4.3 If either party is delayed at any time in the progress of the work by force majeure, the delayed party shall notify the other party in writing of such delay, as soon as is practicable and no later than the following business day, of the commencement thereof and shall specify the causes of such delay in such notice. Such notice shall be delivered or mailed certified return receipt and shall make a specific reference to this article, thereby invoking its provisions. The delayed party shall cause such delay to cease as soon as practicable and shall notify the other party in writing when it has done so. The time of completion shall be extended by Contract Amendment for a period of time equal to the time that results or effects of such delay prevent the delayed party from performing in accordance with this Contract.

4.4 Any delay or failure in performance by either party hereto shall not constitute default hereunder or give rise to any claim for damages or loss of anticipated profits if, and to the extent that such delay or failure is caused by force majeure.

2.1 The State may, at any time, by written order to the Contractor, require the Contractor to stop all or any part, of the work called for by this Contract for period(s) of days indicated by the State after the order is delivered to the Contractor. The order shall be specifically identified as a stop work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage.

2.2 If a stop work order issued under this clause is canceled or the period of the order or any extension expires, the Contractor shall resume work. The Procurement Officer shall make an equitable adjustment in the delivery schedule or Contract price, or both, and the Contract shall be amended in writing accordingly.

3. Non-exclusive Remedies. The rights and the remedies of the State under this Contract are not exclusive.

4. Nonconforming Tender. Materials or services supplied under this Contract shall fully comply with the Contract. ADHS shall review the adequacy of the Performance Bond on a monthly basis to determine if the Performance Bond must be increased. The Contractor may adjust the performance bond amount if notified by ADHS when the monthly Title XIX and Title XXI Capitation and Non-Title XIX/XXI payments are adjusted by plus or minus ten percent (10%) to an amount equal to or greater than eighty (80%) of the adjusted monthly Title XIX and Title XXI capitation and Non-Title XIX/XXI payments. The Contractor shall obtain a performance bond with the adjusted amount no later than thirty (30) days after notification by ADHS of the amount required.

1.7 Not change the amount, duration, or scope of the Performance Bond without prior written approval from ADHS.

1.8 Reimburse ADHS for expenses exceeding the performance bond amount.

1.9 Submit the Performance Bond to ADHS Office of Financial Review within thirty (30) days notification by ADHS to adjust the amount.

2 ADHS shall:

2.1 When Contractor is in breach of any material term of this Contract, in addition to any other remedies it may have herein, obtain payment under the performance bond or performance bond substitute for the following:

1 INTRODUCTION

1.1 Overview

The Arizona Department of Health Services/Division of Behavioral Health Services (ADHS/DBHS) is responsible for administering Arizona’s publicly funded behavioral health programs and services for children, adults and their families. For this Contract, ADHS/DBHS and Arizona’s Medicaid agency, the Arizona Health Care Cost Containment System Administration (AHCCCS), have entered into an Intergovernmental Agreement (IGA) to design a new health care service delivery system that provides integrated physical and behavioral health services to Medicaid eligible adults with Serious Mental Illness (SMI). The Contractor will operate as the Regional Behavioral Health Authority (RBHA) to coordinate the delivery of health care services to eligible persons in Geographic Service Area (GSA) 6, which includes Maricopa County.

Integrating the delivery of behavioral and physical health care to SMI members is a significant step forward in improving the overall health of SMI members. Under this Contract, the Contractor is the single entity that is responsible for administrative and clinical integration of health care service delivery, which includes coordinating Medicare and Medicaid benefits for dual eligible members. From a member perspective, this approach will improve individual health outcomes, enhance care coordination and increase member satisfaction. From a system perspective, it will increase efficiency, reduce administrative burden and foster transparency and accountability.

The Contractor shall be responsible for delivering medically necessary covered services as follows:

1.1.1 Behavioral health services to Medicaid eligible children and adults;

1.1.2 Behavioral health services to Non-Medicaid eligible children and adults, for which ADHS/DBHS receives funding; and

1.1.3 Integrated behavioral and physical health services to Medicaid eligible adults with SMI, including Medicare benefits for SMI members who are eligible for both Medicare and Medicaid (dual eligible members), through the CMS Capitated Financial Alignment Demonstration or as a Dual Eligible Special Needs Plan, as specified by the State.

