provider policies and procedures directing compliance with ADA standards; and provider posting of ADA notice that informs individuals with a disability of their right to request reasonable accommodations and alternate forms of communication.

- 13) Absence of Interest - verification through staff interview that no RBHA or State Employee benefits financially from the provider's subcontract agreement.
 - 14) Credentialing - Provider staff must be credentialed in compliance with provider policy and procedure, OBHL requirements, and AHCCCS requirements as evidenced by documentation in the provider personnel records.
 - 15) Fingerprint Requirements are met by all child/adolescent staff, any subcontractor of the provider, and staff identified as "restricted" are supervised when with juveniles.
 - 16) Referrals - history of provider accepting all referrals from COMCARE unless the agency has no additional capacity or remaining contract funds.
 - 17) Accounting for Funds - funds are accounted for separately in accordance with ADHS Uniform Financial Reporting Requirements.
 - 18) Institutional Review Board (IRB) for Research - providers must obtain approval for any research projects involving COMCARE members from the provider's IRB or in the absence of such a board, approval must be obtained from the COMCARE IRB.
 - 19) Billing/Payment - history of provider billing to include: billing at least monthly; billing for a service within 90 days of the date of service or within 120 days if Third Party Liability; and re-submission of denied claims within 90 days of the date of denial.
 - 20) Claims Clean Up - provider documentation of efforts to correct and resubmit denied claims.
 - 21) Membership Determinations - history of provider obtaining verification of COMCARE enrollment status of service recipients prior to delivery of services.
 - 22) Enrollment Package - history of provider submission of completed enrollment packet as required by COMCARE policy and procedure.
 - 23) Providers obtain a signed COMCARE Service Authorization - for all services other than inpatient, residential, partial care, or non-emergency transportation as evidenced by documentation in the provider's medical record.
 - 24) Coordination of Benefits: Co-pay - provider assesses and collects co-payment in compliance with ADHS policy and COMCARE policy as evidenced by documentation in the provider's medical record.
 - 25) Coordination of Benefits: Notice to Members - provider informs member of their financial responsibility for non-covered services as evidenced by documentation in the provider's medical record.
 - 26) Coordination of Benefits: Third Party Liability - provider pursues Third Party Liability in compliance with ADHS and COMCARE policy as evidenced by documentation in the provider's medical record.
- C. Deficiencies are noted by the assigned Fiscal Program Auditor on the Checklist tool for each contract compliance measure.

Reporting and Feedback Loops:

- D. During the Provider Quality Review Exit Interview, the Fiscal Auditors verbally provide an overview of their Administrative and On-Site Review findings and suggests some initial recommendations. A detailed report of findings, specific recommendations and requested corrective actions, if applicable, will be submitted to the provider in the form of a Comprehensive Provider Quality Review Report within 30 days of the Exit Interview. A copy of all correspondence relative to the audit process will be maintained in the provider's file by the Program Administrator.

Providers will have 14 working days to respond with their plan of correction. The plan of correction will be reviewed by the Fiscal Auditors and staffed with the Director of Finance as necessary. A letter acknowledging receipt and acceptance of the plan of correction will be returned to the agency. The letter will also specify a tentative date and time for a follow up visit specifically to review the agency's effectiveness in implementing the plan of correction.

- E. The Manager of Fiscal Audits reports the findings of regularly scheduled and follow-up audits to the Provider Quality Review Committee. The Committee meets two times a month. This group consists of management representation from Provider Relations, Capacity Management, Fiscal, Adult Services, C/A Services, Quality Management, Quality Improvement, Office of Legal Counsel, Office of the Medical Director, and the V. P. of Member Services.

The group hears high level summaries of audit findings and makes recommendations as needed. These recommendations will be included in the final Comprehensive Provider Quality Review Report. In the event of more critical issues, the V. P. of Member Services takes the issues to COMCARE's Executive Council for an administrative ruling and/or policy decision.

3. PROGRAM AUDIT

The Program Audit is comprised of several parts including a Quality Management Review; Case Review; Service Program Review - SMI Providers; Training Review; and Member Satisfaction. Each part will be described herein with specific steps associated with the **Administrative Review** and the **On-Site Review**.

Sampling Methodology for Program Audit:

Three weeks prior to an audit the Manager of Quality Improvement requests a query of the COMCARE Impact database for new intakes completed by the agency in the last 6 months. 30 cases are randomly selected, using a sample selection software developed by the Fiscal Section, to be included in the audit. The sample will specify those cases which are case managed versus service coordinated. Records for cases which are case managed are requested two weeks prior to going to the provider agency. They are reviewed using the ADHS/BHS Case Review Tool. The same tool is used to review provider records.

A. *Quality Management Review*

- **GOAL:** To determine that the provider has an effective Quality Management Program inclusive of required policies, procedures, and practices.

Data Collection Instruments: Several tools are used in the Quality Management Review portion of the Provider Quality Review including:

- Provider Quality Review - QM Administrative Review Part A - QM Plan***
- Provider Quality Review - QM Administrative Review Part B - Performance Measures***
- Provider Quality Review - QM On-Site QM Program Review***

The **Administrative Review** includes the following processes conducted by the Quality Improvement Specialist assigned to the provider agency scheduled for review:

- 1) The assigned Quality Improvement Specialist reviews for quality and completeness the provider's Quality Management Plan, Utilization Management Plan, Training Plan, Quarterly Training Reports, and Medical Care Evaluation Studies contained in the provider's file located in the Provider Relations Department. If these documents are not available for review prior to going to the provider agency, the Specialist will ask to review them during the On-Site Review.

Each of the above items has a review checklist outlining the required measures for adequacy and comprehensiveness. The Specialist makes an objective judgment as to the presence or absence of each measure, scores a "yes" or "no" accordingly, and documents his/her comments as deemed necessary. Items 3.A.2 through 3.D will outline these indicators and their measures.

- 2). The provider Quality Management Plan is reviewed for the following elements:

- a). Provisions for an active QM Committee;
- b). Written performance improvement activities including performance standards and indicators as well as outcome indicators;
- c). Written Peer Review OR Case Review policy, procedure, and practice of same as evidenced by documentation, minutes, or summaries;
- d). Written Medical Records policy and procedure to include:
 - (1). Reflection of all aspects of care provided;
 - (2). Client Information System Intake Form;
 - (3). Assessment A;
 - (4). Assessment B;
 - (5). Financial Information Form;
 - (6). Comprehensive Assessment/Evaluation;
 - (7). Individual Service Plan/Treatment Plan;
 - (8). Letter of Authorization/Service Authorization Form;
 - (9). ALFA or CAFAS;
 - (10). Progress Notes;
 - (11). Discharge Summary;
 - (12). Monthly Progress Reports to the Case Manager;
 - (13). Medication and lab sheet;
 - (14). Results of all diagnostic testing and consultations;
 - (15). All other information required by ADHS/OBHL;
 - (16). Informed consent for treatment/services including the intended outcome, nature, and procedures involved in the treatment; the risks, side effects, if any, as well as the risks of not proceeding with treatment; the alternatives to the treatment, including alternatives offering less risk or other adverse effects; and notification that consent can be withdrawn or withheld at any time without any punitive action taken against the member. R9-21-206.F.; and

- (17). Informed consent for medication including: information relating to common risks and side effects of the medication; procedures to be taken to minimize such risks; and, description of any clinical indications that might require suspension or termination of the drug. R9-21-207.A.
 - e). Written policy and procedures for confidentiality of records in compliance with AAC R9-1-311 to R9-1-315; 42 CFR part 2; ARS § 36-663 and 664 re: HIV; and for SMI programs R9-21-209.
 - f). Written policy and procedure for members to present grievances regarding the operations of the program that result in denial, suspension, or reduction of services approved by the RBHA in accordance with COMCARE policy and procedure and for SMI programs, R9-21-401 through R9-21-410.
 - g). Written credentialing , re-credentialing, and privileging policy and procedure for physicians and other behavioral health staff who are licensed by Arizona.
 - h). Written member rights policy and procedure or statement of member rights. For SMI programs, such policy and procedure will be in accordance with R9-20-201 and R9-21-211 including posting of Exhibit A Notice of Legal Rights for Persons with Serious Mental Illness; and member's written acknowledgment of receipt of Exhibit B Notice Discrimination Prohibited for providers of service to adults with Serious Mental Illness. Providers of services to populations other than Seriously Mentally Ill adults will have a written member rights policy and procedure in accordance with ADHS/OBHL R9-20-201
 - l). Written Utilization Management Plan and Medical Care Evaluation Studies for acute level one inpatient and JCAHO residential provider agencies.
 - j). Written policies and procedures in accordance with R9-21-204 Restraint and Seclusion for providers of services to the Seriously Mentally Ill adult population.
- 3) The assigned Quality Improvement Specialist reviews the most recent Member Accessibility Report for provider performance related to accessibility. The Member Accessibility Report is generated by COMCARE's MIS Department and forwarded to the Manager of Quality Improvement on the 10th of each month. The report profiles intakes and first services by provider. The following performance measures are reviewed:
- a). Intakes are performed within 7 calendar days of the date of the referral.
 - b). Intake to first service time frame does not exceed 30 calendar days from the date of the intake.
 - c). Delay reasons for intakes performed beyond the 7 calendar day standard are reported to COMCARE as evidenced by the content of the Member Accessibility Report.
 - d). Failure reasons for intakes not conducted are reported to COMCARE as evidenced by the content of the Member Accessibility Report.
 - e). Delay reasons for first services performed beyond the 30 calendar day standard are reported to COMCARE as evidenced by the content of the Member Accessibility Report.
- 4) To comply with ADHS/BHS requirements, the Quality Improvement Section collects, trends and analyzes provider performance on eligibility determinations and the

adequacy and comprehensiveness of assessments and service planning. This information is also used in profiling provider performance.

- 5) The Office of Legal Counsel is consulted to determine provider compliance with the submission of written incident/accident reports within 5 days as required by COMCARE policy and procedure OLC 110. The OLC forwards a copy of their monthly Seclusion and Restraint Report by the 10th of each month for the previous month. The report will allow the OLC and Quality Improvement to profile providers' performance in this area. As an additional review, three (3) cases included in the sample that have incident/accident reports will be reviewed for timeliness, completeness, and accuracy of documentation. If follow up is required, the timeliness of the provider's response to COMCARE's request and the appropriateness of the follow up will be reviewed.
- 6) The Office of Legal Counsel is consulted to determine that providers of services to the Seriously Mentally Ill submit written reports of incidents of abuse, neglect, mistreatment, denial or rights or exploitation to COMCARE in accordance with COMCARE policy and procedure OLC 110 and OLC 104 and with R9-21-203. B., C., D., and E. The OLC forwards a copy of their monthly Seclusion and Restraint Report by the 10th of each month for the previous month. The report will allow the OLC and Quality Improvement to profile providers' performance in this area.
- 7) The Office of Legal Counsel is consulted to determine that providers of services to the Seriously Mentally Ill submit written reports of restraint and seclusion to COMCARE in accordance with COMCARE policy and procedure and with R9-21-204.Q. and R. The OLC forwards a copy of their monthly Seclusion and Restraint Report by the 10th of each month for the previous month. The report will allow the OLC and Quality Improvement to profile providers' performance in this area. As an additional review, three (3) cases included in the sample that have restraint/seclusion reports will be reviewed for timeliness, completeness, and accuracy of documentation. If follow up is required, the timeliness of the provider's response to COMCARE's request and the appropriateness of the follow up will be reviewed.
- 8) The Office of Legal Counsel is consulted to determine that providers of services to the Seriously Mentally ill submit their grievances and grievance resolutions to COMCARE in accordance with COMCARE policy and procedure OLC 103 and R9-21-401 through R9-21-410.

Once automated, The OLC forwards a copy of their monthly Grievance, Grievance Appeals and Grievance Resolutions Report by the 10th of each month for the previous month. The report will allow the OLC and Quality Improvement to profile providers' performance in this area. If applicable, an additional review of three (3) cases included in the sample that have a grievance or grievance appeal filed will be reviewed for timeliness, completeness, and accuracy of documentation. If follow up is required, the timeliness of the provider's response to COMCARE's request and the appropriateness of the follow up will be reviewed.

- 9) As applicable, Quality Improvement Specialist will review three (3) mortality cases associated with the provider for timeliness of reporting the death and timeliness of submitting their written report of the death.
- 10) Twice yearly ADHS/BHS implements a member satisfaction survey to case managed members and those members receiving outpatient services. The results are profiled by RBHA and by providers within each RBHA. The assigned Quality Improvement Specialist reviews the results of ADHS/BHS surveys and records the provider's most

recent score on the QM Administrative Review Checklist, Part B, Performance Measures

- 11) The **On-Site Review** portion of the Quality Management Review consists of the assigned Quality Improvement Specialist reviewing the provider's Quality Management Committee documentation including minutes and other associated records to assess that the provider has an active QM process and practice in place. If provider policies and procedures are not on file with COMCARE Provider Relations, the assigned Quality Improvement Specialist obtains copies from the provider and reviews them during the **On-Site Review**.

B. Case Review

- **GOAL:** To determine that provider medical records meet minimum standards for documentation, that required clinical and administrative processes are performed, and that service/care rendered is effective, satisfactory and leading to desired measurable outcomes.

Data Collection Instrument: The ADHS/BHS Case Review instrument is used by the assigned Quality Improvement Specialist when conducting Case Review for all populations. The Case Review instrument is designed to assess provider and COMCARE performance in the areas of Assessment; Service Planning/Treatment Planning; Service Delivery and Progress; Coordination of Care with the Primary Care Physician and Family; and Inpatient Care and Coordination of Care.

For purposes of the Provider Quality Review, the Assessment and Service Planning/Treatment Planning sections of the Case Review instrument will apply only to providers which conduct the initial assessment and the initial Service Plan/Treatment Plan for COMCARE members; e.g., Phase IV General Mental Health, Substance Abuse, and Child/Adolescent members. For all cases reviewed involving an adult with Serious Mental Illness or a child/adolescent in Phase I or Phase II case management, the Assessment and Service Planning/Treatment Planning sections apply to the COMCARE initial assessment and Individual Service Plan. ***See Attachment A for a copy of the Case Review Tool. References to R9-21 are located throughout the document.***

- 1) The **Administrative Review** portion of the Case Review process involves the following:
- a). A random stratified sample of cases is selected by ADHS/BHS which COMCARE sorts by provider. If the sample is not representative for the provider under review by the Provider Quality Review Team, COMCARE uses a sampling software to draw a sufficient random stratified sample from EDS/CIS data downloaded to the COMCARE IMPACT system in order to conduct the Case Review.
 - b). Fifteen days prior to the date of the provider **On-Site Review**, the COMCARE medical record is requested by the Quality Improvement Section through the Medical Records Section.
 - c). An assigned Quality Improvement Specialist, who has been trained in the Case Review process and approved by ADHS/BHS, conducts a review of the COMCARE medical record against criteria contained in the Case Review instrument prior to reviewing the provider medical record.

- d). The assigned Quality Improvement Specialist rates each performance measure contained in the Case Review instrument with a "yes", "no", or "not applicable" score and follows all instructions which accompany the instrument. Comments are noted in the comments section. The Specialist completes the Case Review instrument to the extent possible when reviewing the COMCARE medical record.
- 2) The **On-Site Review** portion of the Case Review consists of the assigned Quality Improvement Specialist reviewing the provider's medical record. Additionally, in the case of providers serving adults with Serious Mental Illness, interviews are conducted by the assigned Quality Improvement Specialist with the case manager, the member, involved family member(s) with the written consent of the member, and/or the guardian; and the reviewer's observations are recorded on the Case Review instrument.
- a). The Quality Improvement Specialist assigned to conduct the provider medical record review composes a list of the members' unique identification numbers related to the cases randomly selected for review and sends this list to the provider, via Provider Relations, two (2) working days in advance of the date of the **On-Site Review**.
 - b). For Case Reviews involving adults with Serious Mental Illness, the Quality Improvement support staff arranges case manager, member, and, with consent, family member interview times and locations to coincide with the dates of the **On-Site Review**.
 - c). The Quality Improvement Specialist visits the provider as part of the Provider Quality Review Team in order to review the provider medical records. The provider medical records selected for review are pulled in advance of the review date by the provider staff and are made available to the assigned Specialist in a private location.
 - d). The Quality Improvement Specialist conducts the provider medical record review using the Case Review instrument to record provider performance and findings uncovered during the review process.
 - e). After completing the medical record review portion of Case Review instrument, the Quality Improvement Specialist interviews the member, case manager, involved family members with the consent of the member, and/or guardian. Responses are recorded on the Case Review instrument. Should critical issues relative to health, safety, rights, respect, or dignity become evident, the Quality Improvement Specialist will immediately report these issues to the Manager of Quality Improvement. The Manager of Quality Improvement will request that the Provider Quality Review Committee convene to review the issues and determine and appropriate course of action to intervene on behalf of the members.
 - f). After completing the interviews, the assigned Quality Improvement Specialist completes the Evaluator's Observations section of the Case Review instrument. The Quality Improvement Specialist obtains a copy of both the Individual Service Plan/Treatment Plan and the Comprehensive Assessment and attaches the copies to the completed Case Review instrument as required by the ADHS/BHS instructions.

- g). Upon completion of the entire Case Review instrument, the Quality Improvement Specialist submits it to the QM Data Entry Specialist for input into the COMCARE Case Review Database. Data is then exported from the database into a statistical software program for statistical manipulation and reporting purposes.
- h). During the Provider Quality Review Exit Interview, the Quality Improvement Specialist verbally discloses the Case Review individual and aggregate findings, recommendations, and requested responses and/or corrective actions with the provider.
- i). Each QI Specialist is required to submit at least one case per quarter for supervisory review and discussion. Additionally, the interpretation and implementation of the case review tool are reviewed in large and small group discussions on a regular basis. Outcomes from these discussions are used to ensure all QI Specialists are utilizing the tool and interpreting the data in the same manner. Feedback on the use of the tool, barriers encountered, and suggestions for improvement of the tool is submitted to ADHS/BHS for consideration.

C. *Service Program Review - SMI Providers*

- **GOAL:** To determine that residential and non-residential provider programs for adults with Serious Mental Illness meet minimum standards in the areas of human rights, member legal rights, individual service planning, as well as grievance and investigations.

Service Program Review occurs entirely during the **On-Site Review** via questions included in the **Case Review** instrument which are designed to capture the member's perspective, and additional questions included in the **Provider Quality Review - QM On-Site Service Program Review - SMI Providers instrument (See Attachment A for a sample of the review tools)**.

1). Human Rights - SMI

The following questions are contained in the **Case Review instrument in the Person Interview Section** on pages 30 through 33 in order to test for provider program inclusion and practice of human rights emphasizing the principles of respect, humane treatment, integration, and self-determination. Please see the matrix below for a complete list of the questions asked to the member during Case Review according to service setting.

Questions included in the Case Review Instrument

QUESTION	RULE	ALL	IP	24	SH	DV
PRINCIPLE OF RESPECT						
When you tell someone here what you need or want, what happens?	R9-21-202.A.2.	xx				
Does anything bad ever happen to you here? If so, can you tell me about it?	R9-21-202.A.6.; 203.A.	xx				
Do you have privacy when bathing, using the bathroom, and dressing?	R9-21-202.A.6.	xx				
Can you take a walk or leave when you want to?	R9-21-202.A.1.			xx	xx	xx
Have you ever refused your medication? If so, what happens when you do?	R9-21-202.A.4.; R9-21-207		xx	xx	xx	xx
PRINCIPLE OF HUMANE TREATMENT						
How do you feel you are treated by staff here?	R9-21-202 A.1.; 203.A.	xx				
What happens when you get sick or hurt?	R9-21-202.7.c.	xx				
Do you feel safe here?	R9-21-202.A.6.	xx				
Who do you talk to when you feel scared?	R9-21-202.A.6.	xx				
Have you ever been held down against you will?	R9-21-204	xx				
Do you have your own shampoo, toothpaste, deodorant?	R9-21-202.A.6.		xx	xx	xx	
For females, do you have personal feminine hygiene products when you need them?	R9-21-202.A.6.		xx	xx	xx	
Do you feel at home here? If so, what things make you feel at home?	R9-21-2-2.A.1.		xx	xx	xx	
PRINCIPLE OF INTEGRATION						
Do you have an opportunity to: go to church? go to outside recreation? go shopping? go to educational. and employment activities?	R9-21-202.A.1. and 7.e. R9-21-201.A.5.	xx				

All - All Service Settings
24 = 24 hour residential

IP = Acute Inpatient
SH = Supported Housing

ASH = Arizona State Hospital

2). Member Rights - SMI

In order to test for program inclusion and practice of member legal rights, R9-21-211 Exhibit A., several questions were formulated as part of the **Case Review instrument** which are located in various sections and pages. Please see the matrix below for a reference guide of the questions to be asked to the member or case manager, or answered through documentation review during the Case Review process.

Questions Included in the Case Review Instrument

The right to appropriate mental health services based on your individual needs	R9-21-211 Exhibit A
Questions 1 - 12 in the Case Review instrument - Assessment section	pgs 10 - 16
Questions 16, 17, 18, and 24 in the Case Review instrument - Service Planning Coordination of Care section	pgs 17 - 19
Questions 26, 27, 39, and 40 in the Case Review Instrument - Service Progress and Delivery section	pgs 21 - 24

Questions Included in the Case Review Instrument

The right to participate in all phases of your mental health treatment, including individual service plan (ISP) meetings	R9-21-211 Exhibit A
Questions 3, 5, 10, 11, and 12 in the Case Review Instrument - Assessment section	pgs 10 - 16
Questions 15, 16, 20, 21, 22, 23, 24 in the Case Review Instrument - Service Planning Coordination of Care section	pgs 17 - 19
Questions 29, 37., 38.,40., 41 in the Case Review Instrument - Person Interview section	pgs 32-33
The right to a discharge plan upon discharge from a hospital	R9-21-211 Exhibit A
Questions 47, 48, 49, 50, and 51 in the Case Review Instrument - Inpatient Care and Coordination of Care section	pgs 28 - 29
The right to consent to or refuse treatment (except in an emergency or by court order)	R9-21-211 Exhibit A
Questions 29, 29.b., 30, and 31 in the Case Review Instrument - Service Delivery and Progress section	pg. 21
The right to treatment in the least restrictive setting	R9-21-211 Exhibit A
Question 10 in the Case Review Instrument - Assessment section	pg. 15
Question 61 in the Case Review Instrument - Evaluator's Observation section	pg. 38
The right not to be physically, sexually, or verbally abused	R9-21-211 Exhibit A
Questions 6., 8., and 9. in the Case Review Instrument - Person Interview section	pg. 30
The right to privacy (mail, visits, telephone conversations)	R9-21-211 Exhibit A
Question 12., 16., 28., in the Case Review Instrument - Person Interview section	pgs 30 - 32
The right to file an appeal or grievance when you disagree with the services you receive or your rights are violated.	R9-21-211 Exhibit A
Question 39 in the Case Review Instrument - Person Interview section	pg. 33
Question 10 in the Case Review Instrument - Assessment section	pg. 15
The right to choose a designated representative(s) to assist you in ISP meetings and in filing grievances.	R9-21-211 Exhibit A
Question 11. and 12. in the Case Review Instrument - Assessment section	pg. 15
Question 30. and 31. in the Case Review Instrument - Person Interview section	pg. 32
The right to a case manager to work with you in obtaining the services you need.	R9-21-211 Exhibit A
Question 1. in the Case Review Instrument - Person Interview section	pg. 30
Questions 1 through 16 in the Case Review Instrument - Case Manager Interview section	pgs 33-34
The right to a written ISP that sets forth the services you will receive	R9-21-211 Exhibit A
Question 13 in the Case Review Instrument - Service/Treatment Planning Coordination of Care section	pg. 17
The right to associate with others	R9-21-211 Exhibit A
Questions 7. and 28. in the Case Review Instrument - Person Interview section	pgs 30 & 32

Questions Included in the QM On-Site Service Program Review - SMI Providers Instrument

In addition to the questions contained in the Case Review instrument, several questions to be answered by the reviewer based on his/her review of documentation or interview of provider staff are contained in the ***Provider Quality Review - QM On-Site Service Program Review - SMI Providers*** instrument. The questions further test provider performance in, and compliance with, the rights of persons with Serious Mental Illness.

