1. **AHCCCS OVERVIEW**

AHCCCS is the single state Medicaid agency for the State of Arizona. In that capacity it is responsible for operating the Title XIX and Title XXI programs through the State’s 1115 Research and Demonstration Waiver, which was granted by the Centers for Medicare and Medicaid Services (CMS), U.S. Department of Health and Human Services. As of October 1, 2012, AHCCCS provided coverage to approximately 1.3 million members.

AHCCCS contracts with 15 different Managed Care Organizations (MCO’s) that are responsible for providing Acute, Long Term Care, and Behavioral Health Services. The program has an appropriated total fund budget for FY 2013 of approximately $8.4 billion. Over 86.5% of the AHCCCS program’s expenditures are through managed care programs. AHCCCS has approximately 58,000 active providers such as individual medical and behavioral health practitioners, therapy disciplines, institutions, durable medical equipment companies and transportation entities.

AHCCCS has an Intergovernmental Agreement with the Arizona Department of Economic Security (ADES) which provides eligibility determination services for roughly 83% of the AHCCCS population. AHCCCS and ADES receive an average of 140,000 applications per month. AHCCCS also administers the Arizona Long Term Care System (ALTCS) eligibility process. Refer to the AHCCCS website for information regarding AHCCCS enrollment statistics, financials and other pertinent information. [http://www.azahcccs.gov/reporting/default.aspx](http://www.azahcccs.gov/reporting/default.aspx)

2. **PROJECT BACKGROUND**

The Arizona State Legislature in the 2011 legislative session passed Laws 2011, Chapter 31, Section 25 (Senate Bill 1619) that directed the AHCCCS Administration to issue a request for information (RFI) for mechanisms to reduce erroneous and fraudulent payments in the Arizona Health Care Cost Containment System, which may include mechanisms that verify the identity of individual recipients and that verify the services provided to individual recipients. As a result of the RFI, AHCCCS is seeking Offeror(s) to conduct a demonstration pilot specifically for member and/or provider identification and verification technologies, such as biometric verification, GPS verification of provider services or Card Swipe technologies.

3. **PURPOSE**

AHCCCS is seeking a one or more demonstration projects for member and/or provider identification and verification technologies that may either:

1. Improve the ability to verify the identity and eligibility status of the member at the time of service; or
2. Improve the ability to verify that, for those services in which a provider has submitted a claim to a health plan, that the provider actually provided the services, and that the
services were actually provided to an AHCCCS member. On a daily basis, the Offeror solution will need to interact with the internal/external data sources in a real-time environment.

The Offeror solution will include real-time data that will be utilized by both AHCCCS and the participating plan. For example, under a card swipe technology to verify provider claim submittals, data may then be cross referenced with the claims and encounter data to combat fraud waste and abuse by providers and members as well as potentially combat identity theft.

The successful Offeror’s data could potentially help combat several fraud schemes for example:

- Abuse related to drug seekers
- Billing for services not rendered,
- Overbilling/inflated billing,
- Altering claim to obtain a higher payment amount;
- Billing “non-covered” services or items as “covered” services

Additionally some Offeror technologies may include “real time” data that might be used prior to the submittal of claims and encounters that flag claims related to services that are vulnerable to fraud. This data may either be used to make real time decisions or maybe used as comparable information once the claim/encounter is submitted to validate claims.

The Offeror must demonstrate how it proposes to set parameters for the program, logistics of implementation (including voluntary provider and member participation), interface with federal requirements, and estimate savings. Offerors will need to fully fund their demonstrations as there is no federal match and no legislative appropriation for this project.

The demonstration project:

1. May be undertaken after it has been determined by the Agency that it is innovative and unique and in the best interest of the Agency and State.
2. Shall not exceed two (2) years.
3. Shall be provided by the Offeror at no cost to the Agency.
4. Shall not obligate the Agency and State to purchase or lease services or materials from the Offeror.

