**IV. CATEGORY OF SERVICE (COS)**

AHCCCS has developed a two-digit coding definition called a Category Of Service (COS). Contractors do not provide the COS, and it cannot be changed on the pended encounter correction file. The COS is determined by AHCCCS.

The COS is determined based on an encounter's:

- procedure code,
- bill type,
- revenue code, or
- pharmacy National Drug Code (NDC).

For professional and dental encounters, the COS assignment is determined by the range or description of each HCPCS procedure code. For example, AHCCCS assigns COS 12 (pathology February 2019

& laboratory) to HCPCS procedure code G0001 (Routine venipuncture of finger/heel/ear for collection of specimen/s). For institutional encounters, the COS assignment is based on the bill type and revenue codes used on the individual encounter. For pharmacy encounters, the COS is based on the NDC. A current list of the AHCCCS assigned COS is summarized in the following table.

<b>COS Code</b>	<b>COS Description</b>

Note that there are relational edits and audits for the appropriateness of the service code reported relative to the provider type. A mismatch between provider type and COS may cause an encounter to pend. A provider’s provider type is assigned by the AHCCCS Provider Registration Unit based on information submitted by the prospective provider regarding the services to be offered and licensing/certification requirements. The absence of licenses or certifications may limit the COS

assignments for a specific provider, regardless of the typical range of services available to that provider type

**V. AHCCCS COVERAGE CODES**

The AHCCCS Coverage Code describes the coverage parameters determined by AHCCCS for each procedure code.

<b>AHCCCS Coverage Codes</b>		
01	Covered service/Code available	Service as described by code is covered and appropriate for reporting
02	Not covered service/Code available	Service as described by code is not covered or used by AHCCCS, but may be allowed on an exception/contract basis by MCO's (related encounters will deny for this reason, but be captured for utilization purposes).
03	Covered service/Use other code	Service as described by code is covered, however another code is more appropriate for reporting
04	Not covered service/Code not available	Service as described by code is neither covered nor appropriate for reporting
05	Outpatient hospital services	Service as described by code is covered and appropriate for outpatient hospital reporting
06	Not covered service/Header record	ICD 10 structure header and detail standards define when it is okay to use the header level value with or without the detail. Refer to CMS ICD10 Guidelines
08	Covered service/Code replaced	Service as described by code is covered, however it has been replaced by another code
09	Medicare only	Service as described by code is not covered, but it is appropriate for reporting when Medicare is primary
10	Non pay Category II Codes	Regardless of coverage determination, allows plans to report performance measurement codes

**VI. JULIAN CALENDAR**

The attached matrices show the three-digit Julian date for each day of the year. Matrices are provided for both regular and leap years. The Julian date of receipt of a New Day Encounter File is incorporated into the Control Reference Number (CRN) that is assigned to each encounter record.
