General Information

All claims submitted to AHCCCS by Indian Health Service (IHS) and Tribal 638 providers are extensively edited by the AHCCCS claims processing system.

The editing process begins when the system checks the claim form to ensure that all required fields have been filled in and that no completed fields are filled out incorrectly. Incorrectly filled out fields include, but are not limited to, the following:

- The use of letters instead of numbers when numbers are required (and vice versa); and/or
- Not entering a valid 9-digit AHCCCS ID, beginning with an A; and/or
- Not including the entire required data set, such as when a provider uses 6 digits for an NPI instead of 10; and/or
- Invalid diagnosis code.

If the required fields are not completed or if any fields are completed incorrectly, an error code will be assigned to the claim. For example, if the date “March 10, 2004” should be recorded as 03/10/2004 (MM/DD/YYYY format) and the claim is received with 2004/03/10, the edit will create a failure for an invalid date.

The system also confirms that a provider ID, an ordering provider ID (for CMS 1500 forms), a member ID, date(s) of service, a place of service code (for CMS 1500 forms), diagnosis code(s), procedure/revenue/NDC code(s), and billed charges are present on the claim. These data elements, as applicable, are required on all claims.

After editing for completeness and correctness of the data submitted, the system edits to ensure that data fields are valid and logical. The most important of these edits ensure that:

- The provider ID number is a valid AHCCCS registered provider on the date of service delivery;
- The provider has the authority to provide and bill for this service;
- The member is on file, eligible, and entitled to the service;
- The service was covered by AHCCCS on the date(s) it was delivered; and
- Diagnosis and procedure codes were valid for the date(s) of service.

Another set of edits ensures that the claim complies with AHCCCS policy requirements. These edits ensure that:

- Prior authorization is obtained (if required),
- The claim is reviewed by AHCCCS medical staff before payment (if required), and
The service is allowed for the member’s age and gender.

The claims processing system reviews the claim for any service limitations, duplicates, and checks whether the member, provider, date(s) of service, and procedure/diagnosis on the claim are the same as on a previously paid claim.

EDITING PROCESS

The claims system attempts to apply all edits during a single processing cycle. However, if certain data are missing, incorrect, or invalid, completion of the entire processing cycle may not be possible.

When claims are processed in the system they are run through the editor, where the business rules are applied. The system will try to run through all the business rules and list all denial edits. However, if a crucial edit is encountered (such as a required field being found blank) the editing process for the rest of the claim will be stopped. The review of the claim does not proceed past the field that failed the editing process, and only the crucial edit that failed will be listed on the remit. This includes, but is not limited to, missing, incorrect or invalid data.

Note: If there are other fields that are blank, filled out incorrectly, or invalid appearing after the field that failed the initial editing process, these will not be caught by the system until after the provider makes the initial field correction and sends the replacement claim back in for review.

Once the edit has been corrected and resubmitted by the provider the editing process may continue and may encounter other critical edits. This may cause the claim to deny and be reported on the remit.

For additional information on how to submit a replacement claim, please refer to Chapter 4, General Billing Rules, of the IHS/Tribal Provider Billing Manual. For additional information on the remit, please refer to Chapter 18, Understanding the Remittance Advice, of the IHS/Tribal Provider Billing Manual.

Examples of edit codes:
- H001.1 - Service Provider ID - Field Is Missing
- H001.3 - Service Provider ID - Field Is Not On File
- L023.1 - Diagnosis Code #1 – Invalid for Member Age & Gender
- L023.2 - Diagnosis Code #1 – Invalid for Member Age
- L023.3 - Diagnosis Code #1 – Invalid for Member Gender

If one or more edits failed during the editing process, there are two possible outcomes:

1. The claim may stop processing and "pend" for internal review when the error detected concerns data or procedures that may be resolved by AHCCCS staff.
When a claim requires Medical Review it will pend internally until the Medical Review department screens the services being billed.

Internally pended claims are generally handled without input from the provider. The exception is when medical documentation is requested for a claim under review.

- The claim may be denied. Please see Chapter 17, Correcting Claim Errors, for further information.
- If the data required for adjudication of a claim is complete, but the service does not meet AHCCCS policy requirements, the claim will be denied.
  
  For example, if a provider was not registered or if a member was not eligible on the date of service, the claim will deny.

AHCCCS’ intention is to process all clean claims in a timely manner, normally within 30 days. A claim is considered "clean" on the date the following conditions are met:

- All required information has been received by AHCCCS, and
- The claim meets all AHCCCS submission requirements, and
- The claim is legible enough to permit electronic image scanning, and
- All errors in the data provided are corrected, and
- All medical documentation required for medical review has been provided.

A Claim Reference Number (CRN) is assigned to all claims when they are initially submitted to AHCCCS. The first five characters of the CRN represent the Julian date that the claim was initially received on by AHCCCS. The remaining numbers make up the claim document number that is assigned by AHCCCS.

