### Apply Multiple Surgery-Bilateral Surgery Logic

1. **See qualifier above.**
2. **Identify the primary and secondary surgery (surgeries) as follows:**
   - Primary = the procedure with the highest fee of the OP Fee Schedule.
   - Multiple units = only the first unit is primary and all other units are secondary.
3. **If the procedure is determined to be secondary and there is not a modifier '51 present**, systematically apply the '51 modifier to the secondary procedure and/or units.
4. **Apply all other modifiers (including modifier '50), and then apply any Provider Type Discounting.**

---

Apply modifier % to the allowed amount calculated in step 9, or apply specified modifier amount in place of the previously calculated allowed.

A | Multiply Allowed Charges by SCO
B | Multiply allowed units by OPFS rates
C | Multiple allowed units by OPFS 051X rates
D | Modifier Logic
E | PGM decision
