

Strategic Focus Area: Children with Behavioral Health Needs, Including Children with and At-risk for Autism Spectrum Disorder, and Children Engaged in the Child Welfare System - DRAFT  
 Project 1: Integration of primary care and behavioral health services for children with behavioral health needs and their families (primary care site)

Objective: To integrate behavioral health services (some of which are paid for by Regional Behavioral Health Authorities (RBHAs)) within the primary care site. This project will include children with behavioral health needs enrolled in an integrated RBHA and children receiving services from both a RBHA and an acute care health plan.

Notes:

- [1] Care managers are individuals that "link children and families to services and resources in a coordinated manner to maximize the potential of children and provide them optimal health care." They are responsible for assessing and identifying the needs of the child, developing, in part, integrated plans of care, implementing the plan of care and periodically reassessing the needs of the child and care plan to address new or emerging needs.

Notes:

- [1] Care managers are individuals that "link children and families to services and resources in a coordinated manner to maximize the potential of children and provide them optimal health care." They are responsible for assessing and identifying the needs of the child, developing, in part, integrated plans of care, implementing the plan of care and periodically reassessing the needs of the child and care plan to address new or emerging needs.

Strategic Focus Area: Children with Behavioral Health Needs, Including Children with and at-risk for Autism Spectrum Disorder, and Children Engaged in the Child Welfare System - DRAFT

Project 3: Improving Treatment for the Care of Children with and At-risk for Autism Spectrum Disorders (ASD) (primary care site)

Objective: To improve the identification and care of Medicaid-enrolled children at-risk for ASD or diagnosed with ASD and create sufficient and consistent linkages between primary care, behavioral health and

CC #	Core Component	DY 2		DY 3	
		Practice Reporting Requirement to DSRIP Entity	DSRIP Entity Reporting Requirement to AHCCCS	Practice Reporting Requirement to DSRIP Entity	DSRIP Entity Reporting Requirement to AHCCCS
<b>Prerequisite Requirements for Project 2</b>					
	Working toward an integrated primary care practice is a critical first component of improving the care of children with and at risk for Autism Spectrum Disorder. Practices must successfully complete Project 1 Core Components 2-4, 5, 7-8 in DY 1. Project 2 will begin in DY 2.	N/A	Listing of practices that successfully completed Project 1 Core Components 2-4 and are starting on Project 2 in DY2.	N/A	Listing of practices that successfully completed Project 1 Core Components 2-4 and are starting on Project 2 in DY3.
<b>Clinical Care within the Primary Care Office</b>					
1	Utilize a commonly accepted toolkit for caring for children with ASD as a guide for clinical management. One such tool is "Caring for Children with Autism Spectrum Disorder: A Resource Toolkit for Clinicians" from the American Academy of Pediatrics.	Identify the name of the ASD toolkit the practice has adopted and document a practice-specific action plan informed by the toolkit, with measurable goals and timelines.	Percentage of practices that have identified the ASD toolkit they have adopted; Frequency distribution of practice-employed ASD toolkits; Summary description of practice action plan areas of focus and goals.	N/A	N/A
2	Develop procedures for referring children with positive screening to ASD treatment teams or programs, consistent with Core Component 5.  If a child is referred to a behavioral health provider (or team) trained to evaluate autism, develop procedures for simultaneously referring the child to:  a. An audiologist to determine whether hearing loss is an etiology of the developmental delay;	Document that policies and procedures have been established for referring patients to an audiologist, and depending on age of patient, AZEIP or the local school district, and DDD.	Percentage of practices with policies and procedures that meet this requirement.	N/A	N/A

Strategic Focus Area: Children with Behavioral Health Needs, Including Children with and At-risk for Autism Spectrum Disorder, and Children Engaged in the Child Welfare System - **DRAFT**

The DSRIP entity and individual practices participating in this strategic focus area will be held accountable for reporting their performance on a specified number of measures, to be defined by AHCCCS, beginning in DY2, and for improving their performance beginning in DY3. The measure list below includes measures under consideration for use at the DSRIP entity and/or practice level.

NQF #	Measures
0024	Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents
1448	Developmental Screening In the First Three Years of Life
0108	Follow-Up Care for Children Prescribed Attention – Deficit/Hyperactivity Disorder
1799	Medication Management for People with Asthma
0002	Appropriate Testing for Children with Pharyngitis
0033	Chlamydia Screening
HEDIS	Adolescent Well Care Visits
1959	Human Papillomavirus (HPV) Vaccine for Female Adolescents
0038	Childhood Immunization Status
1407	Immunizations for Adolescents
HEDIS	Lead Screening for Children
1388	Annual Dental Visits
0710	Depression Remission at 12 months

HEDIS	ED Visits per 1000

Strategic Focus Area: Children with Behavioral Health Needs, Including Children with and At-risk for Autism Spectrum Disorder, and Children Engaged in the Child Welfare System - DRAFT

### DSRIP Entity Requirements

- 1 The DSRIP entity must execute an agreement with each participating provider that defines how each participating provider will engage with the DSRIP entity in order to accomplish each project. These agreements must describe, at a minimum:
  - How providers will document and report milestone achievement and report performance measures specific to each project.
  - Provider commitment to participate in DSRIP entity meetings and provider training events.
  - DSRIP entity obligation to disburse DSRIP incentive payments to participating providers for milestone achievement and achievement on project-specific performance measures.
  - How DSRIP entities will engage in data sharing and data analytics, to support provider activity.
  - How DSRIP entities and participating providers will collaborate to develop shared clinical and administrative protocols.
  - How acute plans, RBHAs and AzHeC will participate in DSRIP entity activities and with participating providers to advance provider performance on DSRIP projects.
- 2 Each DSRIP entity must create its own portfolio of technical assistance offerings to its providers, based on the needs of participating providers, to support provider efforts to address DSRIP project core components and based on any requirements for training established in the core components of each project. Such technical assistance might include, but is not limited to, didactic education, interactive one-on-one practice coaching and peer-based learning. The DSRIP entity should use multiple modalities, potentially including a learning collaborative to address provider needs. The technical assistance portfolio may change over the 5 years of the DSRIP program, but must be established within the first 120 days of the program.
- 3 Each DSRIP entity must identify which participating providers will be participating in each of the projects, all of which are required at the DSRIP-entity level, within the timeframe established by AHCCCS.
- 4 Each DSRIP entity must report on the performance of its providers within the timeframe established by AHCCCS, and using the metrics established by AHCCCS. Each entity must also assist AHCCCS in facilitating audits and record reviews, as requested by AHCCCS.