When submitting documentation (e.g., Medicare EOB) following the initial submission of a claim, the CRN assigned when the claim was first submitted should be provided. This is required so that AHCCCS is able to link the documentation to the claim.

Note: Please see the References Section for information on the 275 Transaction Insight Portal and how to upload attachments. Itemized statements from hospitals, AHCCCS Daily Trip Reports, and additional documentation may be submitted through this portal.

Providers also must provide the initial CRN when replacing (resubmitting/adjusting) or voiding a claim. For IHS facilities and providers, if your claim is replaced without the CRN, the claim will be treated as a first-time submission and may not pass the 12-month initial claim filing deadline or the 12-month clean claim filing deadline. If the initial CRN is not provided, the claim also may be incorrectly identified as a duplicate of an existing claim and denied.
ALL INCLUSIVE RATE (AIR) INFORMATION

Claims requesting the AIR for reimbursement must be submitted on a UB-04 form.

If multiple AIRs are submitted on one (1) claim, even if each AIR is for a different date of service, all AIRs will still deny. Only one (1) AIR per claim can be submitted.

Claims will be edited based on the allowance of 5 All Inclusive Rates (AIR) per member, per day. The system is set up to automatically deny any AIR claim submissions in excess of 5 per member, per day.

PRICING OF CLAIMS

When the editing process is completed and no errors are found on the claim, it will proceed to pricing and payment.

The AHCCCS claims processing system prices claims using the following pricing hierarchy:

1. AHCCCS reimburses the Medicare coinsurance, deductible, or co-pay, minus any third party payments, for Medicare-covered services for members with Medicare.

2. If the provider has negotiated a settlement with the AHCCCS Office of Administrative Legal Services, the claim is priced in accordance with the negotiated settlement.

3. If there is a provider-specific rate on file for the service, covered charges are priced at 100 percent of billed charges or the provider-specific rate, whichever is less.

4. If there is no provider-specific rate for the service, the system determines if there is a capped fee on file for the procedure.

   If there is a capped fee for the service, covered charges are priced at 100 percent of the billed charges or the capped Fee-For-Service rate, whichever is less.

AHCCCS had adopted a facility/non-facility rate differential similar to the Medicare format. The facility/non-facility rate structure assigns a reimbursement rate for a given AHCCCS-covered procedure code based on the billed place of service (POS) code.

The following POS codes are defined as a facility for purposes of the facility/non-facility rate structure:

<table>
<thead>
<tr>
<th>19</th>
<th>21</th>
<th>22</th>
<th>23</th>
<th>24</th>
<th>26</th>
<th>31</th>
<th>34</th>
</tr>
</thead>
<tbody>
<tr>
<td>41</td>
<td>42</td>
<td>51</td>
<td>52</td>
<td>53</td>
<td>56</td>
<td>61</td>
<td></td>
</tr>
</tbody>
</table>

The AIR rate for IHS/638 tribal facility outpatient services is considered to be a capped fee.
5. If there is no provider-specific rate for the service, no capped fee on file, and the service does not require manual pricing, the system determines if a specific rate has been prior authorized.

If there is a prior authorized rate on file for the provider, member, date of service, and service being billed, the claim is priced at 100 percent of covered billed charges or the prior authorized amount, whichever is less.

6. If none of the above pricing methodologies have been applied at this point, claims billed on a CMS 1500 claim form (837P for electronic claims) are reimbursed at the current AHCCCS by-report percentage of covered billed charges. Claims billed on a UB-04 claim form (837I for electronic claims) are reimbursed at the current AHCCCS by-report percentage of covered billed charges.

Editing Process extensively updated. New verbiage added includes: “The system attempts to apply all edits during a single processing cycle. However, if certain data fields are missing, incorrect or invalid, completion of the entire processing cycle may not be possible.

When claims are processed in the system they are run through the editor, where the business rules are applied. The system will try to run through all the business rules and list all denial edits. However, if a crucial edit is encountered (such as a required field being found blank) the editing process for the rest of the claim will be stopped. The review of the claim does not proceed past the field that failed the editing process, and only the crucial edit that failed will be listed on the remit. This includes, but is not limited to, missing, incorrect or invalid data.

Note: If there are other fields that are blank, filled out incorrectly, or invalid appearing after the field that failed the initial editing process, these will not be caught by the system until after the provider makes the initial field correction and sends the replacement claim back in for review.

Once the edit has been corrected and resubmitted by the provider the editing process may continue and may encounter other critical edits. This may cause the claim to deny and be reported on the remit.”

Claim Reference Number (CRN) section updated.
Clarity added to AHCCCS Claims Processing Hierarchy and Pricing Claims sections.
References Section Added
“Recipient” changed to “member” throughout.