1). Grievances and Investigation Procedures - SMI

The following questions appear in the ***Provider Quality Review - QM On-Site Service Program Review - SMI Providers*** instrument. The questions further test provider performance in, and compliance with, rights of persons with Serious Mental Illness related to Grievances and Investigation Procedures.

- a). Does the provider adhere to their policies and procedures for grievances and investigations which are in compliance with R9-21-401 through 410?
- b). Does the provider ensure that all required reporting takes place within the specified time frames?
- c). Is there documentation in the provider medical record to verify that the member has been informed of their right to file a grievance or request an investigation?
- d). Is the grievance rule posted and forms for filing posted in a prominent place in the provider agency?
- e). Does the agency forward copies of the request for special assistance to the Office of Human Rights?
- f). Does the provider notify COMCARE when:
 - (1). A member brings criminal charges against an employee
 - (2). A provider employee brings criminal charges against a member
 - (3). A provider employee or member is indicted or convicted because of an action required to be investigated by the SMI Rules
 - (4). A member dies
 - (5). A member is allegedly physically or sexually abused

2). Residential Service Providers - SMI

In addition to the measures detailed in Service Program Review - SMI C.1). through 4).above, the following questions appear in the ***Provider Quality Review - QM On-Site Service Program Review - SMI Providers*** instrument to test provider performance in, and compliance with, requirements for residential service providers.

- a). Is a nutritionally sound diet of wholesome and tasteful food available at appropriate times and in as normal a manner as possible? R9-21-202.7.a.
- b). Is there an adequate allowance of neat, clean, appropriate, and seasonable clothing that is individually chosen and owned? R9-21-202.7.b.
- c). Is assistance given in securing prompt and adequate medical care, including family planning services, through community medical facilities? R9-21-202.7.c.

- d). Are there opportunities for social contact in the living environment? R9-21-202.7.d.
- e). Are there opportunities for daily activities, recreation and physical exercise? R9-21-202.7.e.
- f). Is there opportunity to keep and use personal possessions? R9-21-202.7.f.
- g). Does the member have access to individual storage space for personal possessions? R9-21-202.7.g.
- h). Has the member been informed of charges for services in advance of being charged? R9-21-202-8.
- i). Does the living environment afford protection from harm? R9-21-202.6.
- k). Does the living environment afford appropriate privacy? R9-21-202.6.
- l). Does the living environment afford freedom from verbal or physical abuse? R9-21-202.6.

Upon completion of the Service Program Review, the Quality Improvement Specialist submits the review instruments to the QM Data Entry Specialist for input into the COMCARE Database. Data is then exported from the database into a statistical software program for statistical manipulation and reporting purposes.

During the Provider Quality Review Exit Interview, the Quality Improvement Specialist verbally discloses the Service Program Review aggregate findings, recommendations, and requested responses and/or corrective actions with the provider.

D. Training Review - SMI and Child/Adolescent

- **GOAL:** To assess the level of provider compliance with training requirements and the level of competency acquired.

Data Collection Instruments: The *Provider Quality Review - QM On-Site Training Review Part A - SMI* or the *Provider Quality Review - QM On-Site Training Review Part B - Children and Adolescents* data collection instruments are used by the assigned Quality Improvement Specialist. At the conclusion of each training session, each training participant completes a post-test with measures for knowledge attained related to required training elements. **See Attachment B for samples of the Post-Tests for each curriculum module.**

- 1) **Administrative Review** occurs when the assigned Quality Improvement Specialist reviews the provider's Quarterly Training Reports and the provider's Training Plan located in the Provider Relations Department agency file.
- 2) The assigned Quality Improvement Specialist reviews the provider's Training Plan for compliance with required elements and required COMCARE curriculum including:

Required Element	Population
a). The Arizona Level of Functioning Assessment (ALFA) Adult SMI functional assessment and level of service planning tool	SMI only
b). Confidentiality, Mental Health and the Law civil, legal, support, and treatment rights member privacy and confidentiality	All
c). Psychopharmacology identification of adverse reactions to psychoactive medications	All
d). Serious Mental Illness identification of member illnesses and injury	SMI only
e). Continuum of Care in a Managed Care Environment	All
f). Individual Service Planning development and implementation of ISPs	All
g). Strengths Model of Service Delivery agency mission and philosophy of community support principles of staff/member interaction designed to facilitate health and growth	All
h). Grievance and Appeals procedures and rules	All
i). Clinical Documentation role, responsibility and authority of case manager and clinical team	All
j). Clinical Aspects of Case Management and the Clinical Team agency mission and philosophy of community support principles of staff/member interaction designed to facilitate health and growth identification, response to and reporting of member abuse, neglect, and exploitation	All
k). Consumer Perspective of Mental Health Services perspectives and values of consumers of mental health services	All
l). Co-Payment	All
m). Exit Criteria Appendix C and Exit Provisions	SMI only
n). CPR/First Aid preliminary medical emergency care and reporting requirements	All
o). Provider Policies and Procedure	All
p). Provider Mission agency mission and philosophy of community support	All
q). Physical Intervention Techniques/Non-Violent Crisis Intervention	All
r). HIV/AIDS	All

- | | |
|---|----------|
| s). Safety and Security in the Workplace
preliminary medical emergency care and reporting requirements | All |
| t). Child and Adolescent Functional Assessment Scale (CAFAS) | C/A only |
| u). Working with Families | C/A only |
| v). Working with Schools | C/A only |
| w). Understanding Childhood Psychiatric Illness | C/A only |
- 3). The assigned Quality Improvement Specialist reviews the provider's Quarterly Training Report to determine the percentage of provider staff who have completed training in each required training element/ curriculum; the total percentage of provider staff who have completed required training elements/curriculum; the percentage of provider staff who passed the post-test for each required training element/curriculum; and, the total percentage of provider staff who passed the post-test.
 - 4). Deficiencies associated with each required training element are noted by the assigned Quality Improvement Specialist on the ***Provider Quality Review - QM On-Site Training Review Part A - SMI*** or the ***Provider Quality Review - QM On-Site Training Review Part B - Children and Adolescents***
 - 5). The assigned Quality Improvement Specialist prepares a written report of the findings, recommendations, and requested corrective actions based on the **Administrative Review**.
 - 6). The **On-Site Review** is then conducted by the Team, with the assigned Quality Improvement Specialist reviewing the provider's personnel training records to determine that documentation exists to support the provider's Quarterly Training Report to COMCARE.
 - 7). The assigned Quality Improvement Specialist interviews provider staff to assess staff competency related to training content and application of knowledge and skills acquired.

Reporting and Feedback Loops:

During the Provider Quality Review Exit Interview, the Quality Improvement Specialist verbally provides an overview of the Administrative and On-Site Review findings and suggests some initial recommendations. A detailed report of findings, specific recommendations and requested corrective actions, if applicable, will be submitted to the provider in the form of a Comprehensive Provider Quality Review Report within 30 days of the Exit Interview. A copy of all correspondence relative to the audit process will be maintained in the provider's file by the Program Administrator.

Providers will have 14 working days to respond with their plan of correction. The plan of correction will be reviewed by the Quality Improvement Specialist and staffed with the Manager of Quality Improvement. A letter acknowledging receipt and acceptance of the plan of correction will be returned to the agency. The letter will also specify a tentative date and time for a follow up visit specifically to review the agency's effectiveness in implementing the plan of correction.

The Manager of Quality Improvement reports the findings of regularly scheduled and follow-up audits to the Provider Quality Review Committee. The Committee meets two times a month. This group consists of management representation from Provider Relations, Capacity Management, Fiscal, Adult Services, C/A Services, Quality Management, Quality Improvement, Office of Legal Counsel, Office of the Medical Director, and the V. P. of Member Services.

The group hears high level summaries of audit findings and makes recommendations as needed. These recommendations will be included in the final Comprehensive Provider Quality Review Report. In the event of more critical issues, the V. P. of Member Services takes the issues to COMCARE's Executive Council for an administrative ruling and/or policy decision.

E. *Provider Interview*

In addition to the case review and program service review, select staff working for agencies who provide services to SMI members will also undergo a brief interview. Quality Improvement Specialists will conduct a brief interview of unit coordinators and/or line staff. Questions will be used to make judgments about agency practice in the areas of integration, self determination, respect, and humane treatment. The questions will be similar to those members are asked during the case review interviews for the four aforementioned principles. A three point Likert scale is used to score the responses given by the interviewee. The scale will be used to rate and compare providers on the Provider Profile data collection tool. **See Attachment A Provider Interviews & Provider Profile.**

F. *Supervisory Overview*

Each Specialist is required to verbally review the entire Provider Audit Protocol including the use of the Case Review Instrument with the Manager of Quality Improvement. The Manager assesses the Specialist's knowledge and understanding of the process, Guiding Principles, and Principles of Care. Additionally, each Specialist will at a minimum, review one case review per quarter to ascertain appropriate use of the tool, clinical judgment, and consistency between reviewers (case judging). Some Specialists may be required to review cases on a more frequent basis. New Specialists are paired up with veteran staff to complete an identical case review. The scores are then compared for consistency.

The use and scoring of the Case Review Instrument is discussed as needed in Quality Improvement Section staff meetings. Issues are problem solved as they arise and feedback, as needed, is forwarded to ADHS/BHS for further refinement of the CFR tool and database.

Within one (1) week of each provider audit, the Manager of Quality Improvement holds a debriefing meeting with the QI Review Team. The purpose is two-fold: first to discuss the audit process and findings and to solicit input about data to be included in the final Comprehensive Provider Quality Review Report; and second, the meeting also serves as a means of preparation for the Lead Specialist who will attend the Provider Quality Review Committee and present an overview of findings.

G. *Member and Family Member Satisfaction*

- **GOAL: To assess the level of member satisfaction with provider network services and programs.**

Data Collection Instrument: Various tests have been considered in order to evaluate outcomes and satisfaction with provider services. The selection process has emphasized tools which are brief, valid, reliable, and affordable. In all cases, the instruments have been used to assess outcomes or satisfaction. In most instances, the instruments are available in Spanish. Efforts will be made, in cooperation with the author(s), to translate into Spanish those tests for which a Spanish translation is not yet available.

For the C/A population the Devereux Scales of Mental Disorders has been selected provided a complimentary and adequate tool can be located to assess adaptive functioning. If such a tool cannot be located, then the Achenbach Child Behavior Checklist will be used. In addition, the Child and Adolescent Practitioner Version of the Service Satisfaction Scale by T.M. Greenfield will be used to assess member and family member satisfaction with provider network services.

Administration of test instruments is scheduled to commence in February 1997 while full implementation is scheduled to commence in April 1997. **See Attachment C (Satisfaction Measurement C/A Members) for the research proposal under review by COMCARE's Research Review Committee.**

It is planned to conduct a survey annually with approximately 25% of the SMI population. The tests which have been selected for the Adult and SMI member and family member satisfaction are: the Brief Symptom Inventory (BSI); the Derogatis Psychiatric Rating Scale (DPRS); the SF-12 Health Survey; the Quality of Life Interview-Brief Version (QOLI); the Addiction Severity Index (ASI); and, the Service Satisfaction Scale-Provider Version (SSS-P). Administration of test instruments is scheduled to commence in November 1996 while full implementation is scheduled for January of 1997. **See Attachment C (Satisfaction Measurement Adult Members) for a copy of the research proposal and survey instrument currently under review by the COMCARE Research Review Committee.**

Results from the C/A and Adult surveys will be provider specific and will allow for profiling of the provider network's performance. Results will be used to improve the system of services and care within the provider network.

4. PROVIDER PROFILING AND SYSTEM IMPROVEMENT

The overwhelming amount of information collected about each provider must be organized into a format that the providers, COMCARE management, and ADHS/BHS can easily interpret. For this reason, a provider profile has been created to display critical data related to each provider and to clusters of providers which serve the same population. Based upon trends resulting from the audits, standards and expected best practices will organized into provider profiles and consistent methods of intervention when specific types of deficits are uncovered.

Profiles are analyzed to:

- a). detect patterns and trends of performance in the network;
- b). reveal the range of strong to weak provider performance;
- c). indicate possible need for reallocation of resources;
- d). indicate possible need for program development and implementation;
- e). improve the quality of care and service delivery through detecting the need for, and implementing specific education/training efforts to shift practices; and
- f). assist in the negotiation of provider contracts.

COMCARE will use data collected during provider audits for the 1995-96 fiscal year to assess baseline provider performance across all providers and service types. Best Practices within the provider network will be shared with providers in a report card format and orally at quarterly provider meetings. Provider programs demonstrating excellence and which may serve as a model program to be replicated will be identified and cultivated. Providers will be given specific findings revealed through the Provider Quality Review process via a written report sent to the provider within 30 days of the On Site Visit.

Dependent upon findings of an individual provider quality audit and or their overall rating, one of four outcomes may occur:

- The agency will remain a provider of services within the COMCARE provider network;
- The agency will remain a provider with minor plans of correction;
- Referrals to the agency will be suspended until all aspects of a corrective action plan have been successfully implemented, and/or
- The agency will no longer be a part of the COMCARE provider network.

Providers who have demonstrated substantial compliance with Fiscal and Service, Contract Compliance and Program Audit performance standards will remain a provider within the COMCARE provider network. Auditors from each discipline have made only minor recommendations for improvement or corrective action.

If there is partial compliance with performance standards and Auditors from each discipline have made several recommendations for improvement or corrective action, technical assistance will be mandatory to assist in the implementation of improvement actions. Depending on the severity of the findings, referrals may be withheld until the corrective actions have successfully been implemented and corrected.

An agency receiving multiple recommendations and/or corrective actions due to unacceptable performance in three areas: financial, programmatic and operational may have referrals withheld until they are corrected. Technical assistance will be mandatory.

Programmatic issues to be considered include medical records, quality of care, member satisfaction, and performance in QM/UM activities. Operational issues include poor performance related to compliance with established policies and procedures; personnel performance, training, and credentialing; and licensure compliance. Technical assistance to implement improvement actions will be offered. Providers will have 90 days to implement plans of correction. A follow up review will be scheduled after the 90 days to ascertain compliance with auditor recommendations and corrective action plans.

Immediate removal and the transfer of members will result should there be evidence of clear and present danger, criminal activity, major non-compliance affecting member care, financial misconduct and/or evidence of suspected fraud. The Provider Quality Review Committee will make a recommendation to the Executive Council to remove the agency from the COMCARE provider network.

The Provider Quality Review Committee examines provider profiles and makes recommendations to the Executive Council. The Executive Council has final authority for making policy, contracting, and financial decisions which ultimately shape and shift the COMCARE network of behavioral health providers.

See Attachment D for the Provider Profile which contains the data elements COMCARE considers critical in considering the provider's status within the network.

PROVIDER AUDIT			
PRE-AUDIT PROGRAM			
PROVIDER NAME		PROJECT #	
PREPARED BY		DATE	
REVIEWED BY		DATE	
FILENAME	C:\AUDTPROG\PREAUDIT	LAST UPDATE	4/17/96

PRE-AUDIT PROGRAM

	DONE BY	PAGE NO.
1. Review the following and note any issues that require resolution in the current year:		
Previous audit workpapers	_____	_____
Prior audit reports	_____	_____
Provider file in Provider Relations (includes correspondence)	_____	_____
2. Review authoritative accounting or auditing pronouncements which may pertain to the audit.	_____	_____
3. Review significant government rules and regulations which may pertain to the audit.	_____	_____
4. Review external audit reports:		
Obtain from Provider Relations a copy of the Provider's most recent Audited Financial Statement or Single Audit Review, including any management letter and reports specifically addressing internal controls review and compliance with OMB A-133.	_____	_____
Complete the Internal Control Evaluation .	_____	_____
Obtain a copy of ComCare's analysis of provider's financial ratios from Financial Data Analyst (ComCare Finance department.) Review for any unusual trends or indications of lack of proper controls.	_____	_____
5. Discuss with Provider Relations:		
Potential problems which relate to the Provider.	_____	_____
Recommendations concerning the scope of our audit or audit approach.	_____	_____
6. Review Provider Contract:		
Obtain copies of the Provider Contract and all Amendments relative to the fiscal year being audited.	_____	_____
Identify the Fee Schedule from the Provider Contract and document:		
Total contract maximum	_____	_____
Fund type maximum	_____	_____
Covered services and rates	_____	_____
7. From the "Behavioral Health Services Maximum Reimbursement Rates Subvention and Title XIX" of ADHS/BHS manual copy the pages with service codes included in this Provider's contract.	_____	_____

PRE-AUDIT PROGRAM (continued)

DONE BY PAGE NO.

8. Run report listing the paid claims for the Provider.

Request the Financial System Analyst (ComCare Finance department) to download the "Encounter Data Base" of paid claims for the fiscal year being audited . FILE NAME: _____.

_____ N/A

Document the test period covered by the audit.

Import the downloaded data base to ACL Audit software and format. FILE NAME: _____.

_____ N/A

Run a report through ACL which classifies the population by service code and accumulates totals by the fields: Net Pd; Net Val; & Units.

Run a report through ACL which classifies the population by fund type and accumulates totals by the fields: Net Pd; Net Val; & Units.

9. Prepare the sample of claims to be tested.

Unless prior experience with the provider or discussions with ComCare Provider Relations dictate use of substantive sampling, the initial sample will be an attribute sample. A sample of 96 records will be selected on a random basis from the total population using the ACL software. This will yield a 95% confidence level with 10% tolerable error and 4% expected error.

Completely document the statistical sampling method used.

Run a report through ACL which classifies the sample by service code and accumulates totals by the fields: Net Pd; Net Val; & Units.

Run a report through ACL which classifies the sample by fund type and accumulates totals by the fields: Net Pd; Net Val; & Units.

Compare the above two reports to those run for the total population in order to assure that the sample is an accurate reflection of the population. If sample does not appear representative, select another random sample and repeat comparison.

Print sample from ACL for workpaper documentation.

Export sample to Excel and format for field audit workpapers. Print.

10. Comparison of Total Contract Amount Paid.

Obtain Provider's YTD "Summary of Services" report. Compare amounts paid to the amounts per contract and the amounts per (a) Accounts Payable file for "Net Value" dollars and (b) total of "Net Paid" column for EDS paid claims.

Research any significant discrepancies and document findings.

PRE-AUDIT PROGRAM (continued)

DONE
BY PAGE
NO.

11. Comparison of Services Billed to Contract

Using the summary of the total population by service code, calculate the average per unit rates paid for each service. Compare to contract rates for reasonableness and investigate any significant variances.

Compare the service codes being billed to service codes specified in the contract. Investigate any non-contract services that have been billed.

12. Review the sample for any variations from the expected combinations of TOS (Type of Service), Fund Type, Net Paid and Net Value. (A TOS 1 should have a fund type of 4, 5, 15 or 16 and dollar value in the Net Paid column. A TOS 2 should have a fund type of 1, 2, 3 or 10 and dollar value in the Net Value column.)

Document any records noted with significant variations. Research through EDS and document findings. (See separate memo detailing procedures for EDS Intake Screen review.)

Inform the Program Administrator of any unusual circumstances noted during this process.

13. Fax and mail to the Provider a list of the records required for review by Member Name, Member ID number and Month of service. This list should be faxed 3 working days before the audit is scheduled to begin, (ie. the Thursday before an audit scheduled for Tuesday.)

PREPARED BY		DATE	
REVIEWED BY		DATE	
FILENAME	C: \AUDTPROG\CLAIMAUD	LAST UPDATE	4/17/96

AUDIT OBJECTIVES:

1. Determine that payments made to the Provider are for authorized services.
2. Ensure that all payments made to the Provider are supported by proof of service and that service approvals are made by an authorized person.
3. Determine that the Provider is meeting contractual requirements.

AUDIT PROCEDURES

DONE BY PAGE NO.

1. Entrance Conference
 Early during the first day of field audit, discuss with Provider management:
 - Provider contacts during field audit
 - The proposed scope of the engagement
 - The objective of the audit
 - Recent important developments
 - Provider questions or concerns
 - Any other applicable matters

Document conference in a memo. _____

2. Obtain an understanding of the Provider's flow and retention of service documentation.
 - a. Discuss with Provider staff the claims processing system including
 - who prepares claims/billing forms?
 - what are the source documents for billed claims ?
 (ie. is clinical documentation the source for claims, or is there an interim step?)
 - what is follow-up for denied claims?

b. Document findings in a memo, including flowcharts or examples of forms if necessary for clarity. _____

3. For the sample selected, review each file for proper claim documentation.

a. Is there adequate documentation in file to support proof of service?
 (ie. progress note, bed log, etc.) _____

b. Is there a properly authorized approval for service?
 (ie. signature of therapist, etc.) _____

c. Document any differences noted in rates and other dollar amounts for each claim reviewed. (Dollar differences must be reported according to the Single Audit) _____

d. Verify the deficiencies noted with the provider.
 (Be sure the file pulled for review encompasses the date of the claim.) _____

4. Change of Scope:

- a. If the deficiencies found during the review are in excess of the determined tolerable deviation rate additional testing may be performed.
 - b. If there appears to be reasons to doubt the integrity of the process, additional testing may be performed.
 - c. Document fully the reasons for any additional testing and the sampling technique used.
-
-

CLAIMS AUDIT PROGRAM, continued

5. Exit Conference

On the last day of field audit, or shortly thereafter, conduct an exit conference with Provider Management to discuss:

- preliminary audit findings
- time line for Provider response to findings and submission of additional documentation
- projected date of final report
- any questions from Provider

Document the discussion in a memo.

**COMCARE
PROVIDER QUALITY REVIEW
SITE VISIT CHECKLIST - BASIC CONTRACT REQUIREMENTS
GUIDE**

1. Auditor obtains copies of current Provider facility license(s), or evidence that provider has applied for a renewed license.
2. Auditor requests correspondence files and reviews them to determine that provider is noticing ComCare 60 days prior to a closure of an existing site or opening of a new site.
3. If Provider must seclude or restrain members with Serious Mental Illness, Provider must hold a "restrictive behavioral management" level one license. Audit reviews the license to ascertain the Provider holds this type of license.
4. The auditor reviews the provider policy manual to determine that the provider agrees to accept all referrals from ComCare (Case Management and Information and Referral) unless the agency has no additional capacity or remaining contract funds. Audit reviews the Provider referral report from the Information and Referral Department to determine that the Provider is accepting all ComCare referrals.
5. The auditor reviews the members' records to locate the Eligibility and Enrollment Unit (EEU) verification form. (If Intake occurred prior to 4/1/96, this is not applicable.
6. The auditor reviews the members' records to locate the appropriate forms comprising this packet. *A review of ComCare records may also be appropriate.*
7. The auditor reviews the members' records to locate a Service Authorization signed by ComCare case management staff authorizing services.
8. The auditor interviews financial staff to determine how often the member billing is done. Individual members' billing records are requested and reviewed to determine that billing is done at least monthly, within 90 days of date of service or 120 days if TPL is involved, and that resubmitted claims are submitted within 90 days of date of denial.

