

Outcome Data for Arizona MAT PDOA Clients

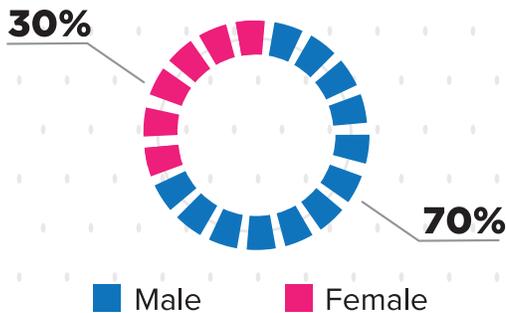

January 2017 through June 2018

In September 2017, the Arizona Health Care Cost Containment System (AHCCCS) obtained grant funding for the Arizona MAT-PDOA Criminal Justice Project. The project is a collaborative initiative between the AHCCCS and the Regional Behavioral Health Authorities (RBHA) in Arizona to address the need for medication assisted treatment (MAT) to treat opioid use disorder (OUD) for individuals involved with the criminal justice system. The project was created to build a bridge between incarceration and outpatient treatment. The project serves individuals who have been diagnosed with OUD and have been screened for MAT eligibility. These individuals must be participating in drug courts, probation, parole, and/or be within four months of release from detention facilities in Maricopa and Pima Counties. As of June 30, 2018, a total of 162 clients have been enrolled in Arizona's MAT PDOA program.

DEMOGRAPHIC YEAR TO DATE SNAPSHOT OF CLIENTS SERVED

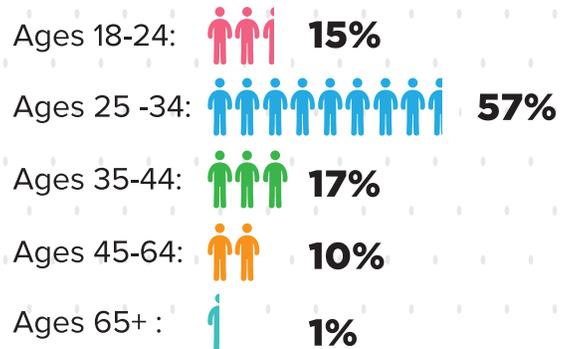

Total of 162 Clients Enrolled between January 1, 2017 and June 30, 2018

GENDER

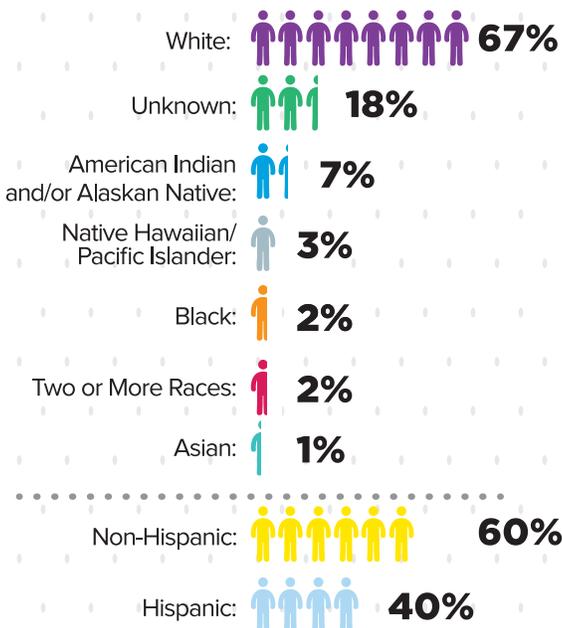

Majority of clients are male.

