1610 - GUIDING PRINCIPLES AND COMPONENTS OF ALTCS CASE MANAGEMENT

Effective Dates: 02/14/96, 10/01/17

Revision Dates: 10/01/04, 02/01/05, 05/01/10, 05/01/12, 01/01/16, 07/20/17

I. PURPOSE

This Policy applies to ALTCS E/PD, DES/DDD; Fee-For-Service (FFS), Tribal ALTCS as delineated within this Policy. Where this Policy references Contractor requirements the provisions apply to ALTCS E/PD, DES/DDD and Tribal ALTCS unless otherwise specified. This Policy establishes an overview of the Guiding Principles and components of ALTCS Case Management.

II. DEFINITIONS

CASE MANAGEMENT A collaborative process which assess, plans, implements, coordinates, monitors, and evaluates options and services to meet an individual’s health needs through communication and available resources to promote quality, cost-effective outcomes.

SERVICE PLAN A uniform system of tracking member services, date ranges and units of service authorized by the ALTCS Contractor. It does not specifically refer to the CA165 screen in the Client Assessment and Tracking System (CATS), except for ALTCS Tribal Contractors.

III. POLICY

Case management is the process through which appropriate and cost effective medical and medically related social and behavioral health services and supports are identified, planned, obtained and monitored for individuals eligible for Arizona Long Term Care System (ALTCS) services. Each individual enrolled as an ALTCS member shall receive case management services as specified in AMPM Chapter 1600 and provided by a qualified case manager.

The case management process involves reviewing the ALTCS member’s strengths and service needs with the member/guardian/designated representative and the case manager. The review should result in a mutually agreed upon, appropriate and cost effective service plan that meets the medical, functional, social and behavioral health needs of the member in the most integrated and least restrictive setting. In serving ALTCS members, the case manager shall promote the values of dignity, independence, individuality, privacy, choice and self-determination, and adhere to the guiding principles outlined below.
A. ALTCS GUIDING PRINCIPLES

1. Member-Centered Case Management

The member is the primary focus of the ALTCS Program. The member/guardian/designated representative, as appropriate, are active participants in the planning for and the evaluation of the provision of long term services and supports. Services are mutually selected through person-centered planning to assist the member in attaining his/her goals(s) for achieving or maintaining his/her highest level of self-sufficiency. Education and up-to-date information about the ALTCS program, choices of options and mix of services shall be readily available to members.

2. Member-Directed Options

To the maximum extent possible, members are to be afforded the opportunity to exercise responsibilities in managing their personal health and development by making informed decisions about how best to have needs met including who will provide the service and when and how the services will be provided.

3. Person-Centered Planning

The Person-Centered Planning process maximizes member-direction and supports the member to make informed decisions, so that he/she can lead/participate in the Person-Centered Planning process to the fullest extent possible. The Person-Centered Plan safeguards against unjustified restrictions of member rights, and ensures that members are provided with the necessary information and supports in order to gain full access to the benefits of community living to the greatest extent possible. The Plan ensures responsiveness to the member’s needs and choices regarding service delivery and personal goals and preferences. The member/guardian/designated representative shall have immediate access to the member’s Person-Centered Plan.

4. Consistency of Services

Development of network accessibility and availability serve to ensure delivery, quality and continuity of services in accordance with the Person-Centered Plan as agreed to by the member and the Contractor.

5. Accessibility of Network

Network sufficiency supports choice in individualized member care and availability of services. Provider networks are developed to meet the unique needs of members with a focus on accessibility of services for aging members and members with disabilities, cultural preferences, and individual health care needs. Services are available to same degree as services for individuals not eligible for AHCCCS.
6. Most Integrated Setting

Members are to live in the most integrated and least restrictive setting and have full access to the benefits of community living. To that end, members are to be afforded the choice of living in their own home or choosing an Alternative HCBS Setting rather than residing in an institution.

7. Collaboration with Stakeholders

Ongoing collaboration with member/guardian/designated representative, service providers, community advocates, and AHCCCS Contractors plays an important role for the continuous improvement of the ALTCS Program.

B. ALTCS CASE MANAGEMENT COMPONENTS

1. Service planning and coordination

To identify services that will effectively meet the member’s needs in the most cost effective manner and to develop and maintain the member’s service plan. Development of the service plan shall be coordinated with the member/guardian/designated representative to ensure mutually agreed upon approaches to meet the member’s needs within the scope and limitations of the program, including cost effectiveness. Service planning and coordination also includes ensuring member/guardian/designated representative know how to report the unavailability of or other problems with services and that these issues will be addressed as quickly as possible when they are reported.

2. Brokering of services

To obtain and integrate all ALTCS services to be provided to the member, as well as other aspects of the member’s care, in accordance with the service plan. If certain services are unavailable, the case manager may substitute combinations of other services, within cost effectiveness standards, in order to meet the member’s needs until the case manager is able to obtain such services for the member. The case manager shall also consider and integrate non-ALTCS covered community resources/services as appropriate based on the member’s needs.

3. Facilitation and Advocacy

To resolve issues which impede the member’s progress and access to needed services (both ALTCS and non-ALTCS covered services) and to ensure services provided are beneficial for the member. The case manager shall assist the member in maintaining or progressing toward his/her highest functional level through the coordination of all services.
4. Review and reassessment

To review, evaluate and make modifications as appropriate to the member’s service plan, goals and services provided to the member as required and as necessary including when the member’s condition changes and/or at the request of the member/family/representative.

5. Monitor and assess

To determine medically necessary and cost effective ALTCS services for the member. This includes evaluating the member’s placement, and authorized services, and taking necessary action to ensure that placement and services are appropriate to meet the member’s needs.