1.2 System Values and Guiding Principles

The following values, guiding system principles and goals are the foundation for the development of this Contract. Contractor shall administer and deliver services consistent with these values, principles and goals:

1.2.1 Member and family member involvement at all system levels;

1.2.2 Collaboration with the greater community;

1.2.3 Effective innovation by promoting evidence-based practices;

1.2.4 Expectation for continuous quality improvement;

1.2.5 Cultural competency;

CONTRACT NO: ADHS13-043918

1.2.6 Improved health outcomes;
1.2.7 Reduced health care costs;
1.2.8 System transformation;
1.2.9 Transparency;
1.2.10 Prompt and easy access to care;
1.2.11 The Nine (9) Guiding Principles for Recovery-Oriented Adult Behavioral Health Services and Systems in Exhibit 6; and
1.2.12 The Arizona Vision-Twelve (12) Principles for Children Service Delivery in Exhibit 5.

1.3 Integrated Health Care Service Delivery Principles for Persons with Serious Mental Illness

Coordinating and integrating primary and behavioral health care is expected to produce improved access to primary care services, increased prevention, early identification, and intervention to reduce the incidence of serious physical illnesses, including chronic disease. Increasing and promoting the availability of integrated, holistic care for members with chronic behavioral and physical health conditions will help members achieve better overall health and an improved quality of life. Beginning in 1.3.1 the principles below describe ADHS/DBHS' vision for integrated care service delivery. However, many of them apply to all populations for all services in all settings. For example, concepts such as recovery, member input, family involvement, person-centered care, communication and commitment are examples that describe well-established expectations ADHS/DBHS has in all of its behavioral health care service delivery contracts.

While these principles have served as the foundation for successful behavioral health service delivery, providing whole-health integrated care services to a segment of the population who die on average, twenty-five (25) years earlier than the general population—primarily because of chronic, preventable, physical conditions—is a challenge that calls for a new approach that will improve health care outcomes in a cost-effective manner. To meet this challenge, the Contractor must be creative and innovative in its oversight and management of the integrated service delivery system. ADHS/DBHS expects the Contractor to embrace the principles in 1.3.1 below and demonstrate an unwavering commitment to treat each and every member with dignity and respect as if that member were a relative or loved one seeking care.

The Contractor shall comply with all terms, conditions and requirements in this Contract while embedding the following principles in the design and implementation of an integrated health care service delivery system:

1.3.1 Behavioral, physical, and peer support providers must share the same mission to place the member's whole-health needs above all else as the focal of point of care.

1.3.2 All aspects of the member experience from engagement, treatment planning, service delivery and customer service must be designed to promote recovery and wellness as defined by the member.
1.3.3 Member input must be incorporated into developing individualized treatment goals, wellness plans, and services.

1.3.4 Peer and family voice must be embedded at all levels of the system.

1.3.5 Recovery is personal, self-directed, and must be defined by the member.

1.3.6 Family member involvement, community integration and a safe affordable place to live are integral components of a member’s recovery and must be as important as any other single medicine, procedure, therapy or treatment.

1.3.7 Providers of integrated care must operate as a team that functions as the single-point of whole-health treatment and care for all of a member’s health care needs. Co-location or making referrals without coordinating care through a team approach does not equate to integrated care.

1.3.8 The team must involve the member as an equal partner by using appropriate levels of care management, comprehensive transitional care, care coordination, health promotion and use of technology as well as provide linkages to community services and supports and individual and family support to help a member achieve his or her whole health goals.

1.3.9 The Contractor’s overarching system goals for individual SMI members and the SMI population are to improve whole health outcomes and reduce or eliminate health care disparities between SMI members and the general population in a cost-effective manner.

1.3.10 System goals shall be achieved using the following strategies:

   - Earlier identification and intervention that reduces the incidence and severity of serious physical, and mental illness;
   - Use of health education and health promotion services;
   - Increased use of primary care prevention strategies;
   - Use of validated screening tools;
   - Focused, targeted, consultations for behavior health conditions;
   - Cross-specialty collaboration;
   - Enhanced discharge planning and follow-up care between provider visits;
   - Ongoing outcome measurement and treatment plan modification;
   - Care coordination through effective provider communication and management of treatment; and
   - Member, family and community education.