AGE GROUP

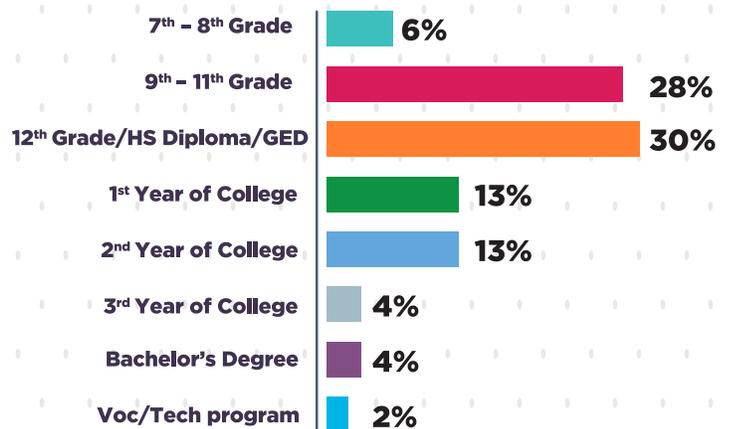

Majority of clients are between the ages of 18 and 34, with the average age being 32.1 years.

RACE / ETHNICITY

Race of majority of clients is White.

EDUCATION

34% of clients have not finished high school, 30% have a high school diploma or GED, and 34% have attended college

Outcome Data for Arizona MAT PDOA Clients

January 2017 through June 2018

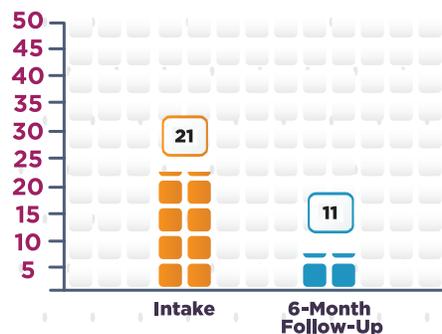

The AZ MAT PDOA program tracks criminal justice involvement for clients. The following data represent a matched sample of 77 MAT PDOA participants who completed an intake interview and a 6-month follow-up interview during the reporting period.

RECIDIVISM & CRIME OUTCOMES

In general, AZ MAT PDOA clients had fewer arrests, fewer drug arrests, spent fewer nights in jail, and committed less crime including using illegal drugs at 6-months post intake.