9. The auditor interviews responsible staff to determine that attempts are made to resubmit denied claims and reviews individual members' billing records to ascertain compliance. EOB's may be requested to determine date(s) of denial and date(s) of resubmitted claims.
10. The auditor requests the accounting policies and procedures. Financial records are reviewed, and procedures are discussed with staff to determine that funds are being accounted for properly.
11. Audit authenticates that the Provider has adequately documented their credentialing policy and procedures. In addition, Audit reviews personnel files of the Medical Director and Clinical Director for adequate documentation of medical licensing and behavioral health certification.
12. Audit interviews staff to ascertain that no employee personally benefits from the contract.
13. Audit reviews Personnel files to determine that staff providing services to children have been fingerprinted. From the Children's member records selected by the Quality Management Team, the auditor selects the names of three staff delivering services to the children. The auditor reviews these personnel files for evidence that fingerprinting has been done. The auditor also determines if any person in the member's record to ascertain that there was another staff member present during that treatment session.
The auditor reviews the provider policy manual for a statement requiring that any subcontractor of the provider be fingerprinted. If the auditor determines that the provider has subcontract(s) with other providers for provision of services to juveniles, the auditor reviews subcontract(s) to determine that the fingerprint provision has been included.
14. The auditor reviews the members' progress notes against their SAF to determine that their service plan is being followed.
15. The auditor reviews the Financial Information Form (FIF) in each member's record to determine if a copay is indicated. If so, the individual member's billing record is reviewed to determine if provider is attempting to collect the copay. Also reviewed is the provider's own financial form, which should be in each member's record. Both the FIF and the provider's financial form must be signed by the member or guardian.
16. The auditor reviews the Financial Information Form (FIF) in each member's record to determine if third party liability is indicated. If so, the member's billing record is reviewed to determine if provider is attempting to collect from the third party source. Also reviewed is the provider's financial form, which should be in each member's record. Both the FIF and the provider's form must be signed by the member or guardian.

17. The auditor reviews the FIF and provider's own financial form in each member's record. If member's or guardian's signature is on these forms, the member has been properly noticed. Each member is to be given a copy of their FIF.
18. Provider policy manual is reviewed by the auditor for statement acknowledging that any research projects involving ComCare members must be approved by the Provider's Institutional Review Board, or in the absence of such a board at the provider, approval will be obtained from the RBHA Institutional Review Board for Research.
19. Audit reviews Provider policies and procedures to determine that, at a minimum, Provider is in compliance with the requirements for handling member funds as stated in R9-21-208, Property and Possessions.
20. - 28. Audit obtains the Provider's policies and procedures and reviews for adequate documentation of an action plan and Provider statement of compliance with all applicable state and federal regulatory requirements as noted in the checklist. The review also includes the verification of prominently displayed signage, if applicable.

1. Intakes are performed within 7 calendar days of the date of referral.					4.1	
2. Intake to first service time frame does not exceed 30 calendar days from the date of the intake.					4.14	
3. Delay reasons for intakes performed beyond the 7 calendar day standard are reported to COMCARE as evidenced by the content of the Member Accessibility Report.					4.1	
4. Failure reasons for intakes not conducted are reported to COMCARE as evidenced by the content of the Member Accessibility Report.					4.1	
5. Delay reasons for first services provided beyond the 30 calendar day standard are reported to COMCARE as evidenced by the content of the Member Accessibility Report.					4.1	
6. Incident/accident reports submitted within 24 hours.					1.5	5.10
7. Written reports of abuse, neglect, mistreatment, denial of rights, or exploitation are submitted within 24 hours. (SMI Only)					1.5	5.10
8. Written reports for each restraint or seclusion are submitted by the 10th of each month for the previous month. (SMI Only)					1.6	5.10
9. Incident and restraint/seclusion reports are accurate and complete					5.10	
10. Restraint/seclusions are used only when an individual presents as a serious physical danger to self or others and only when other reasonable less restrictive alternatives have been tried and/or determined inappropriate					1.6	
11. Restraint/seclusion is only used when authorized by a physician and with orders which do not extend beyond three hours					1.6	
12. Response/action to requests for follow up on incident and restraint/seclusion reports is appropriate and timely					1.5	5.10
13. Copies of grievances and grievance resolutions are submitted to COMCARE. (SMI Only)					5.9	
14. Action taken on grievance resolutions is appropriate and timely					5.9	5.11
15. Mortality reports are phoned in within 24 hours and written report is received within 5 days						
16. Provider participates in ADHS/BHS and COMCARE member satisfaction surveys annually. Note Score: %					6.2	6.4

COMCARE
PROVIDER QUALITY REVIEW
QM ADMINISTRATIVE REVIEW Part B - Performance Measures
GUIDE

1. Specialists will review the COMCARE triage form for the referral date; the intake date will be derived from Assessment A & B forms. The referral date is the first contact to either a provider or COMCARE seeking services. The intake date is the date the comprehensive assessment/psychosocial assessment is completed. The difference between the dates will be the time lapsed between referral and intake.
2. The intake date is the date the comprehensive/psychosocial assessment is completed as recorded on the Assessment AB forms. First service is any billable service other than a screening or evaluation. The first service date can be obtained from the member progress notes, nursing notes, or psychiatric progress notes. The difference between the two dates is the lapsed time between intake and first service.
3. Acceptable delay codes for intakes not completed within 7 days are: no show, clt rescheduled, delayed by other agency or court, and other. Delay codes can be found on the Member Accessibility Summary/Detail Report and from progress notes in the member's medical record.
4. Rationale for intakes not being completed can be found on the Detailed Member Accessibility Report. Use best clinical judgment as to whether the rationale is acceptable.
5. Acceptable delay codes for first service not occurring within 30 days are: no show, clt rescheduled, delayed by other agency or court, and other. Delay codes can be found on the Member Accessibility Summary/Detail Report and from progress notes in the member's medical record.
6. Data obtained from the monthly Incident/Accident Report collected and trended by provider. Report is obtained from OLC Office of Legal Counsel. Report is submitted to Quality Improvement on the 10th of each month for the previous month. OLC will determine timeliness of Incident/Accident reporting and include this data in the Incident/Accident Report.
7. Obtained from monthly report submitted by OLC on the 10th of the month for the previous month. Timeliness of reporting will be trended by provider.
8. Obtained from monthly Seclusion and Restraint Report submitted by OLC (Attachment 2).
9. Obtained from the Seclusion and Restraint Report under the Summary of Situations section.
10. Obtained from the Seclusion and Restraint Report under the Summary of Situations section.
11. Review documentation on restraints/seclusions form or log for each individual case; look for documentation indicating physician sign off, time frame for implementation, start time and ending time.
12. Review OLC Restraint/Seclusion Report for instances where follow up was requested during the Administrative Review; when On-Site at the agency look for documentation in the provider log for restraints/seclusions if not available in OLC; note date of incident, date request for follow up submitted from OLC, and date response was received from provider.
13. Ask agency representative where they document grievance and appeals information, process used to follow up on these situations, who they report information to, and how they report it, i.e. written report, phone call, etc.
14. Review documentation relative to the circumstances leading to the grievance; use best clinical judgment re appropriateness of resolution.
15. Review OLC Mortality Reports and log during the Administrative Review; look for # of mortalities reported, date phone called received, and date written report received; during the On-Site review at the agency compare finding from COMCARE Mortality report to providers Mortality Report/log; note if there are discrepancies between the COMCARE log, provider log, and progress notes in the member medical record.
16. During Administrative Review look at most recent BHS & COMCARE satisfaction survey results for agency participation and scores.

**COMCARE
PROVIDER QUALITY REVIEW
ON-SITE REVIEW - QM PROGRAM REVIEW
GUIDE**

1. Review QM plan submitted by agency. At agency look for minutes that reflect structure, membership, and activities, as outlined in the plan. May come in the form of formal Quality Management Committee minutes or may be included in the body of regularly scheduled management and staffing minutes.

Performance indicators and outcome measures are outlined in the QM Plan. Review documentation of indicator scope, methodology, population reviewed, aspects of care, data collection, and desired outcomes/threshold as documented in formal reports of progress. Also review what happens with the results of the findings; does the feedback get back to the affected areas.

Review agency management meeting minutes to determine if feedback regarding quality initiatives and activities are reflected.

Review departmental, section, unit meeting minutes to determine if quality initiatives and activities are reflected.

Review agency notebook, maintained in the Provider Relations Section, prior to On-Site-Visit. Look for indicators of improvement activities to address identified issues
- Ideally, you should be able to trace a paper trail of activities from the QM Plan through QM Committee minutes, Management minutes, Unit staffing minutes, and formal reporting of Performance and Outcome measures internally and to ComCare.

**COMCARE
PROVIDER QUALITY REVIEW
QM ON-SITE SERVICE PROGRAM REVIEW - SMI
GUIDE**

1. Review G/A policy and procedure; compare actions to be taken as prescribed by the policy with actual events and steps taken for any grievances that may have been filed; also compare the steps outlined in licensure reg.
2. Review incident/accidents for ComCare members; compare log if available to dates of incident; compare dates documented within incident report to the date report was written; compare findings with compliance reported by Incident/Accident Report received monthly from OLC.
3. Look for the presence of the Notice of Grievance and Appeals Procedure Form.
4. Ask agency to show you where they post the grievance rules and where forms are placed for member access.
5. Requests for Special Assistance
6. Look at I/A reports, mortality reports; compare to monthly I/A Report from OLC.

#19 - 30 are to be reviewed within the residential milieu via observations, member, and staff interviews.

19. ask to see menus for the week/month(however prepared); observe dining room and kitchen area; interview member re quality of food and times meals are served.
20. Ask member if you can see his/her room; observe what member and others are wearing; ask member if he/she gets to pick and buy own clothes.
21. Look for policy/procedure for follow-up on member medical care needs; ask members who they tell when they are sick; what happens when they tell someone; who is their medical doctor, dentists, how do they get to the doctor, etc.
22. Look for clean comfortable atmosphere; sofas, chairs, love seats, game tables, magazines, books, adequate lighting; look for patio furniture outside in covered or shaded areas; observe whether clients are mingling/interacting and the quality of that interaction; observe staff interactions with clients; are visitors allowed, and if so where do they visit.
23. Ask for program/rec. schedule for at least a two week period and preferably for one month; are activities varied; who plans activities; are members involved in planning their day; do they have the option of participating or not participating; are there off grounds outings i.e.

movies, mall, museum, zoo, park; interview at least one staff re recreation activities; interview member re recreation activities; observe activities occurring in the milieu at time of your visit.

24. Ask member to show you his/her room; are there personal pictures on walls, dresser, etc.; do they have their own personal comforter or quilt; is there evidence of other personal items in the room/residence; ask member if he/she is allowed to have their own personal items.
25. Ask member if you can see his/her room; ask to look in closet; observe if a dresser is available; ask them if they have any place else to put their things that is just for them.
26. Ask the member if s/he has been informed of charges for services.
27. Observe milieu for client to staff ratio; observe for visible safety hazards, i.e.: broken furniture, broken windows, exposed wiring; ask members if they feel safe and protected from staff and other clients.
28. Ask member if he/she has privacy; observe living environment for doors to rooms, bathrooms.
29. Observe milieu for staff to client interactions and client to client interactions; if applicable, do staff intervene as needed.
30. Audit reviews Provider policies and procedures to determine that, at a minimum, Provider is in compliance with the requirements for handling member funds as stated in R9-21-208, Property and Possessions.

31 - 40 ARE OUTCOME SUMMARY QUESTIONS - SEE INSTRUCTIONS BELOW

31. This is a summary question related to the principle of RESPECT for all providers. A yes rating must be achieved in all items listed below in order to answer the summary question as "yes."

PROQMP #8 Provider has a written member rights policy and procedure or statement of member rights in accordance with R9-20-201 and for SMI programs also R9-21-211.

PROAR1 #14 Provider response/action to member grievances/appeals is appropriate and timely.

SMIPROV #7 Information about treatment is released to sources other than COMCARE or its affiliates only with a signed release.

SMIPROV #16 Does the living environment afford appropriate privacy? R9-21-202.6.

32. This is a summary question related to the principle of HUMANE TREATMENT for all providers. A yes rating must be achieved in all items listed below in order to answer the summary question as "yes".

PROAR1 #10 Restraint/seclusions are used only when an individual is present as a serious physical danger to self or others and only when other reasonable less restrictive alternatives have been tried and/or determined inappropriate

PROAR1 #11 Restraint/seclusion is only used when authorized by a physician and with orders which do not extend beyond three hours.

SMIPROV #17 Does the living environment afford freedom from verbal or physical abuse? R9-21-202.6.

33. This is a summary question related to the principle of INTEGRATION for 24 hour staffed residential programs. A yes rating must be achieved in all items listed below in order to answer the summary question as "yes".

SMIPROV #10 Members participate in the development, implementation, monitoring, and revision of their treatment plans.

- a) member signature
- b) member, guardian and case manager interviews
- c) case manager progress notes

SMIPROV #11 Members have a choice/input in personal goals related to community living, education/vocation, social and recreational activities unless they are unwilling or unable to do so.

- a) face sheet of ISP
- b) CFR person interview #8
- c) SMI Program Review #12
- d) Provider Interviews #s 8, 9, 12

34. This is a summary question related to the principle of SELF DETERMINATION for 24 hour staffed residential programs. A yes rating must be achieved in all items listed below in order to answer the summary question as "yes".

SMIPROV #10 Members participate in the development, implementation, monitoring, and revision of their treatment plans.
Consider the member signature, member, guardian and case manager interviews, and case manager progress notes when making your determination.

SMIPROV #11 Members have a choice/input in personal goals related to community living, education/vocation, social and recreational activities unless they are unwilling or unable to do so.
Consider the face sheet of ISP, CFR person interview #8, SMI Program Review #12, and Provider Interviews #s 8, 9, 12 when making your determination.

35. This is a summary question related to the principle of INTEGRATION in Inpatient settings. A yes rating must be achieved in all items listed below in order to answer the summary question as "yes".

SMIPROV #13 Members are offered services which are integrated into the community and are geographically, physically, and culturally accessible.

SMIPROV #23 There are opportunities for daily activities, recreation, and physical exercise. R9-21-202.7 e.
Consider the member/guardian interviews, program observations, and program activity schedules when making your determination.

36. This is a summary question related to the principle of SELF DETERMINATION in Inpatient settings. A yes rating must be achieved in all items listed below in order to answer the summary question as "yes".

SMIPROV #10 Members participate in the development, implementation, monitoring, and revision of their treatment plans. (All programs) Consider the member signature, member, guardian and case manager interviews, and case manager progress notes when making your determination.

SMIPROV #11 Members have a choice/input in personal goals related to community living, education/vocation, social and recreational activities unless they are unwilling or unable to do so.
Consider the face sheet of ISP, CFR person interview #8, SMI Program Review #12, and Provider Interviews #s 8, 9, 12 when making your determination.

37. This is a summary question related to the principle of INTEGRATION for day programs. A yes rating must be achieved in all items listed below in order to answer the summary question as "yes".

SMIPROV #13 Members are offered services which are integrated into the community and are geographically, physically, and culturally accessible.

SMIPROV #23 Are there opportunities for daily activities, recreation, and physical exercise? R9-21-202.7 e.

- a) member/guardian interviews
- b) program observation
- c) program activity schedules

38. This is a summary question related to the principle of SELF DETERMINATION for day programs. A yes rating must be achieved in all items listed below in order to answer the summary question as "yes".

SMIPROV #10 Members participate in the development, implementation, monitoring, and revision of their treatment plans. (All programs) Consider the member signature, member, guardian and case manager interviews, and case manager progress notes when making your determination.

SMIPROV #11 Members have a choice/input in personal goals related to community living, education/vocation, social and recreational activities unless they are unwilling or unable to do so.
Consider the face sheet of ISP, CFR person interview #8, SMI Program Review #12, and Provider Interviews #s 8, 9, 12 when making your determination.

39. This is a summary question related to the principle of INTEGRATION for vocational programs. A yes rating must be achieved in all items listed below in order to answer the summary question as "yes".

SMIPROV #13 Members are offered services which are integrated into the community and are geographically, physically, and culturally accessible.

SMIPROV #23 Are there opportunities for daily activities, recreation, and physical exercise? R9-21-202.7.e.

- a) member/guardian interviews
- b) program observation
- c) program activity schedules

40. This is a summary question related to the principle of SELF DETERMINATION for vocational programs. A yes rating must be achieved in all items listed below in order to answer the summary question as "yes".

SMIPROV #10 Members participate in the development, implementation, monitoring, and revision of their treatment plans. (All programs) Consider the member signature, member, guardian and case manager interviews, and case manager progress notes when making your determination.

SMIPROV #11 Members have a choice/input in personal goals related to community living, education/vocation, social and recreational activities unless they are unwilling or unable to do so.

ON SITE TRAINING REVIEW PART C - RBHA Staff
Guide**

Each quarter, ComCare Human Resources will furnish to the Quality Management Department/Education and Training Section a data flat file containing names and staff IDs for all clinical staff employed for at least six months. The file will be run/matched against the Training Verification Database (an Access database) and a report will be created which shows the percentages of compliance and non-compliance with the requirement. Further, detailed reports listing individual clinical staff per site/area who do not meet the requirement will be run and used for improvement and compliance purposes.

** Clinical staff = staff with direct contact with members, e.g. case managers, team leaders, area team managers, nurses, physicians, etc.

Provider _____ Interviewer _____

Name of person interviewed:

Date: _____

Title of person interviewed:

Program Type:(Check one)

- Residential
- Supported Living
- Semi-Supervised/Supervised Independent
- Inpatient
- Ref (Re-Entry Facility)
- Supervisory Care/Board & Care
- Group Home
- Outpatient

CIRCLE THE RATING THAT YOU FEEL MOST ACCURATELY REFLECTS THE RESPONSE/EXPLANATION PROVIDED. EXPLAIN ALL PARTIAL AND INADEQUATE RATINGS.

1. Tell me what a new client can expect on their first day in the program?
What kind of orientation to the program do they receive?

1 = Adequate

2 = Partial

3 = Inadequate

2. How does the program run on a day to day basis?

1 = Adequate

2 = Partial

3 = Inadequate

*H = Humane Treatment
*I = Integration
*R = Respect
*S = Self Determination

1

*24 Hr Res = 24 Hour Residential
*ASH = Arizona State Hospital
*Supp Hsg = Supported Housing
*Day/Voc = Day/Vocational

3. Who does a client go to if they feel they are being mistreated/abused by a staff member?
By another client?
How are these situations handled when they occur? (H)

1 = Adequate

2 = Partial

3 = Inadequate

4. What happens when a client is sick or gets hurt? (H)

1 = Adequate

2 = Partial

3 = Inadequate

5. Do clients have an opportunity to: (I)
A. go to church?
B. go to outside recreation?
C. go shopping?
D. go to education and employment activities?

1 = Adequate

2 = Partial

3 = Inadequate

6. What happens when a client becomes physically out of control? (H)

1 = Adequate

2 = Partial

3 = Inadequate

7. How does your program ensure clients have privacy when bathing, using the bathroom, and dressing? (R)

1 = Adequate

2 = Partial

3 = Inadequate

8. Do clients get to choose what they wear? (S)

1 = Adequate

2 = Partial

3 = Inadequate

9. Do clients have input into planning their meals; snacks? (S)

1 = Adequate

2 = Partial

3 = Inadequate

10. Do clients get spending money? (S)
If so, how do they get it and how often?

1 = Adequate

2 = Partial

3 = Inadequate

11. What is done to help the client feel at home here? (H)

1 = Adequate

2 = Partial

3 = Inadequate

*H = Humane Treatment
*I = Integration
*R = Respect
*S = Self Determination

3
*24 Hr Res = 24 Hour Residential
*ASH = Arizona State Hospital
*Supp Hsg = Supported Housing
*Day/Voc = Day/Vocational

12. Can a client take a walk or leave whenever they want to? If yes what is the procedure for checking in and out? How do staff monitor client whereabouts? (R)

1 = Adequate

2 = Partial

3 = Inadequate

13. What type of recreational and educational activities does your program make available for the clients? Are they scheduled daily, weekly? Do the clients have input into their activities planning? (S), (I)

1 = Adequate

2 = Partial

3 = Inadequate

14. Do clients get to visit with family or significant others in their life? If yes, how often is visitation allowed? (I)

1 = Adequate

2 = Partial

3 = Inadequate

15. What happens when a client refuses their medication? (R)

1 = Adequate

2 = Partial

3 = Inadequate

*H = Humane Treatment
*I = Integration
*R = Respect
*S = Self Determination

*24 Hr Res = 24 Hour Residential
*ASH = Arizona State Hospital
*Supp Hsg = Supported Housing
*Day/Voc = Day/Vocational

16. When and how are changes in services communicated to clients? Ie, termination of services, discharge or termination from program, change in medications, etc.
(R)

1 = Adequate

2 = Partial

3 = Inadequate

17. What process is in place if the client does not agree with the proposed change? Appendix C.5.

1 = Adequate

2 = Partial

3 = Inadequate

18. How and when is a client informed of their rights to:
appeal treatment decisions? (S)
file a grievance? (S)

1 = Adequate

2 = Partial

3 = Inadequate

19. In your opinion, what is the most important service your program provides to the clients you serve?

1 = Adequate

2 = Partial

3 = Inadequate

*H = Humane Treatment
*I = Integration
*R = Respect
*S = Self Determination

5
*24 Hr Res = 24 Hour Residential
*ASH = Arizona State Hospital
*Supp Hsg = Supported Housing
*Day/Voc = Day/Vocational

20. Do clients participate in the development of their treatment/service plan?
Appendix C.9. (S)

1 = Adequate

2 = Partial

3 = Inadequate

21. Who else participated in the development of the treatment/service plan? Appendix C.2.
List:

1 = Adequate

2 = Partial

3 = Inadequate

22. If the person has a guardian, significant other or interested family, were they invited to participate?

1 = Adequate

2 = Partial

3 = Inadequate

23. Do you offer special assistance to help clients understand their treatment and/or discharge plan? Appendix C.10. (R), (H)

1 = Adequate

2 = Partial

3 = Inadequate

*H = Humane Treatment
*I = Integration
*R = Respect
*S = Self Determination

6
*24 Hr Res = 24 Hour Residential
*ASH = Arizona State Hospital
*Supp Hsg = Supported Housing
*Day/Voc = Day/Vocational

24. Do you offer special assistance in understanding or participating in the appeal or a grievance process? Appendix C. 10. (R), (H)

1 = Adequate

2 = Partial

3 = Inadequate

25. What QM activities are in place at this time?
How do you give input into organizational QM initiatives?

1 = Adequate

2 = Partial

3 = Inadequate

*H = Humane Treatment
*I = Integration
*R = Respect
*S = Self Determination

7
*24 Hr Res = 24 Hour Residential
*ASH = Arizona State Hospital
*Supp Hsg = Supported Housing
*Day/Voc = Day/Vocational

This system is responsible for the production of hormones, such as testosterone, estrogen, etc. Antipsychotic medications can affect the production of these hormones, resulting in a variety of physical symptoms. Individuals may experience weight gain or decreased sexual drive. Women may experience disruptions in their menstrual cycles.
- _____ 7. Usually prescribed only for individuals who have been unresponsive to other types of antidepressant medications by inhibiting the release of an enzyme that breaks down the neurotransmitters dopamine, norepinephrine and serotonin. Most common types are Nardil and Parnate.
- _____ 8. Prolonged muscle contractions with exaggerated posturing of the head, neck, jaw or tongue.
- _____ 9. Metallic taste in mouth, upset stomach, loose stools are common side-effects of this mood stabilizer.
- _____ 10. Inability to sit still. This side effect accounts for 50% of all Extrapyrimalal Syndrome (EPS) complaints.