1.3.11 Achievement of system goals shall result in the following outcomes:

   - Reduced rates of unnecessary or inappropriate Emergency Room use;
Reduced need for repeated hospitalization and re-hospitalization;
Reduction or elimination of duplicative health care services and associated costs; and
Improved member’s experience of care and individual health outcomes.

- Age/gender;
- Medicare enrollment for SSI members;
- Risk sharing arrangements for limited or all members; and
- Penetration for Title XIX/XXI behavioral health categories/risk groups: CMDP Child, Non-CMDP Child, GMH/SA, or SMI members not receiving physical health care services under this Contract.

15.5.4 Limit the amount of expenditures to be used in the capitation rate setting process and reconciliations to the lesser of the contracted/mandated amount or the Contractor paid amount for services or pharmaceuticals, in instances in which AHCCCS or ADHS/DBHS has specialty contracts or legislation/policy which limits the allowable reimbursement.

15.5.5 Review the information described in Sections 15.5.2 with Actuaries in renewal years to determine if adjustments are necessary.

15.5.6 Not include in the data provided to Actuaries for setting capitation rates if Contractor provides services not covered under the State Plan (42 CFR 438.6(e)).

15.6.2 Have discretion to review the effect of program changes, legislative requirements, Contractor experience, actuarial assumptions, and/or Contractor specific capitation factors to determine if a capitation adjustment is needed. In these instances the adjustment and assumptions will be discussed with the Contractor prior to modifying capitation rates.

15.6.9 Not report members incarcerated with the Arizona Department of Corrections.

15.6.10 Be subject to recoupment if a member is enrolled twice with the same Contractor as soon as the double capitation is identified.

Note: Several counties are submitting daily files of all inmates entering their jail and all inmates released. AHCCCS will match these files against the database of active AHCCCS members. Title XIX/XXI members who become incarcerated will be disenrolled from AHCCCS and placed in a “no-pay” status for the duration of their incarceration. The Contractor will see the “IE” code for ineligible associated with the disenrollment. Upon release from jail, the member will be re-enrolled with Contractor. A member is eligible for covered services until the effective date of the member’s “no-pay” status.

15.7.10 Cost Settlement for Primary Care Payment Parity:

The Patient Protection and Affordable Care Act (ACA) requires that the Contractor pay qualified primary care providers (and other providers specified in ACA) fees that are no less than the Medicare fee schedule in effect for 2013 and 2014, or the fee schedule rate that would result from applying the 2009 Medicare conversion factor, whichever is greater, for certain services designated by specific Current Procedural Terminology (CPT) codes. AHCCCS has developed an enhanced fee schedule containing the qualifying codes using the 2009 Medicare conversion factor in compliance with the greater-of requirement. The enhanced payments apply only to services provided on and after April 1, 2014 by qualified providers, who self-attest to AHCCCS as defined in the federal regulations.

The Contractor shall reprocess all qualifying claims for qualifying providers back to April 1, 2014 dates of service with no requirements that providers re-submit claims or initiate any action. The Contractor shall not apply any discounts to the enhanced rates.

In the event that a provider retroactively loses his/her qualification for enhanced payments, the Contractor shall identify impacted claims and automatically reprocess for the recoupment of enhanced payments. It is expected that this reprocessing will be conducted by the Contractor without requirement of further action by the provider.

ADHS will make quarterly cost-settlement payments to the Contractor based upon adjudicated/approved encounter data. The Contractor will be required to refund payments to ADHS for any reduced claim payments in the event that a provider is subsequently “decertified” for enhanced payments due to audit or other reasons.

Additionally, there will be modifications to the populations currently subject to AHCCCS mandatory and optional (nominal) copayments, copayment amounts, and services for which copays are required. Implementation of these provisions is anticipated to begin in early 2014.

Assessments may also be provided by a registered dietitian when ordered by the member’s PCP. Nutritional therapy on an enteral, parenteral or oral basis, when determined medically necessary to provide either complete daily dietary requirements or to supplement a member’s daily nutritional and caloric intake is covered according to criteria specified in the AHCCCS Medical Policy Manual.