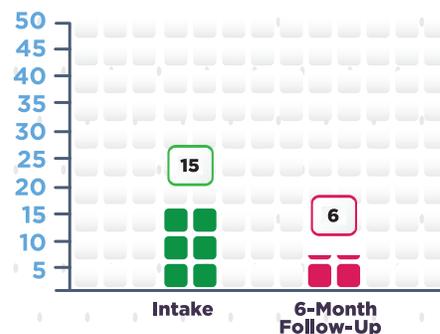

IN THE PAST 30 DAYS

NUMBER OF ARRESTS

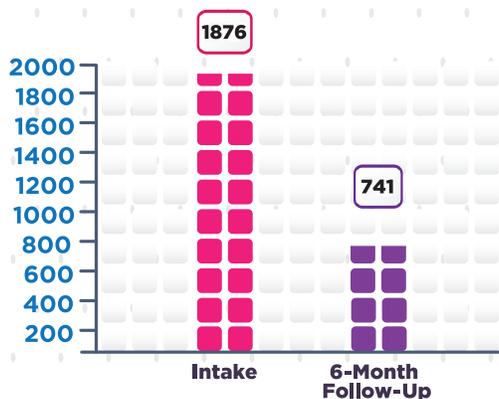

48% REDUCTION IN ARRESTS

NUMBER OF DRUG ARRESTS

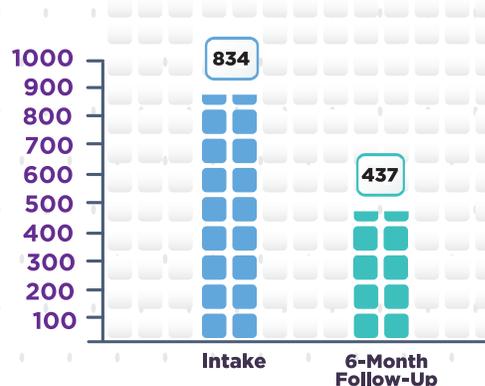

60% REDUCTION IN DRUG ARRESTS

NUMBER OF CRIMES COMMITTED

61% REDUCTION IN CRIMES COMMITTED

NIGHTS IN JAIL

48% REDUCTION IN NIGHTS SPENT IN JAIL

Outcome Data for Arizona MAT PDOA Clients

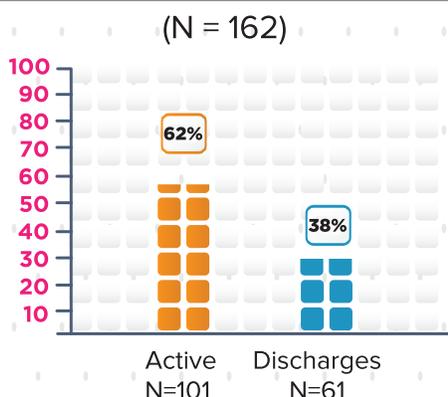

January 2017 through June 2018

The AZ MAT PDOA project serves individuals who have been diagnosed with Opioid Use Disorder (OUD) and have been screened for Medication Assisted Treatment (MAT) eligibility. These individuals must be participating in drug courts, probation, parole, and/or be within four months of release from detention facilities in Maricopa and Pima Counties. The project supports enrolled individuals with a team of recovery support specialists who provide on-going support, referrals for multiple needs, and access to Moral Reconciliation Therapy.

ENROLLMENTS & DISCHARGES

The following data represent a matched sample of 77 MAT PDOA participants who completed an intake interview and a 6-month follow-up interview during the reporting period.

ENROLLMENT & DISCHARGES

Between January 1, 2017 and June 30, 2018 a total of 101 clients enrolled in the program and 61 have been discharged.