4. **LEGAL AUTHORITY**

This solicitation and any resultant demonstration are being administered pursuant to Title 41 Chapter 23, The Arizona Procurement Code.
5. **CURRENT ENVIRONMENT**

5.1 **Eligibility Determination**
AHCCCS is responsible for determining eligibility for Medicaid and the Children’s Health Insurance Program (CHIP). AHCCCS employees determine eligibility for the Arizona Long Term Care System, SSI MAO, Medicare Savings Programs and KidsCare (CHIP). ADES determines eligibility for Medicaid eligibility groups covering families, pregnant women and children, as well as a waiver group, AHCCCS Care, covering childless adults. The Agency uses a number of external Offerors, as well as in-house products and tools to verify data provided on the applications. The products and services currently in use are outlined in Attachment B.

5.2 **Eligibility Verification**
At the time service is provided, Medicaid and CHIP providers are able to verify a member’s eligibility status through a number of means that are outlined in Attachment 1.

5.3 **Provider/Claim and Encounter Verification**
Editing and auditing of submitted encounter data is conducted on a per submission basis to evaluate and monitor the accuracy of the submitted encounters, consistency with AHCCCS policy, appropriateness of payment and adherence to applicable national processing standards. AHCCCS also tracks and trends submitted claims and encounters monthly and quarterly, as well as performs a data validation audit at least annually.

AHCCCS OIG’s investigative analytics team performs data analytics in support of the member and provider investigative units. The analytics team runs ad hoc reports mining both the claims and encounter data to identify patterns that may suggest fraud or abuse. In addition, the OIG also uses contracted vendors that maintain multiple public and private sources of information as well as claims data. The combination of databases retains more than 17 billion records and claims. The contracted vendor then analyzes the data and then uses algorithms to look for known fraud patterns.

5.4 **Information Technology**
The Agency’s Medicaid Management Information System is a custom built application that runs on an IBM z/OS mainframe that is operated by the Arizona Department of Administration. The application is written in CA/IDEAL and utilizes a CA/Datacom database engine.

The Agency’s eligibility system for CHIP, SSI-MAO (Aged, Blind, and Disabled) and Long Term Care populations is a network based application written in Visual Basic and is supported by an Oracle database engine.
A batch HIPAA 270/271 transaction is supported to verify eligibility for a Medicaid recipient as well as a web based eligibility verification application.

6. **OVERALL REQUIREMENTS OF THE DEMONSTRATION**

6.1 The Demonstration shall be fully funded by the Offeror. AHCCCS will not reimburse the Offeror for goods or services.

6.2 Any biometric components of the Demonstration must adhere to biometric standards such as those developed by the National Institute of Standards and Technology.

6.3 AHCCCS will not mandate participation by providers or health plans. The Offeror is responsible for developing a voluntary partnership with a health plan to implement the Demonstration. 6.4 The Demonstration is limited to the Acute Care population and members twenty-one (21) years of age and older except for technologies that may be used to verify home and community based services providers serving the ALTCS Elderly/Physically Disabled population. American Indian recipients and individuals with Serious Mental Illness are excluded from this demonstration.

6.5 The Offeror must work with participating health plans regarding the issuance of new Medicaid identification cards if applicable. Any issuance of new cards is the responsibility of the Offeror or participating health plan and must be cost neutral to AHCCCS. AHCCCS must approve the content and design of the new cards.

1. Offeror is licensed to do business in the state of Arizona, or will become licensed if selected for this project.

AHCCCS: Fraud Prevention Technology

The following is a comprehensive list of vendors, technology and systems currently used by AHCCCS:

**Wire Third Party Query (WTPY)**
WTPY is a Social Security Administration automated system that is used to verify a person’s Social Security Number, Social Security benefits, Supplemental Security Income and Medicare benefits. AHCCCS utilizes this system to verify identifying information for individuals and identify social security and Medicare receipts at the beginning of the eligibility determination for every applicant and household member.

