#### Voluntary Benefit Package Selection Assurances - Eligibility Group under Section 1902(a)(10)(A)(i)(VIII) of the Act

The state/territory has fully aligned its benefits in the Alternative Benefit Plan using Essential Health Benefits and subject to 1937 requirements with its Alternative Benefit Plan that is the state's approved Medicaid state plan that is not subject to 1937 requirements. Therefore the state/territory is deemed to have met the requirements for voluntary choice of benefit package for individuals exempt from mandatory participation in a section 1937 Alternative Benefit Plan.

Explain how the state has fully aligned its benefits in the Alternative Benefit Plan using Essential Health Benefits and subject to 1937 requirements with its Alternative Benefit Plan that is the state's approved Medicaid state plan that is not subject to 1937 requirements.

The State has a rich benefit package and has served adults 19-64 since 2000. The majority of base bench mark benefits are a duplication of benefits that exist in the current state plan. Benefits provided by the base bench mark plan that are not included in the state plan were substituted for state plan benefits not provided by the base bench mark plan. The EHB categories where substitution occurred met the standard of actuarial equivalence.

#### Describe program below:

The Arizona Health Care Cost Containment System (AHCCCS), the State's Medicaid Agency, uses federal, state, and county funds to provide health care coverage to the State's acute, long-term care Medicaid populations and low-income groups. Since 1982, when it became the first statewide Medicaid managed care system in the nation, AHCCCS has operated under a federal Research and Demonstration 1115 Waiver authority that allows for the operation of a total managed care model. AHCCCS makes prospective capitation payments to contracted health plans responsible for the delivery of care to members. The result is a managed care system that mainstreams recipients, allows them to select their providers, and encourages quality care and preventive services. The new adult group is included in the managed care program.
