Core Component #5
Justice Area of Concentration

Screening Members to Assess Social Determinants of Health (SDOH)
Key Concepts for Core Component #5 - Screening Members to Assess SDOH

• This Core Component is vital for integration and collaboration among behavioral health and primary care providers that can benefit the patient in need.
• Practices should be using SDOH screens annually or as needed.
• This module contains examples of SDOH screening tools you can choose from.
• One consideration practices may have is to use a tool such as PRAPARE. PRAPARE is an electronic application that can integrate with your existing EHR and supports SDOH data collection and use. EHR’s that support PRAPARE include:
  o E-Clinical Works
  o NextGen
  o Epic
  o GE-Centricity
• Please contact your Health Current account manager for additional support
Review of Core Component #5

5. Screen all members to assess the status of common social determinants of health (SDOH), and develop procedures for intervention or referral based on the results from use of a practice-identified, structured SDOH screening tool.

Tool examples include: the Patient-Centered Assessment Method (PCAM), the Health Leads Screening Toolkit, the Hennepin County Medical Center Life Style Overview and the Protocol for Responding to and Assessing Patients’ Assets, Risks and Experiences (PRAPARE).

Core Component #5

- Screen all members to assess the status of common social determinants of health (SDOH) and develop procedures for intervention or referral based on the results from use of a practice—identified, structured SDOH screening tool.
- If you intend to use a different screening tool, please contact the TI email box.

Click on the examples below:
- Patient Centered Assessment Method (PCAM)
- The Health Leads Screening Toolkit
- Hennepin County Medical Center Lifestyle Overview
- The Protocol for Responding to and Assessing Patients’ Assets, Risks, and Experiences (PREPARE)
Practice Reporting Requirement to State:

• By September 30, 2018, identify which SDOH screening tool is being used by the practice

AND

• By September 30, 2018, develop policies and procedures for intervention or referral to specific resources/agencies, consistent with Core Component 10, which is to identify community-based resources as identified through the lists maintained by the Managed care Organizations (MCOs).
Attestation and Document Validation

- AHCCCS will be opening a TI Attestation Portal through **AHCCCS Online** ([https://azweb.statemedicaid.us/Account/Login.aspx?ReturnUrl=%2f](https://azweb.statemedicaid.us/Account/Login.aspx?ReturnUrl=%2f))

- The portal will be available for milestone attestation in June 2018

- Not all of the Milestones will require providers to upload documentation through the Attestation Portal for review by AHCCCS.

- In order to attest for this Core Components, participants will need to attest to identify the SDOH screening tool and develop protocols.

- More detailed information and guidance about how to use the TI Attestation Portal will be available prior to June 2018.