**Work Number**
The Work Number product provides payroll services to over 1000 private businesses and government agencies nationwide. Eligibility staff is able to request information from this system in order to verify both employment and income information from the Work Number System relative to applicants to the Medicaid system. This information is requested for every applicant and household member over the age of sixteen.

**Systemic Alien Verification for Entitlements (SAVE)**
The SAVE Program is a web-based system that queries the federal immigration database and provides a mechanism for the State to verify an applicant or recipient’s immigration status. This system also allows the Agency to submit information to the federal government when it is determined that additional investigation is necessary. Queries are conducted for every non-citizen applicant to the Medicaid system.

**LexisNexis**
LexisNexis Accurint for Government Services allows a governmental agency to conduct one search through multiple public records for individual applicants. Using this technology, users may access tax and property records, deed transfers and mortgage filings, together with registration information for motor vehicles, aircraft and boats. This software may also be used to search for individual and business locator information including driver licenses, white pages, census records and voter information. This technology is used primarily to track property records in other states for ALTCS applicants and members and community spouses.

**Public Assistance Reporting Information System (PARIS)**
PARIS is an information exchange system designed by the Administration for Children and Families to provide participating public assistance agencies with data from other states and information from the Veterans Administration, the Department of Defense and the Office of Personnel Management. AHCCCS runs a quarterly match with this system for every member in order to validate reported income and identify unreported income from the Veterans Administration, federal government or military. In addition, this system is used to identify individuals who are receiving public assistance in more than one state.

**General Unemployment Insurance Development Effort (GUIDE)**
This DES software system automates the processing of unemployment insurance claims and benefit payments. AHCCCS has online access to this system and utilizes the software to verify receipt of unemployment insurance and obtain information about recent employment. This system contains data that individual employers report to the Unemployment Insurance system and contains information on wages earned in a prior quarter. Eligibility staff run a check of this system for every applicant and household member of working age or older at the beginning of the eligibility determination.
New Hire Report
All employers are required to report new employees, re-hires, and temporary employees to a central reporting center. This information is sent to AHCCCS daily and is compared with our member database. Matches are reported to eligibility staff who investigate the discrepancy.

AZTECS Child Support Payment History (CHSP) Screen
This screen provides information on support payments issued through the Division of Child Support Enforcement (DCSE). Eligibility staff can run a check of this system for every child known to AZTECS when there is an absent parent.

Arizona Department of Health Services (ADHS), Office of Vital Records Death Records Match
AHCCCS and ADHS conduct a monthly and an annual match between the PMMIS Recipient Subsystem and the ADHS Vital Records file of deaths. AHCCCS uses this file as the only official record of death, although we will accept dates of death from other sources as long as they do not conflict with the Vital Records information. Monthly ADHS sends a file of new and changed death records. Annually ADHS sends a reconciliation file of all death records for the previous year.

Arizona Department of Health Services (ADHS), Office of Vital Records Birth Records file
Each month ADHS sends AHCCCS a full file of Arizona births. AHCCCS stores this information on a secure website so that AHCCCS and Department of Economic Security (DES) eligibility staff can verify Arizona births.

Eligibility Verification Services
AHCCCS provides several methods for the Providers to verify a member’s eligibility at the time of service. Options for this service include Subscription services provided by third party vendors, Interactive Voice Response with fax back, call center services and web based verification for registered providers (AHCCCS On-Line).

EDIWatch Intelligent Investigator
EDIWatch Intelligent Investigator and Trail Tracker are software programs that assist in the detection and prevention of fraud, waste and mismanagement. Using this technology, investigators are automatically directed to unusual patterns of claims billing activity and billing anomalies that indicate possible fraudulent actions, and can cross-reference data among providers, members, facilities, and pharmacies. Automated fraud rules, drill-down, peer-to-peer comparison, utilization rankings, static and dynamic reporting are some the system capabilities. This technology also allows the investigator to build and document the entire case history in one location. The case history is electronically accessible to multi-levels of oversight.
