<input checked="" type="checkbox"/> Javier Favela	<input checked="" type="checkbox"/> Heather Martinez – Nextgen’s main point of contact
<input checked="" type="checkbox"/> Devon Echols	<input checked="" type="checkbox"/> Kimla Wille

## Agenda:

### Target goals for today’s meeting:

1. Provide overview of ASAM CONTINUUM steering committee consensus decision to recommend Option 2 integration (intermediate dataset)
  - a. Nextgen currently pulls back the actual document and pull certain data elements into screenings and assessment grid
    - i. Not a full level 1
2. Discuss technical feasibility with Nextgen:
  - a. Timeline and technical complexity
    - i. First steps would be focused on opening the API to make sure as much data as possible can be pulled back
    - ii. Would need to do an analysis for AZ programs
  - b. Value add of additional data variables
  - c. Cost
    - i. Nextgen would like 30 days to evaluate the pieces and opportunities to discuss time frames, cost association with programs

## Action Items:

- Next steps would be for Nextgen to start discussing feasibility with providers
  - Step 1: Nextgen technical resources to review/have technical conversations with the ASAM team

- Not prepped to have client facing conversations yet, need time to review specified data elements
  - Step 2: have discovery conversations with providers about feedback on the process
- Easiest approach to kick off these conversations would be to share providers with Nextgen
  - Nextgen can then start those discussions
    - People on the call today:
      - Sarah Swonder – Empact
      - Dan Porter – Terros
      - Colleen and Bobbie – Copa Health
- Circle back at the end of a 30-day window
  - Reconvene with Nextgen at the end of September
- FEI team to provide Nextgen with most updated API information
  - Kimla to send
