

**837 v5010 Health Care Claim: Professional/Institutional/Dental  
Instruction Table Corrections**

Recently several discrepancies have been identified that affect our ability to validate and route files within our system.

We have included a summary spreadsheet of section 3, Instruction Tables, from the Companion Guide (it combines 837P, 837I, and 837D). The critical elements effecting validation and routing of files are ISA08 and GS02. Please verify that you are populating your files with the expected values as identified in this table.

We have included all of the elements that are included in the Instruction Table of the Companion Guide but have hi-lighted in purple those where there has been a correction or clarification.

The AZ 837 v5010 Encounter Transaction Notes and Companion Guide will be updated to reflect this new requirement. Please remember to utilize the Community Manager Portal to ensure that the 837 file is X12 compliant prior to submission to AHCCCS.

If you have any questions regarding this issue, please send an email to: [5010Testing@azahcccs.gov](mailto:5010Testing@azahcccs.gov)

Thank you!  
Division of Health Care Management