4.25. *Oral Health* includes medically necessary dental services to members age eighteen (18) to twenty (20) including emergency dental services, dental screening and preventive services in accordance with the AHCCCS Dental Periodicity Schedule, as well as therapeutic dental services, dentures, and pre-transplantation dental services. The Contractor shall monitor compliance with the AHCCCS Dental Periodicity Schedule for dental screening services. The Contractor shall ensure that members are notified when dental screenings are due if the member has not been scheduled for a visit. If a dental screening is not received by the member, a second notice must be sent. Members age eighteen (18) to twenty (20) may request dental services without referral and may choose a dental provider within the Contractor’s provider network. For members twenty-one (21) years of age and older, the Contractor shall cover medical and surgical services furnished by a dentist only to the extent such services may be performed under state law either by a physician or by a dentist in conformance with A.A.C. R9-22-207. These services would be considered physician services if furnished by a physician. Limited dental services are covered for pre-transplant candidates and for members with cancer of the jaw, neck or head. Additional detail on oral health services is contained in the AHCCCS Medical Policy Manual.

4.26. *Orthotics* includes services for members age eighteen (18) to twenty (20) prescribed by the member’s PCP, attending physician, practitioner, or by a dentist as described in the AHCCCS Medical Policy Manual. Medical equipment may be rented or purchased only if other sources, which provide the items at no cost, are not available. The total cost of the rental must not exceed the purchase price of the item. Reasonable repairs or adjustments of purchased equipment are covered for all members to make the equipment serviceable and/or when the repair cost is less than renting or purchasing another unit. The component will be replaced if at the time authorization is sought documentation is provided to establish that the component is not operating effectively.

4.27. *Physician* includes physician services for medical assessment, treatments and surgical services provided by licensed allopathic or osteopathic physicians.

4.28. *Post-stabilization Care Services Coverage and Payment* includes services, related to an emergency medical condition, provided after the member’s condition is sufficiently stabilized in order to maintain, improve or resolve the member’s condition so that the member could be safely discharged or transferred to another location 42 CFR 438-114(a). Pursuant to A.A.C. R9-22-210 and 42 CFR 438.114; 42 CFR 422.113(c) and 42 CFR 422.133, the following conditions apply for
coverage and payment of emergency and of post-stabilization care services, except where otherwise stated in this Contract:

4.28.1. The Contractor must cover and pay for post-stabilization care services without authorization, regardless of whether the provider that delivers the service has a subcontract with the Contractor, as follows:

4.28.1.1. Post-stabilization care services were pre-approved by the Contractor; or

4.28.1.2. Post-stabilization care services were not pre-approved by the Contractor because the Contractor did not respond to the treating provider’s request for pre-approval within one (1) hour after the treating provider’s request or could not be contacted for pre-approval.

4.28.1.3. The Contractor representative and the treating physician cannot reach agreement concerning the member’s care and a Contractor physician is not available for consultation. In this situation, the Contractor must give the treating physician the opportunity to consult with a Contractor physician and the treating physician may continue with care of the patient until a Contractor physician is reached or one of the criteria in 42 CFR 422.113(c)(3) is met.

4.28.2. Pursuant to 42 CFR 422.113(c)(3), the Contractor’s financial responsibility for post-stabilization care services that have not been pre-approved ends when:

