To whom this may concern,

I fully support the merger of Arizona Complete Health and Care1st! AzCH has been an excellent partner to the Flagstaff Family Food Center and many other organizations that serve AHCCCS-eligible populations in the north. I especially appreciate how they consider the north region a significant of a priority as they do with the central or south service area. Organizations with statewide operations often adopt the "great state of Maricopa" mindset, but AzCH has been one of our strongest allies since they came here. Having corporate offices in Maricopa deny this merger would come at the cost of what's best for AHCCCS-eligible populations in the north.