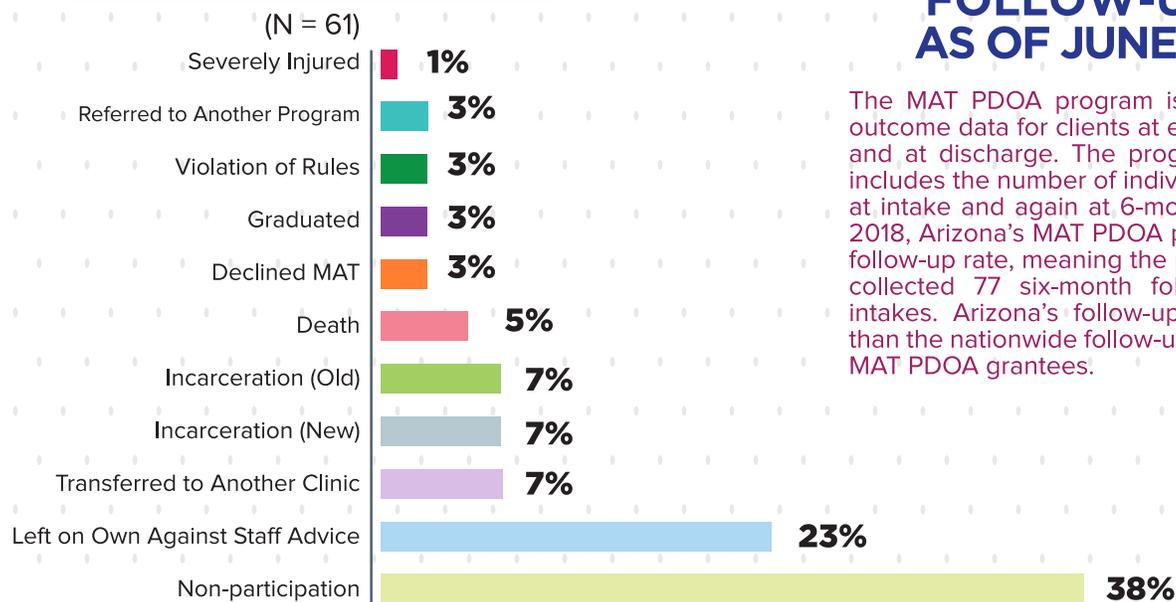

FOLLOW-UP RATE

77 Successful follow-ups completed out of **101** follow-ups due

76.2%
FOLLOW-UP RATE AS OF JUNE 30, 2018

The MAT PDOA program is required to collect outcome data for clients at enrollment, 6-months, and at discharge. The program's follow-up rate includes the number of individuals providing data at intake and again at 6-months. As of June 30, 2018, Arizona's MAT PDOA program had a 76.2% follow-up rate, meaning the program successfully collected 77 six-month follow-ups out of 101 intakes. Arizona's follow-up rate is 14% higher than the nationwide follow-up rate of 62.2% for all MAT PDOA grantees.

REASONS FOR DISCHARGE

The most common reasons clients discharged were failure to participate in program services and leaving treatment against staff advice, (e.g. clients did not show up for regularly scheduled MAT treatment and could not be contacted by recovery support staff after missing treatment appointments).