4.28.2.1. A Contractor physician with privileges at the treating hospital assumes responsibility for the member’s care;

4.28.2.2. A Contractor physician assumes responsibility for the member’s care through transfer;

4.28.2.3. A Contractor representative and the treating physician reach an agreement concerning the member’s care; or

4.28.2.4. The member is discharged.

4.29. Pregnancy Termination includes pregnancy termination coverage if the pregnant member suffers from a physical disorder, physical injury, or physical illness, including a life endangering physical condition caused by or arising from the pregnancy itself, that would, as certified by a physician, place the member in danger of death unless the pregnancy is terminated, or the pregnancy is a result of rape or incest. The attending physician must acknowledge that a pregnancy termination has been determined medically necessary by submitting the Certificate of Necessity for Pregnancy Termination. This certificate must be submitted to the Contractor’s Medical Director. The Certificate must certify that, in the
4.30. Prescription Medications includes medications ordered by a PCP, attending physician, dentist or other authorized prescriber and dispensed under the direction of a licensed pharmacist subject to limitations related to prescription supply amounts, Contractor formularies and prior authorization requirements. An appropriate over-the-counter medication may be prescribed as defined in the AHCCCS Medical Policy Manual when it is determined to be a lower-cost alternative to a prescription medication. Additional detail is contained in Scope of Work, Section 4.11. Additional detail for coverage of Medicare Part D prescription medications is contained in Scope of Work, Section 15.17.

4.31. Primary Care Provider (PCP) includes those medically necessary covered services provided by a physician, physician assistant or nurse practitioner selected by, or assigned to, the member. The PCP provides primary health care and serves as a coordinator in referring the member for specialty medical services 42 CFR 438.208(b). The PCP is responsible for maintaining the member’s primary medical record, which contains documentation of all health risk assessments and health care services of which they are aware whether or not they were provided by the PCP.

4.32. Radiology and Medical Imaging includes services ordered by the member’s PCP, attending physician or dentist for diagnosis, prevention, treatment or assessment of a medical condition.

4.33. Rehabilitation Therapy includes occupational, physical and speech therapies prescribed by the member’s PCP or attending physician for a physical health condition and the member must have the potential for improvement due to the rehabilitation. Occupational and Speech therapy is covered for all members receiving inpatient hospital or nursing facility services. Occupational Therapy and Speech therapy services provided on an outpatient basis are only covered for members age eighteen (18) to twenty (20). Physical Therapy is covered for all members in both inpatient and outpatient settings. Outpatient physical therapy for members twenty-one (21) years of age or older is subject to a fifteen (15) visit limit per Contract Year as described in the AHCCCS Medical Policy Manual.

4.34. Respiratory Therapy includes respiratory therapy services covered in inpatient and outpatient settings when prescribed by the member’s PCP or attending physician, and is necessary to restore, maintain or improve respiratory functioning.

4.35. Transplantation of Organs and Tissue, and Related Immunosuppressant Drugs includes services covered subject to the limitations in the AHCCCS Medical Policy Manual for members diagnosed with specified medical conditions. Services include: pre-transplant inpatient or outpatient evaluation; donor search; organ/tissue harvesting or procurement; preparation and transplantation services; and convalescent care. In addition, if a member receives a transplant covered by a source other than AHCCCS, medically necessary non-experimental services are provided, within limitations, after the discharge from the physical health care hospitalization for the transplantation. AHCCCS maintains specialty contracts with transplantation facility providers for the Contractor’s use or the Contractor may select its
own transplantation provider. Additional detail for coverage of organ transplants is contained in Scope of Work, Section 2.2.

4.36. Transportation includes emergency and non-emergency medically necessary transportation. Emergency transportation, including transportation initiated by an emergency response system such as 911, may be provided by ground, air or water ambulance to manage a member’s emergency medical condition at an emergency scene and to transport the member to the nearest appropriate medical facility. Non-emergency transportation shall be provided for members who are unable to provide their own transportation for medically necessary services. The Contractor shall ensure that members have coordinated, reliable, medically necessary transportation to ensure members arrive on-time for regularly scheduled appointments and are picked up upon completion of the entire scheduled treatment.

4.37. Triage/Screening and Evaluation includes services provided by physical health care hospitals, IHS facilities, a P.L. 93-638 tribal facility and after-hours settings to determine whether or not an emergency exists, to assess the severity of the member’s medical condition and determine services necessary to alleviate or stabilize the emergent condition. Triage/screening services must be reasonable, cost effective and meet the criteria for severity of illness and intensity of service.