SATISFACTION MEASUREMENT
OF COMCARE C/A MEMBERS--1996-1997
(DRAFT)

INTRODUCTION

ComCare manages the behavioral health care for approximately 12,009 C/A members through its case management system including Phases 1, 2 and 4. These members receive psychiatric services either at the case management sites or the provider agencies, and behavioral health counseling through ComCare's comprehensive network of providers. In order to provide continual quality improvement, it is necessary to develop and implement procedures to measure clinical outcomes and satisfaction with services on an ongoing basis. While ComCare has historically engaged in extensive efforts to monitor quality of care through, for instance, case record review and provider monitoring, it is now embarking on efforts to monitor quality of care employing additional methodologies. These methodologies include the systematic surveying of members and providers of care using testing instruments which are systematically administered under controlled circumstances. The validity and reliability of these instruments have been established and are designed to assess specific areas of interest to ComCare and its partners.

Through the Quality Management Department, and with the cooperation of the Provider Relations and C/A Departments, ComCare will implement the following methods in order to measure satisfaction among its C/A members and their families receiving outpatient services through the ComCare provider network.

Administration of the pilot project is scheduled to commence in February 1997 while full implementation is scheduled to commence in April 1997.

PROCEDURES

STEP ONE: Various tests have been considered in order to evaluate outcomes and satisfaction with provider services. The selection process has emphasized tools which are brief, valid, reliable, and affordable. In all cases, the instruments have been used to assess outcomes or satisfaction. In most instances, the instruments are available in Spanish. Efforts will be made, in cooperation with the author(s), to translate into Spanish those tests for which a Spanish translation is not yet available.

The Devereux Scales of Mental Disorders has been selected provided a complimentary and adequate tool can be located to assess adaptive functioning. If such a tool cannot be located, then the Achenbach Child Behavior Checklist will be used. In addition, the Child and Adolescent Practitioner Version of the Service Satisfaction Scale by T.M. Greenfield will be used.

These tests are comprised of the following scales:

- A. Achenbach Child Behavior Checklist (15-20 minutes): three competency scales; eight problem scales; three composite scales (i.e., internalizing, externalizing, and total).
- B. Devereux Scales of Mental Disorders (110 items; 15 minutes): six problem scales; three composite scales (externalizing, internalizing, and critical pathology); and one total scale.
- C. Service Satisfaction Scale-Provider (10 minutes): Practitioner Manner and Style; Perceived Outcome; Office Procedures; Accessibility.
- D. Yet To Be Determined: A measure of adaptive functioning to be used in conjunction with the Devereux Scales for Mental Disorders.

Collectively, these tests measure adaptive functioning, symptoms, and satisfaction with services delivered by the ComCare provider network. Information will be secured directly from parents/guardians of C/A members.

STEP TWO: An informed consent will be drafted which will outline the procedures involved and member rights.

STEP THREE: Participants in this evaluation program will be selected in cooperation with the C/A Department and MIS. The number of members and selection process have yet to be determined.

STEP FOUR: Test instruments, along with scoring templates or computer software, will be purchased and, in the case of computer software, will be loaded into hardware.

STEP FIVE: A consultant will be identified and offered a contract in order to provide technical assistance with methodological and statistical issues as needed.

STEP SIX: Method of administration will be developed in conjunction with the Provider Relations and C/A departments. Those responsible for data collection will receive training in the following:

- A. Overall plan will be introduced in detail.
- B. Basics of test administration
 1. Importance of standard administration
 2. Introduction to validity and reliability
 3. Importance of alternating the order of tests
 4. Introduction to the tests
 - a. Hand out each test
 - b. Explanation of the importance of each test
 - c. Explain what each test measures
 5. Train data collectors in the administration of each test
 - a. Provide specific detailed instructions for each test
 - b. Data collectors will form dyads and each individual will administer the battery of tests to each other while being observed by the research psychologist
- C. Review questions and problems which arose during training with all interviewers

STEP SEVEN: Interviewers will administer the test battery either in a room appropriate for this purpose or by telephone. Informed consents will be secured in writing in the event of a face-to-face interview, or verbally in the event of a telephone interview. Packets will be returned to the research psychologist or designee.

STEP EIGHT: Demographic data will be secured regarding the members who complete the surveys. This data will include, but will not necessarily be limited to, the following: chronological age of the member; gender; intake date; case management team; dollars authorized during the past year; and, region of residence.

STEP NINE: Demographic data and tests results will be entered into a data base which will not include information which could identify members. Test forms will not include members' names. Instead, each form will be numbered and the numbers will be logged onto a separate form with the names of members. This log will be maintained in a locked file cabinet separate from the locked file cabinet containing the test forms. Demographic data will be maintained in yet another locked file cabinet should it contain member identifying information.

STEP TEN: The data will be analyzed using the Statistical Package for the Social Sciences (SPSS).

STEP ELEVEN: A report will be generated describing the results.

STEP TWELVE: Upon approval of the final report, a quality improvement plan will be developed and implemented as appropriate. Outcomes and satisfaction will again be measured in order to assess the impact of the quality improvement procedures.

SATISFACTION MEASUREMENT
OF COMCARE ADULT MEMBERS--1996-1997
(DRAFT)

INTRODUCTION

ComCare manages the behavioral health care for approximately 11,293 adult SMI members through its intensive case management system. Many of these members also receive psychiatric services at the case management sites and behavioral health counseling through ComCare's comprehensive network of providers. In order to provide continual quality improvement, it is necessary to develop and implement procedures to measure clinical outcomes and satisfaction with provider services on an ongoing basis. While ComCare has historically engaged in extensive efforts to monitor quality of care through, for instance, case record review and provider monitoring, it is now embarking on efforts to monitor quality of care employing additional methodologies. These methodologies include the systematic surveying of members and providers of care using testing instruments which are systematically administered under controlled circumstances. The validity and reliability of these instruments have been established and are designed to assess specific areas of interest to ComCare and its partners.

Through the Quality Management Department, and with the cooperation of Adult Services and the Provider Relations Department, ComCare will implement the following methods in order to measure outcomes and satisfaction among its SMI members receiving services through the ComCare provider network.

Administration of test instruments is scheduled to commence in November 1996 while full implementation is scheduled for January of 1997.

PROCEDURES

STEP ONE: Various tests have been considered in order to evaluate satisfaction with provider services. The selection process has emphasized tools which are brief, valid, reliable, and affordable. In all cases, the instruments have been used to assess outcomes or satisfaction. In most instances, the instruments are available in Spanish. Efforts will be made, in cooperation with the author(s), to translate into Spanish those tests for which a Spanish translation is not yet available.

The tests which have been selected are: the Brief Symptom Inventory (BSI); the Derogatis Psychiatric Rating Scale (DPRS); the SF-12 Health Survey; the Quality of Life Interview-Brief Version (QOLI); the Addiction Severity Index (ASI); and, the Service Satisfaction Scale-Provider Version (SSS-P).

These tests are comprised of the following scales:

A. Brief Symptom Inventory (53 items; 8-10 minutes): Somatization; Obsessive-Compulsive; Interpersonal Sensitivity; Depression; Anxiety; Hostility; Phobic Anxiety; Paranoid Ideation; Psychoticism; Global Severity Index (current overall level of distress); Positive Symptom Distress Index (intensity of distress); and, Positive Symptom Total (number of symptoms reported).

B. Derogatis Psychiatric Rating Scale (2-5 minutes): Same as the Brief Symptom Inventory nine primary scales; Global Pathology Scale; eight additional scales not included on the Brief Symptom Inventory.

C. SF-12 Health Survey (12 items; less than 5-10 minutes): Physical Functioning; Role Limitations due to Physical Health; Bodily Pain; General Health; Vitality (energy/fatigue); Social Functioning; Role Limitations due to Emotional Problems; Mental Health (psychological distress and psychological well being); Physical Health (summary scale); and, Mental Health (summary scale).

D. Quality of Life Interview--Brief Version (15 minutes): Living Situation; Daily Activities and Functioning; Family Relations; Social Relations; Finances; Work and School; Legal and Safety Issues; and, Health.

E. Addiction Severity Index (60-75 minutes for initial interview; 15-20 minutes for follow-up interview): Medical Status; Employment and Support; Drug Use; Alcohol Use; Legal Status; Family/Social Status; and, Psychiatric Status.

F. Service Satisfaction Scale-Provider (10 minutes): Practitioner Manner and Style; Perceived Outcome; Office Procedures; Accessibility.

Collectively, these tests measure quality of life, symptoms, health status, substance use/abuse, and satisfaction with services delivered by providers of clinical care. Information will be secured directly from members as well as psychiatrists and case managers/therapists.

STEP TWO: An informed consent will be drafted which will outline the procedures involved and member rights.

STEP THREE: Participants in this evaluation program will be selected by mutual agreement between ADHS/BHS and the court monitor's office. The number and selection process has yet to be determined.

STEP FOUR: Test instruments, along with scoring templates or computer software, will be purchased and, in the case of computer software, will be loaded into hardware.

STEP FIVE: A consultant will be identified and offered a contract in order to provide technical assistance with methodological and statistical issues as needed. Faculty from Arizona State University will be approached initially.

STEP SIX: Quality Improvement (QI) staff from ComCare's Quality Management Department will be responsible for the administration of the tests to case managers/therapists, psychiatrists, and members. Each QI Specialist will receive training in the administration of the tests as follows:

- A. Overall plan will be introduced in detail
- B. Basics of test administration
 1. Importance of standard administration
 2. Introduction to validity and reliability
 3. Importance of alternating the order of tests
 4. Introduction to the tests
 - a. Hand out each test
 - b. Explanation of the importance of each test
 - c. Explain what each test measures
 5. Train QI specialists in the administration of each test
 - a. Provide specific detailed instructions for each test
 - b. QI specialists will form dyads and each specialist will administer the battery of tests to each other while being observed by the research psychologist
- C. Review questions and problems which arose during training with all QI Specialists

STEP SEVEN: Relying on the sample provided by BHS and the court monitor's office, the QI Specialists will administer the test battery in a room appropriate for this purpose. There will be at least two QI Specialists assigned to each case management site in order to enhance measurement of inter-rater reliability. Informed consents will be secured. Packets will be sealed and returned to the research psychologist or designee. The member will be rescheduled for follow-up as soon as possible if unable to complete the battery in one testing session.

STEP EIGHT: Demographic data will be secured from Adult Services regarding the members who complete the surveys. This data will include, but will not necessarily be limited to, the following: chronological age; gender; priority status; intake date; diagnoses including the presence of a chemical dependency diagnosis; case management team; dollars authorized during the past year; and, region of residence.

STEP NINE: Demographic data and tests results will be entered into a data base which will not include information which could identify members. Test forms will not include members' names. Instead, each form will be numbered and the numbers will be logged onto a separate form with the names of members. This log will be maintained in a locked file cabinet separate from the locked file cabinet containing the test forms. Demographic data will be maintained in yet another locked file cabinet should it contain member identifying information.

STEP TEN: The data will be analyzed using the Statistical Package for the Social Sciences (SPSS).

STEP ELEVEN: A report will be generated describing the results.

STEP TWELVE: Upon approval of the final report, a quality improvement plan will be developed and implemented as appropriate. Satisfaction will again be measured in order to assess the impact of the quality improvement procedures.

Respectfully Submitted,

Elliot D. Salk, Ph.D.
Research Psychologist

Ann Froio
Director, Quality Management

PRINCIPLES OF CARE

MEASURE	Meets Standard	Does Not Meet Standard
1. Humane Treatment		
2. Integration		
3. Respect		
4. Self Determination		

Humane Treatment: Provider Audit

PROARI #10 Restrain/seclusions are used only when an individual presents as a serious physical danger to self or others and only when other reasonable less restrictive alternatives have been tried and/or determined inappropriate

PROARI #11 Restrain/seclusion is only used when authorized by a physician and with orders which do not extend beyond three hours.

SMIPROV #29 The living environment is free from verbal and/or physical abuse. R9-21-202.6.

Humane Treatment: Case File Review

CFR #185 The person's basic needs are reasonably met.

Use evidence in the record regarding adequacy of food, clothing and shelter

Input from person, family, guardian

Assist in obtaining and coordination regarding medical treatment for major medical conditions

All three provider audit questions must be scored "yes"

The two Case File Review questions must also be scored "yes".

To make a final determination as to whether the member receives humane treatment, roll all five (three provider audit and two CER) questions together: all must be "yes" to achieve compliance with this principle. The provider will be scored as "Meets Standards" on the provider profile when all criterion are met. If a "no" answer is present among the five criterion the provider will be scored as "Does Not Meet Standards" and the criteria or criterion will be reflected in a requirement for corrective action per the PQR protocol.

Integration: Provider Audit

SMIPROV #13 Members are offered services which are integrated into the community and are geographically, physically, and culturally accessible.

SMIPROV #23 There are opportunities for daily activities, recreation, and physical exercise. R9-21-202.7.e.

Consider the member/guardian interviews, program observations, and program activity schedules when making your determination.

Integration: Provider Audit

CFR #176-C During the time period examined, the services provided are provided in the least restrictive manner possible.

Consider the amount of supervision needed, input from person/family/guardian, privacy, individualized setting, safety issues, and the person's ability to make personal choices and decisions.

CFR #70 Members have an opportunity to go to church, outside recreation, shopping, or seek education and employment activities.

Consider member/guardian interviews and program activity schedules to make your determination.

*Both provider audit questions must be scored "yes"
Both Case File Review questions must also be scored "yes".*

To make a final determination as to whether the member is integrated into the community, roll all four (two provider audit and two CFR) questions together; all must be "yes" to achieve compliance with this principle. The provider will be scored as "Meets Standards" on the provider profile when all criterion are met. If a "no" answer is present among the four criterion the provider will be scored as "Does Not Meet Standards" and the criteria or criterion will be reflected in a requirement for corrective action per the POR protocol

Respect: Provider Audit

PROQMP #8 Provider has a written member rights policy and procedure or statement of member rights in accordance with R9-20-201 and for SMI programs also R9-21-211.

PROARI #14 Action take on grievance resolutions is appropriate and timely.

SMIPROV #7 Information about treatment is released to sources other than COMCARE or its affiliates only with a signed release.

SMIPROV #28 The living environment affords appropriate privacy. R9-21-202.6.

Respect: Case File Review

CFR #180-D

Overall, the person is treated with dignity and respect. Consider the following to determine compliance:

- Indication that the person is treated as a unique and valued individual (person, case manager, family/guardian, & provider interviews; program observations)
- Individual's rights are honored and protected (#3A-B, 108A-B)
- Provision of special assistance when applicable (#179)
- Participation in the planning process (#175)
- Person's input, preferences, choices and personal goals are included in the planning (#174)
- Changes in the person's circumstances are responded to by the clinical team (#177)
- Cultural diversities are recognized and respected by the clinical team

All four provider audit questions must be scored "yes

The Case File Review summary question and all of the above referenced questions that lead to the scoring of the summary question must also be scored "yes."

To make a final determination as to whether the member is treated with dignity and respect, roll all five (four provider audit and the CFR summary) questions together: all must be "yes" to achieve compliance with this principle. The provider will be scored as "Meets Standards" on the provider profile when all criterion are met. If a "no" answer is present among the five criterion the provider will be scored as "Does Not Meet Standards" and the criteria or criterion will be reflected in a requirement for corrective action per the PQR protocol.

Self-Determination: Provider Audit

SMIPROV #10

Members participate in the development, implementation, monitoring, and revision of their treatment plans. (All programs)

Consider the member signature, member, guardian and case manager interviews, and case manager progress notes when making your determination.

SMIPROV #11

Members have a choice/input in personal goals related to community living, education/vocation, social and recreational activities unless they are unwilling or unable to do so.

Consider the face sheet of ISP, CFR person interview #8, SMI Program Review #12, and Provider Interviews #s 8, 9, 12 when making your determination.

Self-Determination: Case File Review

CFR #22-A Documentation is present re: the person's long term view, preferences, or personal goals with respect to community living arrangements, social/recreational activities and educational/vocational activities.

CFR #38 Evidence exists that the person/guardian provided verbal or written consent to take psychiatric medications.

Evidence can be located in the psychiatric/nurse practitioner progress notes, consent forms, or team meeting notes.

CFR #175 Did the class member participate in the planning and development of their ISP, if one exists, or their treatment plan, if no ISP is available?

The reviewer will determine through interviews and through documentation in progress notes, ISP/treatment plans, assessment information and other clinical record documentation whether the person participated in the planning or development of their ISP/treatment plan.

Both provider audit questions must be scored "yes"

All three Case File Review questions must also be scored "yes."

To make a final determination as to whether the member has input into his/her destiny, roll all five (two provider audit and three CER) questions together; all must be "yes" to achieve compliance with this principle. The provider will be scored as "Meets Standards" on the provider profile when all criterion are met. If a "no" answer is present among the five criterion the provider will be scored as "Does Not Meet Standards" and the criteria or criterion will be reflected in a requirement for corrective action per the POR protocol.

ComCare PROVIDER TRAINING PLAN

I. INTRODUCTION

ComCare values the importance of a well trained service delivery team. The guiding forces of the Behavioral Health System are demonstrating an increased level of attention to the ongoing training and education of this work force. In an effort to increase the cohesion and consistency of information provided, ComCare has developed and is implementing the Provider Training Plan (PTP). Compliance with the PTP is mandated through Standard #9 of the FY 9/6/97 ComCare Quality Management (QM) Plan. The monitoring of compliance with this plan will be conducted as indicated by the Provider Monitoring Plan, and Performance Indicators.

The ComCare Provider Training Plan is developed in cooperation between the Education & Training and Provider Relations Sections. This plan will establish:

1. Training standards/criteria for Provider agencies:

There are 2 sets of criteria, those for Adult SMI Providers, and Child/Adolescent Providers. Those Providers of other services are not affected by the current PTP.

2. A ComCare technical assistance plan:

ComCare Education & Training Section will provide 13 Adult SMI Curriculum Packages, and 12 Child/Adolescent Curriculum Packages. This begins with the delivery of 4 Curriculum Packages and Training of the Trainer (TOT) Seminars by 4/96.

3. Provider reporting mechanism and acceptable time frames for implementation of this plan:

Provider training is expected to begin after the delivery of Curriculum Packages and TOT Seminars

4. Criteria for Providers' Internal Training Plan:

Providers must submit the "Provider Internal Training Plan" to their Program Specialist by 3/1/97.

5. Standards for maintenance of training documentation, and on site review process.

Specific documentation standards are delineated below.

Only Provider agency staff delivering face to face clinical services to ComCare members are subject to the requirements of the PTP. This includes all staff employed (including contracted and full time employees) by the Provider Agency who are involved in provision of clinical service to ComCare members. All qualifying employees are to receive the same program of instruction. There are not specific requirements for different positions. The successful actualization of the PTP will be included as part of Provider agencies maintaining their credentialing in the ComCare Provider network.

At this time, only those agencies delivering Adult SMI services, or Child/Adolescent services are mandated to implement the PTP. For those providing services under the fund types Mental Health, Alcohol, & Drug, an additional set of criteria will be established, and curriculum will be developed and delivered by 4/97, with an expectation of implementation by 7/97. Agencies delivering Prevention services will not be included in this plan, at this time. ComCare's recent publishing of the Prevention Plan is currently being implemented by prevention providers. Additionally, the Prevention Professional Standards (1/96 implementation) delineate current training standards for Prevention Professionals.

All agencies in the ComCare Provider network are licensed by the Office of Behavioral Health Licensing. As is noted on the matrix in APPENDIX A *Provider Training Mandates* a majority of the training modules have multiple mandate sources. For consistency and accuracy of the data, ComCare will monitor all mandated training requirements delineated in the matrix.

Time frames

Training requirements remain largely consistent across agencies, however there will be differing content areas for those providing Child/Adolescent services and those providing Adult SMI services. All Provider agencies providing services under these fund types will be required to submit a Provider Internal Training Plan (PITP) to communicate their strategies for implementation of the PTP. The PTP will go into effect in April of 1996, with PITP's due to ComCare's Provider Relation Section no later than March 1, 1997. Criteria and reporting mechanisms will be communicated in detail later in this document. Curriculum packages for mandated training modules will be delivered to Provider agencies at a rate of 4 per quarter, beginning in April of 1996. At that time the first four curriculum packages, which will have been reviewed by ComCare staff as well as a Provider Focus Group, will be delivered.

II. PTP CRITERIA

Agencies providing **Adult SMI Services** will receive the following curriculum packages: *See APPENDIX A for mandating source.*

- CPR/First Aid
- Facility Policies/Mission
- Safety and Security in the workplace
- Arizona Level of Functioning Assessment (ALFA)
- Confidentiality/Mental Health and the Law
- Physical Intervention Techniques/Non-Violent Crisis Intervention
- Psychopharmacology
- Understanding Persons with Serious Mental Illness
- Continuum of Care in Managed Care
- Individual Service Plan (ISP) **(Includes Special Assistance Process)
- Strengths Model of Service Delivery
- Grievance & Appeals
- Clinical Documentation
- HIV/AIDS
- Clinical Aspects of Case Management and Clinical Team **(Includes Special Assistance Process)
- Consumer Perspective of Mental Health Services
- Co-Pay
- Exit Criteria

ComCare Courses and Exit Criteria Training Requirements Cross Walk

ComCare Course	Exit Criteria Requirement/Language
CPR/First Aid	1. Preliminary medical emergency care and reporting requirements.
Facility Policies/Mission	1. Agency mission and philosophy of community support
Safety and Security in the workplace	1. Preliminary medical emergency care and reporting requirements
Confidentiality/Mental Health and the Law	1. Legal and human rights 2. Member privacy and confidentiality
Non-Violent Crisis Intervention	1. Physical intervention techniques
Psychopharmacology	1. Identification of adverse reactions to psychoactive medications
Understanding Persons with Serious Mental Illness	1. Identification of member illnesses and injury
Individual Service Plan (ISP)	1. Development/implementation of ISP's
Strengths Model of Service Delivery	1. Agency mission and philosophy of community support 2. Principles of staff/member interaction designed to facilitate health and growth
Grievance & Appeals	1. Grievance Procedures
Clinical Documentation	1. Role, responsibility and authority of case manager and clinical team
Clinical Aspects of Case Management and Clinical Team	1. Agency mission and philosophy of community support 2. Principles of staff/member interaction designed to facilitate health and growth 3. Principles of normalization and least restrictive environment 4. ID, response to, and reporting of member abuse, neglect and exploitation 5. Principles of staff/member interaction designed to facilitate health and growth
Consumer Perspective of Mental Health Services	Perspectives and values of consumers of mental health services

Agencies providing **Child/Adolescent Services** will receive the following curriculum packages: *See APPENDIX A for mandating source*

- CPR/First Aid
- Facility Policies/Mission
- Safety and Security in the Workplace
- Confidentiality/Mental Health and the Law
- Arizona Level of Functioning Assessment (ALFA)
- Physical Intervention Techniques/Non-Violent Crisis Intervention
- Psychopharmacology
- Continuum of Care in Managed Care
- Working with Schools (Replaces Hodges v Bishop)
- Understanding Childhood Psychiatric Illness
- Strengths Model of Service Delivery
- Grievance & Appeals
- Clinical Documentation
- HIV/AIDS
- Clinical Aspects of Case Management and Clinical Team
- Working with Families
- Co-Pay

III. ComCare Technical Assistance

In order to assist agencies in the Provider Network, ComCare will provide technical assistance in the following manners.