Outcome Data for Arizona MAT PDOA Clients

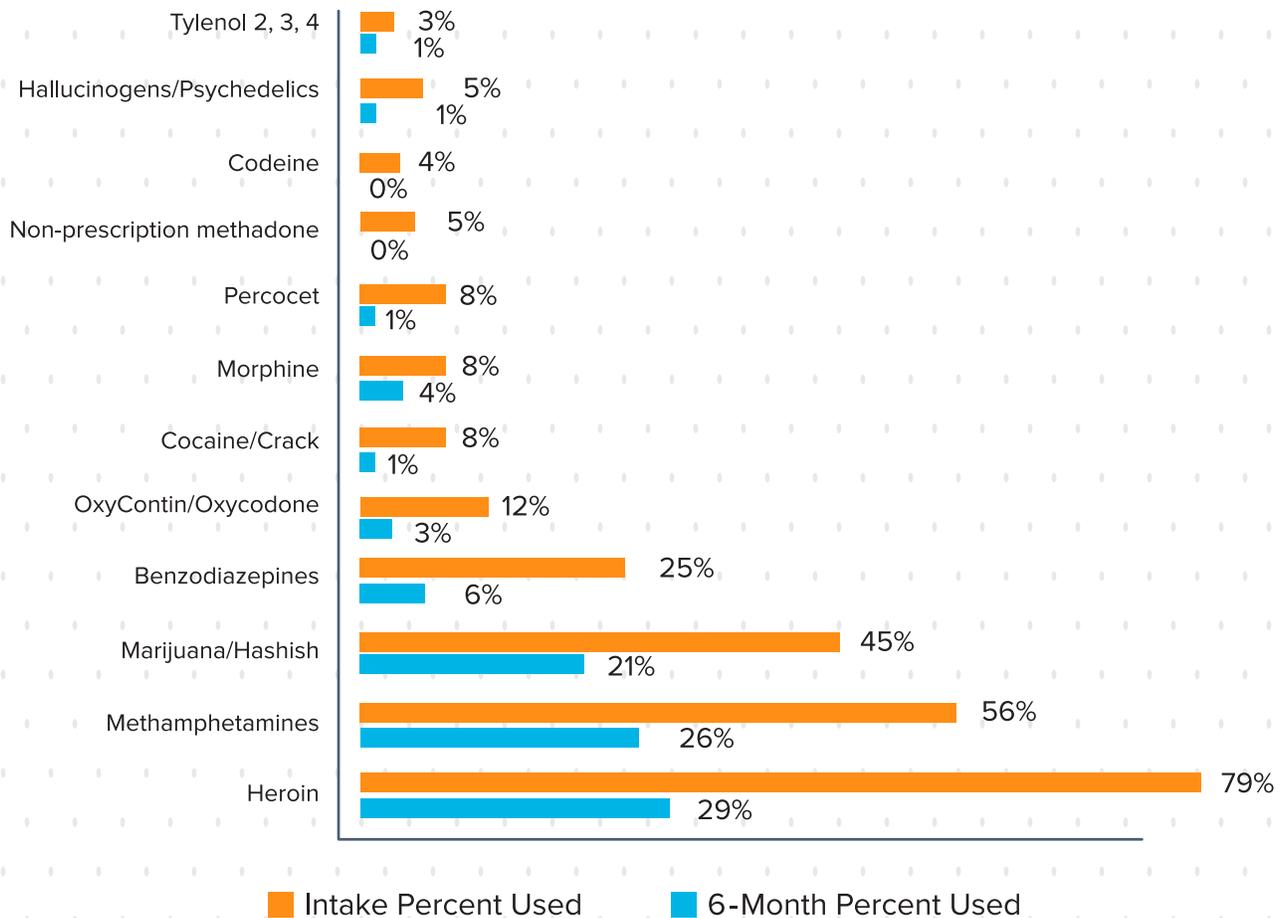

January 2017 through June 2018

The AZ MAT PDOA project tracks the number of clients reporting substance use in the past 30 days by substance used. The following data represent a matched sample of 77 MAT PDOA participants who completed an intake interview and a 6-month follow-up interview during the reporting period.

RELAPSE OUTCOME

The highest percentage of AZ MAT PDOA clients reporting past 30 day use at intake reported using heroin (79%), methamphetamines (56%), marijuana /hashish (45%), and benzodiazepines (25%). The numbers of clients reporting substance use in the past 30 days at 6-months post intake decreased across all substances.

