How are we doing with kids?

**2015 Oral Health Status of Arizona’s Children in Kindergarten and Third Grade**

- **Almost two thirds of 3rd grade children (64%)** have a history of tooth decay, compared to 52% of 3rd grade children in the general U.S. population.
- **More than a quarter of Arizona’s kindergarten and 3rd grade children (28%)** have untreated tooth decay, higher than the national average of 22%. (See figure 2)
- **Over half (52%) of Arizona’s kindergarten children** have a history of tooth decay, higher than the national average (36%) for 5-year-old children.
- Arizona has substantial disparities in oral health, with low-income children as well as Native American and Hispanic children having the highest prevalence of tooth decay in 2014-2015.
- **Only 44% of Arizona’s 3rd grade children** have at least one dental sealant; 74% need initial or additional sealants. (See figure 3)

Takeaways

• Charity is not a system of care
• Large percentage of patients are AHCCCS covered or eligible
  · Oral health problems are largely preventable
  · Inadequacy of the $1,000 cap
  · Good oral health is a job development incentive
  · Annual Cost - -$200,000+ completely by charitable giving is unsustainable
  · Volunteer Burn-out
  · Opportunities to shine a light on the problems, especially opinion leaders and public officials

AHCCCS Works Geographic Phase-in Recommendation

- Gradually phase-in AHCCCS Works program by geographic areas.
- If approved, the AW program will be implemented in three phases:
  - **Phase 1:** Most Urbanized Counties: Maricopa, Pima, and Yuma
  - **Phase 2:** Semi-Urbanized Counties: Cochise, Coconino, Mohave, Pinal, Santa Cruz, & Yavapai
  - **Phase 3:** Least Urbanized Counties: Apache, Gila, Graham, Greenlee, La Paz, & Navajo

**Why:**

- Need time to establish community engagement supports for members in regions with limited employment, educational and training opportunities, accessible transportation, and child care services.
- Phase-in approach will give the State time to assess the availability of community engagement resources in rural areas and address gaps.
- Counties with a higher percentage of urban populations are likely to have sufficient community engagement supports compared to counties with a higher percentage of rural populations.

Recent/Upcoming Developments

Reaching across Arizona to provide comprehensive quality health care for those in need
Rideshare/Equine Transport

- Established new provider type for rideshare (transportation network companies/TNCs) on May 1, 2019
  - TNCs must provide services to members, and bill, through a non-emergency medical transportation (NEMT) broker
  - Information provided to TNC driver limited to member’s first name, “masked” phone number and pick-up and drop-off address
  - TNC is required to maintain all driver records
  - Reduced training requirements for TNCs
  - Reduced rate of reimbursement

- Established equine and helicopter non-emergency transport for members residing in the Grand Canyon on May 1, 2019

Reaching across Arizona to provide comprehensive quality health care for those in need
Telehealth

- Broadening of POS allowable for distant and originating sites (including home)
- Broadening of disciplines able to offer telehealth services, generally, to any AHCCCS enrolled provider
- Broadening of coverage for telemedicine (real time, remote patient monitoring) and asynchronous
- No rural vs. metro limitations
- MCOs retain their ability to manage network and leverage telehealth strategies as they determine appropriate
Differential Adjusted Payments CYE20

- Distinguish providers that take designated actions for improving care and/or reducing costs
- Positive adjustment to the AHCCCS Fee-For-Service (FFS) rates
- Federally approved and time-limited
- MCOs required to pass-through DAP increases
- Projected $100 M in payments in FFY 20
Differential Adjusted Payments