1. The ComCare Education & Training Section will provide curriculum packages for specified mandated courses. Those courses for **Providers for Adult SMI Services** are:
 - Arizona Level of Functioning Assessment (ALFA)
 - Confidentiality/Mental Health and the Law
 - Psychopharmacology
 - Understanding Persons with Serious Mental Illness
 - Continuum of Care in Managed Care
 - Individual Service Plan (ISP)
 - Strengths Model of Service Delivery
 - Grievance & Appeals
 - Clinical Documentation
 - Clinical Aspects of Case Management and Clinical Team
 - Consumer Perspective of Mental Health Services
 - Co-Pay
 - Exit Criteria

ComCare will require, but not provide curriculum packages for the following:

- CPR/First Aid
- Facilities Policies/Mission
- Physical Intervention Techniques/Non Violent Crisis Intervention
- HIV/AIDS
- Safety and Security in the Workplace

ComCare will not provide these curriculums as these classes are offered to ComCare staff by other agencies, and are not packages designed or delivered by members of the Education & Training staff. ComCare will provide referrals to agencies in the community who provide these training programs.

All aforementioned classes are required to be taken only once by each employee. This excludes CPR/First Aid, which has specific time limits designated by the organization delivering the training. Only attendance at training using ComCare Curriculum Packages, or Approved Alternative Training Packages will satisfy this plans' training requirements. Attendance at State, National, or other Local training sessions will not be allowed to substitute for these classes.

Those Provider agencies delivering services for **Child/Adolescent** members will be able to receive the following curriculum packages:

- Arizona Level of Functioning Assessment (ALFA)
- Confidentiality/Mental Health and the Law
- Psychopharmacology
- Continuum of Care in Managed Care
- Working with Schools (Replaces Hodges v Bishop)
- Understanding Childhood Psychiatric Illness
- Strengths Model of Service Delivery
- Grievance & Appeals
- Clinical Documentation
- Clinical Aspects of Case Management and Clinical Team
- Working with Families
- Co-Pay

ComCare will require, but not provide curriculum packages for the following:

- CPR/First Aid
- Facilities Policies/Mission
- Physical Intervention Techniques/Non Violent Crisis Intervention
- HIV/AIDS
- Safety and Security in the Workplace

ComCare will not provide these curriculums as these classes are offered to ComCare staff by other agencies, and are not packages designed or delivered by members of the Education & Training staff. ComCare will provide referrals to agencies in the community who provide these training programs.

All aforementioned classes are required to be taken only once by each employee. This excludes CPR/First Aid, which has specific time limits designated by the organization delivering the training. Only attendance at training using ComCare Curriculum Packages, or Approved Alternative Training Packages will satisfy this plans' training requirements. Attendance at State, National, or other Local training sessions will not be allowed to substitute for these classes.

As of this date these curriculum packages are not fully prepared for distribution to Providers. Providers will have the opportunity to send representatives to a Training of the Trainers (TOT) seminars to be conducted in coordination with the release of a curriculum package. Curriculum Packages are expected to be completed at a rate of 4 per quarter, beginning in April 1996. They will be delivered to the Provider agencies as soon as they have received all final approval, and have been produced.

TOT Seminars will be offered Annually by ComCare Education & Training Staff. These sessions will be used to update existing curriculum packages, as well as to certify newly selected Provider Trainers. Provider Agencies can send no more than 3 staff members to attend any TOT Seminar.

The Education & Training Section will not be providing videotapes of the TOT Seminars. The interactive nature of the TOTs will reduce the efficacy of videotape as a reasonable substitute for active participation. However, any agencies wishing to videotape the events are welcome to do so.

Provider Trainers will be encouraged to utilize their own experiences, as well as to tailor the materials to the particular services they deliver. The ComCare Curriculum Packages are developed to provide a structure, necessary facts and information, as well as examples intended to clarify concepts, for instruction. Instructions in the TOT sessions will direct Provider Trainers to elaborate upon the provided materials so as to increase the relevance to their agencies.

If a Provider Agency believes that they are currently using a curriculum package that better meets their needs, and is consistent with the stated learning objectives of the ComCare Curriculum, they may submit those materials to be considered for substitution. If the materials reflect a content which is fundamentally similar, and participants can consistently pass the ComCare Post-Test, it will be allowed to substitute for the ComCare Curriculum Package. Alternative training materials will be approved on a probationary basis if they meet the first criteria. One quarter after their implementation Provider Agencies must submit a report indicating the percentage of participants passing the ComCare Post Test. Alternative training materials will be fully approved for those packages with over 80% of participants passing. Please see Section D of the Provider Internal Training Plan Reporting Format, (Appendix D) for the Alternative Curriculum Approval Form.

Certification of Provider Trainers

Provider success in the implementation of this plan requires careful selection of the trainers to attend the TOT seminars. It is suggested that you select an individual who is experienced, and has established their credibility within your organization. Secondly their pre-seminar review of the Curriculum Packages is imperative. It is ComCare's expectation that those individuals chosen to attend the TOT seminars will have read all curriculum packages prior to their attendance. Their ability to comprehend both the content and training strategies will be directly influenced by their pre-seminar preparation. It is anticipated at this date that seminars will combine at least two, and the most 3 curricula packages in each 4 hour block of time.

All participants successfully completing the TOT Seminars will receive ComCare Provider Training Certification. It is recommended that all Provider Agencies send representatives to the TOT Seminars. The value in participation in these seminars is multiple. First they will be provided with a thorough review of the curriculum packages by the Education & Training staff authoring the curriculum. Secondly, participants will receive valuable advice regarding adult learning principles and effective training strategies and tactics. Thirdly, Provider Trainers will have an opportunity to have all their questions answered regarding both the particular curricula and the Provider Training Plan. Fourthly, the TOT Seminars will provide an excellent opportunity to establish relationships between Provider Trainers and ComCare's Education & Training Staff. Finally, the TOT seminars will specifically facilitate the process of Provider Networking to pool the collective training resources of Provider Agencies.

However, attendance at the TOT seminars are not required for a Provider Trainer to receive Certification. Provider Trainers not attending the TOT seminars and requesting Certification must submit the following:

- Name, Title, and Degree,
- Training Experience in Behavioral Health
- Reason why they feel it is not necessary for their attendance at the TOT Seminars
- Curriculum Modules for which they are requesting Certification
- Experience in content areas of Curriculum Modules
- Approval from their supervisor to train the Curriculum Modules without attending the TOT Seminars
- A video/audio tape of one of their training sessions.

Certified Provider Trainers will receive a certificate for each of the Curriculum Modules. Certificates will be distributed at the conclusion of a TOT Seminar to all participants. Certificates for those not attending the TOT Seminars will be distributed as individual reviews are completed. These will be Provisional Certificates and full Certification will occur at the completion of the first quarter of implementation. One quarter after their implementation Provider Trainers with Provisional Certificates must submit a report indicating the percentage of participants passing the ComCare Post Test. Full Certification will be approved for those Provider Trainers with over 80% of participants passing .

IV. Reporting Mechanisms

ComCare will provide all Providers with Master Copies of Sign-In Sheets (*see APPENDIX C*) for all monitored classes. These are to be used by network agencies to document their staffs' participation. The provided Sign-In Sheet must be used in all PTP training activities. Providers will then translate percentages and numbers of their staff who have received training in each specific class. Reports will document the percentage of existing staff who have received training for each of the mandated training sessions. Providers will submit the reports to ComCare in a quarterly report. *See APPENDIX B for the Provider Quarterly Reporting Form.*

Provider Quarterly Reports are due at the conclusion of a quarter. Quarters will end December, March, June, and September, and the reports are to be submitted no later than the 15th of the following month. Reports are to be sent to the Provider agency's' appointed Provider Relations Specialist (*Need correct title*). Those reports will be consolidated on the ComCare Provider Training Quarterly Compliance Summary form.

Thresholds for compliance, which are consistent with those indicated in the Exit Stipulation, are as follows:

- year one, compliance = 35% of staff trained January 1, 1998
- year two, compliance = 60% of staff trained January 1, 1999
- year three, compliance = 80% of staff trained January 1, 2000

Percentages are to be compiled by dividing the number of Agency staff who deliver face to face clinical services to ComCare Members, by the number of same Agency staff who have completed the training for a particular training package. Percentages must be completed for each of the 16 required courses.

At the conclusion of the first year of implementation Providers will be evaluated for their compliance with these criteria. Provider agencies not in compliance will have to submit a Corrective Action Plan (CAP) and delineate how they will come into compliance in the subsequent quarter. Those agencies who are unable to meet criteria within the first quarter following the compliance date will be required to send their staff to ComCare sponsored classes at a cost of \$10 per course hour, per person. Additional sessions of the Training of the Trainer Workshops will also be provided annually.

V. Provider Internal Training Plan (PITP)

To communicate the strategies members of the Provider Network intend to meet the criteria of the Provider Training Plan each must develop an internal plan for implementation. These plans can be developed for only one specific agency, or a number of agencies can cooperatively develop plans to be used by participating agencies. The PITP must be submitted to your Provider Relations Specialist no later than 5/1/96.

Please see the Provider Internal Training Plans format in APPENDIX D for specifics.

Documentation Of Training And On Site Monitoring

ComCare will conduct periodic on-site monitoring reviews of Provider documentation of training. Responsibilities for this will be determined by the Provider Monitoring Task Force. It is expected that all Providers maintain a file of the documentation of their staffs' training activities. This documentation will be maintained in one central location. The COMCARE Sign-In Sheets and Competency tests will satisfy all documenting criteria. Documentation must contain at least the following information:

- Staff name participating in the training module
- Class Title
- Hours of the Class
- Instructor
- Date of Completion
- Copy of post-test

On site reviews will occur in conjunction with the review standards articulated in the Provider Monitoring Plan.

RBHA EVALUATION PROCESSES

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

RBHA Evaluation Processes

- Quarterly quality management and financial reports (including utilization reports by COMCARE)
- Problem resolution tracking system reports
- Grievance, appeal, and investigation reports
- Mortality reports
- Seclusion and/or restraint reports
- Annual operational/financial review
- Annual provider network status report with quarterly updates
- Case review instrument (see first tab in Attachment E)
- Client satisfaction survey (see second tab in Attachment E)

ATTACHMENT E.4A
QUARTERLY QUALITY MANAGEMENT AND FINANCIAL REPORTS

RBHA EVALUATION
Quarterly Quality Management Reports

Indicators Utilized for Quarterly Quality Management Reports:

- Determination of Need for special services for people with serious mental illness (SMI)
- Determination of Need for Intensive Case Management Services (Children)
- Accessibility
 - Waiting Time: Referral to Intake (Number/% within standard - 7 days)
 - Waiting Time: Intake to First Service (Number/% within standard - 30 days)
 - Threshold = 95%
- Assessment and Service Planning
 - Number of Records Reviewed
 - Number/% of Assessments determined Adequate/Comprehensive
 - Number/% of Service Plans determined Adequate/Comprehensive
 - Number/% of Service Plans consistent with Assessment Information
- Coordination with Health Plans (meet at least one during the quarter)
- Response Back to PCP Referrals (Number/% verified)
- Report on RBHA monitoring of providers (as available)
- Report on Client Satisfaction (as available, twice per year)
- Report on Problem Resolution Tracking
- Patient Days per 1000 (intensive levels of care)
- Average Length of Stay (intensive levels of care)
- Readmissions within 30 days (to intensive levels of care)

In addition, a monthly report is issued on Clozapine usage including the following outcome indicators:

- Functional Level (ALFA)
- Global Improvement (CGI)
- Efficacy (CGI)

ATTACHMENT E.4B
PROBLEM RESOLUTION TRACKING SYSTEM REPORTS

RBHA EVALUATION

Problem Resolution Tracking System

Title

- Problem Resolution Tracking System

Purpose

- provide follow up to requests submitted for resolution of problems related to delivery of behavioral health services through the RBHAs in an expedient manner and to ensure a system is in place to address issues as they rise in the future

Process

- record receipt of request for problem resolution not related to grievance and appeals process
- data enter information
- assign identification number, follow up date, and name of investigator
- classify timeframe for resolution as to urgency (emergency--within 24 hours, immediate--within two working days, routine--within ten days)
- summarize current status of outstanding requests on a monthly basis and forward to respective manager for feedback
- apprise individual requesting resolution of status within 72 hours of receipt of request
- provide formal response with resolution and recommendations to AHCCCS Coordinator on a quarterly basis
- track and trend problem reporting in quarterly quality management reports

Frequency

- Ongoing

Processes for Grievances/Investigations

RBHA Grievances and Investigations (other than physical/sexual abuse and mortalities)

- client files complaint with RBHA
- RBHA assigns ADHS/DBHS docket number
- RBHA reviews complaint
- complaint summarily disposed, initially disposed, or assigned to investigator
- acknowledgment sent to complainant
- if assigned, investigator interviews both the person filing the complaint and the person named in the complaint and all relevant parties
- investigator reviews documentation
- investigator submits written report with recommendations to RBHA Director
- RBHA Director reviews report and issues decision
- RBHA notifies all parties of decision
- complainant files notice of appeal with RBHA and ADHS/DBHS
- RBHA forwards file to DBHS for review
- ADHS/DBHS reviews reports, requests revisions (as needed), remands to RBHA, or issues decision
- DBHS issues decision with appeal rights to complainant
- if remanded, RBHA provides revised decision with appeal rights to client who may appeal to DBHS
- if complainant appeals, ADHS/DBHS forwards to Office of Administrative Counsel
- ADHS Administrative Counsel arranges hearing through OAH
- if not resolved, client may file request for reconsideration
- Director issues decision regarding request for reconsideration

DBHS Grievances and Investigations (arising from allegations of physical/sexual abuse)

- incident reported to RBHA
- RBHA provides written notification to DBHS
- DBHS screens and assigns for investigation as appropriate or determines appropriate disposition
- DBHS assigns investigator

* data entered in public log

RBHA EVALUATION

Grievances, Appeals, and Requests for Investigations

- investigator submits written report with recommendations to DBHS/Office of Grievances and Appeals
- DBHS reviews report and issues decision, including requirements for corrective action
- RBHA submits completed corrective action to DBHS
- grievant files notice of appeal with ADHS/DBHS (grievances only)
- ADHS/DBHS forwards notice of appeal to Office of Administrative Counsel
- ADHS Administrative Counsel arranges hearing through Office of Administrative Hearing (OAH)
- OAH issues recommendation to Director
- Director issues decision
- if not resolved, client may file request for reconsideration
- Director issues decision regarding request for reconsideration

Data Elements for Appeals

- Resolved - DBHS*
- Appealed to hearing (if unresolved)
- Hearing date
- Hearing decision
- Request for reconsideration
- Director's decision regarding resolution
- Appeal to AHCCCS, if unresolved
- Closure Date*

Processes for Appeals

Appeals

- client files appeal with RBHA
- RBHA assigns ADHS/DBHS docket number
- RBHA acknowledges receipt of appeal and refers to clinical team for resolution
- if not resolved, RBHA schedules informal conference
- RBHA mediates issue and resolves in informal conference, if possible
- RBHA notifies ADHS/DBHS if not resolved and DBHS schedules second informal conference (if not waived by applicant)
- DBHS holds second informal conference
- if not resolved (or if applicant waived DBHS informal conference), fair hearing is scheduled with Office of Administrative Hearing (OAH) through ADHS counsel
- OAH Director holds fair hearing and renders final decision
- if not resolved, appealant may request reconsideration and/or ADHS Director may render final decision
- appeal to AHCCCS if Title XIX

* data entered in public log

RBHA EVALUATION Mortality Reports

- Medical History
- Name-of-Witnesses
- Action-Taken
- Name-Preparer-Report

Process

- RBHA sends initial report of death to DBHS
- record receipt of report
- assign a docket number
- create report file and enter information into mortality database
- review of I/A/D form by OMC/QA UR nurse
- follow up on receipt of RBHA Mortality Report Form until received
- enter information from Mortality Report Form into mortality database
- review of completed file by OMC/QA UR nurse for completeness, clarity, documentation of coordination with medical providers in relation to significant medical conditions, service provision and events preceding death in relation to statutes/rules/policies/standards of care in the community, documentation of identification of training or technical assistance issues, identification of examples of best practice activities, quality improvement actions
- request additional information, if needed, and follow up until received
- complete review of case and forward to ADHS/DBHS Medical Director for final resolution, if needed
- discuss case with Medical Director and determine whether to close case or request an investigation
- follow process for investigations, if needed, as described in Request for Investigation
- hold a quarterly meeting with RBHA staff to discuss:
 1. problems in reviewing client deaths
 2. quality improvement activities
 3. trends/technical assistance/educational needs
- distribute minutes of meetings

**ATTACHMENT E.4E
SECLUSION AND/OR RESTRAINT REPORTS**

RBHA EVALUATION

Seclusion and/or Restraint

Title

- Seclusion and/or Restraint

Purpose

- review of all incidents of seclusion and/or restraint to assure that the RBHAs fulfill their responsibilities under Title 9, Chapter 21 and that the RBHAs have a system in place to maintain the quality of care for all clients

Frequency

- Monthly

Data Sources

- RBHA monthly report of incidents of seclusion and/or restraint

Content

- Level I Facility monitoring forms
- Number of incidents of s/r at each Level I Facility
- RBHA monitoring activities and summary of any quality improvement, training, and/or technical assistance

Process

- record receipt of reports
- forward reports to DBHS OMC/QA UR nurse for review
- review reports for completeness, clarity, timeliness, data consistency, documentation of compliance with statutes/rules/regulations/policies, documentation of identification of training or technical assistance issues, identification of examples of best practice activities, quality improvement actions
- request additional information as needed
- follow up on requests for additional information
- conduct review with special attention on specific areas:
 - ⇒ interventions utilized prior to the use of seclusion/restraint
 - ⇒ physician involvement if incident exceeds time lines
 - ⇒ Special Treatment Plan Development per requirements
 - ⇒ criteria for release from seclusion/restraint
 - ⇒ facility staff check patient for safety, basic needs (water and toilet), vital signs, and/or more specific monitoring of medical conditions
- complete review and file report in locked area
- hold a quarterly meeting with RBHA staff to discuss:
 - trends, technical assistance, and/or educational needs
 - quality improvement activities
 - problem encountered in reviewing information

RBHA EVALUATION

Seclusion and/or Restraint

- distribute minutes of meeting to:
 - ⇒ ADHS/DBHS Management Team
 - ⇒ Bureau of Persons with Serious Mental Illness
 - ⇒ Meeting attendees
- for specific RBHA issues, the OMC/QA UR nurse meets with RBHA reviewers and appropriate RBHA staff to work for improvement of processes, using such questions as:
 - ⇒ what criteria could show the person is treated with dignity and respect during S/R and that it could not have been prevented?
 - ⇒ what statistical data should we be collecting?
 - ⇒ what can we do to reduce incidences of seclusion/restraint?
 - ⇒ what other indicators should we be reviewing?
 - ⇒ how can we make the feed back loop better?

ATTACHMENT E.4F
ANNUAL OPERATIONAL/FINANCIAL REVIEW

RBHA EVALUATION

Operational/Financial Review

The Operational/Financial Review is a comprehensive monitoring activity, conducted by ADHS/DBHS and their consultants for review of Regional Behavioral Health Authority (RBHA) operations. This review encompasses off-site and on-site activities which assess strengths as well as areas for improvement in RBHA functions and identifies corrective action and/or technical assistance needs. Corrective actions are monitored/completed and technical assistance provided following the review.

The ADHS/DBHS Operational/Financial Review for 1996 was made up of four components:

1. Monitoring Team review of the **Evaluation Guide for Operational Financial Review of Regional Behavioral Health Authorities (RBHA)** and response to all areas for which adequate information was known/available within ADHS/DBHS.

This review was completed off-site prior to the visit to the RBHA by individual team members (for their area of expertise) and/or within Monitoring Team meetings for areas requiring the combined expertise of team members.

An on-site visit to the RBHA, with scheduled interviews (individually and/or in small groups) between selected RBHA staff and ADHS/DBHS and consultant staff, covered the following topics:

- Executive Management
- Provider Network
- Member Services
 - Grievance and Appeals
 - Prior Authorization/Utilization Management
- Quality Management
- Clinical Management
 - Access and Eligibility
 - Screening and Intake
 - Emergency Services
- Medical Director
- Financial and Information Management
- Client Information Systems
- Prevention Services

2. Discussion/review with the RBHA staff of current information on processes which changed since the prior year. ADHS/DBHS staff also

RBHA EVALUATION

Operational/Financial Review

were seeking information which they found absent/lacking in their off-site review of the **Evaluation Guide**.

3. A review of the functional components of the RBHA system

A goal of the review is to understand, as clearly as possible, how the components of the RBHA system interrelate and influence each other (e.g., clinical, financial, data). In 1996, a "theme" was selected (Treatment Planning) which provided a focus for discussion of how the systems work together to achieve accountability and the best possible outcome for clients. Treatment Planning is a complex process, with many demands placed on systems due to the severity of clients clinical condition, resource availability, staff training and skills, provider strengths, geographic considerations, and myriad other influences. The review, beginning with a presentation by RBHA staff, considered clinical and administrative aspects of the process, including how Treatment Planning is influenced by, and/or influences:

- the development and monitoring of the provider network;
- data collection and MIS capabilities;
- financial processes, including overall risk management, payment methodologies, or financial position of the RBHA;
- QM studies or recommendations for improvement in the Treatment Planning process;
- coexisting mental health and addictive disorders; and
- the compliance of clients.

The areas noted above were not intended to be all inclusive, but to provide guidelines for the potential scope of the discussion. The theme, "Treatment Planning" represented a microcosm, a focus for understanding the functioning of RBHA systems.

4. Review of/determination of progress of corrective actions from the Operational/Financial Review of the prior year

ATTACHMENT E.4G
ANNUAL PROVIDER NETWORK STATUS REPORT WITH QUARTERLY
UPDATES

RBHA EVALUATION

Provider Network Status Report

Title

- Provider Network Status Report

Purpose

- Describe the delivery system at a point in time in order to determine scope and limitations of behavioral health services provided by RBHAs and subcontracted provider agencies for Title XIX eligible and enrolled individuals and their families

Frequency

- Annual report with quarterly updates to AHCCCS

Data Sources

- ADHS contract files
- DBHS management information system
- data submitted to ADHS/DBHS by RBHAs

Process

- RBHAs submit to the ADHS/DBHS Office of Planning an Annual Service Plan each February which reviews current needs and planning activities for filling gaps through contracting with providers in July
- ADHS/DBHS Office of Planning analyzes the needs assessment and gaps in services
- In July, the Office of Planning requests contract files, reviews the RBHA plan, determines whether or not needs are now being met, and assembles a report on the RBHA network for reporting to AHCCCS in October
- On a quarterly basis, the Office of Planning contacts each RBHA, secures information on contracts in process (date due, services to be provided, contracts to be reduced or terminated, etc.), determines plan to continue medically necessary services, and ascertains whether other plans are being developed to fill gaps in service needs
- RBHA notifies ADHS/DBHS immediately of the termination of any provider contract

Content

Service Categories

- behavior management
- educational and outreach services
- HIV early intervention
- home-based therapy/counseling
- inpatient service
- intervention without client present
- medication monitoring (R.N.)
- office-based therapy/counseling

INDEPENDENT EVALUATION OF THE DUTIES AND ACTIVITIES OF THE
OFFICE OF OVERSIGHT AND PROTECTIONS FOR THE SERIOUSLY
MENTALLY ILL

INDEPENDENT EVALUATION OF THE DUTIES AND ACTIVITIES OF THE OFFICE OF OVERSIGHT AND PROTECTION FOR THE SERIOUSLY MENTALLY ILL

I. Scope of Evaluation

The scope of the evaluation covers an objective and comprehensive assessment of the performance of the following entities:

1. The ADHS Office of Oversight and Protection for the Seriously Mentally Ill (hereafter referred to as OOPSMI),
2. Agencies contracting with ADHS to perform any of the OOPSMI functions as outlined in Title 9, Chapter 21, including human rights advocates,
3. Statewide and Regional Human Rights Committees.