Percent of Individuals Reporting Past 30 Day Use by Substance

Outcome Data for Arizona MAT PDOA Clients

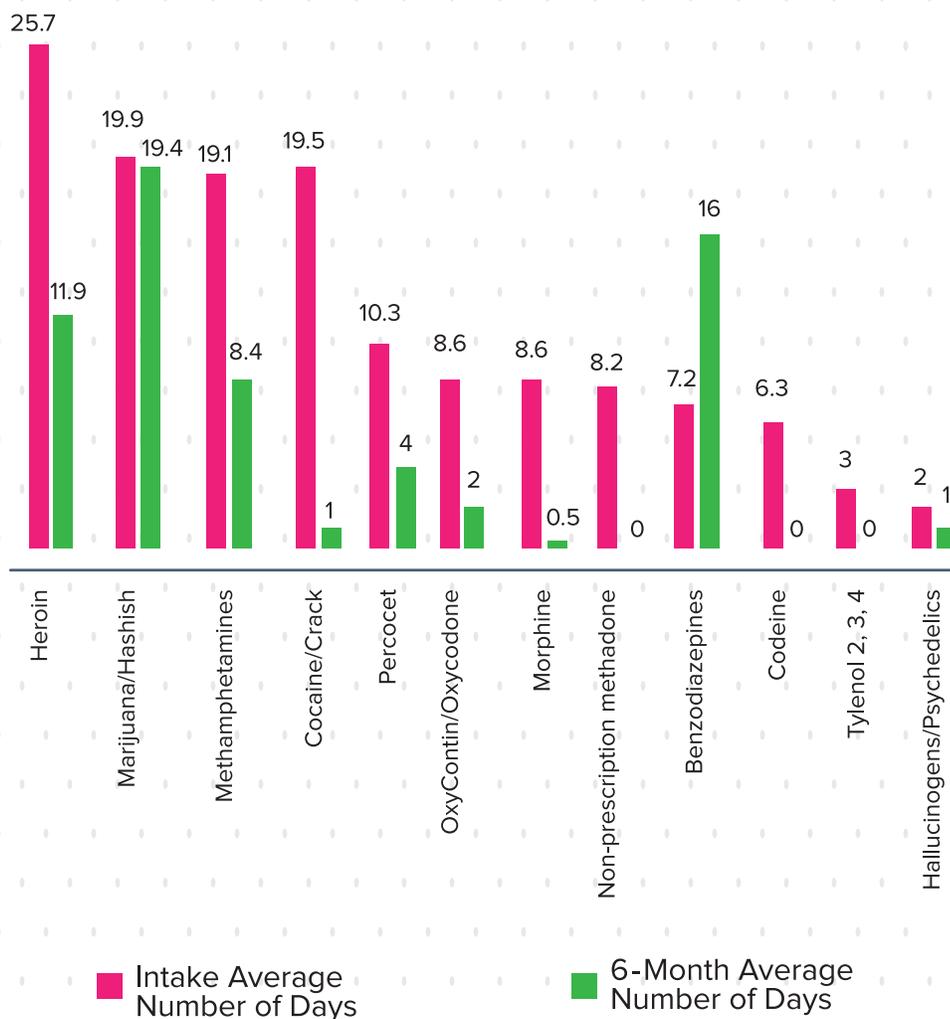

January 2017 through June 2018

The AZ MAT PDOA project tracks the number of days of illegal substances used in the past 30 days for clients. The following data represent a matched sample of 77 MAT PDOA participants who completed an intake interview and a 6-month follow-up interview during the reporting period.

RELAPSE OUTCOME

The highest number of days of use for specific substances reported by AZ MAT PDOA clients at intake included heroin, marijuana /hashish, methamphetamines, and cocaine/crack. At 6-months post intake, clients reported a decrease in the number of days of use for all substances except benzodiazepines. There was 94% reduction in number of days use of cocaine/crack, 56% decrease in days of use for methamphetamines, and a 54% reduction in use of heroin. Days of use for Percocet and OxyContin/Oxycodone decreased by 61% and 77% respectively. The only substance to show an increase in days of use was Benzodiazepines.

Average Number of Days Illegal Drugs Used In Past 30 Days

Outcome Data for Arizona MAT PDOA Clients

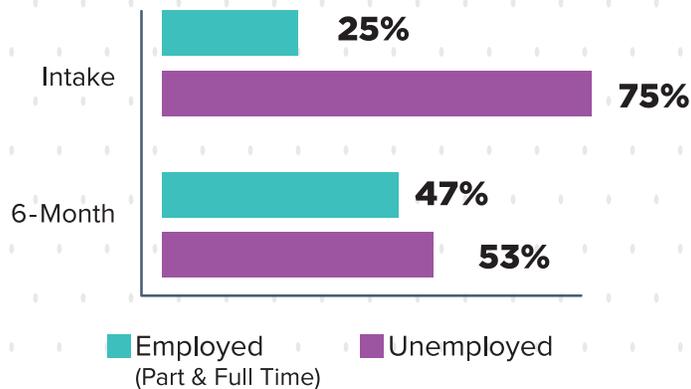

January 2017 through June 2018

The AZ MAT PDOA project tracks employment and housing outcomes for clients. The following data represent a matched sample of 77 MAT PDOA participants who completed an intake interview and a 6-month follow-up interview during the reporting period.

EMPLOYMENT OUTCOMES

More clients were employed at 6-months than at intake.

Percent of Individuals Employed at Intake Compared to 6-month Follow-up

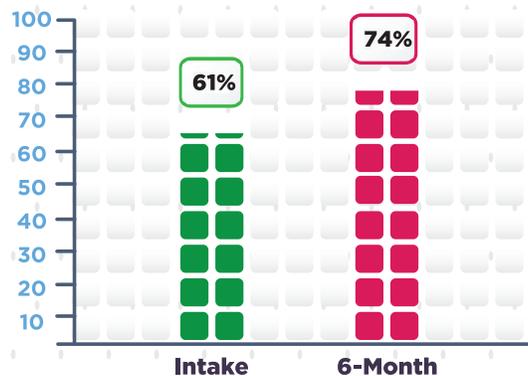

29% REDUCTION IN UNEMPLOYMENT
89% INCREASE IN EMPLOYMENT

HOUSING OUTCOMES

More clients were permanently housed at 6-months than at intake.

Percent of Individuals Housed at Intake Compared to 6-month Follow-up

21% INCREASE IN PERMANENT HOUSING