4.38. Vision Services/Ophthalmology/Optometry includes all medically necessary emergency eye care, vision examinations, prescriptive lenses and frames, and treatments for conditions of the eye for all members age eighteen (18) to twenty (20). For members who are twenty-one (21) years of age and older, the Contractor shall provide emergency care for eye conditions which meet the definition of an emergency medical condition, cataract removal, and medically necessary vision examinations and prescriptive lenses and frames, if required following cataract removal and other eye conditions as described in the AHCCCS Medical Policy Manual. Members shall have full freedom to choose, within the Contractor’s network, a practitioner in the field of eye care, acting within the scope of their practice, to provide the examination, care or treatment for which the member is eligible. A “practitioner in the field of eye care” is defined to be either an ophthalmologist or an optometrist.
The “Arizona Vision,” for children is built on twelve principles to which ADHS and AHCCCS are both obligated and committed. The Arizona Vision states:

In collaboration with the child and family and others, Arizona will provide accessible behavioral health services designed to aid children to achieve success in school, live with their families, avoid delinquency, and become stable and productive adults. Services will be tailored to the child and family and provided in the most appropriate setting, in a timely fashion and in accordance with best practices, while respecting the child’s family’s cultural heritage.

5.1. Collaboration with the child and family: Respect for and active collaboration with the child and parents is the cornerstone to achieving positive behavioral health outcomes. Parents and children are treated as partners in the assessment process, and the planning, delivery, and evaluation of behavioral health services, and their preferences are taken seriously.

5.2. Functional outcomes: Behavioral health services are designed and implemented to aid children to achieve success in school, live with their families, avoid delinquency, and become stable and productive adults. Implementation of the behavioral health services plan stabilizes the child’s condition and minimizes safety risks.

5.3. Collaboration with others: When children have multi-agency, multi-system involvement, a joint assessment is developed and a jointly established behavioral health services plan is collaboratively implemented. Client-centered teams plan and deliver services. Each child’s team includes the child and parents and any foster parents, any individual important in the child’s life who is invited to participate by the child or parents. The team also includes all other persons needed to develop an effective plan, including, as appropriate, the child’s teacher, the child’s Child Protective Service and/or Division of Developmental Disabilities case worker, and the child’s probation officer. The team (a) develops a common assessment of the child’s and family’s strengths and needs, (b) develops an individualized service plan, (c) monitors implementation of the plan and (d) makes adjustments in the plan if it is not succeeding.

5.4. Accessible services: Children have access to a comprehensive array of behavioral health services, sufficient to ensure that they receive the treatment they need. Plans identify transportation the parents and child need to access behavioral health services, and how transportation assistance will be provided. Behavioral health services are adapted or created when they are needed but not available.

5.5. Best practices: Competent individuals who are adequately trained and supervised provide behavioral health services. They are delivered in accordance with guidelines adopted by ADHS that incorporate evidence-based “best practice.” Behavioral health service plans identify and appropriately address behavioral symptoms that are reactions to death of a family member, abuse or neglect, learning disorders, and other similar traumatic or frightening circumstances, substance abuse problems, the specialized behavioral health needs of children who are developmentally disabled, maladaptive sexual behavior, including abusive conduct and risky behavior, and the need for stability and the need to promote permanency in class member’s lives, especially class members in foster care. Behavioral Health Services are continuously evaluated and modified if ineffective in achieving desired outcomes.
EXHIBIT-5
ARIZONA VISION-TWELVE PRINCIPLES FOR CHILDREN SERVICE DELIVERY
CONTRACT NO: ADHS13-043918

5.6. Most appropriate setting: Children are provided behavioral health services in their home and community to the extent possible. Behavioral health services are provided in the most integrated setting appropriate to the child’s needs. When provided in a residential setting, the setting is the most integrated and most home-like setting that is appropriate to the child’s needs.

5.7. Timeliness: Children identified as needing behavioral health services are assessed and served promptly.

5.8. Services tailored to the child and family: The unique strengths and needs of children and their families dictate the type, mix, and intensity of behavioral health services provided. Parents and children are encouraged and assisted to articulate their own strengths and needs, the goals they are seeking, and what services they think are required to meet these goals.

5.9. Stability: Behavioral health service plans strive to minimize multiple placements. Service plans identify whether a class member is at risk of experiencing a placement disruption and, if so, identify the steps to be taken to minimize or eliminate the risk. Behavioral health service plans anticipate crises that might develop and include specific strategies and services that will be employed if a crisis develops. In responding to crises, the behavioral health system uses all appropriate behavioral health services to help the child remain at home, minimize placement disruptions, and avoid the inappropriate use of the police and criminal justice system. Behavioral health service plans anticipate and appropriately plan for transitions in children’s lives, including transitions to new schools and new placements, and transitions to adult services.