Additionally, the scope includes an assessment of whether or not other responsible parties, e.g. Regional Behavioral Health Authorities (hereafter referred to as RBHA's) are performing those responsibilities required regarding advocacy services and referral of clients in need of special assistance.

The evaluation will be conducted by the ADHS Office of Auditing.

The evaluation is scheduled to be conducted during the Spring of 1998 and annually thereafter until material compliance is attained. Reviews then would be biannual.

II. Methods and Activities

In order to assess compliance with the requirements of Title 9, Chapter 21, we will incorporate a number of different procedures and tests, which will include the following:

1. A review of necessary policies and procedures that should be in place for the following entities:
 - a. OOPSMI,
 - b. Contractors providing advocacy services for ADHS,
 - c. Statewide and Regional Human Rights Committees,
 - d. RBHA's.
2. A review of actual operating practices of the entities referred to in 1 above.

INDEPENDENT EVALUATION OF THE DUTIES AND ACTIVITIES OF THE OFFICE OF OVERSIGHT AND PROTECTION FOR THE SERIOUSLY MENTALLY ILL

3. Collection of information necessary to evaluate effectiveness of the functioning of the following entities:
 - a. OOPSMI,
 - b. Contractors providing advocacy services,
 - c. Statewide and Regional Human Rights Committees.
4. A review of membership, meeting dates, attendance logs, and minutes of each Regional Human Rights Committee.
5. A review of membership, meeting dates, attendance logs, and minutes of the Statewide Human Rights Committee.
6. A review of the availability of human rights advocates in Maricopa County. Availability should comply with the standards in Title 9, Chapter 21. Additionally, the ratio of clients to human rights advocates should be no larger than two thousand five hundred to one, and at least one human rights advocate should be available to the Arizona State Hospital.
7. A review of the training, supervision, and performance evaluations procedures and practices for human rights advocates in Maricopa County.
8. Interviews with the following persons:
 - a. human rights advocates in Maricopa County,
 - b. recipients(selected randomly) of services from either OOPSMI or contracted human rights advocates,
 - c. individuals who have requested and were determined not to be eligible to receive advocacy services.
 - d. other persons(selected randomly) associated with the SMI population, involved in their treatment, or advocating on their behalf. These persons could include the following:
 - 1) family members,
 - 2) ComCare case managers, clinical team members, and client advocates,
 - 3) employees of the ADHS/Division of Behavioral Health Services,
 - 4) members of Statewide and Regional Human Rights Committees,
 - 5) employees of the Office of the Court Monitor,
 - 6) representatives of other organizations whom clients approach for assistance when not satisfied with

INDEPENDENT EVALUATION OF THE DUTIES AND ACTIVITIES OF THE OFFICE OF OVERSIGHT AND PROTECTION FOR THE SERIOUSLY MENTALLY ILL

OOPSMI/human rights advocates, i.e., AAMI, consumer groups, Center for Disability Law, etc.

9. A review of documents and reports submitted to the Regional Human Rights Committees and the Statewide Human Rights Committee regarding the following issues:
 - a. allegations of illegal, dangerous, or inhumane treatment of clients,
 - b. monthly reports concerning the use of restraint and seclusion,
 - c. monthly reports regarding allegations of abuse, neglect, exploitation and mistreatment of clients,
 - d. monthly reports concerning accidents and injuries involving clients.
10. A review of the procedures and practices of the Regional Human Rights Committees and the ComCare clinical teams in identifying persons in need of special assistance, including, but not limited to, their maintenance of current lists of such persons.
11. A review of the quarterly reports of each Regional Human Rights Committee and the Statewide Human Rights Committee. This review will especially focus on follow-up given to issues previously raised.

III. Analysis of Information Gathered:

We will report on the results of the above procedures. In addition, we will perform adequate testing to report on each of the following assertions:

1. OOPSMI, human rights advocates, and Statewide and Regional Human Rights Committees have appropriate policies and procedures in place. Those policies and procedures comply with Title 9, Chapter 21, and are being implemented by the applicable parties.
2. Human rights advocates serve clients in accordance with Title 9, Chapter 21.
3. The Office of Human Rights and/or the human rights advocates have clear policies for the triage and prioritization of cases and activities of the staff.
4. OOPSMI and its staff have adequate support and legal assistance when needed.

**INDEPENDENT EVALUATION OF THE DUTIES AND ACTIVITIES OF
THE OFFICE OF OVERSIGHT AND PROTECTION FOR THE
SERIOUSLY MENTALLY ILL**

5. Human rights advocacy activities have effective procedures and practices to accomplish the following activities:
 - a. Inform clients about the role of the Regional Human Rights Committees,
 - b. Inform clients regarding their access to the Regional Human Rights Committees and human rights advocates,
 - c. Ensure that service providers, including ComCare; the Arizona State Hospital, and other inpatient and outpatient programs facilitate client access to human rights advocates and that they cooperate fully with human rights advocates as they attempt to serve clients.

6. Human rights advocates assist special-needs clients with the following services:
 - a. Developing individualized service plans,
 - b. Filing treatment appeals when clients believe that they are being denied services which they require,
 - c. Filing grievances when clients believe their rights have been violated,
 - d. Intervening directly to request an investigation whenever evidence exists or allegations are reported that a client may have been abused, neglected, mistreated or exploited.

7. Required information is routinely reported to the Regional and Statewide Human Rights Committees.

8. Regional and Statewide Human Rights Committees provide oversight and review of the following allegations/ reports:
 - a. Allegations of illegal, dangerous, or inhumane treatment of clients,
 - b. Monthly reports concerning allegations of abuse, neglect, exploitation and mistreatment of clients,
 - c. Monthly reports concerning the use of restraint and seclusion,
 - d. Monthly reports concerning accidents and injuries involving clients.

9. Regional and Statewide Human Rights Committees provide such oversight and review as is necessary to assess the following issues:
 - a. Accountability of the reports made to the committee,
 - b. Occurrence of appropriate investigations/reviews of any untoward incidents and of incidents which appear to violate client rights,

INDEPENDENT EVALUATION OF THE DUTIES AND ACTIVITIES OF THE OFFICE OF OVERSIGHT AND PROTECTION FOR THE SERIOUSLY MENTALLY ILL

- c. Issuance of appropriate recommendations to the Statewide Human Rights Committee, OOPSMI, and/or Division of Behavioral Health Services.
10. Regional and Statewide Human Rights Committees issue and submit quarterly reports on the first day of the months of January, April, July, and October of every year to the ADHS Director and the Assistant Director of the Division of Behavioral Health Services.
11. Regional and Statewide Human Rights Committees are properly constituted according to Title 9, Chapter 21.
12. Regional and Statewide Human Rights Committees request the services of consultants or staff persons when needed to advise the committees on specific issues. Fees for said consultants are paid by ADHS or ComCare subject to availability of funds allocated for this purpose.
13. ADHS ensures that ComCare case managers and clinical teams identify clients who are in need of special assistance.
14. ADHS and/or the RBHA ensure that clients who are in need of special assistance are identified.
15. ADHS allows the human rights advocates to operate independently without interference from ADHS in the representation of clients.

[Audit work and audit reports will be done in compliance with Government Auditing Standards as they apply to performance audits.]

IV. Evaluation Report

Our report will document the results of tests referred to in Section II and will report on the objectives referred to in Section III. It will be sent in draft form to the following entities:

OOPSMI
Statewide Human Rights Committee
Regional Human Rights Committees
ADHS Director
Assistant Director, Division of Behavioral Health Services
Contractor for human rights advocates
Regional Behavioral Health Authorities

**INDEPENDENT EVALUATION OF THE DUTIES AND ACTIVITIES OF
THE OFFICE OF OVERSIGHT AND PROTECTION FOR THE
SERIOUSLY MENTALLY ILL**

These entities will be allowed 30 days to review/comment on the draft report. Comments received by our office will be considered during preparation of the final report. Corrective action plans will be requested of parties found to have instances of material non compliance.

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

ATTACHMENT F

DATA MANAGEMENT PROCESSES

This section is a “freeze-frame” look at the overall approach that will be taken to analyze, display, and act on the data collected through the use of the data sources/processes described in Section VI, shown in Attachment E, and illustrated in the prospective examples of data reports in Attachment G.

The data management processes for the following four data collection tools/processes are described in this attachment: for the following:

1. Case Review Instrument
2. Client Satisfaction Survey
3. Provider Quality Review
4. RBHA Evaluation Tools/Processes

ADHS/DBHS will be assisted by a contractor in designing and implementing a database which will support the production of reports similar to those included in Attachment G. Additionally, the contractor will assist ADHS/DBHS in establishing specifications to guide, operationalize, and implement the management and dissemination of the data available for retrieval from the database.

ATTACHMENT F.1
CASE REVIEW INSTRUMENT

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

VI. DATA SOURCES FOR INDICATORS APPLICABLE TO CLASS MEMBERS

Five primary data sources or processes contain all necessary information for measuring and ensuring compliance with the relevant requirements of the *Exit Stipulation*, including *Appendix C*. The Case Review Instrument is the primary responsibility of COMCARE with ADHS/DBHS assuming responsibility for validating a sample of Case Review Instrument-generated results. The Provider Quality Review is the sole responsibility of COMCARE, and two of the data sources/processes are the exclusive province of ADHS/DBHS (Client Satisfaction Survey and RBHA Evaluation). The last data source relates to the responsibilities of the Office of Oversight and Protection for the Seriously Mentally Ill.

Copies of each of the tools are included in Attachment E. Descriptions of the data management activities for the tools or processes are contained in Attachment F, and prospective examples of data reports, based on the output of the majority of these tools, are shown in Attachments G and I. Attachment H demonstrates the relationship of data elements from these tools to the Six Principles and Performance Outcomes. The five data sources/processes are as follows:

1. DATA SOURCE

Case Review Instrument

DESCRIPTION

A tool of 191 data elements probing the status of an individual class member which is administered by qualified behavioral health staff

Data are generated via a treatment record review; interviews with clients, family members/surrogates, case managers, and providers; and via personal observations. The Case Review Instrument concludes with a summation applying the professional judgment of the reviewer to present a coherent picture of the status of the individual class member.

PRIMARY PURPOSE - COMCARE

To comprehensively examine, with a client-centered focus, most elements of services authorized for, and utilized by, individual class members

To determine whether each individual is receiving treatment and support appropriate to his/her needs, multiple components of service delivery (structure, process, and outcome) are assessed from several perspectives to promote accurate identification of opportunities to ensure protection of clients' rights, enhance their quality of life, and improve delivery of treatment services to clients. Because it is prohibitive to assess each client individually, a representative

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

sample will be drawn from the population of all clients according to the methodology described in Section VIII.

PRIMARY PURPOSE - ADHS/DBHS

To ascertain the reliability of the responses recorded in the COMCARE process of administering the tool and recommend necessary corrections, ADHS/DBHS reaudits 10% of the cases completed by COMCARE (using the original data sources), comparing results of the reaudits to the original audit responses, and immediately addressing issues of significant concern. ADHS/DBHS trends the results of these reaudits and then works with COMCARE to modify the tool and/or instructions and/or conduct additional training as needed in order to continually improve the reliability of the instrument.

For more information on the data management process, please refer to the description located under the Case Review Instrument tab in Attachment F.

2. DATA SOURCE

Provider Quality Review¹

DESCRIPTION

An instrument of approximately 180 data elements administered by qualified behavioral health and financial staff in order to assess provider performance in the provision of services to persons with serious mental illness

PRIMARY PURPOSE

To assess and monitor the delivery of services by the provider network through a review encompassing quality of care/service, member satisfaction, client rights, provider quality management program, utilization of funding, staff training, and compliance with all subcontract provisions and other requirements. The goals of administering the Provider Quality Review are twofold:

- A. to assess the extent to which clients receive services of optimal quality and appropriateness, and
- B. to identify barriers to achieving this objective and initiate actions to remove those barriers.

More detail on this tool can be found under the Provider Quality Review tab in Attachment F.

¹ Given the status of the Arizona State Hospital as a provider, ADHS/DBHS will review the Arizona State Hospital using the relevant components of the Provider Quality Review.

ATTACHMENT F.2
CLIENT SATISFACTION SURVEY

DATA MANAGEMENT PROCESSES

Client Satisfaction Surveys

Client Satisfaction Surveys have been developed by both ADHS/DBHS and COMCARE. The ADHS/DBHS survey is short and straightforward. It has questions such as: "How long was it after you entered your program that you started receiving services?" COMCARE developed a pair of longer surveys, one dealing with client's interaction with his/her case manager, the other dealing with the client's perceptions of how services were provided. The two approaches to assessing Client Satisfaction complement each other nicely. However, they will be given to different samples of clients. One is a part of the ADHS/DBHS Quality Management System, the other part of the COMCARE Quality Management system.

ADHS/DBHS

In June, 1995, ADHS/DBHS launched the first statewide client satisfaction survey. This initiative was prompted by the results of the first client satisfaction survey conducted in the PGBHA area as a part of the Client Satisfaction Incentive Program which was funded by the legislature. After pilot-testing the first survey, it was determined that a statewide client satisfaction survey would be completed by ADHS/DBHS twice each year.

The client satisfaction survey is a one-page instrument consisting of 12 questions: 4 of the questions provide demographic information on the client; 8 questions are related to satisfaction with the services. There is space provided for more detailed written comments as well. The name of the agency providing services is entered on the form before it is distributed to clients. The surveys are designed to be folded, sealed, and returned, with the return address and postage pre-printed.

Surveys are mailed to all contracted provider agencies (not to individual providers of services, such as psychologists in private practice), and, in Maricopa County, to each of the case management sites. The providers are instructed to give a blank survey to all clients who come into the agency/site for services during a specified week. The clients are requested to complete the form and drop it in the mail.

When the surveys are returned to ADHS/DBHS, the data is entered into the computer and analyzed. Results are produced for each RBHA and aggregated into statewide data by Title XIX, non-Title XIX, and the population as a whole. Data are also analyzed by ethnicity to determine levels of satisfaction within a particular ethnic population. Results for each provider are given to the provider and to the RBHA; each provider receives an aggregate result of satisfaction for the RBHA, but the individual results for each provider are shared only with the individual provider and with the RBHA. ADHS/DBHS also provides the RBHA with a copy of the data on diskette in order for the RBHA to do further analysis if they wish.

DATA MANAGEMENT PROCESSES

Client Satisfaction Surveys (continued)

The ADHS/DBHS management team is provided with copies of results for each RBHA, as well as the statewide data. In addition, they are provided with a written summary of the comments for each agency, so that they may make note of any particular problems that are raised. Copies of the analysis for the Title XIX clients are also provided to AHCCCS.

ATTACHMENT F.3
PROVIDER QUALITY REVIEW

DATA MANAGEMENT PROCESSES

Provider Quality Review

The Provider Quality Review has been designed by ADHS/DBHS and COMCARE as a part of the quality management system. It is designed to be an annual assessment of providers of services for adults with Serious Mental Illness, and it is completed by a team of trained reviewers.

The instrument combines data from record review, interviews, documentation review, and reviewer observations. Most questions on the instrument are answered "Yes" "No" or "NA". For the items relating to On-Site training, the data consist of percent of staff trained and percent of staff passing a post-test, while the items on the Provider Interview are mostly open-ended. The Provider Quality Review (October, 1996 version) contains 146 short answer items and a 34 item interview schedule consisting mainly of open-ended questions for interviews with provider staff. The information gathered in the interviews becomes the basis for making some of the ratings in other portions of the Provider Quality Review.

Detailed instructions to the reviewer/interviewer are incorporated into the form itself to ensure consistency in the administration of the instrument. Adjustments were made in December, 1996 upon completion and assessment of the piloting of the instrument. Adjustments will continue to be made on an ongoing basis as experience with the tool is gained.

Section*	# of Items
On-Site Review - QM Program Review	7
On-Site Training Review Part A - SMI	24
QM Admin. Review Part A - QM Plan	35
QM Admin. Review Part B - Performance Measures	16
QM On-Site Service Program Review (SMI)	25
Site Visit - Basic Contract Requirements	39

* There will be an addendum to the December, 1996 Provider Quality Review for the four program types defined in Item #15 of Appendix C of the *Exit Stipulation*.

The Provider Quality Review will be completed every year for providers of inpatient, day/vocational/ 24 hour staffed residential, and supported housing programs for adults with Serious Mental Illness. Providers of outpatient services for adults with Serious Mental Illness will be reviewed every year; however, the comprehensive, onsite review will take place on alternating years with a Desk Review. The Desk Review consists of review of documentation and data deliverables available to the RBHA by virtue of the

DATA MANAGEMENT PROCESSES

Provider Quality Review (continued)

providers' compliance with their contracts. The results will be reported for each provider separately and for the group as a whole. The individual providers will receive the report on their own program. The RBHA and ADHS/DBHS will get the individual reports and the summary reports. The individual provider report is essentially a copy of the completed Provider Quality Review with the ratings and comments on the ratings. The summary reports will again be organized around the sections of the instrument since these sections are each devoted to an important aspect of program operations. The interviews will not be processed and analyzed separately; however, they will be available if questions arise about the bases of ratings. In general, it is anticipated that the other components of the Provider Quality Review will provide sufficient detailed information.

For the summary reports, the data tabulated will be the number of providers receiving a "Yes" rating, the number receiving a "No" rating, and the number receiving an "NA." An example of a report on the On-Site Service Program Review for SMI Clients is shown in Attachment G. The other summary reports will have the same format.

TO BE DONE

Criteria for Evaluation/Thresholds: thresholds are to be established following review of the initial data collection

ATTACHMENT F.4
RBHA EVALUATION PROCESSES

DATA MANAGEMENT PROCESSES

RBHA Evaluation

ADHS/DBHS conducts a variety of monitoring activities to ensure thorough evaluation of the RBHA, examining areas ranging from overall quality management to provider contracting to operational/financial performance. As noted in the body of this document, nine specific monitoring functions have been selected to illustrate the scope and depth of the ADHS/DBHS evaluation of the RBHAs for the purposes of demonstrating compliance with the *Exit Stipulation*.

Quarterly Quality Management and Financial Reports

ADHS/DBHS, through the Office of Managed Care/Quality Assurance (OMC/QA) reviews the RBHA Quality Management Reports each quarter. At the conclusion of its review, the OMC/QA may accept the report with no further action required, or it may offer written observations, additional findings, and/or call for improvement actions by COMCARE or ADHS/DBHS management. The ADHS/DBHS management team reviews the information and recommends the appropriate action, if any. The ADHS/DBHS Assistant Director provides decisions and direction to the ADHS/DBHS Monitoring Team for COMCARE as well as to the ADHS/DBHS Office for Persons with Serious Mental Illness for review and follow up as determined to be necessary.

Problem Resolution Tracking System Reports

Also through the Office of Managed Care/Quality Assurance, ADHS/DBHS provides follow up to requests for problem resolution related to delivery of behavioral health services. OMC/QA collects information about the issue/circumstance of concern and sets a timeframe for resolution depending on the urgency/seriousness of the problem identified. An investigator is assigned to collect additional information, if needed, and to either resolve the issue or refer it to the appropriate manager for resolution. The investigator is also responsible for keeping the individual, who submitted the problem for resolution, apprised of the status of the investigation and of the formal response, when determined. On a monthly basis, the investigator summarizes the current status of all outstanding requests and forwards the summaries to the respective managers for feedback. On a quarterly basis, OMC/QA provides a formal response with resolutions and recommendations to the AHCCCS Coordinator. Lastly, OMC/QA tracks and trends problem reporting in quarterly quality management reports.

Grievance, Appeal, and Investigation Reports

The Grievance and Appeal data collection system is designed to collect information to determine: (1) whether timelines are followed in accordance with the Administrative Rules, and to (2) identify the types of problems encountered by applicants/consumers related to service delivery.

DATA MANAGEMENT PROCESSES

RBHA Evaluation (continued)

ADHS/DBHS requires the RBHAs and ASH to maintain logs of essential information for all grievances and appeals and to report all grievances and appeals to ADHS/DBHS using the ADHS/DBHS Form for Filing Grievances. The RBHAs and ASH are directed to follow the procedures specified in the Grievance Investigations Records and Tracking System and to maintain records in the following manner:

- All documentation received and mailed related to the grievance and investigation process is date stamped on the day received.
- The RBHAs and ASH obtain from ADHS/DBHS a docket number for each grievance/request for investigation that is filed. All correspondence related to each grievance or request for investigation must include the docket number.
- The RBHA and ASH maintain a log of all grievances filed. Separate logs are kept for clients and providers and include statistical information used for filing quarterly reports.
- The RBHAs and ASH maintain a file of all summary dispositions. The File includes the original grievance or investigation request letter, the ADHS/DBHS form, and a copy of the written summary disposition.
- The RBHAs and ASH maintain a grievance investigation case record for each request that has not received summary disposition. The record includes:
 - ⇒ A docket number assigned by ADHS/DBHS
 - ⇒ The original grievance/investigation request letter and the ADHS/DBHS Request for Investigation/Grievance Appeal Form
 - ⇒ Copies of all information generated through the investigation
 - ⇒ The investigator's report which includes a description of the grievance issue, documentation of the investigative process, names of all persons interviewed, written documentation of the interviews, the investigator's findings, conclusions, and recommendations
 - ⇒ A copy of the acknowledgment letter, final decision letter, and any information/documentation generated by an appeal of the grievance decision.

Reports are generated for the RBHAs and provided to ADHS/DBHS OMC/QA on a quarterly basis. The specifics of the ADHS/DBHS OMC/QA processes are described in Attachment E, RBHA Evaluation, Grievances/Appeals/Investigations. Examples of trending reports are shown in Attachment I.

Mortality Reports and Seclusion and/or Restraint Reports

The purpose of reviewing seclusion, restraint, mortality, and incidents for persons with a serious mental illness is to ensure that human rights, client rights, and the principles of respect, self-determination, and humane treatment are preserved for class members.

DATA MANAGEMENT PROCESSES

RBHA Evaluation (continued)

ADHS/DBHS investigates allegations of physical and sexual abuse as required by the SMI Rules. Accidents and injuries are investigated through the ADHS/Office of Behavioral Health Licensure (OBHL). Information regarding the OBHL investigations will be addressed during the monthly coordination meeting between ADHS/DBHS and OBHL.

Mortality reports are received by the ADHS/DBHS Office of Grievances and Appeals and assigned a docket number; then information is entered into the public log. Once completed, the reports are forwarded to the ADHS/DBHS OMC/QA. The OMC/QA reviews the reports and may ask for additional information from the RBHA if there is not sufficient data for a comprehensive review. Deaths shall be investigated as required.

The OMC/QA receives and reviews the RBHA summary and individual seclusion/restraint reports which are submitted monthly. ADHS/DBHS tracks and trends mortality, seclusion/restraint, and investigations of physical and sexual abuse information and may provide technical assistance, request corrective action, and require or recommend education and training as appropriate.

