**CONTEXTURE ASSISTANCE**

As part of Targeted Investments (TI 2.0) Program, participants will share data bidirectionally with the Contexture Health Information Exchange (HIE). Contexture is currently upgrading to a unified technology platform that will be live in 2025. While Contexture is covering the integration costs and not charging integration fees, data sender participants may have Electronic Health Record (EHR) vendor charges related to the integration. Contexture will begin charging participants HIE service fees in July of 2025. Contexture's new fee structure is currently being developed and will be communicated to TI participants in July of 2024, one year before they go into effect. Visit the [Contexture website](#) to learn more about these upcoming changes.

Contexture is available to provide TI participants with technical assistance on data use and exchange. This includes strategies for making effective use of incoming data, such as using health information technology and securely sharing clinical data in order to improve care coordination, identifying and managing patient populations, and developing high risk patient registries. Contact your Contexture account manager or [GetConnected@contexture.org](mailto:GetConnected@contexture.org) for assistance.