5.10. Respect for the child and family’s unique cultural heritage: Behavioral health services are provided in a manner that respects the cultural tradition and heritage of the child and family. Services are provided in Spanish to children and parents whose primary language is Spanish.

5.11. Independence: Behavioral health services include support and training for parents in meeting their child’s behavioral health needs, and support and training for children in self-management. Behavioral health service plans identify parents’ and children’s need for training and support to participate as partners in the assessment process, and in planning, delivery, and evaluation of services, and provide that such training and support, including transportation assistance, advance discussions, and help with understanding written materials, will be made available.

5.12. Connection to natural supports: The behavioral health system identifies and appropriately utilizes natural supports available from the child and parents’ own network of associates, including friends and neighbors, and from community organizations, including service and religious organizations.
The Nine Guiding Principles below were developed to provide a shared understanding of the key ingredients needed for an adult behavioral health system to promote recovery. System development efforts, programs, service provision, and stakeholder collaboration must be guided by these principles.

6.1. Respect

Respect is the cornerstone. Meet the person where they are without judgment, with great patience and compassion.

6.2. Persons In Recovery Choose Services And Are Included In Program Decisions And Program Development Efforts

A person in recovery has choice and a voice. Their self-determination in driving services, program decisions and program development is made possible, in part, by the ongoing dynamics of education, discussion, and evaluation, thus creating the “informed consumer” and the broadest possible palette from which choice is made. Persons in recovery should be involved at every level of the system, from administration to service delivery.

6.3. Focus On Individual As A Whole Person, While Including And/Or Developing Natural Supports

A person in recovery is held as nothing less than a whole being: capable, competent, and respected for their opinions and choices. As such, focus is given to empowering the greatest possible autonomy and the most natural and well-rounded lifestyle. This includes access to and involvement in the natural supports and social systems customary to an individual’s social community.

6.4. Empower Individuals Taking Steps Towards Independence And Allowing Risk Taking Without Fear Of Failure

A person in recovery finds independence through exploration, experimentation, evaluation, contemplation and action. An atmosphere is maintained whereby steps toward independence are encouraged and reinforced in a setting where both security and risk are valued as ingredients promoting growth.

6.5. Integration, Collaboration, And Participation With The Community Of One’s Choice

A person in recovery is a valued, contributing member of society and, as such, is deserving of and beneficial to the community. Such integration and participation underscores one’s role as a vital part of the community, the community dynamic being inextricable from the human experience. Community service and volunteerism is valued.

6.6. Partnership Between Individuals, Staff, And Family Members/Natural Supports For Shared Decision Making With A Foundation Of Trust

A person in recovery, as with any member of a society, finds strength and support through partnerships. Compassion-based alliances with a focus on recovery optimization bolster self-confidence, expand understanding in all participants, and lead to the creation of optimum protocols and outcomes.

6.7. Persons In Recovery Define Their Own Success

A person in recovery -- by their own declaration -- discovers success, in part, by quality of life outcomes, which may include an improved sense of wellbeing, advanced integration into the community, and greater self-determination. Persons in recovery are the experts on themselves, defining their own goals and desired outcomes.
6.8. Strengths-Based, Flexible, Responsive Services Reflective Of An Individual’s Cultural Preferences

A person in recovery can expect and deserves flexible, timely, and responsive services that are accessible, available, reliable, accountable, and sensitive to cultural values and mores. A person in recovery is the source of his/her own strength and resiliency. Those who serve as supports and facilitators identify, explore, and serve to optimize demonstrated strengths in the individual as tools for generating greater autonomy and effectiveness in life.

6.9. Hope Is The Foundation For The Journey Towards Recovery

A person in recovery has the capacity for hope and thrives best in associations that foster hope. Through hope, a future of possibility enriches the life experience and creates the environment for uncommon and unexpected positive outcomes to be made real. A person in recovery is held as boundless in potential and possibility.