Annual Operational/Financial Review

Each year, ADHS/DBHS conducts an operational and financial review of each of the RBHAs. The review begins with collecting specific information from the RBHAs and forwarding the materials to the Monitoring Team for review off-site. The next step in the process is an on-site review of the RBHAs which consist of interviews of selected RBHA staff covering the topics described in Attachment E, RBHA Evaluation/Operational Financial Review. In addition to specified topics, the Monitoring Team will explore issues discovered in the process of reviewing materials prior to the on-site visit and will follow up on changes made in RBHA processes since the prior year's review.

Annual Provider Network Status Report (with quarterly updates)

ADHS/DBHS reviews and approves RBHA subcontracts, as well as credentialing/privileging policies and procedures. New/revised contracts are reviewed upon submission, and service information is entered into the ADHS/DBHS contract data base. The contract data base rejects contract status for any service code not permitted under the subcontractor license. ADHS/DBHS receives license status information related to RBHAs, subcontractors, and ASH directly from the Office of Behavioral Health Licensure (OBHL). ADHS/DBHS and OBHL monthly and jointly review and monitor licensing complaints and licensing review deficiencies in order to detect trends.

DATA MANAGEMENT PROCESSES

RBHA Evaluation (continued)

Case Review Instrument

The Case Review Instrument has been described earlier in the first subsection of this Attachment F.

Client Satisfaction Survey

The ADHS/DBHS Client Satisfaction Survey has been described earlier in the second subsection of this Attachment F.

QUALITY MANAGEMENT SYSTEMS AS IT APPLIES TO

Arizona Department of Health Services
Division of Behavioral Health Services

ATTACHMENT G

PROSPECTIVE EXAMPLES OF DATA REPORTS

Three different types of reports were created to give examples of the ways in which data can be collected, displayed, and compared to thresholds. With the exception of the data report related to Appendix C criteria, the data elements referenced in the report examples in this attachment were taken from the data collection tools in existence at the time of the original development of data reports, i.e., Version 11.00 of the Case Review Instrument and the October, 1996 version of the Provider Quality Review. As noted previously, only the Appendix C data report is based on the most recent editions of the Case Review Instrument (Version 15.00) and the Provider Quality Review (April, 1997).

Part of the implementation phase of the quality management system will be the design of a data system capable of supporting reports such as those shown in this attachment. The proposed data system will operationalize the functions of the QM system and ensure appropriate management and dissemination of information. One of the issues to be addressed will be how to deal with multiple scores when determining achievement of outcomes or meeting thresholds. The validity of using the median score as the definitive determination will be assessed.

The three types of prospective examples of data reports, with artificial data in the format of the tools used to collect the data, which are found in this attachment are:

1. **Functional Summary Reports**
 - a) Case Review Instrument
 - b) Client Satisfaction Survey
 - c) Provider Quality Review

2. **Principle/Performance Outcome Reports**
 - a) Performance Outcome 1.07
 - i) Data
 - ii) Graph
 - iii) Trend
 - b) through g) Performance Outcomes 2.03, 2.04, 3.02, 4.01, 5.05, 6.01
 - i) Data
 - ii) Graph
 - iii) Trend

3. **Appendix C Report**

ATTACHMENT G.1
FUNCTIONAL REPORTS

PROSPECTIVE EXAMPLES OF DATA REPORTS

All data are artificial and keyed to the data collection tools in existence in November, 1996

Functional Summary Reports

These sample reports list all items in each individual data collection tool and, for each item, the numbers of applicable clients for whom the item was rated "Yes" and "No" and "NA." Additionally, there could be a summary measure: percent of applicable items answered "Yes" for the section. Generally, this summary would be reported for the entire sample. However, if the reports were on providers and/or their programs, the sample would be drawn from only the clients receiving that individual provider/program's services.

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tool in existence in November, 1996

CASE REVIEW INSTRUMENT - ASSESSMENT SECTION ITEMS

#	QUESTIONS	Yes	No	NA
01	Is the intake assessment timely?	150	25	3
02	Is there evidence of response back to referral source?	140	36	2
02B	Is there notice to the referral source within 72 hours of referral?	125	15	38
02C	For ALTCS/DDD children and adolescents, was the response to DDD within 72 hours of intake?	30	10	138
03A	Was input from the person/family/guardian/significant other included in the assessment regarding: The history of previous treatment?	120	7	51
03B	Was input from the person/family/guardian/significant other included in the assessment regarding: The success of previous treatment?	110	17	51
04	Was the intake assessment performed by (or reviewed by) qualified staff?	169	5	4
05A	Does the intake assessment, comprehensive assessment, or psychiatric evaluation information include: Reason for request and/or referral for services?	160	14	4
05B	Does the intake assessment, comprehensive assessment, or psychiatric evaluation information include: Past psychiatric history, including hospitalizations?	150	20	8
05C	Does the intake assessment, comprehensive assessment, or psychiatric evaluation information include: Medical history?	150	15	13
05D	Does the intake assessment, comprehensive assessment, or psychiatric evaluation information include: Substance use history?	150	20	8
05E	Does the intake assessment, comprehensive assessment, or psychiatric evaluation information include: Family history, including history of behavioral health disorders?	160	10	8
06	Does the assessment information include a psychiatric diagnosis?	170	2	6
06A	Is it current? (Within the last 12 months)	150	20	8
06B	Is it complete? (All 5 axis)	130	40	8
07A	Is there a comprehensive assessment or evaluation?	150	20	8
07B	Was a face-to-face interview conducted during the assessment/evaluation process?	120	10	48
07C1	Does comprehensive assessment include mental health status?	150	20	8

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tool in existence in November, 1996

CASE REVIEW INSTRUMENT - ASSESSMENT SECTION ITEMS

#	QUESTIONS	Yes	No	NA
07C10	Does comprehensive assessment include resources/entitlements?	140	10	28
07C11	Does comprehensive assessment include substance use history?	120	30	28
07C2	Does comprehensive assessment include legal status and/or apparent capacity to make informed decisions/need for guardian/conservator?	125	25	28
07C3	Does comprehensive assessment include person's social setting?	115	35	28
07C4	Does comprehensive assessment include physical health status?	145	5	28
07C5	Does comprehensive assessment include level of daily living skills?	135	15	28
07C6	Does comprehensive assessment include criminal justice history?	60	90	28
07C7	Does comprehensive assessment include employment?	70	80	28
07C8	Does comprehensive assessment include education?	110	40	28
07C9	Does comprehensive assessment include language abilities/Interpreter services/need for sign language or literary assistance?	90	60	28
08A	Do evaluations or assessment reports address: Any required provisional or emergency services?	120	10	48
08B	Do evaluations or assessment reports address: Further evaluation or assessments required?	20	30	128
08C	Do evaluations or assessment reports address: Follow up efforts to secure needed information?	40	20	118
09	Is the assessment information available and sufficient for the clinical team/provider treatment staff to formulate a service/treatment plan?	165	13	0
10A	Is there documentation that the person was notified of his/her rights: to appeal eligibility and treatment decisions?	150	10	18
10B	Is there documentation that the person was notified of his/her rights to file a grievance?	150	10	18
10C	Is there evidence that the person/guardian has given written consent to receive treatment?	169	5	4
11A	Has the team assessed that the person is in need of special assistance in participating in treatment planning?	35	145	8
11B	Has the team assessed that the person is in need of special assistance in participating in the grievance process?	35	144	9

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tool in existence in November, 1996

CASE REVIEW INSTRUMENT - ASSESSMENT SECTION ITEMS

#	QUESTIONS	Yes	No	NA
12	If "yes" to either part of 11, is there evidence that special assistance was offered or provided by ADHS or the RBHA?	35	0	143
12B	If "no" to either part of 11, does the reviewer believe that the individual needs special assistance?	10	135	33

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tool in existence in November, 1996

ADHS/DBHS Client Satisfaction Survey Items

<u>#</u>	<u>Questions</u>		<u>Number of Responses</u>
BHS01	When you first came to the program, how long was it until you began receiving services?		
		Immediately	300
		1-7 days	139
		1-2 weeks	50
		2 weeks to 1 month	10
		over 1 month	1
BHS02	I am satisfied that my Individual Service Plan (ISP) is being followed.		
		Always	400
		Never	75
		Usually	15
		Sometimes	10
		Seldom	0
BHS03	I am treated with dignity/respect by staff.		
		Always	375
		Never	87
		Usually	23
		Sometimes	14
		Seldom	1
BHS04	Staff advise me of my rights as a consumer and I can express complaints without fear of retaliation.		
		Always	350
		Never	100
		Usually	35
		Sometimes	10
		Seldom	5

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tool in existence in November, 1996

ADHS/DBHS Client Satisfaction Survey Items

#	Questions	Number of Responses
BHS05	The clinic/office is conveniently located.	
	Yes, very	275
	Yes, fairly	125
	Somewhat No	75
	Not very No	20
	Not at all	5
BHS06	The clinic/office offers convenient appointment times.	
	Yes, very	300
	Yes, fairly	100
	Somewhat No	50
	Not very No	30
	Not at all	20
BHS07	Overall, I am satisfied that the services I have received have helped me to deal better with my problems.	
	Yes, very	420
	Yes, fairly	40
	Somewhat No	30
	Not very No	10
	Not at all	0
BHS08	I would recommend this program to a friend/relative.	
	Yes, definitely	400
	Yes, probably	65
	Not sure No	20
	Probably not No	10
	Definitely not	5

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tool in existence in November, 1996

PQR QM On-Site Service Program Review (SMI)

Item #	Item	Yes	No	NA
SMI01A	Does the provider adhere to their policies and procedures for grievances and investigations which are in compliance with R9-21-401 through R9-21-410 - people are treated with dignity and respect?	32	2	2
SMI01B	Does the provider adhere to their policies and procedures for grievances and investigations which are in compliance with R9-21-401 through R9-21-410 - members, their family/ significant others, and treatment staff all have input into treatment decisions & services?	33	3	0
SMI01C	Does the provider adhere to their policies and procedures for grievances and investigations which are in compliance with R9-21-401 through R9-21-410 - members are able to achieve the highest level of self-sufficiency supported by service/ treatment plan?	30	4	2
SMI01D	Does the provider adhere to their policies and procedures for grievances and investigations which are in compliance with R9-21-401 through R9-21-410 - services are accessible, timely, & in the least restrictive setting necessary to meet the clinical needs?	31	3	2
SMI01E	Does the provider adhere to their policies and procedures for grievances and investigations which are in compliance with R9-21-401 through R9-21-410 - members are not discouraged from challenging the system to continually improve its services (e.g. I/A)?	35	0	1
SMI02	Does the provider ensure that all required reporting takes place within the specified time frames?	36	0	0
SMI03	Is there documentation in the provider medical record to verify that a member has been informed of their right to file a grievance or request an investigation?	33	0	3
SMI04	Is the grievance rule posted and forms for filing posted in a prominent place in the provider agency?	34	2	0
SMI05	Does the agency forward copies of the request for special assistance to the Office of Human Rights?	33	3	0
SMI06A	Does the provider notify COMCARE when a member brings criminal charges against an employee?	30	0	6
SMI06B	Does the provider notify COMCARE when a provider employee brings criminal charges against a member?	32	4	0

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tool in existence in November, 1996

PQR QM On-Site Service Program Review (SMI)

Item #	Item	Yes	No	NA
SMI06C	Does the provider notify COMCARE when a provider employee or member is indicted or convicted because of an action required to be investigated by the SMI Rules?	32	0	4
SMI06D	Does the provider notify COMCARE when a member dies?	35	1	0
SMI06E	Does the provider notify COMCARE when a member is allegedly physically or sexually abused?	33	1	2
SMI07	Is a nutritionally sound diet of wholesome and tasteful food available at appropriate times and in as normal a manner as possible? R9-21-202.7.a	31	3	2
SMI08	Is there an adequate allowance of neat, clean, appropriate and seasonable clothing that is individually chosen and owned? R9-21-202.7.b	34	0	2
SMI09	Is assistance given in securing prompt and adequate medical care, including family planning services, through community medical facilities? R9-21-202.7.c	31	3	2
SMI10	Are there opportunities for social contact in the living environment? R9-21-202-7.d	33	2	1
SMI11	Are there opportunities for daily activities, recreation, and physical exercise? R9-21-202.7.e	32	1	3
SMI12	Is there opportunity to keep and use personal possessions? R9-21-202.7.f	35	0	1
SMI13	Does the member have access to individual storage space for personal possessions? R9-21-202.7.g	36	0	0
SMI14	Has the member been informed of charges for services in advance of being charged? R9-21-202-8	32	0	4
SMI15	Does the living environment afford protection from harm? R9-21-202.6	33	3	0
SMI16	Does the living environment afford appropriate privacy? R9-21-202.6	34	2	0
SMI17	Does the living environment afford freedom from verbal or physical abuse? R9-21-202.6	32	4	0

ATTACHMENT G.2
PRINCIPLE/PERFORMANCE OUTCOME REPORTS

PROSPECTIVE EXAMPLES OF DATA REPORTS

All data are artificial and keyed to the data collection tools in existence in November, 1996

Principle/Performance Outcome Reports

While the Functional Summary Reports are organized around the instruments used to collect data, the Principle/Performance Outcome Reports organize the data with respect to the Six Principles and 40 Performance Outcomes. These reports have a design very similar to the design of the Functional Summary Reports. There is one report for each outcome summarizing data from the different instruments (each with its own sample). Seven examples of these reports have been constructed. Like the functional summaries, the reports display each outcome along with the data collected on the outcome. The data elements listed are all of the ones which have been determined to be relevant to the particular outcome; items can be relevant to more than one outcome.

A parallel set of graphic reports has been derived from the Summary Reports. These reports were created by converting the response summaries to percentages. For different items and for instruments administered to different samples, the conversion happens different ways. For example, most of the Case Review Instrument items are "Yes/No," and the answers come from a sample of clients. Thus, if ADHS/DBHS sampled 178 clients (which is the number on which the artificial data are based), then for each item ADHS/DBHS has a count of "Yes" responses, a count of "No" responses, and a count of non-responses, illegible responses, etc. which have been labeled "NA." To convert these items, ADHS/DBHS divides the number of "Yes" by the number of "Yes" plus "No" responses. For example Item, data element P 130 from the Case Review Instrument, which appears on Performance Outcome Summary 5.01, has 146 "Yes's," 22 "No's," and 10 "NA's." The percent of "Yes" responses is 87 (i.e., $146/(146+22)$). The percent of "Yes's" is calculated for each item scored this way (i.e., "Yes," "No," or "NA.")

The Provider Quality Review is completed for each provider; thus, the total number of answers for a Provider Quality Review item can be the number of providers. For the Client Satisfaction Scales, ADHS/DBHS assumed that 600 clients responded. The scales are usually 5 point Likert type scales. For the summary reports, ADHS/DBHS has entered percentages; these would be the percent of clients selecting "Always" or "Usually" for an item. For the Summary Graph reports, ADHS/DBHS has taken all the items which apply to an outcome and, for each, plotted the percent of "Yes's" to Case Review Instrument and Provider Quality Review items and percent responding "Always" or "Usually" to Client Satisfaction Survey items. These reports provide a clear, graphic presentation which can be scanned easily.

The same data which go into the summary reports are also used to generate a set of Performance Outcome Trend reports. These reports combine all items

PROSPECTIVE EXAMPLES OF DATA REPORTS

All data are artificial and keyed to the data collection tools in existence in November, 1996

from an instrument for a particular outcome and show the average percent of Case Review Instrument, Provider Quality Review, and Client Satisfaction Survey items meeting criteria. In addition, because the information is reduced to three numbers for a year, ADHS/DBHS can plot the outcomes over time. For the report examples in this document, ADHS/DBHS has shown three years. This is a useful way to track changes in the performance of the system from year to year.

ATTACHMENT G.2A
PERFORMANCE OUTCOME 1.07

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tools in existence in November, 1996

PRINCIPLE #1 AND PERFORMANCE OUTCOME 1.07

Principle	People are treated with dignity and respect, and it is acknowledged that each person has rights and individual strengths which are molded by differences in culture, values, perspectives and goals.
Outcome	Individuals are provided sufficient information on their assessments and service plans so they are able to provide informed consent to treatment.

<u>Instrument</u>	<u>Item</u>	<u>Yes</u>	<u>No</u>	<u>NA</u>
CRI 09	Is the assessment information available and sufficient for the clinical team/provider treatment staff to formulate a service/treatment plan?	150	25	3
CRI 29	Is there documentation that the person received an explanation of the benefits and risks of the medication?	167	3	8
CRI 29b	If yes to 29 is there evidence that the explanation was provided by qualified staff ?	174	3	1
CRI 31	Is there documentation of adequate informed consent to ECT or surgically related procedures to address mental health conditions?	130	50	8
CRI 46	As appropriate and with consent from the person, is there evidence that the family or the guardian is involved and informed regarding behavioral health treatment?	125	45	18

<u>Instrument</u>	<u>Item</u>	<u>Percent Meeting Criterion</u>
CSS CM30	What is your overall feeling about the handling and accuracy of your records (as best you can tell)?	60
CSS SVC27	What is your overall feeling about the publicity or information about programs and services offered?	75
CSS SVC28	What is your overall feeling about the handling and accuracy of your records (as best you can tell)?	92
PQR QMP0401	Written medical record policy and procedure informed consent for treatment/ services: intended outcome	96
PQR QMP0402	Written medical record policy and procedure informed consent for treatment/ services: nature and procedures involved in treatment	80
PQR QMP0403	Written medical record policy and procedure informed consent for treatment/ services: risks of treatment	87

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tools in existence in November, 1996

PRINCIPLE #1 AND PERFORMANCE OUTCOME 1.07

<u>Instrument</u>	<u>Item</u>	<u>Percent Meeting Criterion</u>
PQR QMP04O4	Written medical record policy and procedure informed consent for treatment/ services: side effects, if any	95
PQR QMP04O5	Written medical record policy and procedure informed consent for treatment/ services: risks of not proceeding with treatment	92
PQR QMP04O6	Written medical record policy and procedure informed consent for treatment/ services: alternatives to treatment	75
PQR QMP04O7	Written medical record policy and procedure informed consent for treatment/ services: alternatives offering less risk or adverse effects	88
PQR QMP04O8	Written medical record policy and procedure informed consent for treatment/ services: notification that consent can be withdrawn or withheld at any time without any punitive action against the member	95
PQR QMP04P1	Written medical record policy and procedure informed consent for medication: common risks and side effects	85
PQR QMP04P2	Written medical record policy and procedure informed consent for medication: procedures to be taken to minimize risks	70
PQR QMP04P3	Written medical record policy and procedure informed consent for medication: description of any clinical indications that might require suspension or termination of the drug	93

Performance Outcome - 1.07

Individuals are provided sufficient information on their assessments and service plans so they are able to provide informed consent to treatment.

Percent Responding "Yes" / Meeting Criterion

PQR2QMP04P3-Written Med Rec Informed consent description of clinical indications

PQR2QMP04P2-Written Med Rec Informed consent procedures to be taken to minimize risks

PQR2QMP04P1-Written Med Rec Informed consent for medication: common risks and side effects

PQR2QMP04O8 -Written Med Rec Notification that consent can be withdrawn or withheld

PQR2QMP04O7 -Written Med Rec Informed consent for alternatives offering less risk

PQR2QMP04O6-Written Med Rec Informed consent for alternatives to treatment

PQR2QMP04O5-Written Med Rec Informed consent for risks of not proceeding with treatment

PQR2QMP04O4 -Written Med Rec Informed consent for side effects, if any

Performance Outcome - 1.07

Individuals are provided sufficient information on their assessments and service plans so they are able to provide informed consent to treatment.

Percent Responding "Yes" / Meeting Criterion

PQR2QMP04O3 -Written Med Rec Informed consent for risks of treatment

PQR2QMP04O2-Written Med Rec Informed consent nature and procedures involved in treatment

PQR2QMP04O1-Written Med Rec Informed consent for treatment/services: intended outcome

CSSVC28 - What is your overall feeling about the handling of your records

CSSVC27 - What is your overall feeling about the publicity

CSSCM30 - What is your overall feeling about the handling and accuracy of you records (as best you can tell)

CRI46 - Family/guardian is involved and informed regarding BH treatment?

CRI31 - Documentation of adequate informed consent to ECT/surgically related procedures

Performance Outcome - 1.07

Individuals are provided sufficient information on their assessments and service plans so they are able to provide informed consent to treatment.

Percent Responding "Yes" / Meeting Criterion

CRI29b - If yes to 29 is there evidence that explanation was provided by qualified staff?

CRI29 - Documentation person received explanation benefits and risks of the medication?

CRI09 - Is the assessment information sufficient for the clinical staff

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tools in existence in November, 1996

Trend Report for Principle #1 and Performance Outcome 1.07

Performance Principle 1

People are treated with dignity and respect, and it is acknowledged that each person has rights and individual strengths which are molded by differences in culture, values, perspectives and goals.

Performance Outcome 1.07

Individuals are provided sufficient information on their assessments and service plans so they are able to provide informed consent to treatment.

Distribution of Scores for 1997 through 1999

	1997	1998	1999
Case File Review	79	83	85
Client Satisfaction	76	85	87
Provider Quality Review	91	91	94

ATTACHMENT G.2B
PERFORMANCE OUTCOME 2.03

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tools in existence in November, 1996

PRINCIPLE #2 AND PERFORMANCE OUTCOME 2.03

Principle	Consumers, family members and treatment staff are valued, responsible partners in the delivery of services.
Outcome	When inpatient treatment is necessary, outpatient and inpatient treatment staff work together with the individual and/or guardian, family members or designated representative in developing the ITDP which has been agreed to by the individual

<u>Instrument</u>	<u>Item</u>	<u>Yes</u>	<u>No</u>	<u>NA</u>
CRI 47	If the person is in an inpatient setting, is there a written document describing the inpatient treatment and discharge plan?	25	3	150
CRI 47A	Does documentation reflect the individual's preferences and strengths?	20	5	153
CRI 50A	Did the person participate in the development of the inpatient treatment and discharge plan?	21	7	150
CRI 50B	Did Guardian, family member, or designated representative, participate in the development of the inpatient treatment and discharge plan?	22	6	150
CRI 50C	Did Case manager or outpatient team/staff member participate in the development of the inpatient treatment and discharge plan?	28	0	150
CRI 50C1	Is there evidence the clinical team received a copy of ITDP?	25	0	153
CRI 50D	Did other state agency case manager participate in the development of the inpatient treatment and discharge plan?	15	13	150
CRI 50E	Did other (specify) participate in the development of the inpatient treatment and discharge plan?	2	26	150
CRI 50F	Is the discharge staffing held for any acute hospital stay over 72 hours?	25	3	150
CRI 50G	Is the case manager notified prior to hospital staffing?	15	12	151
CRI 51	Is there evidence that the case manager or a member of the clinical team met with the person while in the hospital?	20	6	152
CRI 53	Is there evidence that outpatient services were initiated/continued after discharge from hospital or RTC?	21	7	150
CRI 53A	Is there documentation of services or contact within seven days of discharge?	18	7	153

Performance Outcome - 2.03

When inpatient treatment is necessary, outpatient and inpatient treatment staff work together with the individual and/or guardian, family members or designated representative in developing the ITDP which has been agreed to by the individual guardian, case manager, and the treatment team.

Percent Responding "Yes" / Meeting Criterion

CRI53C - The CM met with the individual within 7 days of discharge?

CRI53B - Is there documentation of services or contact within 30 days?

CRI53A - Is there documentation of services or contact within seven days of discharge?

CRI53 - Outpatient services initiated after discharge from hospital or RTC?

CRI51 - Is there evidence the CM or clinical team met with the person in the hospital?

CRI50G - Is the case manager notified prior to hospital staffing

CRI50F - Is the discharge staffing held for any acute hospital stay over 72 hours?

CRI50E - Did Other participate in development treatment and discharge plan?

Performance Outcome - 2.03

When inpatient treatment is necessary, outpatient and inpatient treatment staff work together with the individual and/or guardian, family members or designated representative in developing the ITDP which has been agreed to by the individual guardian, case manager, and the treatment team.

Percent Responding "Yes" / Meeting Criterion

CRI50D - Did Other state agency CM participate in treatment/discharge plan?

CRI50C1 - Is there evidence the clinical team received a copy of ITDP?

CRI50C - Did Case manager participate development of treatment and discharge plan?

CRI50B - Did Guardian/family participate in the development treatment/discharge plan?

CRI50A - Did the person participate in the development treatment and discharge plan?

CRI47A - Does documentation reflect the individual's preferences and strengths

CRI47 - If an inpatient - written document describing the treatment and discharge plan?

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tools in existence in November, 1996

PRINCIPLE #2 AND PERFORMANCE OUTCOME 2.03

<u>Instrument</u>	<u>Item</u>	<u>Yes</u>	<u>No</u>	<u>NA</u>
CRI 53B	Is there documentation of services or contact within 30 days?	20	7	151

CRI07C5 - Does comprehensive assessment include Level of daily living skills

CRI07C4 - Does comprehensive assessment include Physical health status

CRI07C3 - Does comprehensive assessment include Person's social setting

CRI07C2 - Does comprehensive assessment include Legal status

Performance Outcome - 4.01

Individuals receive timely, adequate, and comprehensive assessments and services are initiated within appropriate time frames.

Percent Responding "Yes" / Meeting Criterion

CRI07C11 - Does comprehensive assessment include Substance use history

CRI07C10 - Does comprehensive assessment include Resources/Entitlements

CRI07C1 - Does comprehensive assessment include Mental health status

CRI07B - Was a face-to-face interview conducted during the assessment

CRI07A - Is there a comprehensive assessment or evaluation?

CRI06B - Is it complete? (All 5 axis)

CRI06A - Is it current? (Within the last 12 months)

CRI06 - Does the assessment information include a psychiatric diagnosis?

Performance Outcome - 4.01

Individuals receive timely, adequate, and comprehensive assessments and services are initiated within appropriate time frames.

Percent Responding "Yes" / Meeting Criterion

CRI05E - Does the intake assessment include:Family history

CRI05D - Does the intake assessment include:Substance use history?

CRI05C - Does the intake assessment include:Medical history?

CRI05B - Does the intake assessment include - Past psychiatric history

CRI05A - Does the intake assessment include Reason for request/referral for services?

CRI04 - Was the intake assessment performed by (or reviewed by) qualified staff?

CRI03B - Was input from the person included in assessment -success of previous treatment?

CRI03A - Was input from the person included in assessment-history of previous treatment?

Performance Outcome - 4.01

Individuals receive timely, adequate, and comprehensive assessments and services are initiated within appropriate time frames.

Percent Responding "Yes" / Meeting Criterion

CRI01 - Is the intake assessment timely

Performance Outcome - 4.01

Individuals receive timely, adequate, and comprehensive assessments and services are initiated within appropriate time frames.

Percent Responding "Yes" / Meeting Criterion

CRIPI37C - Major change in the services Discharge/termination of a day/vocational program?

CRIPI37B - Major change in the services Discharge/termination from residential program?

CRIPI37A - Major change in services - Decrease or termination of services

CRICM6 - Has the team met within the last 12 months to discuss the the individual?

CRICM4 - How does the ISP address these issues and needs?

CRICM3 - What are the most important issues and needs to be addressed with this person?

CRI53C - The CM met with the individual within 7 days of discharge?

CRI53B - Is there documentation of services or contact within 30 days?

Performance Outcome - 4.01

Individuals receive timely, adequate, and comprehensive assessments and services are initiated within appropriate time frames.

Percent Responding "Yes" / Meeting Criterion

CRI53A - Is there documentation of services or contact within seven days of discharge?

CRI53 - Outpatient services initiated after discharge from hospital or RTC?

CRI51 - Is there evidence the CM or clinical team met with the person in the hospital?

CRI48 - Was an inpatient treatment and discharge plan developed by the tenth day

CRI27 - Are all the behavioral health treatment needs adequately addressed?

CRI26 - Are the person's basic needs addressed?

CRI25B - Are on-going services delivered per service/treatment plan?

CRI25A - Is the provider plan consistent with the ISP?

Performance Outcome - 4.01

Individuals receive timely, adequate, and comprehensive assessments and services are initiated within appropriate time frames.

Percent Responding "Yes" / Meeting Criterion

CRI25 - Is service delivery timely

CRI09 - Is the assessment information sufficient for the clinical staff

CRI08C - Do evaluations address: Follow up efforts to secure needed information

CRI08B - Do evaluations reports address: Further evaluation or assessments required

CRI08A - Do evaluations address: Any required provisional or emergency services

Performance Outcome - 4.01

Individuals receive timely, adequate, and comprehensive assessments and services are initiated within appropriate time frames.

Percent Responding "Yes" / Meeting Criterion

PQR3PAR05 -Delay reasons when first services beyond 30 calendar day are reported

PQR3PAR04 -Failure reasons for intakes not conducted are reported to COMCARE

PQR3PAR03-Delay reasons for intakes beyond the 7 calendar day standard are reported

PQR3PAR01 -Intakes are performed within 7 days of the date of referral

CSSSVC30 - In an overall general sense, how satisfied are you with the service

CSSSVC20 - What is your feeling about explanations of procedures and approaches used.

CSSSVC13 - What is your overall feeling about the availability of appointment times

CSSSVC06 - What is your feeling about the knowledge and competence of the practitioner

Performance Outcome - 4.01

Individuals receive timely, adequate, and comprehensive assessments and services are initiated within appropriate time frames.

Percent Responding "Yes" / Meeting Criterion

CSSCM36 - What is your overall general sense of how satisfied are you with the service

CSSCM29 - What is your overall feeling about the willingness to see you

CSSCM22 - What is your overall feeling about the explanations of how the agency works

CSSCM13 - What is your feeling about getting appointment times that fit your schedule

CSSCM06 - What is your overall feeling about the knowledge and competence of the staff

CSSCM05 - What is your overall feeling about the the kinds of questions asked

CSSBHS06 - The clinic/office offers convenient appointment times?

CRIP41A - Describe the other services you feel you need.

Performance Outcome - 4.01

Individuals receive timely, adequate, and comprehensive assessments and services are initiated within appropriate time frames.

Percent Responding "Yes" / Meeting Criterion

CRIP41 - Are there additional services you feel you need?

CRIP38B - If yes to any part of 37, were the reasons explained to you in advance?

CRIP38A - If yes to any part of 37, did you agree to these changes?

PROSPECTIVE EXAMPLE OF DATA REPORT

All data are artificial and keyed to the data collection tools in existence in November, 1996

Trend Report for Principle #4 and Performance Outcome 4.01

Performance Principle 4

Services are accessible, timely, and in the least restrictive setting necessary to meet the clinical needs of the individual.

Performance Outcome 4.01

Individuals receive timely, adequate, and comprehensive assessments, and services are initiated within appropriate time frames.

ATTACHMENT G.3
APPENDIX C REPORT

PROSPECTIVE EXAMPLES OF DATA REPORTS

All data are artificial and keyed to the data collection tools in existence as of April, 1997

Appendix C Report

Appendix C of the *Exit Stipulation* specifies 17 criteria with required thresholds for each of three years. ADHS/DBHS is responsible for reporting on 16 of the 17 criteria; Criterion 13 is applicable only to the Maricopa County Jail.

As was done for the Performance Outcome reports, ADHS/DBHS constructed a prospective example of a data report for Appendix C Criteria. However, for only the Appendix C data report, shown in Attachment G3a, were the latest versions of the Case Review Instrument (Version 15.00 of April, 1997 shown in Attachment E 1), and the Provider Quality Review (April, 1997 version shown in Attachment E 3) used.

For the Appendix C data report shown in Attachment G3a, ADHS/DBHS identified items from the Case Review Instrument, the Provider Quality Review, and the RBHA Evaluation process which assess system performance on the 16 criteria. Artificial data were used in creating this report to illustrate comparison of findings to the annual thresholds for Year 1.

PQR = Provider Quality Review

PROSPECTIVE EXAMPLE OF DATA REPORT

All Data are Artificial

EXIT STIPULATION APPENDIX C CRITERIA

- identification of adverse reactions to psychoactive medications
- identification of client illnesses and injury
- preliminary medical emergency care and reporting requirements

A provider will be deemed in compliance if 90% of the clinical staff have received training and orientation.

For compliance purposes, there will be scoring for separate sections (14A and 14B). The threshold percentages will be the same for both 14A and 14B.

Methodology - RBHA Clinical Staff

Each quarter, COMCARE Human Resources will furnish to the Quality Management Department/Education and Training Section a data flat file containing names and staff IDs for all clinical staff employed for at least six months. The file will be run/matched against the Training Verification Database (an Access database), and a report will be created which shows the percentages of compliance and non-compliance with the requirement. Further, detailed reports listing individual clinical staff per site/area who do not meet the requirement will be run and used for improvement and compliance purposes. Clinical staff are those staff who have direct contact with members, i.e., case managers, team leaders, area team managers, nurses, physicians, etc.

Methodology - Individual Provider Staff

The auditor(s) will review the provider's Quarterly Training Report prior to conducting the On-Site Review and calculate the percentage of provider staff employed for at least six months who have received adequate orientation and training, per Appendix C #14, as reported at the time of the last quarterly report received from the provider.

When on site, the auditor(s) will pull a 25% sample of the provider employee training records to validate receipt of orientation and training as evidenced by the provider's records.

EXIT STIPULATION APPENDIX C CRITERIA

In additional, the auditor(s) will interview two direct line provider staff and the provider staff person responsible for coordinating staff orientation and training to assess the adequacy of the orientation and training.

Methodology - Provider System

The percentage of providers who meet the individual provider requirement will be the score used for determining compliance with Appendix C14B. Performance will be aggregated quarterly for all providers reviewed during that period. The annual performance score will be cumulative reflecting all providers reviewed from the date the DBHS Quality Management Plan is approved by the Monitor until such time that 12 calendar months have elapsed.

Provider clinical staff are staff who have direct contact with members, i.e., as defined in the provider training plan submitted annually by providers to COMCARE Provider Relations.

EXIT STIPULATION APPENDIX C CRITERIA

Criterion	15a	Thresholds	
All programs funded by ADHS substantially provide services which are consistent with principles 2 (respect) and 5 (humane treatment) of AACR 9-21-103		Year 1	30%
		Year 2	60%
		Year 3	85%

Instrument	Item	Source	Year 1 Score
CRI 180D	Overall, is the person treated with dignity and respect? Explain: _____	Summary	83%

(See attached sheet for background questions used to determine whether persons were treated humanely and with respect based on the preponderance of evidence.)

To make a final determination as to whether the member is treated humanely and with respect, roll all seven Provider Audit questions and the eight Case Review Instrument questions together. (See next pages). All questions must be answered "Yes" in order to demonstrate compliance with this criterion. (See instructions in the COMCARE Provider Quality Review Provider Profile.)

Instruments: CRI = Case Review Instrument
PQR = Provider Quality Review

PROSPECTIVE EXAMPLE OF DATA REPORT

All Data are Artificial

EXIT STIPULATION APPENDIX C CRITERIA

Background Questions for Establishing Treatment with Dignity and Respect Based on Preponderance of Evidence

Provider Audit - Respect

- PROQMP #8 Provider has a written member rights policy and procedure or statement of member rights in accordance with R9-20-201 and for SMI programs also R9-21-211.
- PROAR1 #14 Action taken on grievance resolutions is appropriate and timely.
- SMIPROV #7 Information about treatment is released to sources other than COMCARE or its affiliates only with a signed release.
- SMIPROV #28 The living environment affords appropriate privacy. R9-21-202.6.

All four Provider Audit questions must be scored "Yes" for purposes of demonstrating compliance with this principle of respect.

Case Review Instrument - Respect

- #3 Is there documentation indicating that the person was notified of his/her rights:
A. to appeal eligibility and treatment decisions?
B. to file a grievance?
- #108 Were you notified of your right
A. to appeal treatment decisions?
B. to file a grievance?
- #174 Was there documentation of adequate communication among involved parties?
- #175 Did the class member meaningfully participate in the planning and development of their ISP (if one exists), or their treatment plan (if no ISP is available)?
- #177 Does the case manager, clinical team and/or service system respond to changes in the person's treatment needs and/or life circumstances in a timely manner?
- #180 The person is treated with dignity and respect by the following:
A. RBHA staff
B. Provider staff
C. Other (specify)

Instruments: CRI = Case Review Instrument
PQR = Provider Quality Review

PROSPECTIVE EXAMPLE OF DATA REPORT

All Data are Artificial

EXIT STIPULATION APPENDIX C CRITERIA

All six Case Review Instrument questions must be scored "Yes" for purposes of demonstrating compliance with this principle of respect.

To make a final determination as to whether the member was treated with respect, roll the four questions from the Provider Audit and the six questions from the Case Review Instrument together; all questions must be answered "Yes" to demonstrate compliance with this principle.

Provider Audit - Humane Treatment

- PROAR1 #10 Restraint/seclusion are used only when an individual presents as a serious physical danger to self or others and only when other reasonable, less restrictive alternatives have been tried and/or determined inappropriate.
- PROAR1 #11 Restraint/seclusion are used only when authorized by a physician and with orders which do not extend beyond three hours.
- SMIPROV #29 The living environment is free from verbal and/or physical abuse. R9-21-202.6.

All three Provider Audit questions must be scored "Yes" for purposes of demonstrating compliance with this principle of humane treatment.

Case Review Instrument - Humane Treatment

- #182 The individual's rights are honored and observed?
(Instruction: Consider the following to determine whether the individual's rights have been honored and observed:
- The level of person's involvement in decision making
 - Person's choices are honored whenever possible
 - Person is informed of their right to file a grievance or appeal
 - Person's freedom from discrimination
 - Persons engages in religious practice, communicates and associates with others as they choose
 - Person's level of involvement in generic/community-based activities)
- #185 The person's basic needs are reasonably met
(Instruction: Evidence in record regarding adequacy of food, clothing, and shelter should be considered to determine if the persons' basic needs have been met.
- Input from person, family, and guardian

Instruments: CRI = Case Review Instrument
PQR = Provider Quality Review

EXIT STIPULATION APPENDIX C CRITERIA

Criterion	15b	Thresholds	
	24 hour staffed residential treatment programs funded by ADHS, ASH and inpatient settings to the extent relevant or practical, and all day/vocational programs substantially provide services which are consistent with principles 3 (self-determination) and 10 (integration) of AACR 9-21-103.	Year 1	30%
		Year 2	60%
		Year 3	85%

Instrument	Item	Source	Year 1 Score
CRI 184	<p>During the time period examined, the services provided:</p> <p>b) maximized individual's independence/ community integration</p> <p>Explain: _____</p> <p>Data to be aggregated by the four specific programs noted above and compared to the annual thresholds individually for each program.</p> <p>(See attached sheets for background questions used to determine whether services provided were consistent with the principles of self-determination and integration based on the preponderance of evidence.)</p>	Summary	82%

To make a final determination as to whether services are provided consistent with principles of self-determination and integration, roll all four Provider Audit questions and all six Case Review Instrument questions together. (See next pages). All questions must be answered "Yes" in order to demonstrate compliance with this criterion.

Instruments: CRI = Case Review Instrument
PQR = Provider Quality Review

PROSPECTIVE EXAMPLE OF DATA REPORT

All Data are Artificial

EXIT STIPULATION APPENDIX C CRITERIA

Background Questions for Establishing Provision of Services Consistent with Self-Determination and Integration Based on Preponderance of Evidence

Provider Audit - Self Determination

- SMIPROV #10 Members participate in the development, implementation, monitoring, and revision of their treatment plans. (applicable to all programs; consider the member signature; member, guardian, and case manager interviews; and case manager progress notes when making your determination.
- SMIPROV #11 Members have a choice/input in personal goals related to community living, education/vocation, social and recreational activities unless they are unwilling or unable to do so. (all programs; consider the face sheet of ISP, CRI person interview #8, SMI Program Review #12, and Provider Interviews #8, 9, and 12 when making your determination.)

Both Provider Audit questions must be answered "Yes" in order to demonstrate compliance with this principle of self-determination.

Case Review Instrument - Self-Determination

- #22A Is there documentation of the person's long term view, preferences, or personal goals with respect to:
1. community living arrangements
 2. education/vocational activities
 3. social/recreational activities
- (Applicable to all programs)
- #38 Is there evidence that the person/guardian provided verbal or written consent to take the psychiatric medication?
(Applicable to 24 hour residential, day treatment, and inpatient settings; evidence can be located in the psychiatric/nurse practitioner progress notes, consent forms, or team meeting notes.)
- #175 Did the class member meaningfully participate in the planning and development of their ISP (if one exists), or their treatment plan (if no ISP is available)?
(Applicable to all programs; the reviewer will determine through interviews and through documentation in progress notes, ISP/treatment plans, assessment information, and other clinical

Instruments: CRI = Case Review Instrument
PQR = Provider Quality Review

PROSPECTIVE EXAMPLE OF DATA REPORT

All Data are Artificial

EXIT STIPULATION APPENDIX C CRITERIA

record documentation whether the person participated in the planning or development of their ISP/treatment plan.)

All three Case Review Instrument questions must be answered "Yes" in order to demonstrate compliance with this principle of self-determination.

To make a final determination as to whether the member has input into his/her destiny, roll all five questions (two from the Provider Audit and three from the Case Review Instrument) together; all must be answered "Yes" in order to demonstrate compliance with this principle of self-determination.

Provider Audit - Integration

- SMIPROV #13 Members are offered services which are integrated into the community and are geographically, physically, and culturally accessible.
- SMIPROV #23 There are opportunities for daily activities, recreation, and physical exercise. R9-21-202.7.e. (consider the member/guardian interviews, program observations, and program activity scheduled when making your determination.)

Both Provider Audit questions must be answered "Yes" in order to demonstrate compliance with this principle of integration.

Case Review Instrument - Integration

- #70 Do you have an opportunity to:
A. go to church
B. go to outside recreation
C. go shopping go to education and employment activities?
(Applicable to all programs; consider member/guardian interviews and program activity schedules to make your determination.)
- #176C During the time period examined, the services provided are:
C. provided in the least restrictive manner possible.
(Applicable to all programs; consider the amount of supervision needed, input from person/family/guardian, privacy, individualized setting, safety issues, and the person's ability to make personal choices and decisions.)

Instruments: CRI = Case Review Instrument
PQR = Provider Quality Review

ATTACHMENT H

**RELATIONSHIP OF DATA ELEMENTS
 TO PRINCIPLES AND PERFORMANCE OUTCOMES**

The data elements contained in earlier versions of the Case Review Instrument (Version 11.00), the Client Satisfaction Survey (November, 1996), and the Provider Quality Review (October, 1996) were mapped to the 40 performance outcomes associated with the six principles. This mapping process was done in November, 1996 in order to illustrate how these three tools were created and modified to ensure capture of all of the data elements potentially required to measure compliance with the requirements of the *Exit Stipulation* as represented by the performance outcomes.

The mapping also demonstrated that the data generated through the use of these tools is quite extensive and, at times, overlapping. It will be through the ongoing efforts to refine the quality management system that ADHS/DBHS and its contractor will: refine the data collection instruments, design and implement a database, and systematically refine the selection of the data elements to be used to demonstrate achievement of the performance outcomes and to measure compliance with the Appendix C Criteria. This last activity will ensure that the mapping is done to only the most specific and appropriate data elements.

An illustration of a possible refinement process is shown below.

Performance Outcomes	Case Review Instrument (14.08 version) Data Elements	Provider Quality Review (12/96 version) Data Elements
1.01	Outcome Summary: #8A, B, C, D	Onsite: #1 & 17
1.03	Intake: #3 Outcome Summary: #9 & 10	Onsite: #3-6 Admin (Part B): #6-15
1.07	Process Summary: #2 & 3	

The text for these data elements is shown on the next pages.

PERFORMANCE OUTCOME 1.01

Individuals are treated with dignity and respect.

Case Review Instrument Outcome Summary

- #8 The person is treated with dignity and respect by the following:
- A. RBHA staff
 - B. Provider staff
 - C. Other (specify)
 - D. Overall, is the person treated with dignity and respect?
Explain:

Provider Quality Review QM Onsite Service Program Review - Persons with Serious Mental Illness

- #1 Does the provider adhere to their policies and procedures for grievances and investigations which are in compliance with R9-21-401 through R9-201-410: people are treated with dignity and respect; members, their family/significant others, and treatment staff all have input into treatment decisions and services; members are able to achieve the highest level of self-sufficiency with assistance in the development and maintenance of their service/treatment plan; services are accessible, timely, and in the least restrictive setting necessary to meet the clinical needs of the member; members are not discouraged from challenging the system to continually improve its services (I/A, GA, Office of Oversight and Protection for the Seriously Mentally Ill, etc.)
- #17 Does the living environment afford freedom from verbal or physical abuse? R9-21-202.6

PERFORMANCE OUTCOME 1.03

All service providers protect the rights of individuals.

Case Review Instrument Intake

- #3 Is there documentation indicating that the person was notified of his/her rights:
- A. to appeal eligibility and treatment decisions?
 - B. to file a grievance?

Case Review Instrument Outcome Summary

- #9 Is the person/guardian aware of his/her rights to file a grievance or treatment appeal?
Explain:
- #10 Are the individual's rights honored and observed?

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
ARNOLD V. SARN CLASS MEMBERS
Arizona Department of Health Services
Division of Behavioral Health Services

Provider Quality Review QM Onsite Service Program Review - Persons with Serious Mental Illness

- #3 Is there documentation in the provider medical record to verify that a member has been informed of their right to file a grievance or request an investigation?
- #4 Is the grievance rule posted and forms for filing posted in a prominent place in the provider agency?
- #5 Does the agency forward copies of the request for special assistance to the Office for Human Rights?
- #6 Does the provider notify COMCARE when: a member brings criminal charges against an employee; a provider employee brings criminal charges against a member; a provider employee or member is indicted or convicted because of an action required to be investigated by the Rules for persons with serious mental illness; a member dies; a member is allegedly physically or sexually abused?

Provider Quality Review QM Administrative Review Part B - Performance Measures

- #6 Incident/accident reports submitted within 24 hours
- #7 Written reports of abuse, neglect, mistreatment, denial of rights, or exploitation are submitted with 24 hours (persons with serious mental illness only)
- #8 Written reports for each restraint or seclusion are submitted by the 10th of each month for the previous month (persons with serious mental illness only)
- #9 Incident and restraint/seclusion reports are accurate and complete
- #10 Restraint/seclusions are used only when an individual presents a serious physical danger to self or others and only when other reasonable less restrictive alternatives have been tried and/or determined inappropriate
- #11 Restraint/seclusion is used only when authorized by a physician and with orders which do not extend beyond three hours
- #12 Response/action to requests for follow up on incident and restraint/seclusion reports is appropriate and timely
- #13 Copies of grievances and grievance resolutions are submitted to COMCARE (person with serious mental illness only)
- #14 Action taken on grievance resolutions is appropriate and timely
- #15 Mortality reports are phoned in within 24 hours and written report is received within 5 days

QUALITY MANAGEMENT SYSTEM AS IT APPLIES TO
